## Course Curriculum of <u>First Semester</u> as per the ICAR-Sixth Deans' Committee Report for Academic Programmes in AGRICULTURE

#### **Course Layout**

#### **B.Sc.** (Hons.) Agriculture

Semester: I (New) w.e.f. Academic Year: 2024-25

Sr. No.	Course No.	Course Title	Credit Hrs.	Remark
1.	CAC-111	Deeksharambh (Induction-cum-Foundation Course)	2(0+2)	NG (2 Weeks)
2.	AEC-111	National Service Scheme (NSS-I) / National Cadet Corps (NCC-I)	1(0+1)	
3.	AEC-112	Communication Skills	2(1+1)	
4.	MDC-111	Farming-based Livelihood Systems	3(2+1)	
5.	MATH-111*/ BIO-111**	Introductory Mathematics*/ Basic Biology**	1(1+0)	NG & Need-based
6.	EXTN-111	Rural Sociology and Educational Psychology	2(2+0)	
7.	AGRO-111	Fundamentals of Agronomy	3(2+1)	
8.	SOIL-111	Fundamentals of Soil Science	3(2+1)	
9. <b>HORT-111</b>		Fundamentals of Horticulture	3(2+1)	
10. <b>SEC-111</b>		Skill Enhancement Course-I (*To be offered from the bouquet of SEC Courses)	2(0+2)	
11.	SEC-112	Skill Enhancement Course-II  (*To be offered from the bouquet of SEC Courses)	2(0+2)	
		21(11+10) G 3(1+2) NG		

CAC: Common Academic Course, AEC: Ability Enhancement Course,

MDC: Multidisciplinary Course, SEC: Skill Enhancement Course,

G: Gradial, NG: Non-Gradial

**Note:** \*MATH-111 for **PCB** student/ \*\*BIO-111 for **PCM** student/ **PCMB** student is NOT required to take any of these Need-based/Deficiency Courses.

#### # List/ Bouquet of Skill Enhancement Courses (SECs):

Sr. No.	Course No.	Course Title	Credit Hrs.
1.	SEC-xxx	Biofertilizer and Biopesticide Production	2(0+2)
2.	SEC-xxx	Mushroom Production Technology	2(0+2)
3.	SEC-xxx	Seed Production Technology	2(0+2)
4.	SEC-xxx	Post-harvest Processing Technology	2(0+2)
5.	SEC-xxx	Beneficial Insect Farming	2(0+2)
6.	SEC-xxx	Horticulture Nursery Management	2(0+2)
7.	SEC-xxx	Plantation Crops Production and Management	2(0+2)

Note: Skill Enhancement Courses can be added/offered as per the facilities and resources available at the respective universities/colleges based on the relevance to the region and the UG degree subject.

The detailed course-wise syllabus of above SEC courses can be primarily developed and followed at College/ University level in the academic year, 2024-25; However, the same will be obtained from the respective UG Degree Coordinator/ Discipline Coordinators and can be followed w.e.f. AY, 2025-26.

[Above list is an indicative list/bouquet of SEC courses and subject to modification as applicable therein]

#### **B.Sc.** (Hons.) Agriculture: First Semester

#### **Course-wise Syllabus with Teaching Schedules**

Course No.: AEC-111 | Course Title: National Service Scheme-I (NSS-I) | Credit Hrs: 1(0+1)

#### **SYLLABUS**

#### **PRACTICAL**

#### **Introduction and Basic Components of NSS**

- Orientation: History, Objectives, Principles, Symbol, Badge; Regular Programs under NSS.
- Organizational structure of NSS, Code of conduct for NSS volunteers, Points to be considered by NSS Volunteers' awareness about Health.
- NSS program activities. Concept of regular activities, Special camping, Day camps, Basis
  of adoption of village/slums, Conducting survey, Analysing Guiding financial patterns of
  scheme, Youth program/schemes of GOI, Coordination with different agencies and
  maintenance of diary. Understanding youth. Definition, Profile, Categories, Issues and
  Challenges of youth; and Opportunities for youth who is agent of the social change.
- Community mobilization. Mapping of community stakeholders, Designing the message as per problems and their culture; Identifying methods of mobilization involving youth-adult partnership. Social harmony and National integration.
- Indian history and culture, role of youth in nation building, Conflict resolution and peace building. Volunteerism and Shramdaan. Indian tradition of volunteerism, its need, importance, motivation and constraints; Shaman as part of volunteerism.
- Citizenship, Constitution, and Human rights. Basic features of constitution of India,
  Fundamental rights and duties, Human rights, Consumer awareness and rights and Right
  to information. Family and Society. Concept of family, Community (PRIs and other
  community-based organizations) and Society.

13	Indian History and Culture- Role of youth in Nation Building	5
14	Volunteerism and Shramdaan: Indian tradition of volunteerism, its need, importance, motivation and constraints; Shaman as part of volunteerism.	5
15	Citizenship, Constitution and Human Rights: Basic features of constitution of India, Fundamental rights and duties, Human rights, Consumer awareness and rights and Right to information.	5
16	Family and Society: Concept of family, Community (PRIs and other community-based organizations) and Society.	5
	Total =	100

Course No.: AEC-111	Course Title: National Cadet Corps-I (NCC-I)	<b>Credit Hrs.: 1(0+1)</b>
---------------------	----------------------------------------------	----------------------------

**Objective:** To integrate and develop qualities of leadership, discipline, character and patriotism and foster the NCC Motto: "Unity and Discipline" among the youth.

#### PRACTICAL

- Aims, Objectives, Organization of NCC and NCC Song. DG's Cardinals of Discipline.
- Drill- aim, General words of command, Attention, Stands-at-ease, Stand-easy and Turning.
- Sizing, Numbering, Forming in three ranks, Open and Close order march and Dressing.
- Saluting at the halt, Getting on parade, Dismissing and Falling-out.
- Marching, Length of pace and time of marching in quick/slow time and halt. Side pace,
   Pace forward and to the rear. Turning on the march and wheeling. Saluting on the march.
- Marking time, Forward march and halt. Changing step, Formation of squad and squad drill.
- Command and control, Organization, Badges of rank, Honours and Awards.
- Nation Building- Cultural heritage, Religions, Traditions and Customs of India.
   National integration. Values and ethics, Perception, Communication, Motivation,
   Decision making, Discipline and duties of good citizens. Leadership traits, Types of leadership. Character/ Personality development. Civil defence organization, Types of emergencies, Firefighting, Protection. Maintenance of essential services, Disaster management, Aid during development projects.
- Basics of Social Service, Weaker sections of society and their needs, NGO's and their contribution, Contribution of youth towards Social welfare and Family planning.
- Structure and Function of human body, Diet and Exercise, Hygiene and Sanitation.
   Preventable diseases including AIDS, Safe blood donation, First aid, Physical and mental health. Adventure activities. Basic principles of Ecology, Environmental conservation, Pollution and its control.

#### PRACTICAL [AEC-111]

Exercise No.	Exercise Topic	Exercise Sub-topics	Weightage (%)
1-2	Introduction to NCC	Aims, Objectives, NCC Organizational structure, NCC Song, DG's Cardinals of Discipline.	4
3-5	Drill Basics	Aim of drill, General words of command, Positions of attention, Stand-at-ease and Stand- easy, Turning.	8
6-8	Formation Drills	Sizing, Numbering, Forming in three ranks, Open and Close order march and Dressing.	8
9-11	Saluting Drills and Parade Movements	Saluting at halt, Getting on parade, Dismissing and Falling-out.	8
12-14	Marching Techniques	Length of pace and time of marching in Quick/slow march, Side pace, Forward/rear pace, Turning on the march, Wheeling and Saluting on the march	10
15-17	Squad Formation and Control	Marking time, Forward march, Halt, Changing step, Formation of squad and Squad drill.	10
18-19	Command and Control in NCC	Organization, Badges of rank, Honours and Awards.	4
20-22	Nation Building and Citizenship; Leadership	Cultural heritage, Religions, Traditions, Customs of India, National integration, Values and Ethics, Communication, Leadership traits, Discipline and Motivation, Character/ Personality Development.	12
23-24	Civil Defence and Emergency Management	Types of emergencies, Fire fighting techniques, Maintenance of essential services, Disaster management and Aid during development projects, Civil Defence Organizations.	10
25-26	Social Service and Youth Welfare	Weaker sections of society, Role of NGOs, Youth participation in Social welfare and Family planning	8
27-29	Health, Hygiene and First Aid	Human body structure, Diet, Hygiene, Preventable diseases (including AIDS), Safe blood donation, First aid practices, Mental and Physical health.	10
30-32	Environment and Ecology	Basic Principles of Ecology, Environmental conservation, Pollution and its control, Adventure activities.	8
		Total =	100

\_\_\_\_

Semester	:	I	
Course No.	:	AEC-112	Credit Hrs. : 2(1+1)
<b>Course Title</b>	Course Title : Communication Skills		
	Gradial Common Course across all UG Degrees		

**Objectives:** (i) To acquire competence in oral, written and non-verbal communication,

- (ii) To develop strong personal and professional communication and
- (iii) To demonstrate positive group communication.

#### THEORY

Communication Process: The magic of effective communication; Building self-esteem and overcoming fears; Concept, nature and significance of communication process; Meaning, types and models of communication; Verbal and Non-verbal communication; Linguistic and nonbarriers communication and reasons behind communication linguistic to gap/ miscommunication. Basic Communication Skills: Listening, Speaking, Reading and Writing Skills; Precis writing/ Abstracting/ Summarizing; Style of technical communication, Curriculum vitae/resume writing; Innovative methods to enhance vocabulary, analogy questions; Structural and Functional Grammar: Sentence structure, modifiers, connecting words and verbals; Phrases and clauses; Case: subjective case, possessive case, objective case; Correct usage of nouns, pronouns and antecedents, adjectives, adverbs and articles; Agreement of verb with the subject: tense, mood, voice; Writing effective sentences; Basic sentence faults.

#### **PRACTICAL**

Listening and note taking; Writing skills: precis writing, summarizing and abstracting; Reading and comprehension (written and oral) of general and technical articles; Micro-presentations and Impromptu Presentations: Feedback on presentations; Stage manners: grooming, body language, voice modulation, speed; Group discussions; Public speaking exercises; Vocabulary building exercises; Interview techniques; Organization of events.

#### THEORY [AEC-112]

Semester	:	I	
Course No.	:	MDC-111	Credit Hrs. : 3(2+1)
<b>Course Title</b>	itle : Farming-based Livelihood Systems		
Gradial Common Course across all UG Degrees			

**Objectives:** (i) To make the students aware about farming-based livelihood systems in Agriculture,

(ii) To disseminate the knowledge and skills that how farming-based systems can be a source of livelihood.

#### **THEORY**

Status of Agriculture in India and different States, Income of farmers and rural people in India, Livelihood-Definition, Concept and livelihood pattern in urban and rural areas, Different indicators to study livelihood systems. Agricultural Livelihood Systems (ALS): Meaning, approach, approaches and framework, Definition of farming systems and farming-based livelihood systems, Prevalent Farming systems in India contributing to livelihood. Types of traditional and modern farming systems. Components of farming system/ farming-based livelihood systems: Crops and cropping systems, Livestock, (Dairy, Piggery, Goatry, Poultry, Duckry etc.), Horticultural crops, Agroforestry systems, Aquaculture, Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.; Small, medium and large enterprises including value chains and secondary enterprises as livelihood components for farmers, Factors affecting integration of various enterprises of farming for livelihood. Feasibility of different farming systems for different agro-climatic zones, Commercial farming-based livelihood models by NABARD, ICAR and other organizations across the country; Case studies on different livelihood enterprises associated with the farming. Risk and success factors in farming-based livelihood systems, Schemes and programs by Central and State Governments; Public and Private organizations involved in promotion of farming-based livelihood opportunities. Role of farming-based livelihood enterprises in 21st Century in view of circular economy, green economy, climate change, digitalization and changing life style.

#### **PRACTICAL**

Survey of farming systems and agriculture-based livelihood enterprises, Study of components of important farming-based livelihood models/systems in different agro-climatic zones, Study of production and profitability of crop based, livestock based, processing-based and integrated farming-based livelihood models, Field Visit of innovative farming system models. Visit of Agri-based enterprises and their functional aspects for integration of production, processing and distribution sectors and Study of agri-enterprises involved in industry and service sectors (Value Chain Models), Learning about concept of project formulation on farming-based livelihood systems along with cost and profit analysis, Case study of Start-Ups in agri-sectors.

#### THEORY [MDC-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1	Status of Agriculture in India	Historical background, Current status, Role of Agriculture in Indian Economy	4
2	Status of Agriculture in Different States	State-wise scenario, Major crops, Regional diversity	4
3	Income of Farmers and Rural People in India	Factors affecting income, Rural-urban income gap, Government initiatives	4
4	Livelihood: Definition, Concept, and livelihood Patterns in urban and rural areas	Livelihood- Definition and its Concept, Urban vs Rural livelihood patterns, Sources of income	4
5	Different Indicators to Study Livelihood Systems	Economic, Social and Environmental indicators, Measuring livelihood resilience	4
6	Agricultural Livelihood Systems (ALS): Meaning and Approaches	Definition, Significance of ALS, Integrated farming systems, Approaches	4
7	ALS Framework and Case studies	Framework for ALS, Case studies in India	4
8	Definition of Farming Systems and farming based Livelihood Systems	Definition and Role of farming systems in rural livelihoods, Examples of systems	4
9	Prevalent Farming Systems in India contributing to livelihood	Traditional vs. Modern farming systems, Regional differences	4
10	Types of Traditional and Modern Farming Systems	Types; Differences; Strengths, Limitations, Case studies	4
11	Components of farming system/farming-based livelihood systems - Crops and Cropping Systems	Components, Crop diversification, Cropping pattern, Mixed cropping, Importance for rural livelihoods	4
12	Livestock-based Farming Systems	Importance and Management of dairy, piggery, poultry, goatry, duckry, etc.	4
13	Horticultural Crops and Livelihoods	Role of fruits, vegetables and spices in rural income generation	4
14	Agroforestry Systems	Agroforestry- Definition, Combining trees and crops, Agroforestry models in India	2
15	Aquaculture as a Livelihood System	Importance of Aquaculture, Integrated systems (e.g. Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.)	4
16	Challenges in Aquaculture- based Systems	Feasibility, Government support and Market access	2

#### **Suggested Readings (MDC-111):**

- 1. **Ashley, C., & Carney, D.** (1999). Sustainable Livelihoods: Lessons from Early Experience. Department for International Development, London, UK.
  - o **Relevance**: This book explores sustainable livelihood frameworks, which are key to understanding livelihood patterns and rural income systems.
- 2. **Agarwal, A., & Narain, S.** (1989). Towards Green Villages: A Strategy for Environmentally Sound and Participatory Rural Development. Centre for Science and Environment, New Delhi, India.
  - o **Relevance**: Provides strategies for participatory rural development, focusing on environmental sustainability—a core concept in farming systems.
- 3. Carloni, A. (2001). Global Farming Systems Study: Challenges and Priorities to 2030 Regional Analysis: Sub-Saharan Africa. FAO, Rome, Italy.
  - o **Relevance**: Offers insights into global farming system challenges, with lessons that can be adapted for Indian contexts in agricultural development.
- 4. **Dixon, J., Gulliver, A., & Gibbon, D.** (2001). Farming Systems and Poverty: Improving Farmers' Livelihoods in a Changing World. FAO & World Bank, Rome & Washington, DC.
  - **Relevance**: Focuses on farming systems' role in poverty alleviation and rural livelihood improvement.
- 5. **Evenson, R.E.** (2000). Agricultural Productivity and Production in Developing Countries. In FAO, The State of Food and Agriculture. FAO, Rome, Italy.
  - **Relevance**: Discusses agricultural productivity, a critical factor in sustainable farming and improved livelihoods.
- 6. **Bhatt, B.P., et al.** (ICAR Research Complex for Eastern Region). Livelihood Improvement of Underprivileged Farming Community: Experiences from Bihar. Patna, Bihar.
  - **Relevance**: Case studies on improving livelihoods in rural India, relevant to learning about region-specific agricultural interventions.
- 7. **Panwar** et al. (2020). Integrated Farming System Models for Agricultural Diversification, Enhanced Income, and Employment. Indian Council of Agricultural Research, New Delhi.
  - o **Relevance**: Provides models for agricultural diversification and income enhancement, which align with farming system topics.
- 8. **Reddy, S.R.** (2016). Farming System and Sustainable Agriculture. Kalyani Publishers, New Delhi.
  - o **Relevance**: Covers sustainable agriculture principles and farming system models, essential for sustainable livelihood systems.
- 9. **Singh, J.P.** *et al.* (2015). *Region Specific Integrated Farming System Models*. ICAR-Indian Institute of Farming Systems Research, Modipuram.
  - o **Relevance**: Discusses integrated farming models tailored to different agro-climatic regions of India, essential for practical learning.
- 10. Walia, S.S., & Walia, U.S. (2020). Farming System and Sustainable Agriculture. Scientific Publishers, Jodhpur, Rajasthan.
  - **Relevance:** Provides insights into sustainable agricultural practices and integrated farming systems with regional focus.

Semester	:	I	
Course No.	:	EXTN-111	Credit Hrs : 2(2+0)
<b>Course Title</b>	:	Rural Sociology and Education	onal Psychology

**Objective:** To provide knowledge on concept and importance of Sociology and Rural Sociology as well as the relationship with Extension Education.

#### **THEORY**

Extension Education and Agricultural Extension: Meaning, Definition, Scope and Importance. Sociology and Rural Sociology: Meaning, Definition, Scope, Importance of Rural Sociology in Agricultural Extension and interrelationship between Rural Sociology and Agricultural Extension. Indian Rural Society: Important characteristics, differences and relationship between Rural and Urban societies. Social Groups: Meaning, Definition, Classification, Factors considered information and organization of groups, Motivation in group formation and Role of social groups in Agricultural Extension. Social Stratification: Meaning, Definition, Functions, Basis for stratification, Forms of social stratification- Characteristics and differences between Class and Caste System. Cultural concepts: Culture, Customs, Folkways, Mores, Taboos, Rituals. Traditions: Meaning, Definition and their Role in Agricultural Extension. Social Values and Attitudes: Meaning, Definition, Types and Role of Social Values and Attitudes in Agricultural Extension. Social Institutions: Meaning, Definition, Major institutions in Rural Society, Functions and their Role in Agricultural Extension. Social Organizations: Meaning, Definition, Types of organizations and role of social organizations in Agricultural Extension. Social control: Meaning, Definition, need of social control and Means of Social control. Social change: Meaning, Definition, Nature of social change, Dimensions of social change and factors of social change. Leadership: Meaning, Definition, Classification, Roles of leader, Different methods of selection of Professional and Lay leaders. Training of Leaders: Meaning, Definition, Methods of training, Advantages and limitations in use of Local leaders in Agricultural Extension, Psychology and Educational Psychology: Meaning, Definition, Scope and Importance of Educational Psychology in Agricultural Extension. Intelligence: Meaning, Definition, Types, Factors affecting intelligence and Importance of intelligence in Agricultural Extension. Personality: Meaning, Definition, Types, Factors influencing the Personality and Role of personality in Agricultural Extension. Teaching - Learning Process: Meaning and Definition of Teaching, Learning learning experience and Learning situation, Elements of learning situation and its characteristics. Principles of learning and their implication of teaching.

#### THEORY [EXTN-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1-2	Extension Education and Agricultural Extension	Meaning, Definition, Scope and Importance	5
3-4	Sociology and Rural Sociology	Meaning, Definition, Scope, Importance of Rural Sociology in Agricultural Extension and Interrelationship between Rural Sociology and Agricultural Extension.	10
5-6	Indian Rural Society	Important characteristics, Differences and relationship between Rural and Urban societies.	5
7-8	Social Groups	Meaning, Definition, Classification, Factors considered in formation and organization of groups and Role of social groups in Agricultural Extension.	10
9-10	Social Stratification	Meaning, Definition, Functions, Basis for stratification, forms of social stratification, characteristics and differences between Class and Caste system	5
11-12	Cultural Concepts	Culture, Customs, Folkways, Mores, Taboos, Rituals. Traditions - Meaning, Definition and their role in Agricultural Extension.	5
13	Social Values and Attitudes	Meaning, Definition, Types and Role of social values and attitudes in Agricultural Extension.	5
14-15	Social Institutions	Meaning, Definition, Major institutions in rural society: Marriage, family and religion, functions and their role in Agricultural Extension.	5
16-17	Social Organization	Meaning, Definition and Types of organization, Role of social organization in Agricultural Extension	5
18	Social Control	Meaning, Definition, Need of social control and Means of social control.	5
19-20	Social Change	Meaning, Definition, Nature of social change, Dimensions of social change and Factors of social change.	5
21-22	Leadership	Meaning, Definition, Classification, Roles of leaders, Different methods of selection of Professional and Lay leader types and their role in Agricultural Extension	5
23-24	Training of Leaders	Meaning, Definition, Methods of training, Advantages and Limitations in use of Local Leaders of Agricultural Extension.	5

Semester	:	I	
Course No.	:	AGRO-111	Credit Hrs. : 3(2+1)
<b>Course Title</b>	:	Fundamentals of Agronomy	

**Objective:** To impart the basic and fundamental knowledge of Agronomy.

#### **THEORY**

Agronomy and its scope: Definition, meaning and scope of Agronomy; Art, science and business of crop production, Relation of Agronomy with other disciplines of Agricultural Science. Field crops: Classification, Importance, Ecology and ecosystem. Seeds and sowing: Definitions of Crop, Variety and Seed. Factors affecting crop stands establishment: good quality seed, proper tillage, time of sowing, seed rate, depth and methods of sowing (broadcasting, drilling, dibbling, sowing behind country plough and transplanting etc.). Tillage and tilth: Definition, Objectives, types, advantages and disadvantages of tillage including Conservation tillage, Modern Concept of Tillage. Crop density and Geometry: Plant geometry and Planting geometry, its effect on growth and yield. Crop nutrition: Definition of essential nutrients, Criteria of essentiality, Functional elements, Classification of essential nutrients, Role of macro and micro nutrients. Nutrient absorption, Active and Passive absorption of nutrients, forms of plant nutrients absorbed by plants, Combined/ Un-combined forms. Manures and fertilizers, Nutrient use efficiency: Sources of nutrients: Inorganic (fertilizers), organic (manures) and biofertilizers; their classification and characteristics, method of preparation and role of organic manures in crop production. Integrated Nutrient Management (INM): Meaning, different approaches and advantages of INM. Green manures- role in crop production: Definition, objectives, types of green manuring, desirable characteristics, advantages and limitations of green manuring. Water management: Water resources of the World, India and the State; Soil Moisture Constants: gravitational water, capillary water, hygroscopic water. Weeds: Definition, importance and basis of classification of weeds and their control. Agro-climatic zones of India and the State. Cropping systems: Factors affecting cropping systems, major cropping patterns and systems in the country. Sustainable crop production: Definition, importance and practices, natural resources and conservation, pollution and pollutants. Allelopathy: Meaning and importance in crop production. Growth and development of crops: Definition, meaning and factors affecting growth and development.

#### **PRACTICAL**

A visit to Instructional Crop Farm and study of field crops, Identification of crops, seeds, fertilizers, pesticides; Crops and cropping systems in different Agro-climatic zones of the state; Study of some preparatory tillage implements; Study of inter-tillage implements, Practice of ploughing/ puddling; Study and practice of inter-cultivation in field crops; Numerical exercises on calculation of seed, plant population and fertilizer requirement; Study of yield contributing characters and yield estimation of crops; Identification of weeds in different crops; Seed germination and viability test of seed; Practice on time and method of application of manures and fertilizers.

#### THEORY [AGRO-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1-2	Agronomy and its Scope	Definition, Meaning and Scope of Agronomy, Art, science and business of crop production. Relation of Agronomy with other disciplines of Agricultural Science. Role of Agronomist.	6
3	Field crops	Classification and importance of field crops, Ecology and ecosystem.	6
4	Growth and Development of crops	Definition, Meaning, Factors affecting growth and development, Growth curve.	4
5-7	Seeds and Sowing:	Definitions- Crops, Variety and Seed. Factors affecting crop stand and its establishment; good quality seed, proper tillage, sowing time, seed rate, sowing depth, seed treatment; Methods of sowing/planting: (broadcasting, drilling, dibbling and transplanting, sowing behind plough etc.), Advantages, Disadvantages, Crops to be sown.	10
8	Tillage and Tilth	Definition, Objectives, Types, Advantages and Disadvantages of tillage, including Conservation tillage.	4
9-10	Modern Concept of Tillage	Modern Concept of Tillage: Types, Definition, Concept, Advantages and Disadvantages.	8
11	Crop Density and Geometry	Definitions- Crop density, Crop geometry and Plant geometry. Effects of planting geometry on growth and yield.	5
12-13	Crop Nutrition	Definition of Essential nutrients; Criteria of essentiality, Functional elements, Classification of essential nutrients; Role of macro- and micro- nutrients in plant growth and development.	8
14	Nutrient Absorption	Active and Passive absorption of nutrients, Forms of major plant nutrients (NPK) absorbed by plants; Combined/ Un-combined forms.	Continued

Continued....

		Total =	100
		Pollution and pollutants.	
30-32	Sustainable Crop Production	Importance and Limitations; Practices, Natural resources and Conservation,	6
28-29	Major Cropping Patterns and Systems in India.	Cropping system: Definition, Classification with examples. Factors affecting cropping systems, Major cropping patterns and Systems in the country. Definition, Components,	5
27	Allelopathy	Meaning, its effect on crops and weed; Importance in crop production	
25-26	Weed Management	Definition, Importance and classification of weeds on season and life cycle basis; Weed control methods- preventive, curative (cultural, physical, mechanical, biological and chemical)	8
21-24	Soil Moisture Constants and Methods of Irrigation	Soil Moisture Constants- Field capacity, Saturation point and PWP; Soil water: Gravitational water, Capillary water, Hygroscopic water; Methods of irrigation, Scheduling of irrigation, Different approaches of scheduling irrigation	10
20	Water Management	Water resources of the World, India and State (Maharashtra)	
19	Role of Green Manures in Crop Production	Definition, Objectives and Types of Green manuring; Desirable characteristics, Advantages and Limitations of Green manuring.	6
18	INM and NUE	Definition, Meaning, Different approaches and Advantages of Integrated Nutrient Management (INM); Concept of Nutrient Use Efficiency (NUE)	6
15-17	Manures and Fertilizers	including biofertilizers with examples; Methods of preparation (FYM and Compost) and Role of organic manures in crop production.	8
		Classification of manures and fertilizers	

#### PRACTICAL [AGRO-111]

Exercise No.	Exercise	Practical Sub-topics/ Titles
1	Instructional Crop Farm Visit	Visit to Instructional Crop Farm and Study on field crops.
2	Identification of crops, seeds, fertilizers and pesticides	Identification of crops, seeds, fertilizers and pesticides; Preparation of Seed Album.
3	Crops and cropping systems in different Agro-climatic state zones	Study of crops and cropping systems in Agroclimatic zones of Maharashtra.
4	Study of some preparatory tillage implements	Study of implements required for primary tillage and secondary tillage operations.
5	Study of inter-tillage implements	Study of implements required for inter tillage or after cultivation operations.
6	Practice of ploughing/ puddling	Study of ploughing/ puddling in rice.
7-8	Study and practice of inter- cultivation in field crops	Study and Practices of inter-cultivation in field crops with tools and implements.
9-10	Numerical exercises on calculation of seed, plant population and	Numerical problems on seed rate and plant population.  Calculation of fertilizer doses.
11	fertilizer requirement Study of yield contributing characters and yield estimation of crops	Study of yield contributing characters and yield estimation of major crops of region.
12	Identification of weeds in different crops	Identification and preparation of Weed Herbarium of 20 major weeds in different crops [Parthenium, Lavala, Hariayali, Ekdandi, Kena, Math, Dudhani (small, medium and large), Ghaneri, Kunjru, Reshimkata etc.].
13	Seed germination and viability test of seed	Study of seed germination test of major crops; Methods of viability test of seed of major crops.
14	Practice on time and method of application of manures and fertilizers.	Organic Manure application; Basal application, top dressing and foliar application of fertilizers.
15	Determination of soil moisture	Determination of soil moisture using gravimetric method
16	Determination of field capacity	Determination of field capacity by field method

- 4. Reddy Yellamanda T and Shankar Reddy G H. 1995. Principles of Agronomy. Kalyani Publishers, Ludhiana.
- 5. Reddy S R. 2008. Principles of Crop Production, Kalyani Publisher, Ludhiana.

\_\_\_\_

Semester	:	I	
Course No.	:	SOIL-111	Credits : 3(2+1)
<b>Course Title</b>	:	Fundamentals of Soil Science	

**Objective:** To impart knowledge on soil genesis, basic soil properties with respect to plant growth.

#### **THEORY**

Soil: Pedological and Edaphological Concepts; Rocks and minerals, Weathering; Silicate clays: constitution and properties; Sources of charge, ion exchange, cation and anion exchange capacity and base saturation (after buffering capacity); Soil formation, Soil organic matter, Pedogenic processes; Soil colloids: inorganic and organic, Properties of soil colloids and Ion exchange in soils; Soil profile, Soil texture, Soil structure; Bulk density and Particle density; Soil consistency; Soil temperature, Soil air, Soil water; Soil reaction and Buffering capacity; Soil taxonomy; Keys to soil orders; Soils of India.

#### **PRACTICAL**

Study of general properties of minerals; Study of minerals-silicate and non-silicate minerals; Study of rocks-igneous, sedimentary and metamorphic rocks; Study of a soil profile, Collection and processing of soil for analysis; Study of soil texture-feel method, mechanical analysis, determination particle density and soil porosity, Determination of soil colour; Study of soil structure and aggregate analysis; Determination of soil moisture; Determination of soil moisture constants field capacity; water holding capacity; Study of infiltration rate of soil; Determination of pH and Electrical conductivity of soil.

#### THEORY [SOIL-111]

#### PRACTICAL [SOIL-111]

Exp. No.	Title of Experiment
1	Study of general properties of minerals.
2	Study of silicate and non-silicate minerals.
3	Study of rocks- Igneous, sedimentary and metamorphic.
4	Study of soil profile.
5	Study of soil sampling tools, collection and processing of soil for analysis.
6	Determination of soil texture by feel method.
7	Determination of soil texture by mechanical analysis.
8	Determination of bulk density by clod coating method.
9	Determination of particle density by pycnometer method and porosity of soil.
10	Determination of soil colour by Munsell soil colour chart.
11	Study of soil structure and aggregate analysis.
12	Determination of moisture content in soil by gravimetric method.
13	Determination of soil moisture constants- Field capacity.
14	Determination of water holding capacity.
15	Study of infiltration rate of soil.
16	Determination of pH and electrical conductivity of soil.
17	Determination of hydraulic conductivity of soil by constant head method.
18	Estimation of organic carbon and organic matter content in soil by Walkely and
	Black method.

Semester	:	I	
Course No.	:	HORT-111	Credit Hrs. : 3(2+1)
<b>Course Title</b>	:	Fundamentals of Horticulture	

#### **Objectives:**

- (i) To provide knowledge on different branches of Horticulture *viz.*, Pomology, Olericulture, Floriculture and Landscaping, Spices and Medicinal plants,
- (ii) To provide knowledge on orchard management, propagation methods, cultural operations and nutrient management of horticultural crops,
- (iii) To provide knowledge on different physiological aspects of horticultural crops.

#### THEORY

Horticulture: Its different branches, importance and scope; Horticultural and Botanical classification; Soil and Climate for horticultural crops; Plant propagation: Methods and propagating structures; Seed dormancy and seed germination; Merits and demerits of sexual and asexual propagation; Stock-Scion relationship. Principles of orchard establishment; Principles and methods of training and pruning of fruit crops; Juvenility and flower bud differentiation; Unfruitfulness in horticultural crops; Pollination, pollinizers and pollinators; Fertilization and parthenocarpy; Medicinal and aromatic plants; Spices and condiments; Importance of plant bio-regulators in horticultural crops; Irrigation and its methods; Fertilizers application in horticultural crops; Principles, features and styles and types of garden; Types of vegetable gardening; Kitchen gardening.

#### PRACTICAL

Identification of garden tools; Identification and nomenclature of fruits; Layout of an orchard; Pit making and system of planting; Nursery raising techniques of fruit crops; Understanding of plant propagation structures; Propagation through seeds and plant parts, Propagation techniques for horticultural crops, Container, potting mixture, potting and repotting; Training and pruning methods on fruit crops; Preparation of fertilizer mixture and application, Preparation and application of PGR; Layout of different irrigation systems; Maturity studies and harvesting; Grading, packaging and storage.

#### THEORY [HORT-111]

Lecture No.	Topic Subtopics/ Key Points				
1-2	Scope and Importance of Horticulture Definitions and Branches of Horticulture, Meaning; Role, Scope, Importance, - Areas with examples.				
3-4	Classification of Horticultural crops	Basis of Classification, Horticultural and Botanical Classification, Types with suitable examples.	10		
5-6	Soil and Climate for Horticultural crops	Meaning, Soil and Climatic requirement for Horticultural crops, Suitable examples.			
7-11	Plant Propagation - Methods and Propagating Structures	Sexual and Asexual methods of Propagation, Its merits and demerits; Propagation by propagules, Propagating structures, Stock-Scion relationship.	15		
12-13	Seed Dormancy and Seed Germination	Definitions, Types of Seed dormancy, Causes of seed dormancy and methods to break seed dormancy; Seed germination and changes in seed during germination.	10		
14-15	Principles of Orchard Establishment	Site selection criteria, Principles, Preparation of land and layout, Planting systems.			
16-17	Training and Pruning of Fruit crops	Principles and methods of training and pruning of fruit crops and Canopy management.	10		
18-19	Juvenility and Flower Bud Differentiation	Definitions, Maturation phase, Techniques to reduce juvenile phase, Ways for rejuvenation or reversion to juvenile stage.	10		
20	Unfruitfulness in Horticultural crops	Definitions, Fruitfulness, Fruit setting, Unfruitfulness and factors responsible for it, Steps to overcome it, Suitable examples.			
21-22	Pollination, Pollinizers and Pollinators	Definitions, Types of pollinations, Mechanisms to promote self and cross-pollination, Advantages and disadvantages, Important pollinators and pollinizers with examples.	05		
23	Fertilization and Parthenocarpy	Definitions, Types of Parthenocarpy with examples.			

Continued...

Total =				
32	Kitchen Gardening	Explanation and Components of Kitchen gardening.	03	
31	Types of Vegetable Gardening	Different types of Vegetable gardening	05	
29-30	Principles, Features and Styles and Types Styles and Types of Garden Of Garden.		05	
28	Fertilizers Application in Horticultural crops	Types of fertilizers; Methods of fertilizers application, their advantages and disadvantages	10	
27	Irrigation Methods in Horticultural crops	Irrigation methods and its advantages and disadvantages.		
26	Importance of Plant Bio-regulators in Horticultural crops	Definition, Role of Bio-regulators and its uses in Horticulture with examples	05	
25	Spices and Condiments	Scope, Importance and its Classification		
24	Medicinal and Aromatic Plants	Scope, Importance and its Classification	05	

#### PRACTICAL [HORT-111]

Exercise	Title			
No.				
1	Identification of garden tools			
2-3	Identification and Nomenclature of fruits			
4	Layout of an orchard			
5	Pit making and system of planting			
6	Nursery raising techniques of fruit crops			
7	Understanding of plant propagation structures			
8	Propagation through seeds and plant parts			
9	Propagation techniques for horticultural crops			
10	Container, potting mixture, potting and repotting			
11	Training and pruning methods on fruit crops			
12	Preparation of fertilizer mixture and application			
13	Preparation and application of PGR			
14	Layout of different irrigation systems			
15	Maturity studies and harvesting			
16	Grading, packaging and storage			

#### **Suggested Readings:**

- 1. Basics of Horticulture by Jitendra Singh
- 2. Introduction to Horticulture by N. Kumar
- 3. Handbook of Horticulture by K.L. Chadda
- 4. Jain, S.K. 1968. Medicinal Plants. National Book Trust New Delhi. Oxford & IBH, New Delhi.
- 5. Atal, E.K. and Kapur, B. 1982. Cultivation and Utilization of Medicinal and Aromatic Plants. CSIR, New Delhi.

Semester : I

Course No. : MATH-111\* Credit Hrs. : 1(1+0) NG; Need-based

Course Title : Introductory Mathematics

\*Need-based, Non-Gradial Common Course across 5 UG Degrees:

B.Sc. (Hons.) Agri. / B.Sc. (Hons.) Horti. / B.Sc. (Hons.) Forestry / B.F.Sc. (Hons.) / B.Sc. (Hons.) C.S.

#### **SYLLABUS**

**Objective:** To impart knowledge on Introductory Mathematics as a need-based/ deficiency course.

#### **THEORY**

**Algebra: Progressions:** Arithmetic Progression: Definition, Sum of n terms, Examples. Geometric Progression: Definition, Sum of n terms, Examples. Harmonic Progression: Definitions, Examples.

**Determinants:** Definition of Determinant, Expansion of determinant up to 3<sup>rd</sup> order, Examples Properties of determinants up to 3<sup>rd</sup> order (without proof).

**Matrices:** Definition of Matrices, Order of Matrix, Types of Matrices, Algebra of Matrices: Addition, Subtraction, Multiplication, Examples, Transpose of Matrix and it's properties (without proof).

**Differential Calculus:** Definition, Differentiation of function using first principle, Examples. Rules of Differentiation: Derivatives of sum, Difference, Product and quotient of two functions (Formulae only) and Derivative of Standard functions: Algebraic Function, Trigonometric, Logarithmic and exponential functions (Formulae only), Examples. Increasing and Decreasing Functions, Growth rate, Average Cost and Marginal cost, Marginal Revenue. Examples.

**Partial Differentiation**: Definition, Homogeneous function, Euler's Theorem, Examples.

Maxima and Minima of the functions of the form y = f(x) Examples.

**Integral Calculus**: Definition of Indefinite and Definite Integrals, Integrals of elementary functions (Formulae only), Theorems of integration (without proof), Integration by substitution, Examples.

Integration by parts, Examples, Application of Integration: to find Area under simple well-known curves (Simple problems based on it).

**Mensuration:** Statement of Simpson's 1/3<sup>rd</sup> Rule (Without Proof). Examples on Simpson's Rule.

#### **Suggested Readings:**

- 1. NCERT, 2012, Mathematics of Class XII, NCERT, India.
- 2. A Textbook of Mathematics XI and XII (Part I and II), Maharashtra State Board of Secondary and Higher Secondary Education, Pune.
- 3. Sharma RD, 2014, Mathematics of Class XII, Dhanpat Rai Publisher.
- 4. Mensuration-I by Pierpoint.

#### **THEORY**

Lecture No.	Topic	Subtopics/ Key Points	Weightage (%)			
1-2	Algebra: Progressions	Arithmetic Progression: Definition, Sum of n terms, Examples.  Geometric Progression: Definition, Sum of n terms, Examples. Harmonic Progression: Definitions, Examples.	10			
3-4	Determinants	terminants  Definition of Determinant, Expansion of determinant up to 3 <sup>rd</sup> order, Examples  Properties of determinants up to 3rd order (without proof)				
5-7	Matrices	Definition of Matrices, Order of Matrix, Types of Matrices  Algebra of Matrices: Addition, Subtraction, Multiplication, Examples  Transpose of Matrix and it's Properties (without proof)				
8-10	Differential Calculus	20				
11-12	Partial differentiation	Definition, Homogeneous function, Euler's theorem, Examples.  Maxima and Minima of the functions of the form $y = f(x)$ Examples.	10			
13-15	Integral Calculus	Definition of Indefinite and Definite Integrals Integrals of elementary functions (Formulae only) Theorems of integration (without proof) Integration by substitution, Examples Integration by parts, Examples Application of Integration: to find Area under simple well-known curves, (Simple problems based on it).	20			
16	Mensuration	Statement of Simpson's 1/3 <sup>rd</sup> Rule (without Proof). Examples on Simpson's Rule.	10			
		Total =	100			

Semester	:	I				
Course No.	:	BIO-111**	Credit Hrs.	:	1(1+0)	Need-based; NG
<b>Course Title</b>	:	Basic Biology				
**Need-based, Non-Gradial Common Course across 5 UG Degrees:						
B.Sc. (Hons.) Agri. / B.Sc. (Hons.) Horti. / B.Sc. (Hons.) Forestry / B.F.Sc. (Hons.) / B.Sc. (Hons.) C.S.						

#### **Objectives:**

- (i) To impart foundational knowledge of biological principles including diversity, genetics, evolution of living organisms,
- (ii) To impart basic knowledge about flowering plants and animals with a focus on their application in Agriculture.

#### **THEORY**

Introduction to the living world, Diversity and characteristics of life. Origin of life, Evolution and Eugenics. Genetics and Basics concepts. Binomial nomenclature and Classification. Cell and cell division. Morphology of flowing plants. Seed and Seed germination. Plant systematics- *viz.*, Brassicaceae, Fabaceae and Poaceae. Role of animals in agriculture.

#### **TEACHING SCHEDULE**

#### **THEORY**

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)
1	Introduction to Living World	Definition of Biology; Composition and Biological Classification of living world.	5
2	Diversity and Characteristics of Life	Definitions: Diversity, Biodiversity; Characteristics of life; Building blocks of life and relationship between different organisms.	5
3	Origin of Life	Theories of Origin of Life; Oparin - Haldane Theory of Chemical origin.	5
4	Evolution and Eugenics	Theories of Evolution:	

Continued...

5	Genetics and Basics Concepts	Genetics and Mendel's Experiments (Basic Concepts)	5
6	Binomial Nomenclature	Binomial nomenclature and classification; Overview of taxonomic hierarchy/ ranks.	10
7	Cell: Structure and Function	Cell structure, Composition and Cell organelles and their functions.	5
8-9	Cell Division	Definition, Types: Mitosis and Meiosis, their Significance, Stages.	10
10-12	Morphology of Flowering plants	Morphology, Structure and Functions: Roots, Stems, Leaves, Flowers and Fruits.	25
13	Seed and Seed Germination	Definitions, Types of seed (Monocot and Dicot seed), Types of seed germination and factors affecting it.	5
14-15	Plant Systematics – Study of Families	Key features, Economic importance and Examples of - A) Brassicaceae B) Fabaceae C) Poaceae	15
16	Role of Animals in Agriculture	Livestock in farming systems: Nutritional and economic contributions; Role of pollinators in crop production; Biological pest control (Predatory use); Sustainable integration of animals in agroecosystems.	5
	•	Total =	100

## **Suggested Readings [BIO-111]:**

- 1. Cell Biology, Genetics, Molecular Biology and Evolution by P.S. Verma, V.K. Agrwal. Publisher- S. Chand and Company Ltd., Ram Nagar, New Delhi. India.
- 2. Evolution of Vertebrates by Edwin H. Colbert, Publisher- A Wiley, Inter Science Publication, John Wiley and Sons, New York. US.
- 3. A Class-book of Botany by A.C. Dutta, Publisher- Oxford University Press, YMCA Library Building. Jai Singh Road, New Delhi 110001, India.
- 4. Fundamentals of Genetics by B.D. Singh, Publisher- Kalyani Publ. B-I/1292, Rajinder Nagar, Ludhiana.
- 5. A Textbook of Practical Botany-2 by Ashok M. Bendre, Ashok Kumar, Publisher- Rastogi Publications, Shivaji Road, Meerut, India.
- 6. Botany-An Introduction to Plant Biology by Jamesh D. Mauseth, Publisher- Continental Prakashan, 1962, Pune.
- 7. Anatomy of Seed Plants by A.C. Datta, Sigh V., Pande P.G., Publisher- Sai Print Opack, New Delhi, Rastogi Publication, Meerut, India.
- 8. Handbook of Animal Husbandry by ICAR, New Delhi Publication, Publisher- Directorate of Knowledge Management in Agriculture, Krishi Anusandhan Bhavan, Pusa, New Delhi 110012, India.

# **B.Sc.** (Hons.) Horticulture : <u>First Semester</u>

# **Course-wise Syllabus with Teaching Schedules**

Semester : I

Course No. : CAC-111 Credit Hrs. : 2 (0+2) NG / 2 Weeks

Course Title : Deeksharambh (Induction-cum-Foundation Course)

Non-Gradial Common Academic Course for the respective UG degree with the activities to be conducted during initial two weeks.

## **Objectives**:

- (i) To create a platform for students to help for cultural Integration of students from different backgrounds,
- (ii) To know about the operational framework of academic process in university, instilling life and social skills,
- (iii) To create Social awareness, Ethics and Values, Team work, Leadership, Creativity,
- (iv) To identify the traditional values and indigenous cultures along with diverse potentialities both in indigenous and developed scenario.

#### **ACTIVITIES**

- ➤ Introduction/Orientation and Discussions on operational framework of academic process in University/ College, as well as interactions with Academic and Research Managers of the University.
- ➤ Interaction with Alumni, Business Leaders, Perspective Employers, Outstanding Achievers in related fields and people with inspiring life experiences.
- ➤ Group activities to identify the strength and weakness of students and to learn from each others' life experiences.
- Activities to enhance Cultural Integration of students from different backgrounds.
- Field visits to the relevant fields/ establishments.
- > Sessions on Personally Development (Instilling Life and Social skills, Social awareness, Ethics and Values, Team work, Leadership etc.) and imbibing the Communication skills.

**Note:** The details of the relevant activities will be decided by the parent University in line with the above-mentioned broad activities.

Course No.: AEC-111 Course Title: National Service Scheme-I (NSS-I) Credit Hrs: 1(0+1)

## **SYLLABUS**

#### **PRACTICAL**

## **Introduction and Basic Components of NSS**

- Orientation: History, Objectives, Principles, Symbol, Badge; Regular Programs under NSS.
- Organizational structure of NSS, Code of conduct for NSS volunteers, Points to be considered by NSS Volunteers' awareness about Health.
- NSS program activities. Concept of regular activities, Special camping, Day camps, Basis
  of adoption of village/slums, Conducting survey, Analysing Guiding financial patterns of
  scheme, Youth program/schemes of GOI, Coordination with different agencies and
  maintenance of diary. Understanding youth. Definition, Profile, Categories, Issues and
  Challenges of youth; and Opportunities for youth who is agent of the social change.
- Community mobilization. Mapping of community stakeholders, Designing the message as
  per problems and their culture; Identifying methods of mobilization involving youth-adult
  partnership. Social harmony and National integration.
- Indian history and culture, role of youth in nation building, Conflict resolution and peace building. Volunteerism and Shramdaan. Indian tradition of volunteerism, its need, importance, motivation and constraints; Shaman as part of volunteerism.
- Citizenship, Constitution, and Human rights. Basic features of constitution of India,
  Fundamental rights and duties, Human rights, Consumer awareness and rights and Right to
  information. Family and Society. Concept of family, Community (PRIs and other
  community-based organizations) and Society.

# PRACTICAL [NSS-I]

Exercise No.	Exercise Topic	Weightage (%)
1	Orientation, History, Objectives, Principles, Symbols, Badge	10
2	Regular Programmes under NSS	10
3	Organisational Structure of NSS	10
4	Code of Conduct of NSS Volunteer	10
5	Points to be considered about NSS Volunteers awareness about Health	5
6	NSS Programme Activities- Concept of Regular Activities	5
7	NSS Programme Activities- Special Campaign	5
8	NSS Programme Activities- Day Camps	5
9	NSS Programme Activities- Adoption of village, Conducting survey, Analysing Guiding financial patterns of scheme	5
10	NSS Programme Activities- Youth programs/schemes of GOI, Coordination with different agencies and maintenance of diary. Understanding youth. Definition, Profile, Categories, Issues and Challenges of youth and Opportunities for youth who is agent of the social change.	5
11	Community Mobilization- Mapping of community stakeholders, Designing the message as per problems and their culture; Identifying methods of mobilization involving youth-adult partnership.	5
12	Community Mobilization-Culture, Social harmony and National integration.	5
13	Indian History and Culture- Role of youth in Nation Building	5
14	Volunteerism and Shramdaan: Indian tradition of volunteerism, its need, importance, motivation and constraints; Shaman as part of volunteerism.	5
15	Citizenship, Constitution and Human Rights: Basic features of constitution of India, Fundamental rights and duties, Human rights, Consumer awareness and rights and Right to information.	5
16	Family and Society: Concept of family, Community (PRIs and other community-based organizations) and Society.	5
	Total=	100

Course No.: AEC-111 | Course Title: National Cadet Corps-I (NCC-I) | Credit Hrs.: 1(0+1)

## **SYLLABUS**

**Objective:** To integrate and develop qualities of leadership, discipline, character and patriotism and foster the NCC Motto: "Unity and Discipline" among the youth.

## **PRACTICAL**

- Aims, Objectives, Organization of NCC and NCC Song. DG's Cardinals of Discipline.
- Drill- Aim, General words of command, Attention, Stands-at-ease, Stand-easy and Turning.
- Sizing, Numbering, Forming in three ranks, Open and Close order march and Dressing.
- Saluting at the halt, Getting on parade, Dismissing and Falling-out.
- Marching, Length of pace and time of marching in quick/slow time and halt. Side pace, Pace forward and to the rear. Turning on the march and wheeling. Saluting on the march.
- Marking time, Forward march and halt. Changing step, Formation of squad and squad drill.
- Command and control, Organization, Badges of rank, Honours and Awards.
- Nation Building- Cultural heritage, Religions, Traditions and Customs of India. National integration. Values and ethics, Perception, Communication, Motivation, Decision making, Discipline and duties of good citizens. Leadership traits, Types of leadership. Character/Personality development. Civil defence organization, Types of emergencies, Fire fighting, Protection. Maintenance of essential services, Disaster management, Aid during development projects.
- Basics of Social Service, Weaker sections of society and their needs, NGO's and their contribution, Contribution of youth towards Social welfare and Family planning.
- Structure and Function of human body, Diet and Exercise, Hygiene and Sanitation.
   Preventable diseases including AIDS, Safe blood donation, First aid, Physical and mental health. Adventure activities. Basic principles of Ecology, Environmental conservation, Pollution and its control.

# PRACTICAL [NCC-I]

Exercise No.	Exercise Topic	Exercise Sub-topics	Weightage (%)
1-2	Introduction to NCC	Aims, Objectives, NCC Organizational structure, NCC Song, DG's Cardinals of Discipline.	4
3-5	Drill Basics	Aim of drill, General words of command, Positions of attention, Stand-at-ease and Stand- easy, Turning.	8
6-8	Formation Drills	Sizing, Numbering, Forming in three ranks, Open and Close order march and Dressing.	8
9-11	Saluting Drills and Parade Movements	Saluting at halt, Getting on parade, Dismissing and Falling-out.	8
12-14	Marching Techniques	Length of pace and time of marching in Quick/slow march, Side pace, Forward/rear pace, Turning on the march, Wheeling and Saluting on the march	10
15-17	Squad Formation and Control	Marking time, Forward march, Halt, Changing step, Formation of squad and Squad drill.	10
18-19	Command and Control in NCC	Organization, Badges of rank, Honours and Awards.	4
20-22	Nation Building and Citizenship; Leadership	Cultural heritage, Religions, Traditions, Customs of India, National integration, Values and Ethics, Communication, Leadership traits, Discipline and Motivation, Character/ Personality Development.	12
23-24	Civil Defence and Emergency Management	Types of emergencies, Fire fighting techniques, Maintenance of essential services, Disaster management and Aid during development projects, Civil Defence Organizations.	10
25-26	Social Service and Youth Welfare	Weaker sections of society, Role of NGOs, Youth participation in Social welfare and Family planning	8
27-29	Health, Hygiene and First Aid	Human body structure, Diet, Hygiene, Preventable diseases (including AIDS), Safe blood donation, First aid practices, Mental and Physical health.	10
30-32	Environment and Ecology	Basic Principles of Ecology, Environmental conservation, Pollution and its control, Adventure activities.	8
		Total=	100

\_\_\_\_\_

 Semester
 : I

 Course No.
 : AEC-112
 Credit Hrs.
 : 2(1+1)

 Course Title
 : Communication Skills

 Gradial Common Course across all UG degrees

#### **SYLLABUS**

Objectives: (i) To acquire competence in oral, written and non-verbal communication,

- (ii) To develop strong personal and professional communication and
- (iii) To demonstrate positive group communication.

## **THEORY**

Communication Process: The magic of effective communication; Building self-esteem and overcoming fears; Concept, nature and significance of communication process; Meaning, types and models of communication; Verbal and Non-verbal communication; Linguistic and nonlinguistic barriers communication behind communication to and reasons gap/ miscommunication. Basic Communication Skills: Listening, Speaking, Reading and Writing Skills; Precis writing/Abstracting/Summarizing; Style of technical communication, Curriculum vitae/resume writing; Innovative methods to enhance vocabulary, analogy questions; Structural and Functional Grammar: Sentence structure, modifiers, connecting words and verbals; Phrases and clauses; Case: subjective case, possessive case, objective case; Correct usage of nouns, pronouns and antecedents, adjectives, adverbs and articles; Agreement of verb with the subject: tense, mood, voice; Writing effective sentences; Basic sentence faults.

#### **PRACTICAL**

Listening and note taking; Writing skills: precis writing, summarizing and abstracting; Reading and comprehension (written and oral) of general and technical articles; Micro-presentations and Impromptu Presentations: Feedback on presentations; Stage manners: grooming, body language, voice modulation, speed; Group discussions; Public speaking exercises; Vocabulary building exercises; Interview techniques; Organization of events.

# THEORY [AEC-112]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1	Communication Process: The Magic of Effective Communication	Elements of Communication process such as Communicator, Message, Channel treatment of message, Audience and Audience response.	5
2	Building Self-esteem and Overcoming Fears	Building Self-esteem and  Points to build Self-esteem, Build social connections, Encourage yourself, Focus on solutions and Set realistic goals. Strategies	
3		Concept, Nature and Significance of Communication process	10
4		Meaning, Types and Models of communication	10
5	Communication	Verbal and Non-verbal communication, Linguistic and Non-linguistic communication	10
6		Barriers to communication and Reasons behind communication gap/ miscommunication	5
7		Listening, Speaking, Reading, Writing Skills	5
8	Basic Communication Skills	Precís writing/ Abstracting/ Summarizing- Styles of technical communication, Curriculum Vitae/Resume writing.	10
9		Innovative methods to enhance vocabulary, analogy questions	5
10		Sentence structure, modifiers, connecting words and verbal; Phrases and Clauses	5
11		Case: Subjective case, Possessive case, Objective case	5
12	Structural and Functional	Correct usage of nouns, Pronouns and Antecedents	5
13	Grammar	Adjectives, Adverbs and Articles	5
14		Agreement of verbs with the subject: Tense, Mood, Voice	5
15		Writing effective sentences	5
16		Basic sentence faults	5
		Total=	100

## PRACTICAL [AEC-112]

Exercise No.	Exercise Topic		
1	Listening and Note taking		
2	Writing skills- Precís writing		
3	Writing skills- Abstracting		
4	Writing skills- Summarizing		
5	Reading and Comprehension (written and oral) of general and technical articles		
6	Micro-presentations		
7	Impromptu presentations		
8	Feedback on presentations		
9	Stage manners- Grooming		
10	Stage manners- Body language		
11	Stage manners- Voice modulations, speed		
12	Group discussions		
13	Public speaking exercise		
14	Vocabulary building exercises		
15	Interview techniques		
16	Organization of events		

# **Suggested Readings [AEC-112]:**

- 1. **Allport, G.W. 1937.** Personality: A Psychological Interpretation, Holt, New York.
- 2. **Brown, M. and Brandreth G. 1994**. How to Interview and be Interviewed. Sheldon Press, London.
- 3. Dale, C. 1997. The Quick and Easy Way to Effective Speaking, Pocket Books, New York.
- 4. **Francis Peter, S.J. 2012.** Soft Skills and Professional Communication, Tata McGraw Hill, New Delhi.
- 5. Kumar, S and Pushpa, L. 2011. Communication Skills, Oxford University Press.
- 6. **Neuliep James, W. 2003.** Intercultural Communication-A Contextual Approach, Houghton Mifflin Co Boston.
- 7. **Pease, A. 1998.** Body Language, Sudha Publications, Delhi.
- 8. Raman, M. and Singh, P. 2000. Business Communication, Oxford University Press.
- 9. Ray, G.L. 2008. Extension, Communication and Management, Kalyani Publishers, Ludhiana
- 10. Ray, G.L. and Mondal S. 2012. Textbook on Rural Development Entrepreneurship and Communication Skills, Kalyani Publishers, Ludhiana.
- 11. Seely, J. 2013. Oxford Guide to Effective Writing and Speaking, Oxford University Press.
- 12. **Thomson, A. J. and Martinet, A.V. 1977.** A Practical English Grammar, Oxford University.

# **SYLLABUS**

**Objectives:** (i) To make the students aware about farming-based livelihood systems in Agriculture,

(ii) To disseminate the knowledge and skills that how farming-based systems can be a source of livelihood.

#### **THEORY**

Status of Agriculture in India and different States, Income of farmers and rural people in India, Livelihood-Definition, Concept and livelihood pattern in urban and rural areas, Different indicators to study livelihood systems. Agricultural Livelihood Systems (ALS): Meaning, approach, approaches and framework, Definition of farming systems and farming-based livelihood systems, Prevalent Farming systems in India contributing to livelihood. Types of traditional and modern farming systems. Components of farming system/ farming-based livelihood systems: Crops and cropping systems, Livestock, (Dairy, Piggery, Goatry, Poultry, Duckry etc.), Horticultural crops, Agroforestry systems, Aquaculture, Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.; Small, medium and large enterprises including value chains and secondary enterprises as livelihood components for farmers, Factors affecting integration of various enterprises of farming for livelihood. Feasibility of different farming systems for different agro-climatic zones, Commercial farming-based livelihood models by NABARD, ICAR and other organizations across the country; Case studies on different livelihood enterprises associated with the farming. Risk and success factors in farming-based livelihood systems, Schemes and programs by Central and State Governments; Public and Private organizations involved in promotion of farming-based livelihood opportunities. Role of farmingbased livelihood enterprises in 21st Century in view of circular economy, green economy, climate change, digitalization and changing life style.

#### **PRACTICAL**

Survey of farming systems and agriculture-based livelihood enterprises, Study of components of important farming-based livelihood models/systems in different agro-climatic zones, Study of production and profitability of crop based, livestock based, processing-based and integrated farming-based livelihood models, Field Visit of innovative farming system models. Visit of Agribased enterprises and their functional aspects for integration of production, processing and distribution sectors and Study of agri-enterprises involved in industry and service sectors (Value Chain Models), Learning about concept of project formulation on farming-based livelihood systems along with cost and profit analysis, Case study of Start-Ups in agri-sectors.

# THEORY [MDC-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1	Status of Agriculture in India	Historical background, Current status, Role of Agriculture in Indian Economy	4
2	Status of Agriculture in Different States	State-wise scenario, Major crops, Regional diversity	4
3	Income of Farmers and Rural People in India	Factors affecting income, Rural-urban income gap, Government initiatives	4
4	Livelihood: Definition, Concept, and livelihood Patterns in urban and rural areas	Livelihood- Definition and its Concept, Urban vs Rural livelihood patterns, Sources of income	4
5	Different Indicators to Study Livelihood Systems	Economic, Social and Environmental indicators, Measuring livelihood resilience	4
6	Agricultural Livelihood Systems (ALS): Meaning and Approaches	Definition, Significance of ALS, Integrated farming systems, Approaches	4
7	ALS Framework and Case studies	Framework for ALS, Case studies in India	4
8	Definition of Farming Systems and farming based Livelihood Systems	Definition and Role of farming systems in rural livelihoods, Examples of systems	4
9	Prevalent Farming Systems in India contributing to livelihood	Traditional vs. Modern farming systems, Regional differences	4
10	Types of Traditional and Modern Farming Systems	Types; Differences; Strengths, Limitations, Case studies	4
11	Components of farming system/farming-based livelihood systems - Crops and Cropping Systems	Components, Crop diversification, Cropping pattern, Mixed cropping, Importance for rural livelihoods	4
12	Livestock-based Farming Systems		
13	Horticultural Crops and Livelihoods	Role of fruits, vegetables and spices in rural income generation	4
14	Agroforestry Systems  Agroforestry- Definition, Combining trees and crops, Agroforestry models in India		2
15	Aquaculture as a Livelihood System	Importance of Aquaculture, Integrated systems (e.g. Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.)	4
16	Challenges in Aquaculture- based Systems	Feasibility, Government support and Market access	2

Continued....

# MDC-111....

17	Small Enterprises in Farming	Role of small enterprises, Value addition, Local processing	2
18	Medium and Large Enterprises in Farming	Value chains, Secondary enterprises as livelihood components for farmers, Agri-processing.	2
19	Factors affecting Integration of various enterprises of farming for livelihood	Technology, Market access, Credit and infrastructure challenges etc.	4
20	Strategies for Enterprise Integration	Successful integration, Government policies, Examples.	2
21	Overview of Agro-Climatic Zones in India	Characteristics of different zones and their agricultural potential.	2
22	Feasibility of different Farming Systems for different Agro-Climatic Zones	Suitable farming systems for different zones, Climate adaptation.	2
23	Commercial Farming Based Livelihood Models by NABARD, ICAR and other organizations across the country	Role of NABARD, ICAR and other Organizations in promoting commercial models, Successful cases.	4
24	Case studies on different Livelihood Enterprises associated with farming	Analysis of successful enterprises, Dairy Cooperatives etc.	4
25	Risk Factors in Farming- based Livelihood Systems	Climate, Market fluctuations, Input costs; Mitigation strategies etc.	4
26	Success Factors in Farming- based Livelihood Systems	Innovation, Market access, Government support, Social capital etc.	2
27	Schemes and Programmes by the Central Government	Overview of schemes like, PM-KISAN, National Rural Livelihood Mission.	2
28	Schemes and programmes by State Governments	State-specific programs promoting rural livelihoods, Case examples.	2
29	Role of Private Sector in Livelihood Promotion	Public-Private Partnerships, Role of private agribusiness.	2
30	Public-Private Partnerships in Agriculture	Successful collaborations in rural development and farming systems	2
31	Farming-based Livelihoods in the 21st Century	Circular economy, Green economy, Climate change, Sustainability.	2
32	Impact of Digitalization and Changing Lifestyles	Technology in Agriculture, Future prospects for rural livelihoods.	2
		Total =	100

# PRACTICAL [MDC-111]

Exercise No.	Exercise Topic	Exercise Sub-topics/ Title
1	Survey of Farming Systems and Agriculture-based Livelihood Enterprises	Methods of data collection; Field survey techniques; Preparing reports on surveyed farms.
2	Study of Components of Farming- based Livelihood Models in Different Agro-Climatic Zones	Components: Crop, livestock, fishery, agroforestry; Identifying models suited to specific zones.
3	Study of Production and Profitability of Crop-based Models	Analysis of input-output relations; Identifying profitable crops
4	Study of Livestock-based Models	Livestock systems: Dairy, poultry, goat farming; Profitability and market access
5	Study of Processing-based Models	Value addition in agriculture; Studying small-scale food processing units
6	Study of Integrated Farming-based Models	Study of crop-livestock-aquaculture integration; Synergies and challenges
7	Field Visit to Innovative Farming System Models	Visit to farms using modern technologies; Documenting practices
8	Visit to Agri-based Enterprises	Enterprises involved in input supply or value addition
9	Study of Functional Aspects: Integration of Production, Processing and Distribution	Backward and forward linkages; Assessing supply chain models
10	Agri-Enterprises in Industry and Service Sectors (Value Chain Models)	Studying value chain enterprises; Evaluating sustainability models
11	Concept of Project Formulation on Farming-based Livelihood Systems	Identifying project objectives; Structuring budgets and timelines
12	Cost and Profit Analysis of Farming- based Livelihood Projects	Developing Cost-Benefit analysis; Identifying Break-Even points
13	Case Study of Start-ups in Agrisectors	Analysing real-world Start-ups; Identifying success factors
14	Group Project: Develop a Farming- based Livelihood Model	Formulating a working model; Feasibility and sustainability analysis
15	Preparation of Report on Farming Systems Survey and Livelihood Models	Compiling field data; Preparing reports with recommendations
16	Presentation and Evaluation of Practical Project Reports	Group presentations; Internal assessment of reports and participation

## **Suggested Readings (MDC-111):**

- **1. Ashley, C. and Carney, D. 1999**. *Sustainable Livelihoods: Lessons from Early Experience*. Department for International Development, London, UK.
  - o **Relevance**: This book explores sustainable livelihood frameworks, which are key to understanding livelihood patterns and rural income systems.
- **2. Agarwal, A. and Narain, S. 1989**. *Towards Green Villages: A Strategy for Environmentally Sound and Participatory Rural Development*. Centre for Science and Environment, New Delhi, India.
  - o **Relevance**: Provides strategies for participatory rural development, focusing on environmental sustainability—a core concept in farming systems.
- **3.** Carloni, A. 2001. Global Farming Systems Study: Challenges and Priorities to 2030 Regional Analysis: Sub-Saharan Africa. FAO, Rome, Italy.
  - o **Relevance**: Offers insights into global farming system challenges, with lessons that can be adapted for Indian contexts in agricultural development.
- **4. Dixon, J., Gulliver, A. and Gibbon, D. 2001**. Farming Systems and Poverty: Improving Farmers' Livelihoods in a Changing World. FAO & World Bank, Rome & Washington, DC.
  - **Relevance**: Focuses on farming systems' role in poverty alleviation and rural livelihood improvement.
- **5.** Evenson, R.E. 2000. Agricultural Productivity and Production in Developing Countries. In FAO, The State of Food and Agriculture. FAO, Rome, Italy.
  - **Relevance**: Discusses agricultural productivity, a critical factor in sustainable farming and improved livelihoods.
- **6. Bhatt** *et al.* (**ICAR Research Complex for Eastern Region**). *Livelihood Improvement of Underprivileged Farming Community: Experiences from Bihar.* Patna, Bihar.
  - **Relevance**: Case studies on improving livelihoods in rural India, relevant to learning about region-specific agricultural interventions.
- 7. Panwar et al., 2020. Integrated Farming System Models for Agricultural Diversification, Enhanced Income, and Employment. Indian Council of Agricultural Research, New Delhi.
  - o **Relevance**: Provides models for agricultural diversification and income enhancement, which align with farming system topics.
- **8. Reddy, S.R., 2016**. *Farming System and Sustainable Agriculture*. Kalyani Publishers, New Delhi.
  - o **Relevance**: Covers sustainable agriculture principles and farming system models, essential for sustainable livelihood systems.
- **9. Singh** *et al.*, **2015**. *Region Specific Integrated Farming System Models*. ICAR-Indian Institute of Farming Systems Research, Modipuram.
  - o **Relevance**: Discusses integrated farming models tailored to different agro-climatic regions of India, essential for practical learning.
- **10.** Walia, S.S., and Walia, U.S., 2020. Farming System and Sustainable Agriculture. Scientific Publishers, Jodhpur, Rajasthan.
  - Relevance: Provides insights into sustainable agricultural practices and integrated farming systems with regional focus.

Syllabus of B.Sc. (Hons.) Horticulture as per the ICAR - Sixth Deans' Committee Report-2024 Pg 14 of 39

Semester : I

Course No. : MATH-111\* Credit Hrs. : 1(1+0) NG; Need-based

Course Title : Introductory Mathematics

\*Need-based, Non-Gradial Common Course across 5 UG Degrees:

B.Sc. (Hons.) Agri. / B.Sc. (Hons.) Horti. / B.Sc. (Hons.) Forestry / B.F.Sc. (Hons.) / B.Sc. (Hons.) C.S.

# **SYLLABUS**

**Objective:** To impart knowledge on Introductory Mathematics as a need-based/ deficiency course.

#### **THEORY**

**Algebra: Progressions:** Arithmetic Progression: Definition, Sum of n terms, Examples. Geometric Progression: Definition, Sum of n terms, Examples. Harmonic Progression: Definitions, Examples.

**Determinants:** Definition of Determinant, Expansion of determinant up to 3<sup>rd</sup> order, Examples Properties of determinants up to 3<sup>rd</sup> order (without proof).

**Matrices:** Definition of Matrices, Order of Matrix, Types of Matrices, Algebra of Matrices: Addition, Subtraction, Multiplication, Examples, Transpose of Matrix and it's properties (without proof).

**Differential Calculus:** Definition, Differentiation of function using first principle, Examples. Rules of Differentiation: Derivatives of sum, Difference, Product and quotient of two functions (Formulae only) and Derivative of Standard functions: Algebraic Function, Trigonometric, Logarithmic and exponential functions (Formulae only), Examples. Increasing and Decreasing Functions, Growth rate, Average Cost and Marginal cost, Marginal Revenue. Examples.

**Partial Differentiation**: Definition, Homogeneous function, Euler's Theorem, Examples.

Maxima and Minima of the functions of the form y = f(x) Examples.

**Integral Calculus**: Definition of Indefinite and Definite Integrals, Integrals of elementary functions (Formulae only), Theorems of integration (without proof), Integration by substitution, Examples.

Integration by parts, Examples, Application of Integration: to find Area under simple well-known curves (Simple problems based on it).

**Mensuration:** Statement of Simpson's 1/3<sup>rd</sup> Rule (Without Proof). Examples on Simpson's Rule.

#### **Suggested Readings:**

- 1. NCERT, 2012, Mathematics of Class XII, NCERT, India.
- 2. A Textbook of Mathematics XI and XII (Part I and II), Maharashtra State Board of Secondary and Higher Secondary Education, Pune.
- 3. Sharma RD, 2014, Mathematics of Class XII, Dhanpat Rai Publisher.
- 4. Mensuration-I by Pierpoint.

Semester	:	I				
Course No.	:	BIO-111**	Credit Hrs.	:	1(1+0)	Need-based; NG
Course Title	:	<b>Basic Biology</b>				
**Need-based, Non-Gradial Common Course across 5 UG Degrees:						
B.Sc. (Hons.) Agri. / B.Sc. (Hons.) Horti. / B.Sc. (Hons.) Forestry / B.F.Sc. (Hons.) / B.Sc. (Hons.) C.S.						

## **SYLLABUS**

# **Objectives:**

- (i) To impart foundational knowledge of biological principles including diversity, genetics, evolution of living organisms,
- (ii) To impart basic knowledge about flowering plants and animals with a focus on their application in Agriculture.

#### **THEORY**

Introduction to the living world, Diversity and characteristics of life. Origin of life, Evolution and Eugenics. Genetics and Basics concepts. Binomial nomenclature and Classification. Cell and cell division. Morphology of flowing plants. Seed and Seed germination. Plant systematics- *viz.*, Brassicaceae, Fabaceae and Poaceae. Role of animals in agriculture.

## TEACHING SCHEDULE

#### **THEORY**

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)
Introduction to Living World		Definition of Biology; Composition and Biological	5
2	Diversity and Characteristics of Life	Classification of living world.  Definitions: Diversity, Biodiversity; Characteristics of life; Building blocks of life and relationship between different organisms.	5
3	Origin of Life	Theories of Origin of Life; Oparin - Haldane Theory of Chemical origin.	5
4	Evolution and Eugenics	Evidences of Organic Evolution, Theories of Evolution; Eugenics: Definition.	5

Continued...

5	Genetics and Basics Concepts	Genetics and Mendel's Experiments (Basic Concepts)	5
6	Binomial Nomenclature	Binomial nomenclature and classification; Overview of taxonomic hierarchy/ ranks.	10
7	Cell: Structure and Function	Cell structure, Composition and Cell organelles and their functions.	5
8-9	Cell Division	Definition, Types: Mitosis and Meiosis, their Significance, Stages.	10
10-12	Morphology of Flowering plants	Morphology, Structure and Functions: Roots, Stems, Leaves, Flowers and Fruits.	25
13	Seed and Seed Germination	Definitions, Types of seed (Monocot and Dicot seed), Types of seed germination and factors affecting it.	5
14-15	Plant Systematics – Study of Families	Key features, Economic importance and Examples of - A) Brassicaceae B) Fabaceae C) Poaceae	15
16	Role of Animals in Agriculture	Livestock in farming systems: Nutritional and economic contributions; Role of pollinators in crop production; Biological pest control (Predatory use); Sustainable integration of animals in agroecosystems.	5
	1	Total =	100

## **Suggested Readings [BIO-111]:**

- 1. Cell Biology, Genetics, Molecular Biology and Evolution by P.S. Verma, V.K. Agrwal. Publisher- S. Chand and Company Ltd., Ram Nagar, New Delhi. India.
- 2. Evolution of Vertebrates by Edwin H. Colbert, Publisher- A Wiley, Inter Science Publication, John Wiley and Sons, New York. US.
- 3. A Class-book of Botany by A.C. Dutta, Publisher- Oxford University Press, YMCA Library Building. Jai Singh Road, New Delhi 110001, India.
- 4. Fundamentals of Genetics by B.D. Singh, Publisher- Kalyani Publ. B-I/1292, Rajinder Nagar, Ludhiana.
- 5. A Textbook of Practical Botany-2 by Ashok M. Bendre, Ashok Kumar, Publisher- Rastogi Publications, Shivaji Road, Meerut, India.
- 6. Botany-An Introduction to Plant Biology by Jamesh D. Mauseth, Publisher- Continental Prakashan, 1962, Pune.
- 7. Anatomy of Seed Plants by A.C. Datta, Sigh V., Pande P.G., Publisher- Sai Print Opack, New Delhi, Rastogi Publication, Meerut, India.
- 8. Handbook of Animal Husbandry by ICAR, New Delhi Publication, Publisher- Directorate of Knowledge Management in Agriculture, Krishi Anusandhan Bhavan, Pusa, New Delhi 110012, India.

# **SYLLABUS**

## **Objectives:**

- (i) To provide basic knowledge of Horticulture in a brief and prescribed manner,
- (ii) To familiarize students with principles and practices of management for Horticultural crops.

#### **THEORY**

Scope and Importance, Classification of horticultural crops and nutritive value, Area and Production, Exports and imports, Fruit and vegetable zones of India and of different states, Nursery techniques and their management, Soil and climate, Vegetable gardens, Nutrition and kitchen garden and other types of gardens-principles, planning and layout, management of orchards, planting systems and planting densities. Principles, objectives, types and methods of pruning and training of fruit crops. Types and use of growth regulators in Horticulture, Water management: irrigation methods, merits and demerits. Weed management. Fertility management in horticultural crops, manures and fertilizers, different methods of application, Cropping systems, intercropping, multi-tier cropping, mulching – objectives, types, merits and demerits. Classification of bearing habits of fruit trees, Factors influencing the fruitfulness and unfruitfulness. Rejuvenation of old orchards, top working, frame working. Principles of Organic and Natural farming, Market chain management.

#### **PRACTICAL**

Features of orchard, Planning and layout of orchard, tools and implements, Identification of various horticultural crops, Layout of nutrition garden, Preparation of nursery beds for sowing of vegetable/ flower seeds, digging of pits for fruit plants, planting systems, training and pruning of orchard trees, Calculation of fertilizer doses, Preparation of fertilizer mixtures and field application, Preparation and application of growth regulators, Layout of different irrigation systems, Identification and management of nutritional disorder in fruits and vegetable crops, Assessment of bearing habits, maturity standards, harvesting, grading, packaging and storage.

# THEORY [HORT-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)	
1	Scope and Importance of Horticulture	Definition, Income/Employment generation, Industrial/religious value, Export value, Nutritional value, Aesthetic value etc.		
2-3	Classification of Horticultural crops	Classification based on life cycle, Nature of stem, Season, Ripening behaviour, Light requirement, Fruit type, Edible portion, Botanical, Growth habit, etc. with examples of fruit, vegetable, flower, spice and plantation crops	10	
4	Nutritive value of Horticultural crops	Role and Deficiency of vitamins and minerals, and their sources.	05	
5	Area and Production, Exports and Imports of fruit and vegetable	Global, Indian and State Scenario in major fruit and vegetable crops	05	
6	Fruit and Vegetable zones of India and of different states	Fruit and Vegetable zones of India and Maharashtra	05	
7	Nursery techniques and their management	Definition, Component, Bed preparation, Growing media, Method of propagation Sexual, Asexual	10	
8	Soil and Climate requirement of Horticultural crops	Optimum condition, Effect of various parameters	10	
9-10	Vegetable gardens, Nutrition and Kitchen garden and other types of gardens	Kitchen garden, Market garden, Truck garden, Vegetable garden for processing, Vegetable garden for seed production, Vegetable forcing and Floating vegetable garden	05	
11-12	Principles, Planning, Layout and Management of Orchards	Points to be considered, Features of orchard	10	
13	Planting systems and Planting densities	Square, Rectangle, Diagonal, Hexagonal, Contour etc.		

Continued....

# *HORT-111...*

14-15	Pruning and Training of fruit crops	Principles, Objectives, Types and Methods	05
16-17	Types and use of growth regulators in Horticulture	Auxins, Gibberellins, Cytokinins, Ethylene, Growth Retardants/ Inhibitors.	05
18	Water management in Horticultural crops	Role of water, Methods of irrigation, Merits and Demerits.	03
19-20	Weed management in Horticultural crops	Definition, Methods of weed control in Horticultural crops.	03
21-22	Fertility management in Horticultural crops	Soil management practices, Sources of nutrient, Manures and Fertilizers, Methods of application of fertilizers	05
23	Cropping systems in Horticultural crops	Types, Advantages, Cropping systems, Intercropping, Multi-tier cropping	05
24	Mulching	Objectives, Types, Merits and Demerits	03
25	Classification of bearing habits of fruit trees	Shoot bearing: Terminal, Lateral/Axillary bearing, SPUR bearing and Stem /Branch bearing with examples.	05
26-27	Fruitfulness and Unfruitfulness	Influencing factors: External and Internal.	05
28	Rejuvenation of old orchards	Top working and Frame working.	04
29-30	Principles of Organic and Natural farming	Concepts, Advantages.	05
31-32	Market chain management	Meaning, Components and Importance of market chain management in Horticulture	02
		Total=	100

## PRACTICAL [HORT-111]

Exercise No.	Exercise Title
1	Identification of various Horticultural crops
2	Tools and implements
3	Features of orchard; Planning and layout of orchard
4	Layout of nutrition garden
5	Preparation of nursery beds for sowing of vegetable/ flower seeds
6	Digging of pits for fruit plants
7	Planting systems for orchard trees
8	Training and pruning of orchard trees
9	Calculation of fertilizer doses, preparation of fertilizer mixtures and field application
10	Preparation and application of growth regulators in horticultural crops
11	Layout of different irrigation systems in horticultural crops
12	Identification and management of nutritional disorder in fruits and vegetable crops
13	Assessment of bearing habits of horticultural crops
14	Maturity standards & harvesting of horticultural crops
15	Grading, packaging and storage of horticultural crops

# **Suggested Readings [HORT-111]:**

- **2. Salunkhe, D. K. and Kadam, S. S. 2013.** A Handbook of Fruit Science and Technology, CRC Press.
- **3. Chattopadhyay, T. K. 2013.** A Textbook on Pomology Vol. I-IV. Kalyani Publications, New Delhi.
- **4. Peter, K.V. 2009.** Basics Horticulture, New India Publishing Agency.
- 5. Misra, K.K. and Kumar, R. 2014. Fundamentals of Horticulture, Biotech Books.
- **6. Singh, N.P. 2005.** Basic Concepts of Fruit Science, 1<sup>st</sup> Edn. IBDC Publishers.
- 7. Kumar, P. 2014. Principles of Horticulture, 2<sup>nd</sup> Edn. Agrobios India.
- **8.** Kunte, Y.N., Kavthalkar, M.P. and Yawalkar, K.S. 2013. Principles of Horticulture and Fruit Growing, 11<sup>th</sup> Edn. Agri-Hort Publishers.

Semester : I

Course No. : FS-111 | Credit Hrs. : 3(1+2)

Course Title : Plant Propagation and Nursery Management of Fruit and Plantation Crops

## **SYLLABUS**

Objectives: (i) To know different methods of propagation techniques,

(ii) To learn the horticultural significance of specialized vegetative structures,

(iii) To study the different types of plant propagation methods and structures.

#### **THEORY**

Status and Importance of plant propagation and nursery production in fruits and plantation crops. Sexual and Asexual methods of propagation, their advantages and disadvantages. Apomixis, Seed dormancy, Types of dormancy and Methods to overcome seed dormancy. Use of vegetative propagation methods viz., division, cutting, layering, budding and grafting. Propagation structures in nursery production: Mist chamber, Humidifiers, Greenhouses, Glasshouses, Cold frames, Hot beds and Polyhouses. Use of growth regulators in nursery production. Components of a Nursery, maintenance of mother trees and seed gardens, collection of scion-wood and bud wood certification. Growing medium and containers used for nursery production. Role of tissue culture techniques viz., Micropropagation, Micrografting and Meristem culture. Nursery Registration Act. Management of insect-pests and diseases in nursery. Cost of establishment of a modern nursery.

#### **PRACTICAL**

Selection of site, soil sterilization and preparation of beds for nursery raising. Preparation of growing media and use of different nursery containers for containerized nursery production in fruits and plantation crops. Seed treatments for breaking dormancy and prevention of nursery diseases. Sowing of seed, raising and maintenance of rootstock/seedlings. Practicing different vegetative propagation methods viz., cutting, layering, grafting and budding. Preparation of plant growth regulators for seed germination and vegetative propagation. Digging, labelling and packing of field grown nursery plants. Familiarisation with propagation structures mist chamber, greenhouse, glasshouse, polyhouse and net house, and their maintenance. Micropropagation and hardening of plants. Tissue culture media preparation, explant preparation, *in vitro* culturing and shoot tip culture, primary and secondary hardening of tissue culture plants. Maintenance of nursery records. Identification and management of insect-pests and diseases in nursery. Project formulation for small and high-tech nurseries. Nursery accreditation.

# THEORY [FS-111]

Lecture No.	Topic	Sub-topics/ Key points	Weightage (%)
1	Status and Importance of Plant propagation and Nursery production in Fruits and Plantation crops	Scope and Importance of plant propagation and Nursery production of fruit and plantation crops: Creating diversity,  Production of genetically pure nurseries stock, Export of nursery stock, Employment generation, Create the new cultivar, Cloning desirable specimens, Development of disease and pest resistant	10
2	Sexual and Asexual methods of plant propagation and their advantages and disadvantages	Definition of propagation, Objectives of propagation, Methods of propagation-Sexual and Asexual, Advantages and Disadvantage of Sexual and Asexual propagation.	10
3	Seed dormancy, Types of dormancy, Internal and External factors affecting seed dormancy and Seed treatment	Definition of Seed dormancy, Types of Seed dormancy: Exogenous- Physical (Seed coat dormancy), Mechanical, Chemical and Endogenous- Morphological, Physiological (Non deep, Photo, Thermo), Double dormancy, Secondary dormancy. Factors affecting seed dormancy; Different Seed treatments (in brief).	10
4	Methods to overcome Seed dormancy	Methods of breaking seed dormancy: Definition of Scarification and Stratification, Scarification methods: Mechanical, Acid scarification, Hot water scarification and Warm moist scarification, Stratification methods- Outdoor stratification.	
5	Apomixis	Definition of Apomixis, Types of Apomixis, Definitions, Monoembrony, Polyembrony, Chimera etc.	4

Continued...

6	Use of vegetative propagation methods viz., division, cutting, layering,	Definition of Cutting, Types of cutting: Stem cuttings (Herbaceous, Softwood, Semi-hard wood, Hardwood), Root cutting, Leaf cutting, Leaf bud cutting.  Definition of Layering, Types of Layering: Simple or Tongue layering, Serpentine or Compound layering, Trench or Continuous layering, Mount or Stool layering, Air or Gootee or Marcottage,  Definition of Division,  Types of specialized plant organs: Bulbs, Corns, Tuber, Runner, Suckers, Offset, Rhizomes etc.	15
7	Budding and Grafting	Methods of budding: T-budding (Shield budding), Patch budding, Chip budding, Flute budding, I-budding, Forkert budding.  Definition of Grafting, Types of grafting: Splice or Whip grafting, Whip and Tongue grafting, Cleft or Wedge grafting, Side grafting, Veneer grafting, Approach grafting, Root grafting, In-situ grafting, Double grafting, Top working, Stone grafting.  Scion-stock relationship (compatibility, closeness of fit, cambial contact etc.)	
8	Propagation structures in nursery production:	Detail information of propagation structures in nursery production: Mist chamber, Humidifiers, Greenhouses, Glasshouses, Cold frames, Hot bed sand Polyhouses.	8
9	Use of Plant Growth Regulators in Nursery propagation	Definition of Plant growth regulators, Use of plant growth regulators: Plant propagation- Seed germination, Rooting of cuttings, Rootings of layers, Hastening the growth of rootstocks in nursery, Other roles; Methods of application: Application of powder mixture, Lanolin paste methods, Soaking method, Quick deep methods, Aerosol method, Vapour method.	8

# PRACTICAL [FS-111]

Exercise No.	Exercise Title	
1	Selection of site for plant propagation and nursery management of fruits and Plantation crops.	
2-3	Preparation of Nursery beds and sowing of seeds	
4-5	Study of different media for plant propagation	
6	Study of different containers for containerized nursery production	
7-8	Seed treatment for breaking seed dormancy including germination and growth of seedlings	
9	Sowing of seeds, raising and maintenance of rootstock/seedlings	
10-11	Potting, repotting, and preparation of plant material for potting	
12	Practicing different types of cutting	
13-14	Practicing different types of layering	
15-16	Practicing different types of runners, offsets and other specialized plant parts for propagation	
17-18	Practicing different methods of budding	
19-20	Practicing different grafting methods	
21-22	Preparation of growth regulators for seed germination and vegetative propagation	
23	Digging/uprooting, labelling and packaging of field grown nursery plants	
24	Use of mist chambers in plant propagation and hardening of plants	
25	Study of propagation structures, greenhouse, polyhouse and net house and their maintenance.	
26-27	Tissue culture media preparation, <i>Ex-plant</i> preparation, <i>in vitro</i> culturing and shoot tip culture	
28	Primary and Secondary hardening of Tissue culture plants	
29	Maintenance of nursery records	
30	Identification and management of insect-pests and diseases in nursery	
31	Project formulation for small and High-tech nurseries	
32	Nursery accreditation	

# **Suggested Readings [FS-111]:**

- 1. Davies, F.T., Geneve, R.L. and Wilson, S.B. 2018. Hartmann and Kester's Plant Propagation: Principles and Practices (9th ed.), Pearson, USA.
  - Relevance: Covers principles and techniques of plant propagation, an essential topic for nursery management and crop establishment.
- 2. ICAR. 2019. Handbook of Horticulture (2nd ed., Vol 1 & 2), ICAR, New Delhi.
  - Relevance: A comprehensive reference on horticultural crops, including information on production, management practices, and horticultural zones of India.
- 3. Peter, K.V. 2002. Plantation Crops. National Book Trust, New Delhi.
  - Relevance: Focuses on key plantation crops in India, with insights into production, management, and marketing, aligning with market chain management concepts.
- 4. Sharma, R.R. and Krishna, H. 2017. Textbook of Plant Propagation and Nursery Management. CBS Publishers, New Delhi.
  - o **Relevance**: Provides detailed guidance on nursery management and propagation techniques, complementing topics on nursery techniques and management.
- 5. **Sharma, R.R. and Srivastava, M. 2004.** *Plant Propagation and Nursery Management.* IBDC Publishers, New Delhi.
  - o **Relevance**: This book further elaborates on propagation methods and nursery management, useful for developing practical skills in orchard establishment.

# **SYLLABUS**

**Objectives:** To impart knowledge about climatic and soil requirements, commercial varieties/hybrids, sowing/planting times and methods, nutritional and irrigation requirements, intercultural operations, weed management, physiological disorders, postharvest management, plant protection measures of major flower crops.

#### **THEORY**

Scope and Importance of commercial floriculture, Soil climate, varieties, propagation, special intercultural operations, fertilizers requirement, irrigation, use of growth regulators, weed management, plant protection measures, harvesting, grading, packaging and storage of flowering flower crops for following flower crops: Rose, Jasmine, Carnation, Chrysanthemum, Gladiolus, Tuberose, Marigold, Cut foliage under open/ partial shade, Seed production of flowering annuals.

#### **PRACTICAL**

Identification of commercially important floricultural crops, Propagation technique in Rose, Jasmine, Carnation, Chrysanthemum, Gladiolus, Tuberose, Marigold, Sowing of seeds and Raising of seedlings of annuals, Propagation of ornamental plants with particular reference to cutting, layering, grafting and budding, bed preparation, soil decontamination. Planting and layout. Staking, Training and Pruning of roses. Growing media and containers for growing flower for exhibition, potting, depoting and repotting. Fertilizer application, Growth regulator measures. Special horticulture practices in cut flower and cut foliage crops. Weed management and plant protection measures, Determination of harvesting indices. Harvesting methods and post-harvest handling. Commercial standards and packaging methods, Project preparation, Visit to commercial flower market and progressive growers having high tech-farms.

# THEORY [FLA-111]

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)
1-2	Scope and Importance of Commercial Floriculture	Scope- Domestic, Export, Urban Horticulture, Industrial, Entrepreneurship, etc. Importance- Economic, Social and Cultural, Aesthetic and Environmental, Health and Therapeutic etc.	10
3-4	Rose		10
5	Jasmine	Soil, Climate, Varieties, Propagation, Special	10
6	Carnation	intercultural operations, Training and pruning, Fertilizers requirement, Irrigation, Use of	10
7-8	Chrysanthemum	growth regulators, Weed management, Plant	10
9-10	Gladiolus	protection measures, Harvesting, Grading,	10
11-12	Tuberose	Packaging and Storage of respective flower crops.	10
13-14	Marigold		10
15	Cut foliage under Open/ Partial shade	Definition, Plant names, Factors, Use, Media, Maintenance (water, fertilizers, plant protection) Harvesting, Storage.	10
16	Seed Production of Flowering Annuals	Soil, Climate, Planting, Irrigation, Pest management, Harvesting, Seed storage.	10
	1	Total =	100

## PRACTICAL [FLA-111]

Exercise No.	Exercise Title	
1	Introduction of flower crops; their Identification, B.N., Family Origin.	
2	Identification of commercial flower crop varieties	
3	Study of Propagation techniques: Sexual and Asexual	
4	Bed preparation: Ridges and furrows, flat bad, raised bed, broad ridge.	
5	Soil Decontamination: Chemical use like, formalin etc.	
6	Planting and layout: Seed sowing, Transplanting, Dibbling	
7	Training and pruning, staking: Rose, Jasmine, Carnation, Tuberose, Gladiolus.	
8	Preparation of growing media and containers for growing flower for exhibition: Identification Characteristics, Advantages and Disadvantages.	
9	Experiment of Potting, depotting and repotting.	
10	Study of Fertilizer application: Direct application; Fertigation.	
11	Study of Growth Regulators Measures, their Use and Application.	
12	Special horticultural practices in cut flower and cut foliage crops: Rose, Chrysanthemum, Carnation.	
13	Weed management and plant protection measures (All six crops major pest and diseases control)	
14	Determination for harvesting indices, harvesting methods and post-harvest handling (Harvesting sign, Time Post harvest handling)	
15	Commercial standards and packaging methods; Packaging materials	
16	Project preparation and Visit to commercial flower market and progressive growers having high-tech farms

 IDE-111
 Credit Hrs.
 :
 2(1+1)

 Course Title
 :
 Sprinkler and Micro Irrigation System

#### **SYLLABUS**

**Objectives:** To acquaint the students with the basic knowledge of modern irrigation systems.

#### **THEORY**

Sprinkler irrigation: Adaptability, types, problems and prospects. Sprinkler/Micro sprinkler irrigation system design: steps, layout, selection, design of lateral, sub-main and main pipeline, selection of pump and power unit. Performance evaluation of sprinkler irrigation system: Uniformity coefficient and pattern efficiency. Microirrigation system: types, merits and demerits, components. Design of drip irrigation system: general considerations, wetting patterns, irrigation requirement, emitter selection, hydraulics and design steps. Steps for proper operation of a drip irrigation system. Maintenance of microirrigation system: clogging, filter cleaning, flushing and chemical treatment. Fertigation: advantages, limitations, methods, fertilizers solubility and their compatibility, precautions, frequency, duration and injection rate. Economics: Cost estimation of sprinkler and micro irrigation systems.

#### **PRACTICAL**

Study of different components, design and installation of sprinkler irrigation system. Determination of precipitation pattern, discharge and uniformity coefficient. Study of different components, design and installation of drip irrigation system. Determination of pressure discharge relationship and emission uniformity for emitter. Study of different types of filters and determination of filtration efficiency. Determination of rate of injection and calibration for chemigation/ fertigation. Design of irrigation and fertigation schedule for crops. Field visit to microirrigation system and evaluation of drip system. Cost economics of sprinkler and drip irrigation systems.

# THEORY [IDE-111]

Lecture No.	Торіс	Sub-topics/ Key points	Weightage (%)
1	Sprinkler irrigation: Adaptability, Types, Problems and Prospects.	Introduction, Advantages, Limitations, Basic concepts	10
2- 4	Sprinkler/Micro sprinkler irrigation system design: Steps, layout, selection, design of lateral, sub-main and main pipeline, selection of pump and power unit.	Hydraulic design of Sprinkler system, Sprinkler selection, Spacing, Design of main line, Sub main line and Sprinkler laterals	15
5-6	Performance evaluation of sprinkler irrigation system: Uniformity coefficient and Pattern efficiency.	Moisture distribution pattern, Testing of uniformity, Distribution uniformity, Uniformity coefficient (Uc), Determination of Uc	05
7	Microirrigation system: Types, Merits and demerits, Components.	Types, Merits and Demerits, Components	10
8-10	Design of drip irrigation system: General considerations, Wetting patterns, Irrigation requirement, Emitter selection, Hydraulics and Design steps.	Basic hydraulics of drip lines, Steps in design of drip system, Selection of drippers, Selection and design of laterals, sub main, mainline, Selection of pump, Calculation of irrigation time	20
11	Steps for proper operation of a drip irrigation system:	Steps for proper operation of a drip irrigation system in detail.	10
12	Maintenance of microirrigation system:	General maintenance, Clogging, Filter cleaning, Sub main and lateral flushing, Chemical treatment in detail	10
13-14	Fertigation:	Advantages, Limitations, Methods of fertilizer injection, Fertilizer solubility and their compatibility, Precautions; Frequency, Duration and Injection rate.	10
15-16	Economics of sprinkler and drip irrigation system:	Calculation of quantities of material required and Cost estimation of sprinkler and drip irrigation system	10
		Total=	100

# PRACTICAL [IDE-111]

Exercise No.	Exercise Title
1-2	Study of different components, design and installation of sprinkler irrigation system.
3-4	Determination of precipitation pattern, discharge and uniformity coefficient.
5-6	Study of different components, design and installation of drip irrigation system.
6-7	Determination of pressure discharge relationship and emission uniformity for emitter.
8	Study of different types of filters and determination of filtration efficiency.
9-10	Determination of rate of injection and Calibration for chemigation / fertigation.
11-12	Design of irrigation and fertigation schedule for crops.
13-14	Field Visit(s) to micro irrigation system and evaluation of drip system.
15-16	Study of Cost Economics of sprinkler and drip irrigation systems.

- 1. **Mane, M.S. and Ayare, B.L. 2019.** Principles of Sprinkler Irrigation. Publ.-Jain Brothers, New Delhi, 4<sup>th</sup> Edn.
- 2. **Mane, M.S. and Ayare, B.L. 2019**. Principles of Drip Irrigation. Publ.- Jain Brothers, New Delhi, 4<sup>th</sup> Edn.

# # List/ Bouquet of Skill Enhancement Courses (SECs)

Sr. No.	Course No.	Course Title	Credit Hrs.
1.	SEC-xxx	Mushroom Cultivation	2(0+2)
2.	SEC-xxx	Orchard Floor Management	2(0+2)
3.	SEC-xxx	Apiculture	2(0+2)
4.	SEC-xxx	Landscape Gardening	2(0+2)
5.	SEC-xxx	Packing and Packaging of Horticultural Crops	2(0+2)
6.	SEC-xxx	Farm Machinery	2(0+2)
7.	SEC-xxx	Introduction to Forestry	2(0+2)
8.	SEC-xxx	Installation, Operation and Maintenance of Microirrigation System	2(0+2)
9.	SEC-xxx	Computer Programming and Data Structures	2(0+2)
10.	SEC-xxx	Turf and Turf Management	2(0+2)
11.	SEC-xxx	Post-harvest Management of Horticulture Crops	2(0+2)
12.	SEC-xxx	Nursery Production in Horticulture Crops	2(0+2)
13.	SEC-xxx	Seed production Techniques in Vegetables Crops	2(0+2)
14.	SEC-xxx	Sericulture	2(0+2)
15.	SEC-xxx	Dairy Management	2(0+2)
16.	SEC-xxx	Ornamental Fishery	2(0+2)
17.	SEC-xxx	Poultry Management	2(0+2)
18.	SEC-xxx	Biofertilizers and Biopesticides	2(0+2)

Note: Skill Enhancement Courses can be added/offered as per the facilities and resources available at the respective universities/colleges based on the relevance to the region and the UG degree subject.

In case of unavailability of said detailed course-wise syllabus of above SEC courses, the same can be primarily developed and followed at College/ University level in the academic year, 2024-25; However, the same will be obtained from the respective UG Degree Coordinator/ Discipline Coordinators and can be followed w.e.f. AY, 2025-26.

[Above list is an indicative list/bouquet of SEC courses and subject to modification as applicable therein]

# Skill Enhancement Courses (SECs): Detailed Syllabi

Course No. : SEC-xxx Credit Hrs. : 2(0+2)

**Course Title : Mushroom Cultivation** 

# **TEACHING SCHEDULE**

# **PRACTICAL**

Exercise No.	Exercise Title (with Sub-topics)		
1	Study of Current status and Scope in India and Maharashtra, Potential for entrepreneurship.		
2	Study of Important features of edible fungi: Nutritional composition, Medicinal benefits, Therapeutic applications.		
3	Study of Nutritional and Medicinal value of mushrooms: Types of media, Sterilization techniques, Preparation for tissue culture.		
4-5	Preparation of media: Types of media, Sterilization techniques, Preparation for tissue culture		
6-7	Tissue Culture Preparation, Sub-culturing, Culture maintenance and Preservation		
8	Sub-culturing for culture maintenance and its preservation		
9-10	Spawn preparation techniques: Types of spawn (grain, sawdust, liquid), Methods of spawn preparation, Quality control		
11-12	Collection of wild mushroom flora: Identification of wild mushrooms, Ecological significance and Safety measures		
13	Raw material formulations for <i>Agaricus bisporus</i> (Button mushroom): Sourcing and Preparation.		
14-15	Composting: Long and Short methods - Long method vs. Short method of composting, Environmental factors and Common challenges.		
16	Casing preparation: Importance of casing, Types of casing materials, Methods and Maintenance.		
17	Study of Crop Management Practices: Environmental controls, Watering, Ventilation and Humidity management.		
18-19	Mushroom farm design and Infrastructure required for commercial unit:  (Farm layout, Design requirements, Essential infrastructure for commercial units)		

20	Cultivation techniques of <i>Pleurotus florida</i> (Dhingri) mushroom	
21	Cultivation techniques of Volvoriella volvacea (Paddy straw) mushroom	
22	Cultivation techniques of Calocybe indica (Milky) mushroom	
23	Cultivation techniques of Lentunus edodes (Shiitake) mushroom	
24	Study of Marketing of mushrooms: Market analysis, Distribution channels, Pricing strategies and Customer engagement	
25-26	Mushroom diseases and their control: Common diseases, Symptoms, Prevention and Control measures	
27-28	Preparation of value-added products from mushrooms:  (Types of value-added products, Processing techniques, Product development ideas)	
29	Working-out the Economics of Mushroom Production: Input requirement and its cost for mushroom production.	
30-32	Exposure visit(s) to Commercial Unit(s): Practical learning through visits to established commercial mushroom farms

- 2. **Kumaresan, V. 2023.** Fundamentals of Mushroom Cultivation, Saras Publication.
- 3. **Suman, B.C. and Sharma, V.P. 2007.** Mushroom Cultivation in India, Daya Publishing House.
- 4. **Gupta R. and Singh, A. 2023.** Textbook of Mushroom Cultivation, Daya Publishing House.
- 5. **Tripathi, D.P. 2014.** Mushroom Cultivation, Oxford and IBH.
- 6. **Cotter, T. 2014.** Organic Mushroom Farming and Mycoremediation: Simple to Advanced and Experimental Techniques for Indoor and Outdoor Cultivation. White River Junction.
- 7. **Oss, O.T. 1991.** Psilocybin: Magic Mushroom Grower's Guide: A Handbook for *Psilocybin enthusiasts*. San Francisco, Calif: Quick American Pub.
- 8. **Stamets, P. 2000.** Growing Gourmet and Medicinal Mushrooms: Shokuyō Oyobi Yakuyō Kinoko No Saibai.
- 9. **Money, N.P. 2004.** Mr. Bloomfield's Orchard: The Mysterious World of Mushrooms, Molds, and Mycologists. Oxford: Oxford University Press.

Course No. : SEC-xxx Credit Hrs. : 2(0+2)

**Course Title : Orchard Floor Management** 

# **TEACHING SCHEDULE**

# PRACTICAL

Exercise No.	Exercise Title (with Sub-topics)	Skills to be developed
1	Introduction to Orchard floor Management: Overview, Objectives, and Significance of floor management	Conceptual understanding of orchard management
2-3	Study of Fruit Crop Nutrition Garden: Importance and Scope, Layout and Layout management practices for availability of fruits	Skill for planning and layout management
4-5	Planning and Design of Orchard layouts, Floor designs and Calculation of plant population.	Skills in planning Orchard floor systems
6-9	Soil Management Practices- Clean Cultivation, Sod Culture, Sod Mulch:  Demonstration of clean cultivation techniques, Practical exposure to sod-based orchard management.	Techniques of: Weed-free cultivation, Identifying benefits of Sod culture & mulch
10-11	Practical exposure to intercropping systems, cover crop selection and Maintenance, Mixed crop selection.	Practical skill of selection & maintenance
12	Mulching with Organic materials using Straw, Leaves & Compost	Hands-on mulching skills;
13	Mulching with Inorganic materials using Plastic, Gravel and Fabric	Application and Evaluation of mulch
14	Soil sampling Techniques: Collection and preparation of soil samples for testing	Precision in soil sampling
15	Demonstration of moisture conservation techniques	Skills in irrigation and mulching
16	Weed identification and classification of common orchard weeds	Weed recognition and classification
17	Mechanical Weed Control: Use of manual and mechanical tools for weeding	Use of mechanical weeding tools
18	Chemical weed control: Herbicide application techniques	Safe handling of chemicals
19-20	Irrigation techniques: Use of drip and sprinkler irrigation systems	Skills in water management
21-22	Organic fertilizers application of organic manures and biofertilizers	Practical organic fertilizer application
23-24	Inorganic fertilizers application of chemical and liquid fertilizers	Precision in inorganic fertilizer use
25	Study of Biofertilizers: Types of biofertilizers, Advantages and Application of beneficial microbes	Application, Techniques and Procedure for preparation of different biofertilizers

26	Study of Green Manuring and Bioagents: Advantages of green manuring; Green manuring crops; Different sources of bioagents and their role.	Identification of green manuring crops and bio- agents; Practice of incorporation of green manuring
27-30	Visit to Orchards of Progressive Fruit Growers: Observing orchard floor management practices in a commercial setting.	Observation & Exposure to real-world practices

#### **Suggested Readings:**

- 1. **Hartmann, H.T., Kester, D.E., Davies, F.T. and Geneve, R.L. 2018.** *Plant Propagation : Principles and Practices (9<sup>th</sup> ed.).* Pearson, USA.
  - o **Relevance**: Covers essential principles of plant propagation and orchard management techniques, including floor preparation.
- 2. **Sharma, R.R. and Pal, R. K. 2016.** *Horticulture for Sustainable Development.* New India Publishing Agency, New Delhi.
  - o **Relevance**: Focuses on sustainable horticultural practices, including organic orchard management and mulching.
- 3. Fageria, N. K., Baligar, V. C. and Jones, C. A. 2011. Growth and Mineral Nutrition of Field Crops. CRC Press.
  - o **Relevance**: Provides detailed insights on soil fertility management, nutrient cycling and integrated nutrient management practices.
- 4. **Atkinson, D. 2018.** The Biology of Horticultural Crops. Elsevier Science.
  - **Relevance**: Explores soil management, root systems and orchard floor practices in the context of horticultural crop production.
- 5. **Bhattacharyya, P. and Chakraborty, G. 2017.** *Handbook of Organic Farming and Bio-fertilizers.* Astral International, New Delhi.
  - o **Relevance**: Offers in-depth knowledge of organic practices for floor management, such as composting, cover cropping and mulching.
- 6. **Singh** *et al.* **2015.** *Region-Specific Integrated Farming System Models.* ICAR-IIFSR, Modipuram.
  - o **Relevance**: Provides practical models for integrating orchard systems with other components like livestock and cover crops.
- 7. Weinbaum, S.A., Johnson, R.S. and DeJong, T.M. 2019. Orchard Systems Management: Ecology and Agronomy. CABI Publishing.
  - o **Relevance**: Covers orchard design, weed management, inter cropping and ecological aspects of orchard systems.
- 8. **Panwar et al. 2020.** Integrated Farming Systems for Agricultural Diversification. ICAR. New Delhi.
  - o **Relevance**: Discusses orchard integration with other farming components and sustainable floor management strategies.
- 9. Yadav, A. K. and Chauhan, S. 2016. Orchard and Plantation Management Practices. Scientific Publishers, Jodhpur.
  - o **Relevance**: Offers insights on orchard layout, weed management, water conservation and post-harvest management.
- 10. **Brady, N.C. and Weil, R.R. 2017.** *The Nature and Properties of Soils (15<sup>th</sup> ed.).* Pearson.
  - o **Relevance:** Essential reference for soil health management and the impact of orchard floor practices on soil properties.

Semester: I (New) w.e.f. Academic Year: 2024-25

Sr. No.	Course No.	Course Title	Credit Hrs.	Remark
1.	CAC-111	Deeksharambh (Induction-cum-Foundation Course)	2(0+2)	NG (2 Weeks)
2.	AEC-111	National Service Scheme (NSS-I)/ National Cadet Corps (NCC-I)	1(0+1)	
3.	MATH-111*	Basic Mathematics*	2(2+0)	NG & Need-based
4.	AGEN-111	Crop Production and Protection Technology	4(3+1)	(MDC)
5.	GAE-111	Introduction to Agricultural Engineering	4(3+1)	
6.	SWCE-111	Surveying and Levelling	3(1+2)	
7.	FMPE-111	Workshop Technology and Practice	2(0+2)	
8.	REE-111	Basic Electrical Gadgets and Instruments	3(2+1)	
9.	COMP-111	Agricultural Informatics and Artificial Intelligence	3(2+1)	
		20(11+9) G 4(2+2) NG		

CAC: Common Academic Course, AEC: Ability Enhancement Course,

MDC: Multidisciplinary Course, SEC: Skill Enhancement Course,

G: Gradial, NG: Non-Gradial

**Note:** \*MATH-111 for **PCB** student and for **PCM** or **PCMB** student, there is no need to offer any Need-based course.

Currently, during AY 2024-25, **AEC-112** & **MDC-111** are being offered in II-semester as **AEC-122** & **MDC-121**, respectively. However, this layout is subject to change and will be regularized **w.e.f. AY 2025-26**, wherein said courses will be offered in I-semester by shifting any 2 above listed courses to II-semester.

# **B.Tech.** (Agricultural Engineering): First Semester

# **Course-wise Syllabus with Teaching Schedules**

Semester : I

Course No. : CAC-111 Credit Hrs. : 2 (0+2) NG/ 2 Weeks

Course Title : Deeksharambh (Induction-cum-Foundation Course)

Non-Gradial Common Academic Course for the said UG degree with the activities to be conducted during initial two weeks.

# **Objectives:**

- (i) To create a platform for students to help for Cultural Integration of students from different backgrounds,
- (ii) To know about the operational framework of academic process in the University, instilling life and social skills,
- (iii) To create Social awareness, Ethics and Values, Team work, Leadership, Creativity,
- (iv) To identify the traditional values and indigenous cultures along with diverse potentialities both in indigenous and developed scenario.

## **ACTIVITIES**

- ➤ Introduction/Orientation and Discussions on operational framework of academic process in University/ College, as well as interactions with Academic and Research Managers of the University.
- Interaction with Alumni, Business Leaders, Perspective Employers, Outstanding Achievers in related fields and people with inspiring life experiences.
- > Students shall be made aware about the field of food processing, the industry, production, systems, importance of nutrition, packaging, quality issues involved, shelf life and the legal standards available using simple day-to-day example.
- > Students shall be exposed to the job opportunities at various levels like production, product development, entrepreneurship opportunities and research opportunities that exist in this area of food processing technology.
- ➤ Group activities to identify the strength and weakness of students and to learn from each other's life experiences.
- Activities to enhance Cultural Integration of students from different backgrounds.
- Field visits to the relevant fields/ establishments.
- ➤ Sessions on Personality Development (Instilling Life and Social skills, Social awareness, Ethics and Values, Team work, Leadership etc.) and imbibing the Communication skills.

**Note:** The details of the relevant activities will be decided by the parent University in line with the above-mentioned broad activities.

\_\_\_\_\_

Course No.: AEC-111 | Course Title: National Service Scheme-I (NSS-I) | Credit Hrs.: 1(0+1)

# **SYLLABUS**

#### PRACTICAL

#### **Introduction and Basic Components of NSS**

- Orientation: History, Objectives, Principles, Symbol, Badge; Regular Programs under NSS.
- Organizational structure of NSS, Code of conduct for NSS volunteers, Points to be considered by NSS Volunteers' awareness about Health.
- NSS program activities. Concept of regular activities, Special camping, Day camps, Basis of
  adoption of village/slums, Conducting survey, Analysing Guiding financial patterns of scheme,
  Youth program/schemes of GOI, Coordination with different agencies and maintenance of diary.
  Understanding youth. Definition, Profile, Categories, Issues and Challenges of youth; and
  Opportunities for youth who is agent of the social change.
- Community mobilization. Mapping of community stakeholders, Designing the message as per problems and their culture; Identifying methods of mobilization involving youth-adult partnership. Social harmony and National integration.
- Indian history and culture, role of youth in nation building, Conflict resolution and peace building. Volunteerism and Shramdaan. Indian tradition of volunteerism, its need, importance, motivation and constraints; Shaman as part of volunteerism.
- Citizenship, Constitution, and Human rights. Basic features of constitution of India, Fundamental rights and duties, Human rights, Consumer awareness and rights and Right to information.
   Family and Society. Concept of family, Community (PRIs and other community-based organizations) and Society.

# PRACTICAL [AEC-111]

Exercise No.	Exercise Topic	Weightage (%)

15	Citizenship, Constitution and Human Rights: Basic features of constitution of India, Fundamental rights and duties, Human rights, Consumer awareness and rights and Right to information.			
16	Family and Society: Concept of family, Community (PRIs and other community-based organizations) and Society.	5		
	Total=	100		

Course No.: AEC-111 | Course Title: National Cadet Corps-I (NCC-I) | Credit Hrs.: 1(0+1)

### **SYLLABUS**

**Objective:** To integrate and develop qualities of leadership, discipline, character and patriotism and foster the NCC Motto: "Unity and Discipline" among the youth.

#### **PRACTICAL**

- Aims, Objectives, Organization of NCC and NCC Song. DG's Cardinals of Discipline.
- Drill- aim, General words of command, Attention, Stands-at-ease, Stand-easy and Turning.
- Sizing, Numbering, Forming in three ranks, Open and Close order march and Dressing.
- Saluting at the halt, Getting on parade, Dismissing and Falling-out.
- Marching, Length of pace and time of marching in quick/slow time and halt. Side pace, Pace forward and to the rear. Turning on the march and wheeling. Saluting on the march.
- Marking time, Forward march and halt. Changing step, Formation of squad and squad drill.
- Command and control, Organization, Badges of rank, Honours and Awards.
- Nation Building- Cultural heritage, Religions, Traditions and Customs of India. National integration. Values and ethics, Perception, Communication, Motivation, Decision making, Discipline and duties of good citizens. Leadership traits, Types of leadership. Character/Personality development. Civil defence organization, Types of emergencies, Fire fighting, Protection. Maintenance of essential services, Disaster management, Aid during development projects.
- Basics of Social Service, Weaker sections of society and their needs, NGO's and their contribution, Contribution of youth towards Social welfare and Family planning.
- Structure and Function of human body, Diet and Exercise, Hygiene and Sanitation. Preventable
  diseases including AIDS, Safe blood donation, First aid, Physical and mental health. Adventure
  activities. Basic principles of Ecology, Environmental conservation, Pollution and its control.

# PRACTICAL [AEC-111]

Exercise No.	Exercise Topic	Exercise Sub-topics/ Titles	Weightage (%)
1-2	Introduction to NCC	Aims, Objectives, NCC Organizational structure, NCC Song, DG's Cardinals of Discipline.	4
3-5	Drill Basics	Aim of drill, General words of command, Positions of attention, Stand-at-ease and Stand-easy, Turning.	8
6-8	Formation Drills	Sizing, Numbering, Forming in three ranks, Open and Close order march and Dressing.	8
9-11	Saluting Drills and Parade Movements	Saluting at halt, Getting on parade, Dismissing and Falling-out.	8
12-14	Marching Techniques	Length of pace and time of marching in Quick/slow march, Side pace, Forward/rear pace, Turning on the march, Wheeling and Saluting on the march	10
15-17	Squad Formation and Control Marking time, Forward march, Halt, Changing step, Formation of squad and Squad drill.		10
18-19	18-19 Command and Control in NCC Organization, Badges of rank, Honours and Awards.		4
Nation Building and Citizenship; Leadership		Cultural heritage, Religions, Traditions, Customs of India, National integration, Values and Ethics, Communication, Leadership traits, Discipline and Motivation, Character/ Personality Development.	12
Civil Defence and Emergency Management		Types of emergencies, Fire fighting techniques, Maintenance of essential services, Disaster management and Aid during development projects, Civil Defence Organizations.	10
25-26	Social Service and Youth Welfare	Weaker sections of society, Role of NGOs, Youth participation in Social welfare and Family planning	8
27-29	Health, Hygiene and First Aid  Human body structure, Diet, Hygiene, Preventable diseases (including AIDS), Safe blood donation, First aid practices, Mental and Physical health.		10
30-32	Environment and Ecology	Basic Principles of Ecology, Environmental conservation, Pollution and its control, Adventure activities.	8
		Total =	100

Semester	:	I		
Course No.	:	MATH-111*	Credit Hrs. : 2(2+0)	Need-based; G/NG
Course Title	:	<b>Basic Mathematics</b>		
*Gradial Need-based Common Course for B.Tech. (Biotechnology);  *Non-Gradial Need-based Common Course for B.Tech. (Agril. Engg.) & B.Tech. (Food Technology)				

# **SYLLABUS**

## **Objectives:**

- (i) To study the basic principles and functions in mathematics like limits and continuity,
- (ii) To study differentiation and integration,
- (iii) To study matrices and determinants.

#### **THEORY**

#### **Functions:**

Function and types of functions, Limit: Introduction, left-handed and right-handed limits, Algebra of limits, Standard limits. Continuity: Definition of continuity, continuity of algebraic functions. Continuity of trigonometric and exponential functions.

# **Differentiation:**

Differentiation by the first principle, Rules of Differentiation: sum, difference, product and quotient formulae, differentiation using the chain rule, differentiation of functions in parametric and implicit form, logarithmic differentiation, geometrical interpretation of derivative. Successive differentiation, maxima and minima.

# **Integration:**

Definition of indefinite integrals, Integrals of elementary functions (Formulae only), Theorems of integration (without proof), Integration by substitution, integration by partial fractions, integration by parts, Definition of definite Integral with examples, properties of definite integral (without proof).

#### **Matrices and Determinants:**

Definition of determinants, example up to Third order determinant, properties of determinant (statements only), Definition of matrix, types of matrices, Algebra of Matrix (addition, subtraction and multiplication), inverse of matrix, Solution of linear equations by Crammer's rule.

# THEORY [MATH-111]

Lecture No.	Topic	Subtopics/ Key Points	Weightage (%)
1-5	<b>Functions:</b>	Definition of Function, Types of functions	
		Some Basic Functions: Definition and Properties of:	
		Constant Function, Identity Function, Power Function.	
		Polynomial Function, Linear, quadratic and cubic function,	
		Radical Function, Rational Function. Exponential,	
		Logarithmic and Trigonometric Function	
	Limit:	Introduction, Definition of Limit, left-handed and right-	
		handed limits, Algebra of limits	
		Standard limits: Method of Factorization, Rationalization,	
		Limit of Trigonometric, Exponential Logarithmic and	
		Functions. Limit of Infinity	
	Continuity:	Definition of continuity, Continuity of algebraic functions,	
		Continuity of trigonometric and exponential functions.	
6 -15	Differentiation:	Definition, Differentiation by the first principle,	30
		Derivative of Some standard functions (Formulae only),	
		Rules of Differentiation (Sum, Difference, Product and	
		quotient without proof), Differentiation using the chain rule,	
		Differentiation of functions in parametric and implicit form,	
		Logarithmic Differentiation, Successive differentiation,	
		Maxima and minima  Definition of indefinite Integral	
16 -25	Indefinite and	Definition of indefinite Integral,	30
	Definite	Integrals elementary functions (Formulae only)	
	Integration:	Theorems of integration (without proof)	
		Methods of Integration: Integration by Substitution,	
		Integration by parts, Integration by partial fractions	
		Some special integrals formulae only.	
		Definition of definite Integral with examples	
		Properties of definite integral (Without proof)	
26 -32	Determinants	Definition of determinants, Expansion up to third order 25	
	and Matrices:	determinant, Properties of determinant (statements only)	
		Definition of matrix, Order of Matrix, Types of matrices,	
		Algebra of Matrices, Inverse of matrix by elementary	
		transformations, Solution of linear equations by Crammer's	
		rule	
		Total=	100

# **Suggested Readings:**

- 1. NCERT, 2012, Mathematics of Class XII, NCERT, India.
- 2. A Textbook of Mathematics XI and XII (Part I and II) Maharashtra State Board of Secondary and Higher Secondary Education, Pune.
- 3. Sharma RD, 2014, Mathematics of Class XII, Dhanpat Rai Publisher.

Semester	:	I	
Course No.	:	AGEN-111	Credit Hrs. : 4(3+1)
<b>Course Title</b>	:	Crop Production and Protection Technologies	

# **SYLLABUS**

# **Objectives:**

- (i) To enable the students to have basic idea on crop production and protection practices to understand the domain of agricultural sciences,
- (ii) To impart the basic knowledge of the different types of machineries/equipments that can be adopted for the said operations.

#### **THEORY**

#### **AGRONOMY:**

Introduction and scope of Agronomy; Classification of crops; Effect of different weather parameters on crop growth and development; Principles of tillage, tilth and its characteristics; Crop seasons; Time and method of sowing of major field crops, seed rate for important crops; Methods and time of application of manures and fertilizers, fertigation; Basic principles of natural farming, organic farming and sustainable agriculture; Soil-water-plant relationship, crop coefficients, water requirement of crops and critical stages for irrigation; Weeds and their management in crops; Crop rotation, cropping systems, cropping scheme, relay cropping, mixed cropping and intercropping.

#### **SOIL SCIENCE:**

Soil forming processes; Classification and composition of soil, Soil taxonomy orders; Important soil physical properties and their importance; Soil particle distribution; Soil inorganic colloids – their composition, properties and origin of charge; Ion exchange in soil and nutrient availability; Soil organic matter– its composition and decomposition, effect on soil fertility; Soil reaction – acidic, saline and sodic soils; Quality of irrigation water; Essential plants nutrients- their functions and deficiency symptoms in plants; Important inorganic fertilizers and their reactions in soils; Gypsum requirement for reclamation of sodic soils and neutralizing RSC; Liquid fertilizers and their solubility and compatibility.

# **HORTICULTURE:**

Types of Horticultural crops; Sowing and planting times and methods; Seed rate and seed treatment for vegetable crops; Macro- and micro- propagation methods; Types of plant growing structures; Pruning and training; Water requirements and critical stages; Management of orchard; Major pests and diseases of horticultural crops and their management.

#### **PRACTICAL**

**AGRONOMY:** Identification of crops and their varieties, seeds and weeds; Study of different fertilizer application methods and weed control methods; Judging the maturity time for harvesting of crop; Study of seed viability and germination test.

**SOIL SCIENCE:** Identification of rocks and minerals; Examination of soil profile in the field; Determination of bulk density, particle density and porosity of soil; Determination of organic carbon of soil; Identification of nutrient deficiency symptoms of crops in the field; Determination of gypsum requirement of sodic soils.

**HORTICULTURE:** Identification and description of important fruits, flowers and vegetables crops; Study of different garden tools; Preparation of nursery bed; Practices of pruning and training in some important fruit crops; Study of cultural operations for vegetable crops (sowing, fertilizer application, mulching, irrigation and weed control); Seed extraction techniques; Visit to commercial greenhouse/polyhouse.

Syllabus of **B.Tech. (Agril. Engineering)** as per the ICAR - Sixth Deans' Committee Report-2024 Pg **12** of 39

Semester	:	I	
Course No.	:	GAE-111	Credit Hrs. : 4 (3+1)
<b>Course Title</b>	:	Introduction to Agricultural Eng	ineering

# **SYLLABUS**

**Objectives:** To enable the students to have basic idea on different agricultural engineering applications of machinery for different farm operations, post-harvest, technologies on renewable energy, soil and water conservation, irrigation and farm structure and allied areas.

#### **THEORY**

#### FARM MACHINERY AND POWER ENGINEERING:

Importance of Agricultural Mechanization for today's Agriculture; Different sectors of Farm Machinery for employment for Agricultural Engineers; Scope of research and higher studies in Farm Machinery and Power in India and abroad; Farm mechanization needs and strategy, Classification of farm machinery on the basis of unit operations; Principles of selection of machinery for different sizes of land and matching power sources; Different types of equipment for tillage, sowing, planting and transplanting, fertilizer application, weed control, plant protection; Harvesting and threshing equipment for rice, wheat, maize, cotton, sugarcane, fruits, tuber crops and other locally important crops; Functions and capabilities of tractor and power tillers; Introduction to the IC engine systems, fuel and air supply systems, cooling and lubricating systems, and electrical systems in a tractor; Basic parts of a power tiller; Hitching system.

#### RENEWABLE ENERGY ENGINEERING:

Introduction to Renewable Energy Engineering for today's Agriculture; Different sectors of employment in Renewable Energy Engineering; Scope of research and higher studies in renewable energy Engineering in India and abroad. Types of Solar energy collectors; Application of Solar energy: Solar water heating system and Solar dryer; Solar photovoltaic system: components and applications; Wind energy: Working principle of WECS, Types and components of WECS; Biogas production and types of biogas plants.

# SOIL AND WATER CONSERVATION ENGINEERING:

Importance of Soil and Water Conservation Engineering for today's Agriculture; Different sectors of employment in Soil and Water Conservation Engineering; Scope of research and higher studies in Soil and Water Conservation Engineering in India and abroad. Different agronomical measures for control of water erosion, mixed cropping, crop rotation, tillage practices, mulching; Different engineering measures, gully control measures; Use of topographical survey and contour maps; Different types of water harvesting structures.

#### **IRRIGATION AND DRAINAGE ENGINEERING:**

Importance of Irrigation and Drainage Engineering for today's Agriculture; Different sectors of employment in Irrigation and Drainage Engineering; Scope of research and higher studies in Irrigation and Drainage Engineering in India and abroad. Introduction to soil-plant-water relationship; Equipment for measurement of irrigation water viz., weirs, notches, orifices and mouth pieces; Introduction to different surface irrigation methods as border, furrow and check basin, sprinkler, drip irrigation and their different components; Underground water conveyance methods in pipes; Introduction to planning of drainage systems; Introduction to centrifugal pumps and different components.

#### **FARM STRUCTURE ENGINEERING:**

Importance of Farm Structural Engineering for today's Agriculture, Scope of research and higher studies in Farm Structural Engineering and Environment management in India and abroad. Different types of Agriculture structures, Introduction to planning layout of farmsteads, animal houses, poultry houses; Different types of grain storage structures; Greenhouse and its different parts, Low cost protected structures.

# PROCESS AND FOOD ENGINEERING:

Importance of Process and Food Engineering for today's Agriculture; Different sectors of employment in Process and Food Engineering; Scope of research and higher studies Process and Food Engineering in India and abroad. Classification of different types of agricultural commodities as durables, perishables etc.; Moisture content and its importance in grain storage: common reasons of food spoilage, food preservation methods; Different primary operations and their necessity; Methods and equipments used for cleaning, washing, sorting, grading, peeling, size reduction; Different types of traditional and modern storage structures, Storage of perishables commodities; Different types of packaging materials and their suitability for various food products; Basic principles of value addition of food as drying and dehydration, evaporation, thermal processing, refrigerated and frozen storage, Chemical preservation and other novel methods.

# **PRACTICAL**

Study of various implements (tillage, sowing, planting, weeding, fertilizer application); Study of farm implements (pesticide application, harvesting and threshing); Study of various components of tractor and matching implements; Study of various components of power tiller and matching implements. Study of biogas plants and operational parameters, Study of solar energy application systems. Visit to a watershed, Study on various components of sprinkler and drip irrigation. Study on various components centrifugal pump. Visit to a greenhouse with modern irrigation system. Study of various post-harvest operations, study of different food processing equipments, value addition of common crops. Visit to implement manufacturing unit, Visit to mechanized farm, Visit to food processing industry.

# THEORY [GAE-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)			
FARM N	FARM MACHINERY AND POWER ENGINEERING					
1	Importance of Agricultural Mechanization	Importance of Agricultural Machinery for today's Agriculture; Different sectors of Farm Machinery for employment for Agricultural Engineers; Scope of research and higher studies in Farm Machinery and Power in India and abroad	5			
2	Farm Mechanization	Farm mechanization advantages, strategy, Classification of farm machinery on the basis of unit operations; Selection of machinery for different sizes of land and matching power sources				
3	Tillage	Tillage: Types, Tillage machinery, Introduction to M.B. plough, disc plough, subsoiler, harrows, cultivators				
4	Planting	Seed drill, planters, zero till drill, calibration, rice and vegetable transplanter	5			
5	Intercultural Equipments	Fertilizer applicators, types of weeders, uses, intercultural equipments				
6	Spraying Equipments	Sprayers: Manual and battery-operated knapsack sprayer, mist blowers, boom sprayer				
7	Harvesting Equipments	Introduction to harvesting machines for rice, wheat, maize, cotton, sugarcane, fruit crop, tuber crop, sugarcane	5			
8	Threshing Equipments	Introduction to thresher for rice, wheat, maize; Combine harvester				
9	Engine	Introduction to the IC engine: C.I. and S.I. engines, their working principles, engine components their functions, valve operating mechanism, firing order in multi cylinder engine and trouble shooting	5			
10	Engine System	Intake, exhaust system: types of air cleaner, their working, exhaust system Fuel supply system: in tractor, components their functions, carburetor, components, working principle, trouble shooting				

<b>GAE-111</b> .	•••		
11	Tractor systems	Cooling system: types, components and functions.  Lubrication system: types, combination of splash and pressure system, components and function trouble shooting.  Electrical system of tractor: Battery, electrolyte, charging, discharging system: components and functions	5
12	Tractor and Power tiller	Functions and capabilities of tractor and power tiller, Basic parts of a power tiller; Tractor hitching system	
		Sub-Total =	25
RENEV	VABLE ENERGY ENGINEE	CRING	
13	Introduction to Renewable Energy Sources	Importance of renewable energy for today's agriculture; Different sectors of renewable energy for employment for Agricultural Engineers; Scope of research and higher studies in renewable energy in India and abroad.  Definition, Classification, Types, Advantages/limitations and prospectus of renewable energy sources.  Comparison between Conventional (Commercial) and Non-conventional energy (Renewable energy) sources.	5
14	Solar Energy Collector	Working principal and function of solar collector.  Types and Application of solar collectors; Advantages and disadvantages of different solar collectors over each other.	Ü
15	Application of Solar energy	Generalized classifications of solar energy applications; Solar Water Heating System: Working Principle, types, advantages and uses. Solar Drying System: Working principle, Types, advantages and uses.	
16	Solar Photovoltaics Systems	Definition and Principles of photovoltaic effect, Solar cell and semiconductor junction, Basic photovoltaics system for power generation; Applications, advantages and disadvantages of solar photovoltaic system	3
17	Wind Energy Systems	Basic components of wind energy conversion system, Types of wind energy machines; Applications, advantages and disadvantages of wind energy system	

**GAE-111...** 

<b>GAE-111</b>	• • •		
18	Biogas Production and Types	Working, Components, Classification and Types of Biogas plants Comparison of floating gas and fixed dome, Applications of biogas system, Factors affecting biogas generation	2
	1	Sub-Total =	10
SOIL A	ND WATER CONSERVATI	ON ENGINEERING	
19	Importance of Soil and Water Conservation for today's Agriculture	Principles, Benefits, Problems by erosion, causes of erosion, Different sectors of employment in SWCE, Scope of research and higher studies in SWCE in India and Abroad	4
20	Agronomical Measures for Control of Water Erosion Mixed cropping, crop rotation, tillage practices, mulching		
21	Different Engineering Measures; Temporary Gully Control Measures  Single row brusho wood dam, Double row brusho wood dam, Loose rock fill dam, log check dam, netting dam		3
22	Permanent Gully Control Structures  Drop inlet spillway, chute spillway and straight drop spillway (functional uses, adaptability, advantages, limitations of all)		3
23	Survey and Maps  Contour lines, Characteristics of contour lines, use of contour maps and topographical maps		2
24	Different Types of Water Harvesting Structures  Roof harvesting, Runoff harvesting (short term and long-term storage), flood water harvesting.		3
	1	Total =	15
IRRIGA	ATION AND DRAINAGE EN	NGINEERING	
25	Importance and Scope	Importance of Irrigation and Drainage Engineering for today's Agriculture; Different sectors of employment in Irrigation and Drainage Engineering; Scope of research and higher studies in Irrigation and Drainage Engineering in India and abroad.	
	Introduction to Soil-Plant-	Soil-Plant-Water Relationship: Relevant	5
	Water Relationship	Terms/Definitions	J
	Water Relations of Soil	Kinds of soil water, Movement of water into soils, Infiltration, Evaporation and Transpiration (Definitions only)	
26	Measurement of Irrigation Water	Units of measurement of water, Methods of water measurement, Weir and notches (Rectangular, Cipoletti weir, V-notch weir, Orifices, Parshall flume) Mouthpieces	

**GAE-111...** 

27	Surface Irrigation Methods	Methods of irrigation- Border irrigation: Basic details only Check basin irrigation: Basic details only Furrow irrigation: Basic details only			
28	Sprinkler, Drip irrigation and their Different Components	Sprinkler irrigation system: Basics, adaptability, limitations, Types of sprinkler systems: Components of sprinkler system (List of components and their functions only) Drip irrigation system: Basics, Advantages of drip system; Components of drip systems (List of components and their functions only)	5		
29	Underground Water Conveyance Methods in Pipes	Basics, Pipes for underground water distribution systems, Discharge capacity of pipelines			
30	Introduction to Planning of Drainage Systems	Basics of Drainage- Definitions, Water logging- Definition, Causes of water logging, Benefits of Drainage, Drainage coefficient and Subsurface drainage.	5		
31	Introduction to Centrifugal Pumps and Different Components	Basics, Principle of operation of Centrifugal pumps, Centrifugal pump classification, components of centrifugal pump			
	Total =				
FADM	STRUCTURE ENGINEERIN	l	15		
FARM 32	Importance	l	3		
		Importance of Farm Structural Engineering for today's Agriculture, Scope of research and higher studies in Farm Structural Engineering and Environment management in India and			
	Importance	Importance of Farm Structural Engineering for today's Agriculture, Scope of research and higher studies in Farm Structural Engineering and Environment management in India and abroad  Introduction, location, size and arrangement, Defects in traditional houses, Rooms of			
32	Importance  Farmstead Planning  Dairy barn and Poultry	Importance of Farm Structural Engineering for today's Agriculture, Scope of research and higher studies in Farm Structural Engineering and Environment management in India and abroad  Introduction, location, size and arrangement, Defects in traditional houses, Rooms of improved farm house.  Types of Dairy barns, Types of poultry houses	3		
32	Importance  Farmstead Planning  Dairy barn and Poultry housing	Importance of Farm Structural Engineering for today's Agriculture, Scope of research and higher studies in Farm Structural Engineering and Environment management in India and abroad  Introduction, location, size and arrangement, Defects in traditional houses, Rooms of improved farm house.  Types of Dairy barns, Types of poultry houses with drawings  Grain storage methods, requirements of good storage structures, indigenous storage structures- Bukhari, Morai and Kothar structure, Grain bins- cylindrical, Rectangular	2.5		

# **GAE-111...**

42	Representation Representation	Numerical only on conversion of wet and dry basis	_	
41	Size Reduction  Moisture content and its	Method and Equipment Wet and dry basis moisture content;	5	
40	Unit Operation of Fruit and Vegetable Processing	Methods of sorting, grading, washing, peeling of fruits and vegetables		
39	Grain Processing Equipments	Air screen cleaner, Specific gravity separator, Indented cylinder and Disk separator, Spiral separator	5	
37	Agricultural Commodities Unit Operations	Common reasons of spoilage and different preservation methods  Cleaning, sorting, grading		
36	Importance	Importance of Agricultural Processing, Different employment sectors for processing and Food Engineers, Scope of research and higher studies in processing and Food Engineering in India and abroad.  Its classification as durables, perishables, etc.	5	

# PRACTICAL [GAE 111]

Exercise No.	Exercise Title
FARM MACI	HINERY AND POWER ENGINEERING
1	Study of tillage, sowing and planting equipments
2	Study of weeding, fertilizer application, pesticide application equipments
3	Study of harvesting and threshing equipments
4	Study of matching implements of tractor and power tiller
5	Study of various components of tractor and power tiller
6	Study of intake exhaust, lubrication and cooling systems
7	Study of fuel, ignition system and electrical system of tractor
RENEWABL	E ENERGY ENGINEERING
8	Study of various types of biogas plants and operating parameters.
9	Study of various applications of solar energy systems.
SOIL AND W	ATER CONSERVATION ENGINEERING
10	Study of various Soil and Water Conservation measures
IRRIGATION	N AND DRAINAGE ENGINEERING
11	Study on various components of sprinkler and drip irrigation
12	Study on various components centrifugal pump
PROCESSING	G AND FOOD ENGINEERING
13	Determination of moisture content of agricultural produce
14	Value addition of horticultural crops
15	Value addition of food grains
Common for a	all above Departments*
16	Visit to implement manufacturing unit, mechanised farm, Visit to watershed, Visit to a greenhouse with modern irrigation system, Visit to a food processing industry.

Syllabus of **B.Tech. (Agril. Engineering)** as per the ICAR - Sixth Deans' Committee Report-2024 Pg **21** of 39

 Semester
 :
 I

 Course No.
 :
 SWCE-111
 Credit Hrs.
 :
 3(1+2)

 Course Title
 :
 Surveying and Levelling

# **SYLLABUS**

**Objectives:** To enable the students to conduct the survey work for any area and also to prepare layout of engineering structures.

#### **THEORY**

Surveying: Introduction, classification and basic principles; Linear measurements, chain surveying, cross staff survey, compass survey, planimeter; Errors in measurements, their elimination and correction; Plane table surveying, methods, advantages and disadvantages. Levelling, levelling difficulties and error in levelling, contouring, computation of area and volume; Theodolite traversing, introduction to setting of curves; Total station; Introduction to GPS survey, Remote Sensing and GIS use in survey.

#### **PRACTICAL**

Linear measurements using different instruments; Reconnaissance survey in the field; Use of field book; Study on various types of chain used in chain survey and its components; Study of errors in chain surveying; Use of ranging rods and ranging in the field; Obstacles during chaining; Offsets in chain survey; Cross Staff; Survey of an area; Preparation of map; Study on various types of compass; Compass survey of an area; Plotting of compass survey; Plane table surveying and different methods; Study on various types of levels and its components; Setting up of dumpy level in the field; Computation of various methods for RL; Study on Levelling, L section and X sections and its plotting; Measurement of slope in the field; Study on contour and its characteristics; Contour survey of an area and preparation of contour map; Introduction of software in drawing contour; Theodolite surveying; Ranging by Theodolite; Height of object by using Theodolite; Setting out curves by Theodolite; Use of minor instruments; Use of total station, Use of modern computers for surveying.

# **Suggested Readings [SWCE-111]:**

# THEORY [SWCE-111]

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)
1-4	Surveying  Computation of area and volume	Definitions, Object of Survey, Primary Divisions of Survey, Classification and use of survey  Principle of surveying, Measurement, Units of measurements, Methods of locating points, Precision in surveying, Works of the surveyor.  Reconnaissance survey in the field; Principles of Chain Surveying, Triangulation survey, offsets in chain survey, ranging and types of ranging  Chaining, Type of chains used in chain survey and its components, Errors in lengths due to incorrect chain, Numerical on chain and tape corrections  Computation of areas, Computation of earth work volume,	30
6	Instruments for setting right angles	Prizmoidal formula and Numerical, Planimeter Instruments for setting right angles, Cross staff, Prism square and optical square, Obstacles during chaining, Numerical	
7-8	Compass survey	Types and Methods of Traverse survey, Prismatic Compass, Surveyor Compass, Bearing of line, and computation of angles.  Local attraction and numerical, Magnetic declinations, Dip of needles, Plotting of traverse survey, Errors and limitation of compass survey.	25
9-10	Plane Table Surveying	Plane Tabling, Instruments and Accessories. Advantages and Disadvantages, setting and orienting tables,  Methods of Plane tabling, Radiation, Intersection,  Traversing and Resection, Errors in Plane Tabling	
11-13	Levelling	Terms used in Levelling, Types of levels, Levelling staffs, Focusing, Bench Marks, Adjustment of Level.  Principles of levelling, Reduction of levels, Booking of staff reading, Numerical.  Classification of levelling, Differential, Profile, Cross sectioning, effect of curvature and refraction, check levelling, Reciprocal and precise levelling.	25
14	Contouring	Contouring, Characteristics of contours Use of contours, Locating the contours, Interpolation of contours.	
15	Theodolite Traversing	Theodolites, Traversing, Measurement of horizontal and vertical angle, Introduction to setting of curves, Total Survey Stations	20
16	GPS, RS & GIS use in survey	Introduction to GPS, Remote Sensing and GIS use in survey	
		Total=	100

# PRACTICAL [SWCE-111]

Exercise No.	Exercise Title
1	Reconnaissance survey in the field, introduction to different linear measuring instruments and Use of Field Book
2	Study on various types of chain used in chain survey and its components
3	Study of errors in chain survey
4	Study of direct ranging of survey line and Offsets in chain survey
5	Study of indirect ranging of survey line
6	Study on various obstacles or obstructions in Chaining
7	Chain survey of an area by Triangulation using cross staff
8	Plotting of chain survey and computation of area
9	Study of Prismatic Compass and surveyor compass,
10	Open traverses survey of Road or Stream and Plotting
11	Closed Traverse survey of field / building and Plotting
12	Plane Table survey by Radiation Methods
13	Plane Table survey by Intersection Methods
14	Plane Table survey by Traversing Methods
15	Study of different levels, levelling staff and their adjustment
16	To study booking of staff reading to determine the reduced level
17	To study the simple and differential levelling to determine reduced levels
18	To study the profile levelling and determine reduced levelling
19	To study the plotting of profile levelling and compute cutting and filling
20	To study the contour survey of field
21	Plotting of contours, interpolation of contours and determine the slope of field
22	Study the software for drawing of contours
23	Cross sectioning of gully or nala and plotting
24	L-section of a gully or nala and plotting
25	To study the Theodolite, Measurement of vertical and horizontal angle by Theodolite
26	Determine the height of object with Theodolite
27	Setting of curves with Theodolite
28	Study of Total Survey Station and height of object with Total Survey Station
29	Study of Minor Instruments (Abney level, hand level, Box sextant and Clinometers)
30	Study of Planimeter and measurement of area from map
31	Study of GPS and Measuring area with GPS
32	Study of DEM and preparation of contour map in GIS

Semester	:	I	
Course No.	:	FMPE-111	Credit Hrs. : 2(0+2)
<b>Course Title</b>	:	Workshop Technology and Practice	

# **SYLLABUS**

**Objectives:** To expose the students to the basic manufacturing processes involved for production of different machine elements and to facilitate hands-on experience of using these machines.

#### **PRACTICAL**

Introduction about different shops in the workshop; Safety and precautions to be taken in the workshop; Study of different tools used for fitting and different fitting operations; Study of various measuring instruments used for fitting; Exercise in fitting: sawing, filing and right angle fitting of MS flat; Working with complex fitting jobs: operations of drilling, reaming, and threading and with tap dies; Preparation of a paper weight; Study of various carpentry tools, types of wood and their characteristics and working with carpentry tools; Preparation of simple joints in carpentry: cross half lap joint or T-half joint, Mortise and Tenon joint in carpentry; Preparation of dovetail joint in carpentry; Study of welding, types of welding, oxyacetylene gas welding, types of flames, welding techniques and equipment used for gas welding, working with welding equipment; Working with electric arc welding; Equipment and tools, safety and precautions taken in arc welding; Preparation of Butt joint and lap joint with ARC welding; Preparation of Lap and Butt joints using gas welding; Working on a lathe machine and study of different tools used in lathe machine; Exercise on simple turning, step turning in lathe machine; Preparation of job on taper turning, drilling, knurling and threading in lathe machine; Working with different machines in machine shop such as shaper milling machine, etc. and with different tools used in machine shop; Exercise on bending, shaping, etc.; Exercise on Drawing, Punching, Riveting; Making different types of sheet metal joints using G.I. sheets; Practice job on shaper; Changing a round MS rod into square section with a shaper; Exercise on a milling machine such as making a slot, gear tooth forming and indexing.

# **Suggested Readings [FMPE-111]:**

- 1. Chapman W.A.J. 2018. Workshop Technology (Vol. I and II), Arnold Publishers (India) Pvt Ltd. New Delhi.
- 2. Hajra Choudhari, S. K. Roy N, Hajra Choudhary A.K. 2017. Elements of Workshop Technology (Vol. I and II), Media Promoters and Publishers Pvt Ltd, Mumbai
- 3. Khurmi R.S and Gupta J.K. 2018 A Textbook of Workshop Technology. S. Chand and Company Ltd., New Delhi.
- 4. Raghuwanshi B.S. 2016. A Course on Workshop Technology (Vol. I and II), Dhanpat Rai and Sons, New Delhi.

# PRACTICAL [FMPE-111]

Exercise No.	Exercise Title		
1	Introduction about different shops in the manufacturing workshop, study of safety		
	tools and safety precautions/measures		
2	Exercise in fitting shop: sawing, filing		
3	Exercise in fitting shop: right-angle fitting of MS flat		
4	Exercise on operations of drilling, reaming		
5	Exercise on operations of threading and with tap dies		
6	Preparation of a paper weight		
7	Preparation of cross half lap joint or T-half joint in carpentry		
8	Preparation of Mortise and Tenon joint in carpentry		
9	Preparation of dovetail joint in carpentry		
10	Preparation of Butt joint with ARC welding		
11	Preparation of Lap joint with ARC welding		
12	Preparation of Butt joint using gas welding		
13	Preparation of Lap joint using gas welding		
14	Introduction and demonstration on a lathe machine		
15	Exercise on simple turning in lathe machine		
16	Exercise on step turning in lathe machine		
17	Preparation of job on taper turning in lathe machine		
18	Preparation of job on drilling in lathe machine		
19	Preparation of job on knurling in lathe machine		
20	Preparation of job on threading in lathe machine		
21	Introduction and demonstration on shaper machine		
22	Introduction and demonstration on milling machine		
23	Exercise on Bending		
24	Exercise on Shaping		
25	Exercise on Drawing		
26	Exercise on Punching		
27	Exercise on Riveting		
28	Making different types of sheet metal joints using G.I. sheets		
29	Exercise on changing a round MS rod into square section with a shaper		
30	Introduction and demonstration of a slot making with milling machine		
31	Introduction and demonstration of a gear tooth forming		
32	Introduction and demonstration of indexing mechanisms.		

\_\_\_\_

Semester	:	I	
Course No.	:	REE-111	Credit Hrs. : 3(2+1)
<b>Course Title</b>	:	Basic Electrical Gadgets and Instruments	

#### **SYLLABUS**

# **Objectives:**

- (i) To enable the students to take up repair and maintenance of different common electrical gadgets.
- (ii) To acquire the basic knowledge of instruments used for scientific measurements.

#### THEORY

Introduction to different electrical appliances used in agricultural buildings, structures and farm operations; Difference between AC and DC supply system; Introduction to AC fundamentals; AC through series RL, RC, and RLC circuits, parallel AC circuit, series and parallel resonance; Q-factor and bandwidth. Three-phase AC circuit: Concept of balanced three-phase AC circuits, line and phase quantity in star and delta network, power in three-phase circuit, various methods of three phase power measurement like (one wattmeter and two-wattmeter method). Diode and its applications: Rectifier, Clipper, Clamper, voltage multiplier and capacitive filter zener diode as voltage regulator. Transistor and its applications: Bipolar junction transistor, operating point. Various biasing methods, fixed, self-biasing and potential divider biasing method; OP-AMP, Ideal OP-AMP characteristics, Linear and non-linear applications of OP-AMP (adder, subtractor, integrator, active rectifier, comparator). Introduction to digital electronics and logic gates: Basic theorem of Boolean algebra, Combinational logic circuits (basic gates, SOP rule and K-map), binary adder. Principles of general instruments, measurement of displacement, temperature, velocity, force and pressure using different instruments like, strain gauges, load cell, thermistors, thermocouples, pyrometer, linear variable differential transformer (LVDT), capacitive transducers, RTD, instruments for measurement of speed, wind velocity, solar radiation, anemometer, multimeter etc.

#### **PRACTICAL**

# BASIC ELECTRICAL AND ELECTRONICS GADGETS

To prepare an electrical switch board to control two light points, one plug point, one fan point and fuse (House wiring); To prepare an electrical switch board to control two light points using two two-way switch (staircase wiring); To connect and test a fluorescent lamp; To find faults and repair home appliances such as heater, electric iron, fans and mixer-grinder, etc.; To find faults and repair UPS; To measure the power requirement and power factor in a AC single phase series RLC circuit; To measure energy of a single phase AC circuit with the help of ammeter, voltmeter and power factor meter and energy meter; To measure the power consumption in a three-phase circuit using two-wattmeter method.

#### **INSTRUMENTATION**

To prepare a DC power supply unit using diode and filter circuit; To study the Zener diode as voltage regulator circuit; To study transistor characteristics in CE configurations; To verify different logic gates; To measure unknown resistance using Wheatstone bridge; To measure the displacement and to determine the characteristics of LVDT; To measure the displacement using LVDT and potentiometer; To measure the pressure using strain gauge and Bourden tube; To measure the temperature using RTD, thermistors and thermocouple and study their characteristics; To measure the speed, wind velocity, solar radiation etc., using different measuring tools like tachometer, anemometer, pyranometer, multimeter, etc.; To acquaint with different other types of instruments used in agriculture and food processing application

# THEORY [REE-111]

Lecture No.	Topic	Sub-topics/Key Points	Weightage (%)	
1	Brief Introduction of electrical appliances used in: Introduction to different Electrical Appliances used in Agricultural Buildings Structures and Farm Operations. Difference between AC and DC Supply systems.  Brief Introduction of electrical appliances used in: Electrified Dairy Farm, Electrified Fruit and Vegetable Farm, Electrified Livestock Farm, Electrified Poultry Farm, Electrified General Farm, Electrified Farm Shop, Definitions and Concepts of Time period, Frequency, Magnitude, Waveform to differentiate A.C. and D.C.		5	
2-4	Introduction to AC Fundamentals	Generation of Alternating Voltages and Current Equation of Alternating Voltages and Current Cycle, Time Period, Frequency, Amplitude Different Forms of E.M.F equation Phase and Phase Difference, Root Mean-Square (R.M.S) Value and its Analytical Derivation Average Value and its Analytical Derivation Form, Crest or Peak or Amplitude Factor A.C Through Pure Ohmic Resistance, Pure Inductance and Pure Capacitance Alone.	10	
5-6	AC through series RL, RC and RLC Circuits	A.C. Through Resistance and Inductance. Definition and Concept of Power Factor, Active Power, Reactive Power and Apparent Power. A.C. through Resistance and Capacitance A.C. through Resistance Inductance and Capacitance. Examples on A.C. through Resistance and Inductance.		
7	Parallel AC Circuit  Series and Parallel Resonance  Q-factor and Bandwidth	Solving Parallel Circuit by Vector or Phasor Method  Resonance in R-L-C series Circuit and in Parallel Circuit.  Brief concept Q factor and Bandwidth	5	

Continued...

#### **REE-111...**

8-10	Three-phase AC Circuit  Line and Phase Quantity in Star and Delta Network	Concept of balanced three-phase AC circuits Generation of Poly phase Voltage. Phase sequence. Interconnection of Three Phases, Star or Wye Connection, Voltages and Currents in Star or Wye Connection, Delta or Mesh Connections;	10
11	Power in Three- phase Circuit	Voltages and Currents in delta or Mesh Connection  Power Measurement in 3-Phase Circuits, Three wattmeter Method, Two wattmeter Method (Balanced or Unbalanced Load), One Wattmeter Method.	5
12-16	Diode and its Applications	Principal, Types and Uses of Rectifier and Capacitive filter. Principal, Types and Uses of Clipper, Clamper, Voltage multiplier and Zener diode as Voltage regulator	5
17-19	Transistor and its Applications	Working principle of : Bi-polar junction Transistor with CE, CB, CC Operating point; Various biasing methods (viz., fixed, self and potential divider biasing methods).	10
20-22	Operational Amplifier (OP-AMP) and its Application	Basic concept of OP-AMP and its Ideal Characteristics; Linear and Non-linear applications of OP-AMP (adder, subtractor, integrator, active rectifier, comparator)	10
23-25	Introduction to Digital Electronics	Concept and Working of Logic gates.  Basic theorem of Boolean Algebra.  Combinational Logic circuits (Basic gates, Introduction to K-Map binary adder and SOP rule)	10
	Magguring	Principles of General instrumentation system with Block diagram; Electrical measurement of: Displacement [like, Linear variable differential transformer (LVDT), Capacitive transducers, Strain gauge]	10
26-32	Measuring Instrumentation (Transducer and Sensors)	Temperature (Thermistors, Thermocouples, RTD, Pyrometer); Force (Strain gauge, Pressuductor load cell)	5
		Pressure (Strain gauges, Load cell, Capacitive, Potentiometric); Speed (Resonance tachometer, Eddy current Tachometer)	5
		Wind velocity (Anemometer); Solar radiation (Pyranometer).	5
		Total	100

#### PRACTICAL [REE-111]

Exercise No.	Exercise Title	
1	To prepare an electrical switch board to control two light points, one plug point,	
	one fan point and fuse (House wiring).	
To prepare an electrical switch board to control two light points		
	two-way switch (Staircase wiring).	
3	To connect and test a fluorescent lamp.	
4	To find faults and repair home appliances such as heater, electric iron, fans and	
-	mixer-grinder and UPS etc.	
5	To measure the power requirement and power factor in an AC single phase series	
	RLC circuit.	
6	To measure energy of a single-phase AC circuit with the help of ammeter,	
	voltmeter and power factor meter and energy meter.	
7	To measure the power consumption in a three-phase circuit using two-wattmeter	
,	method.	
8	To prepare a DC power supply unit using diode and filter circuit.	
9	To study the Zener diode as voltage regulator.	
10	To study transistor characteristics in CE configurations.	
11	To verify different logic gates.	
12	To measure unknown resistance using Wheatstone bridge.	
13	To measure the displacement and to determine the characteristics of LVDT and	
13	Potentiometer.	
14	To measure the pressure using strain gauge and Bourden tube.	
15	To measure the temperature using RTD, thermistors and thermocouple and study	
15	their characteristics.	
16	To measure the speed, wind velocity, solar radiation etc., using different measuring	
10	tools like tachometer, anemometer, pyranometer, multimeter etc.

- 7. Robert H. Brown, Farm Electrification. Allied Pacific Private Limited Bombay, Indian Edition.
- 8. Singh S K, Industrial Instrumentation and control, third edition, published by Tata McGraw-Hill Companies.

Syllabus of **B.Tech. (Agril. Engineering)** as per the ICAR - Sixth Deans' Committee Report-2024 Pg **31** of 39

#### **SYLLABUS**

#### **Objectives:**

- (i) To acquaint students with the basics of computer applications in Agriculture, multimedia, database management, application of mobile apps and decision-making processes etc.,
- (ii) To provide basic knowledge of computer with applications in Agriculture,
- (iii) To make the students familiar with Agricultural-Informatics, its components and applications in Agriculture and Artificial Intelligence.

#### THEORY

Introduction to Computers, Anatomy of Computers, Memory Concepts, Units of Memory, Operating System: Definition and types, Applications of MS-Office for creating, Editing and Formatting a document, Data presentation, Tabulation and graph creation, Statistical analysis, Mathematical expressions, Database, concepts and types, creating database, Uses of DBMS in Agriculture, Internet and World Wide Web (WWW): Concepts and components. Computer programming: General concepts, Introduction to Visual Basic, Java, Fortran, C/C++, etc. concepts and standard input/output operations. e-Agriculture, Concepts, design and development; Application of innovative ways to use information and communication technologies (IT) in Agriculture, Computer Models in Agriculture: Statistical, weather analysis and crop simulation models, concepts, structure, input-output files, limitation, advantages and application of models for understanding plant processes, sensitivity, verification, calibration and validation, IT applications for computation of water and nutrient requirement of crops, Computer-controlled devices (automated systems) for Agri-input management, Smartphone mobile apps in agriculture for farm advice: Market price, postharvest management etc. Geospatial technology: Concepts, techniques, components and uses for generating valuable agriinformation, Decision support systems: Concepts, components and applications in Agriculture. Agriculture Expert System, Soil Information Systems etc. for supporting farm decisions. Preparation of contingent crop planning and crop calendars using IT tools, Digital India and schemes to promote digitalization of agriculture in India. Introduction to artificial intelligence, background and applications, Turing test. Control strategies, Breadth-first search, Depth-first search, Heuristics search techniques: Best-first search, A\*algorithm, IoT and Big Data; Use of AI in Agriculture for autonomous crop management, and health, monitoring livestock health, intelligent pesticide application, yield mapping and predictive analysis, automatic weeding and harvesting, sorting of produce, and other food processing applications; Concepts of Smart Agriculture, Use of AI in food and nutrition science etc.

#### **PRACTICAL**

Study of computer components, accessories, practice of important DoS Commands, Introduction of different operating systems such as Windows, Unix/ Linux, creating files and folders, File Management. Use of MS-WORD and MS PowerPoint for creating, editing and presenting a scientific document, MS- EXCEL - Creating a spreadsheet, Use of statistical tools, Writing expressions, Creating graphs, Analysis of scientific data, Handling macros. MS-ACCESS: Creating Database, preparing queries and reports, Demonstration of Agri- information system, Introduction to World Wide Web (WWW) and its components, Introduction of programming languages such as Visual Basic, Java, Fortran, C, C++, Hands on practice on Crop Simulation Models (CSM), DSSAT/Crop-Info/Crop Syst/Wofost, Preparation of inputs file for CSM and study of model outputs, computation of water and nutrient requirements of crop using CSM and IT tools, Use of smart phones and other devices in agroadvisory and dissemination of market information, Introduction of Geospatial Technology, Hands on practice on preparation of Decision Support System, Preparation of contingent crop planning, India Digital Ecosystem of Agriculture (IDEA).

#### Tools available for Student for Academic Purpose only: (COMP-111)

- 1. DSSAT (Decision Support System for Agrotechnology Transfer)
  - Purpose: A comprehensive crop modeling tool.
  - Use: Simulates plant growth, development, and yield for various crops under different management and environmental conditions.
  - Download: <a href="https://dssat.net/">https://dssat.net/</a>
- 2. APSIM (Agricultural Production Systems Simulator)
  - Purpose: A powerful plant simulation tool.
  - Use: Models the effects of environmental variables like soil, climate, and management strategies on plant growth and crop yield.
  - Download: <a href="https://www.apsim.info/">https://www.apsim.info/</a>

#### 3. Open Sim Root

- Purpose: A root growth modeling software.
- Use: Helps understand plant root growth processes, interactions with soil, and how they respond to environmental conditions.
- Download: Available as open-source software via research platforms like Git Hub. https://gitlab.com/rootmodels/OpenSimRoot

#### 4. Virtual Plant

- Purpose: A tool for visualizing and modeling plant metabolic and regulatory networks.
- Use: Helps in understanding complex plant processes such as gene regulation, metabolic pathways, and how they respond to environmental conditions.
  - Download: <a href="https://sourceforge.net/projects/virtualplant/">https://sourceforge.net/projects/virtualplant/</a>
- 5. R Studio (with Bioconductor and Plant Modeling Libraries)
  - Purpose: A programming environment for statistical computing.
  - Use: Using plant modeling libraries like plant and photosynthesis, researchers can model plant growth, carbon assimilation, and nutrient cycling.
  - Download: https://posit.co/downloads/

#### 6. WOFOST (World Food Studies)

- Purpose: A plant process and crop growth simulation model developed by the FAO.
- Use: Helps in understanding crop development, photosynthesis, and biomass accumulation under different environmental and management conditions.
- Download: <a href="https://www.wur.nl/en/research-results/research-institutes/environmental-research/facilities-tools/software-models-and-databases/wofost/downloads-wofost.htm">https://www.wur.nl/en/research-results/research-institutes/environmental-research/facilities-tools/software-models-and-databases/wofost/downloads-wofost.htm</a>

#### 7. Green Lab

- Purpose: A plant growth model focused on plant architecture and functional growth processes.
- Use: Simulates plant organ development and growth processes, integrating functional and structural aspects of plant behavior.
- Download: https://greenlab.cirad.fr/GLUVED/html/P3 Tools/Tool simul 003.html

# **ANNEXURE-IV**

(~ of DICC-Circular No. MAUEB/DICC-Circular/New UG Syllabi/420/24; Dtd. 29.11.2024)

New Undergraduate Degree Syllabus of <u>I-Semester</u> of

# **B.Tech.** (BIOTECHNOLOGY)

Finalized & Approved by the DICC as per the

ICAR - SIXTH DEANS' COMMITTEE REPORT

# Course Curriculum of <u>First Semester</u> as per the ICAR-Sixth Deans' Committee Report for the Academic Programmes in <u>BIOTECHNOLOGY</u>

- UG-Certificate in Biotechnology
- UG-Diploma in Biotechnology
- UG-Degree: B.Tech. (Biotechnology)

Dr. Panjabrao Deshmukh Krishi Vidyapeeth, Akola

Vasantrao Naik Marathwada Krishi Vidyapeeth, Parbhani

Dr. Balasaheb Sawant Konkan Krishi Vidyapeeth, Dapoli

Maharashtra Agricultural Universities Examination Board, Pune

Compiled & Submitted by

Dr. Anil A. Kale

Incharge, State-level Biotechnology Centre, MPKV, Rahuri.

**UG Degree Syllabus State Coordinator** 

with

UG Degree Syllabus Discipline Coordinators & DICC - UG Degree Syllabus Core Committee

Submitted to the

**Directors of Instruction Coordination Committee** 

~ w.e.f. AY, 2024-25 ~

# Course Curriculum of <u>First Semester</u> as per the ICAR-Sixth Deans' Committee Report for Academic Programmes in BIOTECHNOLOGY

# **Course Layout**

# **B.Tech.** (Biotechnology)

Semester: I (New) w.e.f. Academic Year: 2024-25

Sr. No.	Course No.	Course Title	Credit Hrs.	Remark
1.	CAC-111	Deeksharambh (Induction-cum-Foundation Course)	2(0+2)	NG (2 Weeks)
2.	AEC-111	National Service Scheme (NSS-I)/ National Cadet Corps (NCC-I)	1(0+1)	
3.	AEC-112	Communication Skills	2(1+1)	
4.	MDC-111	Farming-based Livelihood Systems	3(2+1)	
5.	MATH-111*/ BOT-111**	Basic Mathematics*/ Basic Botany**	2(2+0)	Need-based
6.	BT-111	Molecular Biology	3(3+0)	
7.	BT-112	Introductory Cell Biology	3(3+0)	
8.	BT-113	Fundamentals of Genetics	3(3+0)	
9.	SEC-111	Skill Enhancement Course-I (To be offered from the bouquet of SEC Courses)	2(0+2)	
10.	SEC-112	Skill Enhancement Course-II (To be offered from the bouquet of SEC Courses)	2(0+2)	
	21(14+7) G 2(0+2) NG			

CAC: Common Academic Course, AEC: Ability Enhancement Course,

MDC: Multidisciplinary Course, SEC: Skill Enhancement Course,

G: Gradial, NG: Non-Gradial

**Note**: \*MATH-111 for **PCB** student/ \*\***BOT-111** for PCM student / **PCMB** students may opt any 1 choice-based course viz., MATH-111 or BOT-111 for completion of the mandatory gradial credits.

#### B.Tech. (Biotechnology): First Semester

#### **Course-wise Syllabus with Teaching Schedules**

Semester : I

Course No. : CAC-111 Credit Hrs. : 2 (0+2) NG/ 2 Weeks

Course Title : Deeksharambh (Induction-cum-Foundation Course)

Non-Gradial Common Academic Course for the said UG degree with the activities to be conducted during initial two weeks.

#### **Objectives:**

- (i) To create a platform for students to help for cultural Integration of students from different backgrounds,
- (ii) To know about the operational framework of academic process in university, instilling life and social skills,
- (iii) To create Social awareness, Ethics and Values, Team work, Leadership, Creativity,
- (iv) To identify the traditional values and indigenous cultures along with diverse potentialities both in indigenous and developed scenario.

#### **ACTIVITIES**

- ➤ Introduction/Orientation and Discussions on operational framework of academic process in University/ College, as well as interactions with Academic and Research Managers of the University.
- ➤ Interaction with Alumni, Business Leaders, Perspective Employers, Outstanding Achievers in related fields and people with inspiring life experiences.
- For Group activities to identify the strength and weakness of students and to learn from each other's life experiences.
- > Activities to enhance Cultural Integration of students from different backgrounds.
- Field visits to the relevant fields/ establishments.
- ➤ Sessions on Personality Development (Instilling Life and Social skills, Social awareness, Ethics and Values, Team work, Leadership etc.) and imbibing the Communication skills.

**Note:** The details of the relevant activities will be decided by the parent University in line with the above-mentioned broad activities.

Semester	:	I		
Course No.	:	AEC-111	Credit Hrs. : 1 (0+1)	
Course Title	:	National Service Scheme (NSS-I) / National Cadet Corps (NCC-I)		
Gradial Common Course across all UG Degrees				

Course No.: AEC-111 | Course Title: National Service Scheme-I (NSS-I) | Credit Hrs: 1(0+1)

#### **SYLLABUS**

#### **PRACTICAL**

#### **Introduction and Basic Components of NSS**

- Orientation: History, Objectives, Principles, Symbol, Badge; Regular Programs under NSS.
- Organizational structure of NSS, Code of conduct for NSS volunteers, Points to be considered by NSS Volunteers' awareness about Health.
- NSS program activities. Concept of regular activities, Special camping, Day camps,
  Basis of adoption of village/slums, Conducting survey, Analysing Guiding financial
  patterns of scheme, Youth program/schemes of GOI, Coordination with different
  agencies and maintenance of diary. Understanding youth. Definition, Profile,
  Categories, Issues and Challenges of youth; and Opportunities for youth who is agent of
  the social change.
- Community mobilization. Mapping of community stakeholders, Designing the message as per problems and their culture; Identifying methods of mobilization involving youth-adult partnership. Social harmony and National integration.
- Indian history and culture, role of youth in nation building, Conflict resolution and peace building. Volunteerism and Shramdaan. Indian tradition of volunteerism, its need, importance, motivation and constraints; Shaman as part of volunteerism.
- Citizenship, Constitution, and Human rights. Basic features of constitution of India, Fundamental rights and duties, Human rights, Consumer awareness and rights and Right to information. Family and Society. Concept of family, Community (PRIs and other community-based organizations) and Society.

# **PRACTICAL**

Exercise No.	Exercise Topic/ Title	Weightage (%)
1	Orientation, History, Objectives, Principles, Symbols, Badge	10
2	Regular Programmes under NSS	10
3	Organisational Structure of NSS	10
4	Code of Conduct of NSS Volunteer	10
5	Points to be considered about NSS Volunteers awareness about Health	5
6	NSS Programme Activities- Concept of Regular activities	5
7	NSS Programme Activities- Special Campaign	5
8	NSS Programme Activities- Day Camps	5
0	NSS Programme Activities- Adoption of village,	5
9	Conducting survey, Analysing Guiding financial patterns of scheme	5
10	NSS Programme Activities- Youth programs/schemes of GOI, Coordination with different agencies and maintenance of diary. Understanding youth. Definition, Profile, Categories, Issues and Challenges of youth and Opportunities for youth who is agent of the social change.	5
11	Community Mobilization- Mapping of community stakeholders, Designing the message as per problems and their culture; Identifying methods of mobilization involving youth-adult partnership.	5
12	Community Mobilization-Culture, Social harmony and National integration.	5
13	Indian History and Culture- Role of youth in Nation Building	5
14	Volunteerism and Shramdaan: Indian tradition of volunteerism, its need, importance, motivation and constraints; Shaman as part of volunteerism.	5
15	Citizenship, Constitution and Human Rights: Basic features of constitution of India, Fundamental rights and duties, Human rights, Consumer awareness and rights and Right to information.	5
16	Family and Society: Concept of family, Community (PRIs and other community-based organizations) and Society.	5
	Total =	100

Course No.: AEC-111	Course Title: National Cadet Corps-I (NCC-I)	<b>Credit Hrs.: 1(0+1)</b>
---------------------	----------------------------------------------	----------------------------

#### **SYLLABUS**

**Objective:** To integrate and develop qualities of leadership, discipline, character and patriotism and foster the NCC Motto: "Unity and Discipline" among the youth.

#### **PRACTICAL**

- Aims, Objectives, Organization of NCC and NCC Song. DG's Cardinals of Discipline.
- Drill- aim, General words of command, Attention, Stands-at-ease, Stand-easy and Turning.
- Sizing, Numbering, Forming in three ranks, Open and Close order march and Dressing.
- Saluting at the halt, Getting on parade, Dismissing and Falling-out.
- Marching, Length of pace and time of marching in quick/slow time and halt. Side pace, Pace forward and to the rear. Turning on the march and wheeling. Saluting on the march.
- Marking time, Forward march and halt. Changing step, Formation of squad and squad drill.
- Command and control, Organization, Badges of rank, Honours and Awards.
- Nation Building- Cultural heritage, Religions, Traditions and Customs of India.
   National integration. Values and ethics, Perception, Communication, Motivation,
   Decision making, Discipline and duties of good citizens. Leadership traits, Types of leadership. Character/ Personality development. Civil defence organization, Types of emergencies, Fire-fighting, Protection. Maintenance of essential services, Disaster management, Aid during development projects.
- Basics of Social Service, Weaker sections of society and their needs, NGO's and their contribution, Contribution of youth towards Social welfare and Family planning.
- Structure and Function of human body, Diet and Exercise, Hygiene and Sanitation.
   Preventable diseases including AIDS, Safe blood donation, First aid, Physical and mental health. Adventure activities. Basic principles of Ecology, Environmental conservation, Pollution and its control.

Semester	:	I			
Course No.	:	AEC-112	Credit Hrs. : 2(1+1)		
<b>Course Title</b>	:	<b>Communication Skills</b>			
Gradial Common Course across all UG Degrees					

#### **SYLLABUS**

**Objectives:**(i) To acquire competence in oral, written and non-verbal communication,

- (ii) To develop strong personal and professional communication and
- (iii) To demonstrate positive group communication.

#### **THEORY**

Communication Process: The magic of effective communication; Building self-esteem and overcoming fears; Concept, nature and significance of communication process; Meaning, types and models of communication; Verbal and Non-verbal communication; Linguistic and non-linguistic barriers to communication and reasons behind communication gap/miscommunication. Basic Communication Skills: Listening, Speaking, Reading and Writing Skills; Precis writing/Abstracting/Summarizing; Style of technical communication, Curriculum vitae/resume writing; Innovative methods to enhance vocabulary, analogy questions; Structural and Functional Grammar: Sentence structure, modifiers, connecting words and verbals; Phrases and clauses; Case: subjective case, possessive case, objective case; Correct usage of nouns, pronouns and antecedents, adjectives, adverbs and articles; Agreement of verb with the subject: tense, mood, voice; Writing effective sentences; Basic sentence faults.

#### **PRACTICAL**

Listening and note taking; Writing skills: précis writing, summarizing and abstracting; Reading and comprehension (written and oral) of general and technical articles; Micropresentations and Impromptu Presentations: Feedback on presentations; Stage manners: grooming, body language, voice modulation, speed; Group discussions; Public speaking exercises; Vocabulary building exercises; Interview techniques; Organization of events.

# THEORY [AEC-112]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1	Communication Process: The Magic of Effective Communication  Elements of Communication process such as Communicator, Message, Channel treatment of message, Audience and Audience response.		5
2	Building Self-esteem and Overcoming Fears	Points to build Self-esteem, Build social connections, Encourage yourself, Focus on solutions and Set realistic goals, Strategies to overcome fears, Practice, Visualise Success, Preparation, Know your audience, Seek feedback and Active listening.	5
3		Concept, Nature and Significance of Communication process	10
4		Meaning, Types and Models of communication	10
5	Communication	Verbal and Non-verbal communication, Linguistic and Non-linguistic communication	10
6		Barriers to communication and Reasons behind communication gap/ miscommunication	5
7		Listening, Speaking, Reading, Writing skills	5
8	Basic Communication Skills	Précis writing/ Abstracting/ summarizing- Styles of technical communication, Curriculum Vitae/resume writing	10
9		Innovative methods to enhance vocabulary, analogy questions	5
10		Sentence structure, modifiers, connecting words and verbal; Phrases and Clauses	5
11		Case: Subjective case, Possessive case, Objective case	5
12	Structural and	Correct usage of nouns, Pronouns and Antecedents	5
13	Functional Grammar	Adjectives, Adverbs and Articles	5
14		Agreement of verbs with the subject: Tense, Mood, Voice	
15		Writing effective sentences	5
16		Basic sentence faults	5
		Total =	100

#### PRACTICAL [AEC-112]

Exercise No.	Exercise Topic/ Title		
1	Listening and Note taking		
2	Writing skills- Précis writing		
3	Writing skills- Abstracting		
4	Writing skills- Summarizing		
5	Reading and Comprehension (written and oral) of general and technical articles		
6	Micro-presentations		
7	Impromptu presentations		
8	Feedback on presentations		
9	Stage manners- Grooming		
10	Stage manners- Body language		
11	Stage manners- Voice modulations, speed		
12	Group discussions		
13	Public speaking exercise		
14	Vocabulary building exercises		
15	Interview techniques		
16	Organisation of events

Semester	:	I			
Course No.	:	MDC-111	Credit Hrs. : 3(2+1)		
<b>Course Title</b>	:	Farming-based Livelihood Systems			
Gradial Common Course across all UG Degrees					

#### **SYLLABUS**

**Objectives:** (i) To make the students aware about farming-based livelihood systems in Agriculture,

(ii) To disseminate the knowledge and skills that how farming-based systems can be a source of livelihood.

#### **THEORY**

Status of Agriculture in India and different States, Income of farmers and rural people in India, Livelihood- Definition, Concept and Livelihood patterns in urban and rural areas, Different indicators to study livelihood systems. Agricultural Livelihood Systems (ALS): Meaning, approach, approaches and framework, Definition of farming systems and farmingbased livelihood systems, Prevalent Farming systems in India contributing to livelihood. Types of traditional and modern farming systems. Components of farming system/ farmingbased livelihood systems: Crops and cropping systems, Livestock, (Dairy, Piggery, Goatry, Poultry, Duckry etc.), Horticultural crops, Agroforestry systems, Aquaculture, Duck/Poultrycum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.; Small, medium and large enterprises including value chains and secondary enterprises as livelihood components for farmers, Factors affecting integration of various enterprises of farming for livelihood. Feasibility of different farming systems for different agro-climatic zones, Commercial farming-based livelihood models by NABARD, ICAR and other organizations across the country; Case studies on different livelihood enterprises associated with the farming. Risk and success factors in farming-based livelihood systems, Schemes and programs by Central and State Governments; Public and Private organizations involved in promotion of farming-based livelihood opportunities. Role of farming-based livelihood enterprises in 21st Century in view of circular economy, green economy, climate change, digitalization and changing lifestyle.

#### **PRACTICAL**

Survey of farming systems and agriculture-based livelihood enterprises, Study of components of important farming-based livelihood models/systems in different agro-climatic zones, Study of production and profitability of crop based, livestock based, processing-based and integrated farming-based livelihood models, Field Visit of innovative farming system models. Visit of Agri-based enterprises and their functional aspects for integration of production, processing and distribution sectors and Study of agri-enterprises involved in industry and service sectors (Value Chain Models), Learning about concept of project formulation on farming-based livelihood systems along with cost and profit analysis, Case study of Start-Ups in agri-sectors.

# THEORY [MDC-111]

Lecture No.	Торіс	Sub-topics/Key Points	Weightage (%)
1	Status of Agriculture in India	Historical background, Current status, Role of Agriculture in Indian Economy	4
2	Status of Agriculture in Different States	State-wise scenario, Major crops, Regional diversity	4
3	Income of Farmers and Rural People in India	Factors affecting income, Rural-urban income gap, Government initiatives	4
4	Livelihood: Definition, Concept, and livelihood Patterns in urban and rural areas	Livelihood-Definition and its Concept, Urban vs Rural livelihood patterns, Sources of income	4
5	Different Indicators to Study Livelihood Systems	Economic, Social and Environmental indicators, Measuring livelihood resilience	4
6	Agricultural Livelihood Systems (ALS): Meaning and Approaches	Definition, Significance of ALS, Integrated farming systems, Approaches	4
7	ALS Framework and Case studies	Framework for ALS, Case studies in India	4
8	Definition of Farming Systems and farming based Livelihood Systems	Definition and Role of farming systems in rural livelihoods, Examples of systems	4
9	Prevalent Farming Systems in India contributing to livelihood	Traditional vs. Modern farming systems, Regional differences	4
10	Types of Traditional and Modern Farming Systems	Types; Differences; Strengths, Limitations, Case studies	4
11	Components of farming system/farming-based livelihood systems - Crops and Cropping Systems	Components, Crop diversification, Cropping pattern, Mixed cropping, Importance for rural livelihoods	4
12	Livestock-based Farming Systems	Importance and Management of dairy, piggery, poultry, goatry, duckry, etc.	4
13	Horticultural Crops and Livelihoods	Role of fruits, vegetables and spices in rural income generation	4
14	Agroforestry Systems	Agroforestry- Definition, Combining trees and crops, Agroforestry models in India	2
15	Aquaculture as a Livelihood System	Importance of Aquaculture, Integrated systems (e.g. Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.)	4
16	Challenges in Aquaculture- based Systems	Feasibility, Government support and Market access	2

Continued...

#### *MDC-111...*

17	Small Enterprises in	Role of small enterprises, Value addition,	2
17	Farming	Local processing	Δ
18	Medium and Large Enterprises in Farming	Value chains, Secondary enterprises as livelihood components for farmers, Agri-processing.	2
19	Factors affecting Integration of various enterprises of farming for livelihood	Technology, Market access, Credit and infrastructure challenges etc.	4
20	Strategies for Enterprise Integration	Successful integration, Government policies, Examples.	2
21	Overview of Agro-Climatic Zones in India	Characteristics of different zones and their agricultural potential.	2
22	Feasibility of different Farming Systems for different Agro-Climatic Zones	Suitable farming systems for different zones, Climate adaptation.	2
23	Commercial Farming Based Livelihood Models by NABARD, ICAR and other organizations across the country	Role of NABARD, ICAR and other Organizations in promoting commercial models, Successful cases.	4
24	Case studies on different Livelihood Enterprises associated with farming	Analysis of successful enterprises, Dairy Cooperatives etc.	4
25	Risk Factors in Farming- based Livelihood Systems	Climate, Market fluctuations, Input costs; Mitigation strategies etc.	4
26	Success Factors in Farming-based Livelihood Systems	Innovation, Market access, Government support, Social capital etc.	2
27	Schemes and Programmes by the Central Government	Overview of schemes like, PM-KISAN, National Rural Livelihood Mission.	2
28	Schemes and programmes by State Governments	State-specific programs promoting rural livelihoods, Case examples.	2
29	Role of Private Sector in Livelihood Promotion	Public-Private Partnerships, Role of private agribusiness.	2
30	Public-Private Partnerships in Agriculture	Successful collaborations in rural development and farming systems	2
31	Farming-based Livelihoods in the 21st Century	Circular economy, Green economy, Climate change, Sustainability.	2
32	Impact of Digitalization and Changing Lifestyles	Technology in Agriculture, Future prospects for rural livelihoods.	2
		Total =	100

# PRACTICAL [MDC-111]

Exercise	Exercise Topic	Exercise Sub-topics/ Titles
No.	Company of Forming Systems and	
1	Survey of Farming Systems and	Methods of data collection;
1	Agriculture-based Livelihood	Field survey techniques;
	Enterprises  Study of Components of	Preparing reports on surveyed farms.
	Study of Components of	Commonanta Cuan livratade fishame aguafanasture
2	Farming-based Livelihood	Components: Crop, livestock, fishery, agroforestry;
	Models in Different Agro- Climatic Zones	Identifying models suited to specific zones.
2	Study of Production and	Analysis of input-output relations;
3	Profitability of Crop-based	Identifying profitable crops
	Models	T' ( ) L ( C )
4	Study of Livestock-based	Livestock systems: Dairy, poultry, goat farming;
	Models	Profitability and market access
5	Study of Processing-based	Value addition in agriculture;
	Models	Studying small-scale food processing units
6	Study of Integrated Farming-	Study of crop-livestock-aquaculture integration;
	based Models	Synergies and challenges
7	Field Visit to Innovative	Visit to farms using modern technologies;
-	Farming System Models	Documenting practices
8	Visit to Agri-based Enterprises	Enterprises involved in input supply or value addition
	Study of Functional Aspects:	addition
9	Integration of Production,	Backward and forward linkages; Assessing supply

#### **Suggested Readings [MDC-111]:**

- 1. Ashley, C., & Carney, D. (1999). Sustainable Livelihoods: Lessons from Early Experience. Department for International Development, London, UK.
  - **Relevance**: This book explores sustainable livelihood frameworks, which are key to understanding livelihood patterns and rural income systems.
- 2. **Agarwal, A., & Narain, S.** (1989). Towards Green Villages: A Strategy for Environmentally Sound and Participatory Rural Development. Centre for Science and Environment, New Delhi, India.
  - o **Relevance**: Provides strategies for participatory rural development, focusing on environmental sustainability—a core concept in farming systems.
- 3. Carloni, A. (2001). Global Farming Systems Study: Challenges and Priorities to 2030 Regional Analysis: Sub-Saharan Africa. FAO, Rome, Italy.
  - **Relevance**: Offers insights into global farming system challenges, with lessons that can be adapted for Indian contexts in agricultural development.
- 4. **Dixon, J., Gulliver, A., & Gibbon, D.** (2001). Farming Systems and Poverty: Improving Farmers' Livelihoods in a Changing World. FAO & World Bank, Rome & Washington, DC.
  - o **Relevance**: Focuses on farming systems' role in poverty alleviation and rural livelihood improvement.
- 5. **Evenson, R.E.** (2000). Agricultural Productivity and Production in Developing Countries. In FAO, The State of Food and Agriculture. FAO, Rome, Italy.
  - **Relevance**: Discusses agricultural productivity, a critical factor in sustainable farming and improved livelihoods.
- 6. **Bhatt, B.P.,** et al. (ICAR Research Complex for Eastern Region). Livelihood Improvement of Underprivileged Farming Community: Experiences from Bihar. Patna, Bihar.
  - **Relevance**: Case studies on improving livelihoods in rural India, relevant to learning about region-specific agricultural interventions.
- 7. **Panwar** et al. (2020). Integrated Farming System Models for Agricultural Diversification, Enhanced Income, and Employment. Indian Council of Agricultural Research, New Delhi.
  - **Relevance**: Provides models for agricultural diversification and income enhancement, which align with farming system topics.
- 8. **Reddy, S.R.** (2016). Farming System and Sustainable Agriculture. Kalyani Publishers. New Delhi.
  - o **Relevance**: Covers sustainable agriculture principles and farming system models, essential for sustainable livelihood systems.
- 9. **Singh, J.P.** *et al.* (2016). Region Specific Synthesized Integrated Farming System Models for Improved Production, Profitability and Nutrition (Series-1). Bulletin, ICAR-Indian Institute of Farming Systems Research, Modipuram, Meerut (U.P.).
  - **Relevance**: Discusses integrated farming models tailored to different agro-climatic regions of India, essential for practical learning.
- 10. Walia, S.S., & Walia, U.S. (2020). Farming System and Sustainable Agriculture. Scientific Publishers, Jodhpur, Rajasthan.
  - o **Relevance:** Provides insights into sustainable agricultural practices and integrated farming systems with regional focus.

Semester	:	I	
Course No.	:	MATH-111*	Credit Hrs.: 2(2+0) Need-based; G/NG
<b>Course Title</b>	:	<b>Basic Mathematics</b>	
*Non Cradis			Course for <b>B.Tech.</b> ( <b>Biotechnology</b> ); <b>B. Tech.</b> (Agril, Engg.) & B. Tech. (Food Technology)

#### **SYLLABUS**

#### **Objectives:**

- (i) To study the basic principles and functions in mathematics like limits and continuity,
- (ii) To study differentiation and integration,
- (iii) To study matrices and determinants.

#### **THEORY**

#### **Functions**:

Function and types of functions, Limit: Introduction, left-handed and right-handed limits, Algebra of limits, Standard limits. Continuity: Definition of continuity, continuity of algebraic functions. Continuity of trigonometric and exponential functions.

#### **Differentiation:**

Differentiation by the first principle, Rules of Differentiation: sum, difference, product and quotient formulae, differentiation using the chain rule, differentiation of functions in parametric and implicit form, logarithmic differentiation, geometrical interpretation of derivative. Successive differentiation, maxima and minima.

#### **Integration:**

Definition of indefinite integrals, Integrals of elementary functions (Formulae only), Theorems of integration (without proof), Integration by substitution, integration by partial fractions, integration by parts, Definition of definite Integral with examples, properties of definite integral (without proof).

#### **Matrices and Determinants:**

Definition of determinants, example up to Third order determinant, properties of determinant (statements only), Definition of matrix, types of matrices, Algebra of Matrix (addition, subtraction and multiplication), inverse of matrix, Solution of linear equations by Crammer's rule.

#### THEORY [MATH-111]

	Continuity:	Definition of continuity, Continuity of algebraic functions, Continuity of trigonometric and exponential functions.	l	
6 -15	Differentiation:	Definition, Differentiation by the first principle, Derivative of some standard functions (Formulae only), Rules of Differentiation (Sum, Difference, Product and quotient without proof), Differentiation using the chain rule, Differentiation of functions in parametric and implicit form, Logarithmic Differentiation, Successive differentiation, Maxima and minima	30	
16 -25	Indefinite and Definite Integration:	Definition of indefinite Integral, Integrals elementary functions (Formulae only) Theorems of integration (without proof) Methods of Integration: Integration by Substitution, Integration by parts, Integration by partial fractions Some special integrals formulae only. Definition of definite Integral with examples Properties of definite integral (without proof)	30	
26 -32	Determinants and Matrices:	Definition of determinants, Expansion up to third order determinant, Properties of determinant (Statements only) Definition of matrix, Order of Matrix, Types of matrices, Algebra of Matrices, Inverse of matrix by elementary transformations, Solution of linear equations by Crammer's rule	25	
		Total=	100	

#### **Suggested Readings:**

- 1. NCERT, 2012, Mathematics of Class XII, NCERT, India.
- 2. A Textbook of Mathematics XI and XII (Part I and II) Maharashtra State Board of Secondary and Higher Secondary Education, Pune.
- 3. Sharma RD, 2014, Mathematics of Class XII, Dhanpat Rai Publisher.

\_\_\_\_

Semester	:	I				
Course No.	:	BOT-111**	Credit Hrs.	:	2(2+0)	Need-based; G/NG
<b>Course Title</b>	:	Basic Botany	•			

\*\*Need-based Common Course among 3 UG Degrees:

B.Tech. (Biotech.) - Gradial / B.Sc. (Hons.) A.B.M. - Gradial / B.Tech. (Food Tech.) - Non-Gradial

#### **SYLLABUS**

**Objectives:** i. To study the basic taxonomy and classification of plants,

ii. To study the features of plant kingdom and morphology,

iii. To study the internal structures of plants.

#### **THEORY**

Plant Kingdom and Features of each group. Plant taxonomy, Systems of classification. Morphology, Modifications and Functions of Root, Stem, Leaf, Flower and Inflorescence. Pollination and Fertilization. Fruit types. Structure of dicot and monocot seed, and seed germination. Cell structure. Chromosome, DNA and Genes. Cell and tissue types. Internal structure of root, stem and leaf. Characteristics and economic importance of Poaceae, Brassicaceae, Fabaceae, Malvaceae, Rutaceae, Rosaceae, Asteraceae and Solanaceae families.

#### TEACHING SCHEDULE

#### THEORY [BOT-111]

Lecture No.	Topics Sub-topics/ Key Points		Weightage (%)
1-3	Plant Kingdom and Features:	Classification of Plant Kingdom (Major plant groups: Bryophytes, Pteridophytes, Gymnosperms, and Angiosperms.) Key distinguishing features/ characteristics of each group with examples. Plantae Kingdom.	8
4-5	Plant Taxonomy and Systems of Classification:	Binomial nomenclature and other systems of classification (in brief)	5
6-7	Plant Cell and Tissue Types:	Basic Structure of a Plant Cell and Tissue, Types of Plant Cells and Tissues; Plant Cell Functions.	8
8-9	Chromosome:	Definition and Overview, Chemical Composition; Chromosome Morphology, Types of Chromosomes.	8

Continued...

#### **BOT-111...**

31-32	Asteraceae and Solanacea	ae	4	
29-30	Rutaceae and Rosaceae			
27-28	Fabaceae and Malvaceae			
25-26	Poaceae and Brassicaceae		4	
	onomy-Classification; Ch s/ Examples of following I	aracteristics and Economic Importance; Families viz.,		
23-24	Seed Germination:	seed germination	5	
21-22	Structures of Monocot and Dicot Seeds:	Structure, Diagrams, Differences  Definitions, Types, Differences and Stages of	5	
20	Fruits:	Types of fruits with examples	3	
17-19	Leaf, Flower and Inflorescence:Morphology, Modifications with examples and Functions			
15-16	Root and Stem:  Morphology, Modifications with examples and Functions			
13-14	Pollination and Fertilization:  Definitions/Terminology, Types, Agents of pollination, Processes/Events, Significances, Barriers to Fertilization, Differences between their types.		10	
12	Genes:	Definitions (Gene, Allele, Genotype, Phenotype, Exon, Intron, Codon) and Historical Overview; Structure: Basic layout of a gene- (Exon, Intron, etc.); Types of genes, Codons (Start/ Stop).	8	
10-11	DNA:	Brief historical overview of DNA discovery, Watson-Crick model of DNA, Chemical composition, Components of a nucleotide, Structures of Purines and Pyrimidines.	8	

#### **Suggested Readings [BOT-111]:**

- 1. Bendre AM and Kumar A, 1999, Textbook of Practical Botany. Vol. 2, 7<sup>th</sup> Edn, Rastogi Publications.
- 2. Bendre AM and Pande PC, 2009, Introduction to Botany, Rastogi Publications.
- 3. Bhatia KN and Tyagi MP, 2020, Elementary Biology. A Truemen Publication.
- 4. David M Hillis, H Craig Heller, Sally D Hacker, David W Hall, David E Sadava, 2020. (eBook) Life: The Science of Biology, 12<sup>th</sup> Edn, Sunderland Publication.
- 5. Dutta AC, 1995, A Class-Book of Botany, 16<sup>th</sup> Edn, Oxford University Press.
- 6. NCERT, 2021. Biology of Class XI. NCERT, India.
- 7. Pande PC and Jain DK, 2022, A Textbook of Botany Angiosperm. S. Chand Publications.

Semester	:	I	
Course No.	:	BT-111	Credit Hrs : 3(3+0)
<b>Course Title</b>	:	Molecular Biology	

#### **SYLLABUS**

#### **Objectives:**

- (i) To study the principles and techniques of Molecular Biology.
- (ii) To study the Central dogma of life.
- (iii) To study the tools in Molecular Biology.

#### **THEORY**

History of Molecular Biology. Central Dogma of Life. Structures of DNA and RNA. Gene structure and function. DNA replication and transcription. Genetic code and translation. Structure of prokaryotic and eukaryotic nuclear, and organelle genomes. Gene regulation in prokaryotes. *Lac* Operon concept and *Tryp* Operon concept. Introduction to Microbial Genetics; Conjugation, transformation and transduction. Tools in Molecular Biology. Role of enzymes in Molecular Biology. Principles of Polymerase Chain Reaction and Electrophoresis.

#### **TEACHING SCHEDULE**

#### THEORY [BT-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)		
	Unit-I				
1	History of Molecular Biology	Concept, Historical evidences and prospects	2		
2-3	Central Dogma of Life	Concept Evidences for DNA as the genetic material- the transformation experiments.	6		
4-7	Structures of DNA and RNA	History, Watson and Crick model of DNA, Structure of DNA and RNA; its types and function of nucleic acids (DNA and RNA).	6		
8-9	Gene Structure and Function	Gene: Gene concept, Unit of function, One gene - one enzyme hypothesis	3		
10-14	DNA Replication	Outline of DNA replication, Meselson and Stahl experiment, Mechanism of DNA replication in prokaryotes and eukaryotes.	8		
15-17	Transarintian	Prokaryotic and Eukaryotic transcription.	6		
18-19	Transcription	Post-transcriptional modifications mechanism.	3		

Continued...

#### BT-111...

20-21	Genetic Code	Amino acids involved in Protein synthesis, Characteristics of Genetic code <i>viz</i> ; Triplet code, Non-overlapping, Comma less, Polarity, Codons and anticodons, Initiation codons, Termination codons, Degenerate and universal, Wobble hypothesis.	4
22-24	To a selection	Prokaryotic and Eukaryotic translation	6
25-26	- Translation	Post-translational modification mechanism	2
		Unit-II	
27-29	Prokaryotes and Eukaryotes Nuclear and Organelle Genomes	Genome organization in Prokaryotes and Eukaryotes, Special features of eukaryotic gene structure and organization, Genome organization of mitochondria and chloroplast.	6
30-31	Gene Regulation in Prokaryotes	Concept of Operon, <i>Lac</i> Operon and <i>Tryptophan</i> Operon.	6
32-34	Introduction to Microbial Genetics	Scope and development, Recombination in bacteria and viruses, Conjugation, Transformation, Transduction- generalized and specialized.	8
		Unit-III	
35-36	Tools in Molecular Biology	Types, nomenclature, characteristics and uses of restriction endonucleases	6
37-38	Role of enzymes/ DNA Modifying Enzymes in Molecular Biology	Nuclease, Ligases, Polymerase, Topoisomerase, Alkaline phosphatase etc.	4
39-41	Vectors	Concept, Properties and Vectors i.e. Plasmid (pBR 322, pUC 18/19, Bacteriophage and Cosmid.	8
42-43		Construction of Genomic and c-DNA Libraries.	4
44-46	Principles of Polymerase Chain Reaction	Concept, Components, Procedure and Applications of PCR.	7
47-48	Principles of Electrophoresis	Principles and its Types <i>viz</i> ; SDS-PAGE, Agarose gel and 2D Electrophoresis.	5
		Total=	100

#### **Suggested Readings [BT-111]:**

- 1. Lewin B, 2017, Gene XII, Oxford University Press.
- 2. Cooper GM and Hausman RE, 2018, The Cell: A Molecular Approach. Sinauer Associates Inc,  $8^{\text{th}}$  Edn.
- 3. Nelson DL and Cox MM, 2017, Lehninger Principles of Biochemistry, 7<sup>th</sup> Edn, W. H. Freeman.
- 4. Satyanarayana U and Chakrapani U, 2021, Essentials of Biochemistry, Elsevier.

•

Semester	:	I	
Course No.	:	BT-112	Credit Hrs. : 3(3+0)
<b>Course Title</b>	:	Introductory Cell Biology	

#### **SYLLABUS**

#### **Objectives:**

- (i) To understand the structures and purposes of basic components of prokaryotic and eukaryotic cells, especially macromolecules, membranes and organelles.
- (ii) To understand how these cellular components are used to generate and utilize energy in cells.
- (iii) To understand the cellular components underlying mitotic cell division.
- (iv) To apply the basic knowledge of cell biology to selected examples of changes or losses in cell function that include responses to environmental or physiological changes, or alterations of cell function brought about by mutation.

#### **THEORY**

Origin and evolution of cell. Introduction to microscopy. Sub-cellular structure of prokaryotic and eukaryotic cells. Membrane structure and function: Plasma membrane, cell wall and extracellular matrix. Structural organization and function of intracellular organelles and organelle biogenesis. Nucleus, Mitochondria, Endoplasmic reticulum, Golgi apparatus, Lysosomes, Peroxisomes, Plastids and Vacuoles. Structure and function of the cytoskeleton and its role in motility. Cell membrane transport. Introduction to cell signaling. Cell growth, Cell cycle and its control. Cell death and cell renewal.

#### **Suggested Readings [BT-112]:**

- 1. Alberts B, Johnson A, Lewis J, Raff M, Roberts K and Walter P. 2008. Molecular Biology of the Cell. 5<sup>th</sup> Ed. Garland Science/ Taylor and Francis Group.
- 2. Lodish H, Berk A, Kaiser CA, Krieger M, Bretscher A, Ploegh H, Amon A & Scott MP. 2012. Molecular Cell Biology. WH Freeman.
- 3. Sadava DE. 1993. Cell Biology: Organelle Structure and Function. Jones and Bartlett Publishers
- 4. Verma PS and Agarwal VK, 2016, Cell Biology, Genetics, Molecular Biology, Evolution and Ecology. S Chand and Sons.
- 5. Cooper GM and Hausman RE, 2018, The Cell: A Molecular Approach. Sinauer Associates Inc.

# THEORY [BT-112]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
	Unit-I		
1-2	Origin and Evolution of Cell	<ul><li>a. Evolution of molecules and first cell</li><li>b. Evolution from Prokaryotes to Eukaryotes</li><li>c. Evolution of single cells to multicellular organisms</li><li>d. Cell theory</li></ul>	4
3-4		Principles and Applications of ~ a. Light microscopy- b. Compound microscopy-	4
5-8	Introduction to Microscopy	Principles and Applications of ~  c. Phase contrast microscopy d. Dark-field microscopy e. Fluorescence microscopy f. Differential interference microscopy g. Confocal laser scanning microscopy (CLSM) h. Electron microscopy	6
9-11	Sub-cellular Structure of Prokaryotic and Eukaryotic Cells	<ul><li>a. Sub-cellular structure of prokaryotic cells</li><li>b. Sub-cellular structure of eukaryotic cells</li><li>c. Differences between Prokaryotic and Eukaryotic cells</li></ul>	4
12-14	Membrane Structure and Function - Plasma membrane	<ul> <li>a. Origin of plasma membrane</li> <li>b. Chemical composition of Plasma membrane (lipids, proteins, carbohydrates)</li> <li>c. Different models of plasma membrane structure</li> <li>d. Functions of plasma membrane</li> </ul>	8
15-17	Cell wall and Extracellular matrix	<ul> <li>a. Cell wall composition and structure: Prokaryotic and Eukaryotic</li> <li>b. Functions of cell wall</li> <li>c. Cell-cell junctions, cell adhesion and extracellular matrix.</li> </ul>	4
18-20	Structural Organization;	<ul><li>a. Structural organization and function of intracellular organelles and organelle biogenesis</li><li>b. Structure and Functions of Nucleus</li></ul>	6
21-22	Functions of	Structure and Functions of Plastids	8
23-24	Intracellular	Structure and Functions of Mitochondria	0
25-26	Organelles and Organelle Biogenesis:	Structure and Functions of Endoplasmic reticulum Structure and Functions of Golgi apparatus	8
		Structure and Functions of Lysosomes, Peroxisomes, Vacuoles.	2

#### BT-112...

		Unit-II	
27-28	Structure and Functions of	a. Origin of cytoskeleton     b. Cytoskeleton structure- Microtubules,     Microfilaments and Intermediate filaments	4
29-30	Cytoskeleton and its Role in motility	c. Cilia and centrioles     d. Function of cytoskeleton and its role in motility	4
31-34	Cell Membrane Transport	<ul> <li>a. Principles of membrane transport</li> <li>b. Active transport and its types</li> <li>c. Passive transport and its types</li> <li>d. Transporter, Channels: Types and function</li> </ul>	8
35-39	Introduction to Cell Signaling	<ul> <li>a. General principles of signaling</li> <li>b. Stages of cell signaling</li> <li>c. Types of cell signaling</li> <li>d. Signaling molecules</li> <li>e. Receptor and its types</li> <li>f. Functions of cell surface receptors</li> </ul>	10
40-41		a. Overview of Cell cycle	4
42-43	Cell Growth, Cell Cycle and its	<ul><li>b. Mitosis and Cytokinesis</li><li>c. Meiosis</li></ul>	4
44-45	Control	d. Components of cell cycle control system e. Regulation of cell cycle	4
46-47	Call Dooth I	a. Programmed cell death/ Apoptosis	4
48	Cell Death and Cell Renewal	b. Cell renewal: stem cells and maintenance of adult tissues	4
	•	Total =	100

Semester	:	I	
Course No.	:	BT-113	Credit Hrs. : 3(3+0)
Course Title	:	<b>Fundamentals of Genetics</b>	

# **Objectives:**

- i. To study the history of Genetics,
- ii. To study the principles of inheritance and variation,
- iii. To study chromosomes and cell division,
- iv. To study the genetic basis of traits.

# **THEORY**

History of Genetics. Mendel's principles and rediscovery. Cell division. Chromosomes structure and function. Chromosomal theory of inheritance. Sex-linked, sex-limited and sex-influenced inheritance. Sex determination and sex differentiation. Multiple allelism. Linkage and crossing-over. Gene-gene interaction. Genetic analysis in prokaryotes and eukaryotes. Extra chromosomal inheritance. Mutations. Hardy-Weinberg law. Quantitative inheritance. Genetic basis of evolution. Introduction to Human Genetics.

# **Suggested Readings (BT-113):**

- 1. Singh B. D., Fundamentals of Genetics, Kalyani Publication, New Delhi.
- 2. Phundan Singh, Elements of Genetics, Kalyani Publication, New Delhi.
- 3. Gardner E. J., Simmons M. J., Snustad D. P., 1991, Principle of Genetics, Wiley India (P) Ltd.
- 4. Brah G. S., 2014, Animal Genetics: Concepts and Implications, 2<sup>nd</sup> Edn., Kalyani Publication, New Delhi.

# THEORY [BT-113]

Lecture No.	Topic	Subtopics/ Key Points	Weightage (%)	
Unit-I				
1-2	History of Genetics	Pre-Mendelian, Mendelian and Post-	4	
1-2	History of Genetics	Mendelian era		
		Law of dominance, Law of segregation,		
3-5	Mendel's Principles and	Law of independent assortment,	4	
	Rediscovery	Reasons of Mendel's success and		
		Mendelian deviations		
. 0	G H D: · ·	Mitosis definition, Stages of mitosis and		
6-9	Cell Division	Importance of mitosis, Meiosis definition,	4	
		Stages of meiosis and Significance of meiosis		
10		Morphological structure,	4	
		Chemical composition and function		
	CI St.	Models of chromosomes structure:		
	Chromosome Structure	Multi-stranded model, Folded fiber model and		
11-12	and Function	Nucleosome solenoid model.	4	
		Special chromosomes:		
		Lampbrush chromosome, Salivary gland		
	Character of a real Theorem	chromosome or Giant chromosome.		
13	Chromosomal Theory of Inheritance	Chromosomal theory of inheritance	4	
		Car linked Car limited and		
14-16	Sex-linked, Sex-limited and Sex-influenced	Sex-linked, Sex-limited and Sex-influenced inheritance:	4	
14-10	inheritance	Definitions, Brief explanations, Examples.	4	
	Sex Determination and	Sex determination and Sex differentiation-		
17-18	Sex Determination and Sex Differentiation	Definitions, Brief explanations, Examples.	4	
	Bea Differentiation	Unit-II		
		Multiple alleles: Def'n, Characters of		
19	Multiple Allelism	multiple alleles, Examples: Blood groups,	4	
17		Rh factor in humans	•	
		<b>Linkage:</b> Def'n, History, Types of linkage;		
		complete and incomplete linkage		
20-21		<b>Detection of linkage:</b> Detection in test cross	4	
		generation, Detection in F <sub>2</sub> generation		
		Crossing over: Def'n, Factors affecting		
22	Linkage and Crossing	recombination frequency, Cytological basis of	4	
	Over	crossing over		
		Crossing over: Crossing over in four-strand		
23		stage, Relationship between chiasma and	4	
23		crossing over, Molecular mechanisms of c.o.,	4	
		Linkage maps and Linkage groups		
		Gene interaction and its types:		
24-26		Def'n, Types of gene interactions and allelic	6	
		gene interactions; Complete dominance,	U	
	Gene Interaction	Incomplete dominance, Codominance		
	Gene interaction	Gene interaction and its types:		
27-29		Non-allelic, Supplementary, Masking,	6	
<u> </u>		Complementary gene interactions etc.;		
		Molecular basis of gene interaction	ntinued	

Continued...

30-31	Genetic Analysis in Prokaryotes and Eukaryotes  Genetic analysis in prokaryotes and eukaryotes (in brief)		4
32	Extrachromosomal	Extrachromosomal inheritance: Definition and Characteristic features of cytoplasmic inheritance with example of <i>Mirabilis jalapa</i> , Inheritance of mitochondrial DNA and chloroplast DNA	4
33	Inheritance	Extra chromosomal inheritance: Genetic maternal effect with examples of shell coiling in snails, kappa particles in paramecium, inheritance due to parasites, symbionts and viruses	4
34		Mutation: Definition, History, Characters of mutation, Classification of mutation, Spontaneous mutation, Induced mutation,	4
35	Mutation	Mutation: Molecular basis of mutation, Mutator, Antimutator genes and Mutable genes, Suppressor mutation and its Mechanism (Definitions, Brief emphasis)	4
36		Mutagens and their types with e.g.: Physical mutagens, Chemical mutagens, Mutation induction and detection, Applications of mutation	4
37		Hardy-Weinberg Law: Gene frequency genotype frequency, Gene pool, Random union of gametes, Random mating among genotypes	2
38- 39	- Hardy-Weinberg Law	Hardy-Weinberg Law: Hardy-Weinberg equilibrium, Equilibrium for one gene with two alleles, Equilibrium for one gene with multiple alleles, Equilibrium for two genes	4
40-41	Quantitative Inheritance	Quantitative inheritance: Multiple factor hypothesis, Characters of quantitative traits and their inheritance, Effects of environment on quantitative traits	4
42-45	Introduction to Human Genetics: Man the organism, Cytogenetics of man: Chromosome banding chromosome aberration. Genetics studies, Genetic diseases, Blood groups, Disputed Parentages		4
46-48	Genetic Basis of Evolution	Genetic basis of evolution and Origin of species: Theories of evolution: Lamarckism, Darwinism, Mutation theory, Neo-Darwinism.	2
		Total=	100

# List/ Bouquet of Skill Enhancement Courses (SECs):

Sr. No.	Course No.	Course Title	Credit Hrs.
1.	SEC-xxx	Practices in Plant Tissue	2(0+2)
2.	SEC-xxx	Laboratory Management and Instrumentation	2(0+2)
3.	SEC-xxx	(To be added)	2(0+2)
4.	SEC-xxx	(To be added)	2(0+2)

Note: Skill Enhancement Courses can be added/ offered as per the facilities and resources available at the respective universities/colleges based on the relevance to the region and the UG degree subject.

The detailed course-wise syllabus of above or other relevant SEC courses can be primarily developed and followed at College/ University level in the academic year, 2024-25; However, the same will be obtained from the respective UG Degree Coordinator/ Discipline Coordinators and can be followed w.e.f. AY, 2025-26.

[Above list is an indicative list/bouquet of SEC courses and subject to modification as applicable therein]

Semester	:	I	
Course No.	:	SEC-xxx	Credit Hrs : 2(0+2)
<b>Course Title</b>	:	Practices in Plant Tissue Culture	

# **Objectives:**

- (i) This course aims at imparting hands-on training on the calculation of per cent solutions, molarity, molality, normality; and preparation of buffers.
- (ii) To study basic equipments used in Plant Molecular Biology and Cell Culture Laboratories; washing, packing and sterilization of glass and plastic wares for cell culture.
- (iii) To study preparation of media and reagents for cell culture, primary culture technique, culturing and sub-culturing of continuous cell lines, viability assay by trypan blue dye exclusion method, micropropagation, haploid production, embryo rescue, cryopreservation of primary cultures and cell lines.
- (iv) To prepare the phytohormones and their sterilization.
- (v) To study Tissue Culture Laboratory management.

#### **PRACTICAL**

Laboratory safety and aseptic techniques, sterilization methods for equipment and media, media preparation, preparation of solid and liquid media, pH adjustment and sterilization of media. Culture initiation and explant selection. Selection of explants; meristem, node, leaf, embryo etc. Surface sterilization of plant material. Techniques for explant preparation and inoculation on to culture media. Callus induction and subculture. Subculture techniques: transfer of cultures to fresh media, monitoring and maintenance of cultures, organogenesis and embryogenesis. Micropropagation. Genetic transformation. Cryopreservation and conservation.

Project Work: Students design and conduct of a small-scale tissue culture project. (Students will choose a plant species, select appropriate explants, culture them *in vitro*, and document the progress and results).

# [Practices in Plant Tissue Culture]

# **PRACTICAL**

Exercise No.	Exercise Title	
1-2	Laboratory safety and aseptic techniques	
3-5	Preparation of Standard Solution: (Percent solutions, molarity, molality, normality and preparation of buffers)	
6-8	Media preparation: Solid and liquid media and pH adjustment	
9-10	Sterilization methods for equipments and media	
11-12	Culture initiation and explant selection: meristem, node, leaf, embryo etc.	
13-14	Surface sterilization of plant material; Techniques for explant preparation and Inoculation on to the culture media.	
15-16	Callus induction and subculture to the fresh media	
17-18	Micropropagation: a) Organogenesis b) Embryogenesis	
19-20	Monitoring and Maintenance of cultures	
21-22	Demonstration of genetic transformation techniques	
23-24	Demonstration of cryopreservation and conservation techniques	
25-30	Project Work – Micropropagation studies:  (Ornamental, Horticultural and Medicinal Plants)	
31-32	Visit(s) to Commercial Plant Tissue Culture Units	

Note: Project work tasks may be conducted from start to end of the semester with group of 10-20 students.

# **Suggested Readings [SEC-111]:**

- 1. Bhojwani SS and Razdan MK, 1996, Plant Tissue Culture: Theory and Practice, Elsevier.
- 2. Reinert J and Bajaj YPS (Ed), 1989, Applied and Fundamental Aspects of Plant Cell, Tissue and Organ Culture, Springer-Verlag.

\_\_\_\_

Semester	:	I	
Course No.	:	SEC-xxx	Credit Hrs : 2(0+2)
<b>Course Title</b>	:	Laboratory Management and Instrumentation	

# **Objectives:**

- (i) To study the establishment and management of different molecular biology laboratories.
- (ii) To impart hands-on training on good laboratory practices, calculation of per cent solutions, molarity, molality, normality; and preparation of buffers.
- (iii) To study basic equipments used in Plant molecular biology and cell culture laboratories, record keeping, teamwork, and SOP of different instruments of the labs.
- (iv) Safe disposal of laboratory chemicals and reagents as per the biosafety guidelines.

#### PRACTICAL

Importance of laboratory safety and regulatory compliance. Quality management systems: ISO9001, GLP, GMP, laboratory safety and regulatory compliance. Risk assessment and hazard identification. Inventory management and equipment maintenance. Principles of laboratory inventory management. Equipment calibration and preventive maintenance. Documentation and record-keeping for regulatory compliance. Quality assurance and control. Introduction to quality assurance (QA) and quality control (QC). Quality control checks for laboratory reagents and instruments, Troubleshooting common laboratory errors and deviations.

Spectroscopy and spectrophotometry, applications in quantitative analysis and molecular biology. Chromatography techniques, microscopy and imaging. Molecular biology techniques. Instrumentation project: students design and conduct a small-scale project using one of the laboratory instruments covered in the course. They will collect data, analyze results, and present their findings.

# [Laboratory Management and Instrumentation]

# **PRACTICAL**

Exercise No.	Exercise Title	
1-2	General Laboratory Safety Rules and Laboratory Compliance	
3-4	Quality Management Systems: ISO 9001, GLP and GMP	
5-6	Risk assessment and Hazard identification; Principles of laboratory inventory management.	
7	Calibration of Weighing balance, pH meter and Micropipettes	
8	Documentation and Record-keeping for Regulatory Compliance.	
9	Calculations of Per cent Solutions, Molarity, Molality, Normality etc.	
10	Preparation and Quality Control Checks for laboratory Reagents and Standards.	
11-13	Determination of the Concentration of DNA, RNA and Proteins in Solutions by Spectrophotometer.	
14-15	Separation and Identification of Amino acids/ Sugars by Paper Chromatography/ TLC.	
16-17	Observation of Microorganisms: Bacterial cell identification by Gram staining	
18-26	Extraction of Plant Genomic DNA, Plasmid DNA and Agarose gel electrophoresis, Restriction Digestion, PCR and Agarose gel electrophoresis of PCR products	
27-32	Instrumentation Project: DNA isolation from different crops/ microbes/ animal cells/ blood, Chromatography, Spectrometry, PCR-based project etc.

9.	FE-111	Post Harvest Engineering	3(2+1)	
10.	SEC-111	Skill Enhancement Course-I (To be offered from the bouquet of SEC Courses)	2(0+2)	
11.	SEC-112	Skill Enhancement Course-II (To be offered from the bouquet of SEC Courses)	2(0+2)	
		Total Credits Hrs.	22(11+11) G 4(2+2) NG	

CAC: Common Academic Course, AEC: Ability Enhancement Course,

MDC: Multidisciplinary Course, SEC: Skill Enhancement Course,

G: Gradial, NG: Non-Gradial

Note: \*MATH-111 for PCB student/ \*\*BOT-111 for PCM student/ PCMB student is NOT required to take any of these Need-based Courses.

# **B.Tech.** (Food Technology): First Semester

# **Course-wise Syllabus with Teaching Schedules**

Semester : I

Course No. : CAC-111 Credit Hrs. : 2 (0+2) NG/ 2 Weeks

Course Title : Deeksharambh (Induction-cum-Foundation Course)

Non-Gradial Common Academic Course for the said UG degree with the activities to be conducted during initial two weeks.

# **Objectives:**

- (i) To create a platform for students to help for Cultural Integration of students from different backgrounds,
- (ii) To know about the operational framework of academic process in the University, instilling life and social skills,
- (iii) To create Social awareness, Ethics and Values, Team work, Leadership, Creativity,
- (iv) To identify the traditional values and indigenous cultures along with diverse potentialities both in indigenous and developed scenario.

# **ACTIVITIES**

- ➤ Introduction/Orientation and Discussions on operational framework of academic process in University/ College, as well as interactions with Academic and Research Managers of the University.
- ➤ Interaction with Alumni, Business Leaders, Perspective Employers, Outstanding Achievers in related fields and people with inspiring life experiences.
- > Students shall be made aware about the field of food processing, the industry, production, systems, importance of nutrition, packaging, quality issues involved, shelf life and the legal standards available using simple day-to-day example.
- > Students shall be exposed to the job opportunities at various levels like production, product development, entrepreneurship opportunities and research opportunities that exist in this area of food processing technology.
- ➤ Group activities to identify the strength and weakness of students and to learn from each other's life experiences.
- Activities to enhance Cultural Integration of students from different backgrounds.
- Field visits to the relevant fields/ establishments.
- > Sessions on Personally Development (Instilling Life and Social skills, Social awareness, Ethics and Values, Team work, Leadership etc.) and imbibing the Communication skills.

**Note:** The details of the relevant activities will be decided by the parent University in line with the above-mentioned broad activities.

\_\_\_\_

Course No.: AEC-111 | Course Title: National Service Scheme-I (NSS-I) | Credit Hrs.: 1(0+1)

# **SYLLABUS**

#### **PRACTICAL**

# **Introduction and Basic Components of NSS**

- Orientation: History, Objectives, Principles, Symbol, Badge; Regular Programs under NSS.
- Organizational structure of NSS, Code of conduct for NSS volunteers, Points to be considered by NSS Volunteers' awareness about Health.
- NSS program activities. Concept of regular activities, Special camping, Day camps, Basis
  of adoption of village/slums, Conducting survey, Analysing Guiding financial patterns of
  scheme, Youth program/schemes of GOI, Coordination with different agencies and
  maintenance of diary. Understanding youth. Definition, Profile, Categories, Issues and
  Challenges of youth; and Opportunities for youth who is agent of the social change.
- Community mobilization. Mapping of community stakeholders, Designing the message as per problems and their culture; Identifying methods of mobilization involving youth-adult partnership. Social harmony and National integration.
- Indian history and culture, role of youth in nation building, Conflict resolution and peace building. Volunteerism and Shramdaan. Indian tradition of volunteerism, its need, importance, motivation and constraints; Shaman as part of volunteerism.
- Citizenship, Constitution, and Human rights. Basic features of constitution of India,
  Fundamental rights and duties, Human rights, Consumer awareness and rights and Right
  to information. Family and Society. Concept of family, Community (PRIs and other
  community-based organizations) and Society.

# PRACTICAL [AEC-111]

Exercise No.	Exercise Topic	Weightage (%)
1	Orientation, History, Objectives, Principles, Symbols, Badge	10

	Total=	100

Course No.: AEC-111 | Course Title: National Cadet Corps-I (NCC-I) | Credit Hrs.: 1(0+1)

# **SYLLABUS**

**Objective:** To integrate and develop qualities of leadership, discipline, character and patriotism and foster the NCC Motto: "Unity and Discipline" among the youth.

# **PRACTICAL**

- Aims, Objectives, Organization of NCC and NCC Song. DG's Cardinals of Discipline.
- Drill- aim, General words of command, Attention, Stands-at-ease, Stand-easy and Turning.
- Sizing, Numbering, Forming in three ranks, Open and Close order march and Dressing.
- Saluting at the halt, Getting on parade, Dismissing and Falling-out.
- Marching, Length of pace and time of marching in quick/slow time and halt. Side pace,
   Pace forward and to the rear. Turning on the march and wheeling. Saluting on the march.
- Marking time, Forward march and halt. Changing step, Formation of squad and squad drill.
- Command and control, Organization, Badges of rank, Honours and Awards.
- Nation Building- Cultural heritage, Religions, Traditions and Customs of India.
   National integration. Values and ethics, Perception, Communication, Motivation,
   Decision making, Discipline and duties of good citizens. Leadership traits, Types of leadership. Character/ Personality development. Civil defence organization, Types of emergencies, Fire fighting, Protection. Maintenance of essential services, Disaster management, Aid during development projects.
- Basics of Social Service, Weaker sections of society and their needs, NGO's and their contribution, Contribution of youth towards Social welfare and Family planning.
- Structure and Function of human body, Diet and Exercise, Hygiene and Sanitation.
   Preventable diseases including AIDS, Safe blood donation, First aid, Physical and mental health. Adventure activities. Basic principles of Ecology, Environmental conservation, Pollution and its control.

# PRACTICAL [AEC-111]

Exercise No.	Exercise Topic	Exercise Sub-topics	Weightage (%)
1-2	Introduction to NCC	Aims, Objectives, NCC Organizational structure, NCC Song, DG's Cardinals of Discipline.	4
3-5	Drill Basics	Aim of drill, General words of command, Positions of attention, Stand-at-ease and Stand- easy, Turning.	8
6-8	Formation Drills	Sizing, Numbering, Forming in three ranks, Open and Close order march and Dressing.	8
9-11	Saluting Drills and Parade Movements	Saluting at halt, Getting on parade, Dismissing and Falling-out.	8
12-14	Marching Techniques	Length of pace and time of marching in Quick/slow march, Side pace, Forward/rear pace, Turning on the march, Wheeling and Saluting on the march	10
15-17	Squad Formation and Control	Marking time, Forward march, Halt, Changing step, Formation of squad and Squad drill.	10
18-19	Command and Organization, Badges of rank, Honours and Control in NCC Awards.		4
20-22	Nation Building and Citizenship; Leadership	d Citizenship; Communication, Leadership traits, Discipline	
23-24	Civil Defence and Emergency Management	Types of emergencies, Fire fighting techniques, Maintenance of essential services, Disaster management and Aid during development projects, Civil Defence Organizations.	10
25-26	Social Service and Youth Welfare	Weaker sections of society, Role of NGOs, Youth participation in Social welfare and Family planning	8
27-29	Health, Hygiene and First Aid  Human body structure, Diet, Hygiene, Preventable diseases (including AIDS), Safe blood donation, First aid practices, Mental and Physical health.		10
30-32	Environment and Ecology  Environmental conservation, Pollution and its control, Adventure activities.		8
		Total =	100

Semester	:	I	
Course No.	:	AEC-112	Credit Hrs. : 2(1+1)
<b>Course Title</b>	:	Communication Skills	
Gradial Common Course across all UG degrees			

**Objectives:**(i) To acquire competence in oral, written and non-verbal communication

(ii) To develop strong personal and professional communication and

(iii) To demonstrate positive group communication.

#### **THEORY**

Communication Process: The magic of effective communication; Building self-esteem and overcoming fears; Concept, nature and significance of communication process; Meaning, types and models of communication; Verbal and Non-verbal communication; Linguistic and nonlinguistic barriers communication and reasons behind communication miscommunication. Basic Communication Skills: Listening, Speaking, Reading and Writing Skills; Precis writing/Abstracting/Summarizing; Style of technical communication, Curriculum vitae/resume writing; Innovative methods to enhance vocabulary, analogy questions; Structural and Functional Grammar: Sentence structure, modifiers, connecting words and verbals; Phrases and clauses; Case: subjective case, possessive case, objective case; Correct usage of nouns, pronouns and antecedents, adjectives, adverbs and articles; Agreement of verb with the subject: tense, mood, voice; Writing effective sentences; Basic sentence faults.

#### **PRACTICAL**

Listening and note taking; Writing skills: precis writing, summarizing and abstracting; Reading and comprehension (written and oral) of general and technical articles; Micro-presentations and Impromptu Presentations: Feedback on presentations; Stage manners: grooming, body language, voice modulation, speed; Group discussions; Public speaking exercises; Vocabulary building exercises; Interview techniques; Organization of events.

Semester	:	I		
Course No.	:	MDC-111	Credit Hrs. : 3(2+1)	
<b>Course Title</b>	:	Farming-based Livelihood Systems		
Gradial Common Course across all UG degrees				

**Objectives:** (i) To make the students aware about farming-based livelihood systems in Agriculture

(ii) To disseminate the knowledge and skills that how farming-based systems can be a source of livelihood

#### **THEORY**

Status of Agriculture in India and different States, Income of farmers and Rural people in India, Livelihood-Definition, Concept and Livelihood pattern in urban and rural areas, Different indicators to study livelihood systems. Agricultural Livelihood Systems (ALS): Meaning, Approach, Approaches and Framework, Definition of farming systems and farming-based livelihood systems, Prevalent Farming systems in India contributing to livelihood. Types of Traditional and Modern farming systems. Components of farming system/ farming-based livelihood systems: Crops and Cropping systems, Livestock, (Dairy, Piggery, Goatry, Poultry, Duckry etc.), Horticultural crops, Agroforestry systems, Aquaculture, Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.; Small, Medium and Large enterprises including value chains and secondary enterprises as livelihood components for farmers, Factors affecting integration of various enterprises of farming for livelihood. Feasibility of different farming systems for different agro-climatic zones, Commercial farming-based livelihood models by NABARD, ICAR and other organizations across the country; Case studies on different livelihood enterprises associated with the farming. Risk and Success factors in farming-based livelihood systems, Schemes and Programs by Central and State Governments; Public and Private organizations involved in promotion of farming-based livelihood opportunities. Role of farming-based livelihood enterprises in 21st Century in view of circular economy, Green economy, Climate change, Digitalization and Changing life style.

# **PRACTICAL**

Survey of farming systems and Agriculture-based livelihood enterprises, Study of components of important farming-based livelihood models/systems in different agro-climatic zones, Study of production and profitability of crop based, livestock based, processing-based and integrated farming-based livelihood models, Field Visit of innovative farming system models. Visit of Agri-based enterprises and their functional aspects for integration of production, Processing and Distribution sectors and Study of agri-enterprises involved in industry and service sectors (Value Chain Models), Learning about concept of project formulation on farming-based livelihood systems along with cost and profit analysis, Case study of Start-Ups in agri-sectors.

# THEORY [MDC-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1	Status of Agriculture in India	Historical background, Current status, Role of Agriculture in Indian Economy	4
2	Status of Agriculture in Different States	State-wise scenario, Major crops, Regional diversity	4
3	Income of Farmers and Rural People in India	Factors affecting income, Rural-urban income gap, Government initiatives	4
4	Livelihood: Definition, Concept, and livelihood Patterns in urban and rural areas	Livelihood- Definition and its Concept, Urban vs Rural livelihood patterns, Sources of income	4
5	Different Indicators to Study Livelihood Systems	Economic, Social and Environmental indicators, Measuring livelihood resilience	4
6	Agricultural Livelihood Systems (ALS): Meaning and Approaches	Definition, Significance of ALS, Integrated farming systems, Approaches	4
7	ALS Framework and Case studies	Framework for ALS, Case studies in India	4
8	Definition of Farming Systems and farming based Livelihood Systems	Definition and Role of farming systems in rural livelihoods, Examples of systems	4
9	Prevalent Farming Systems in India contributing to livelihood	Traditional vs. Modern farming systems, Regional differences	4
10	Types of Traditional and Modern Farming Systems	Types; Differences; Strengths, Limitations, Case studies	4
11	Components of farming system/farming-based livelihood systems - Crops and Cropping Systems	Components, Crop diversification, Cropping pattern, Mixed cropping, Importance for rural livelihoods	4
12	Livestock-based Farming Systems	Importance and Management of dairy, piggery, poultry, goatry, duckry, etc.	4
13	Horticultural Crops and Livelihoods	Role of fruits, vegetables and spices in rural income generation	4
14	Agroforestry Systems	Agroforestry- Definition, Combining trees and crops, Agroforestry models in India	2
15	Aquaculture as a Livelihood System	Importance of Aquaculture, Integrated systems (e.g. Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.)	4
16	Challenges in Aquaculture- based Systems	Feasibility, Government support and Market access	2

Continued....

# MDC-111....

17	Small Enterprises in Farming	Role of small enterprises, Value addition, Local processing	2
18	Medium and Large Enterprises in Farming	Value chains, Secondary enterprises as livelihood components for farmers, Agri-processing.	2
19	Factors affecting Integration of various enterprises of farming for livelihood	Technology, Market access, Credit and infrastructure challenges etc.	4
20	Strategies for Enterprise Integration	Successful integration, Government policies, Examples.	2
21	Overview of Agro-Climatic Zones in India	Characteristics of different zones and their agricultural potential.	2
22	Feasibility of different Farming Systems for different Agro-Climatic Zones	Suitable farming systems for different zones, Climate adaptation.	2
23	Commercial Farming Based Livelihood Models by NABARD, ICAR and other organizations across the country	Role of NABARD, ICAR and other Organizations in promoting commercial models, Successful cases.	4
24	Case studies on different Livelihood Enterprises associated with farming	Analysis of successful enterprises, Dairy Cooperatives etc.	4
25	Risk Factors in Farming- based Livelihood Systems	Climate, Market fluctuations, Input costs; Mitigation strategies etc.	4
26	Success Factors in Farming- based Livelihood Systems	Innovation, Market access, Government support, Social capital etc.	2
27	Schemes and Programmes by the Central Government	Overview of schemes like, PM-KISAN, National Rural Livelihood Mission.	2
28	Schemes and programmes by State Governments	State-specific programs promoting rural livelihoods, Case examples.	2
29	Role of Private Sector in Livelihood Promotion	Public-Private Partnerships, Role of private agribusiness.	2
30	Public-Private Partnerships in Agriculture	Successful collaborations in rural development and farming systems	2
31	Farming-based Livelihoods in the 21st Century	Circular economy, Green economy, Climate change, Sustainability.	2
32	Impact of Digitalization and Changing Lifestyles	Technology in Agriculture, Future prospects for rural livelihoods.	2
		Total =	100

# PRACTICAL [MDC-111]

Exercise No.	Exercise Topic	Exercise Sub-topics/ Title
1	Survey of Farming Systems and Agriculture-based Livelihood Enterprises	Methods of data collection; Field survey techniques; Preparing reports on surveyed farms.
2	Study of Components of Farming- based Livelihood Models in Different Agro-Climatic Zones	Components: Crop, livestock, fishery, agroforestry; Identifying models suited to specific zones.
3	Study of Production and Profitability of Crop-based Models	Analysis of input-output relations; Identifying profitable crops
4	Study of Livestock-based Models	Livestock systems: Dairy, poultry, goat farming; Profitability and market access
5	Study of Processing-based Models	Value addition in agriculture; Studying small-scale food processing units
6	Study of Integrated Farming-based Models	Study of crop-livestock-aquaculture integration; Synergies and challenges
7	Field Visit to Innovative Farming System Models	Visit to farms using modern technologies; Documenting practices
8	Visit to Agri-based Enterprises	Enterprises involved in input supply or value addition
9	Study of Functional Aspects: Integration of Production, Processing and Distribution	Backward and forward linkages; Assessing supply chain models
10	Agri-Enterprises in Industry and Service Sectors (Value Chain Models)	Studying value chain enterprises; Evaluating sustainability models
11	Concept of Project Formulation on Farming-based Livelihood Systems	Identifying project objectives; Structuring budgets and timelines
12	Cost and Profit Analysis of Farming- based Livelihood Projects	Developing Cost-Benefit analysis; Identifying Break-Even points
13	Case Study of Start-ups in Agrisectors	Analyzing real-world Start-ups; Identifying success factors
14	Group Project: Develop a Farming- based Livelihood Model	Formulating a working model; Feasibility and sustainability analysis
15	Preparation of Report on Farming Systems Survey and Livelihood Models	Compiling field data; Preparing reports with recommendations
16	Presentation and Evaluation of Practical Project Reports	Group presentations; Internal assessment of reports and participation

# **Suggested Readings (MDC-111):**

- **1. Ashley, C. and Carney, D. 1999**. *Sustainable Livelihoods: Lessons from Early Experience*. Department for International Development, London, UK.
  - o **Relevance**: This book explores sustainable livelihood frameworks, which are key to understanding livelihood patterns and rural income systems.
- **2. Agarwal, A. and Narain, S. 1989**. *Towards Green Villages: A Strategy for Environmentally Sound and Participatory Rural Development*. Centre for Science and Environment, New Delhi, India.
  - o **Relevance**: Provides strategies for participatory rural development, focusing on environmental sustainability—a core concept in farming systems.
- **3.** Carloni, A. 2001. Global Farming Systems Study: Challenges and Priorities to 2030 Regional Analysis: Sub-Saharan Africa. FAO, Rome, Italy.
  - o **Relevance**: Offers insights into global farming system challenges, with lessons that can be adapted for Indian contexts in agricultural development.
- **4. Dixon, J., Gulliver, A. and Gibbon, D. 2001**. Farming Systems and Poverty: Improving Farmers' Livelihoods in a Changing World. FAO & World Bank, Rome & Washington, DC.
  - **Relevance**: Focuses on farming systems' role in poverty alleviation and rural livelihood improvement.
- **5. Evenson, R.E. 2000**. Agricultural Productivity and Production in Developing Countries. In FAO, The State of Food and Agriculture. FAO, Rome, Italy.
  - **Relevance**: Discusses agricultural productivity, a critical factor in sustainable farming and improved livelihoods.
- **6. Bhatt** *et al.* (**ICAR Research Complex for Eastern Region**). *Livelihood Improvement of Underprivileged Farming Community: Experiences from Bihar*. Patna, Bihar.
  - **Relevance**: Case studies on improving livelihoods in rural India, relevant to learning about region-specific agricultural interventions.
- 7. Panwar et al., 2020. Integrated Farming System Models for Agricultural Diversification, Enhanced Income, and Employment. Indian Council of Agricultural Research, New Delhi.
  - o **Relevance**: Provides models for agricultural diversification and income enhancement, which align with farming system topics.
- **8. Reddy, S.R., 2016**. *Farming System and Sustainable Agriculture*. Kalyani Publishers, New Delhi.
  - o **Relevance**: Covers sustainable agriculture principles and farming system models, essential for sustainable livelihood systems.
- **9. Singh** *et al.*, **2015**. *Region Specific Integrated Farming System Models*. ICAR-Indian Institute of Farming Systems Research, Modipuram.
  - o **Relevance**: Discusses integrated farming models tailored to different agro-climatic regions of India, essential for practical learning.
- **10.** Walia, S.S., and Walia, U.S., 2020. Farming System and Sustainable Agriculture. Scientific Publishers, Jodhpur, Rajasthan.
  - o **Relevance:** Provides insights into sustainable agricultural practices and integrated farming systems with regional focus.

Semester	:	I			
Course No.	:	MATH-111*	<b>Credit Hrs.</b> : 2(2+0)	Need-based; G/NG	
Course Title	:	<b>Basic Mathematics</b>			
*Gradial Need-based Common Course for B.Tech. (Biotechnology);					
*Non-Gradi	*Non-Gradial Need-based Common Course for B.Tech. (Agril. Engg.) & B.Tech. (Food Technology)				

# **Objectives:**

- (i) To study the basic principles and functions in mathematics like limits and continuity,
- (ii) To study differentiation and integration,
- (iii) To study matrices and determinants.

#### **THEORY**

#### **Functions:**

Function and types of functions, Limit: Introduction, left-handed and right-handed limits, Algebra of limits, Standard limits. Continuity: Definition of continuity, continuity of algebraic functions. Continuity of trigonometric and exponential functions.

# **Differentiation:**

Differentiation by the first principle, Rules of Differentiation: sum, difference, product and quotient formulae, differentiation using the chain rule, differentiation of functions in parametric and implicit form, logarithmic differentiation, geometrical interpretation of derivative. Successive differentiation, maxima and minima.

# **Integration:**

Definition of indefinite integrals, Integrals of elementary functions (Formulae only), Theorems of integration (without proof), Integration by substitution, integration by partial fractions, integration by parts, Definition of definite Integral with examples, properties of definite integral (without proof).

#### **Matrices and Determinants:**

Definition of determinants, example up to Third order determinant, properties of determinant (statements only), Definition of matrix, types of matrices, Algebra of Matrix (addition, subtraction and multiplication), inverse of matrix, Solution of linear equations by Crammer's rule.

# **Teaching Schedule**

# **THEORY**

Lecture No.	Topic	Subtopics/ Key Points	Weightage (%)
1-5	<b>Functions:</b>	Definition of Function, Types of functions	15
		Some Basic Functions: Definition and Properties of: Constant Function, Identity Function, Power Function. Polynomial Function, Linear, quadratic and cubic function, Radical Function, Rational Function. Exponential, Logarithmic and Trigonometric Function	
	Limit:	Introduction, Definition of Limit, left-handed and right-handed limits, Algebra of limits	
		Standard limits: Method of Factorization, Rationalization, Limit of Trigonometric, Exponential Logarithmic and Functions. Limit of Infinity	
	Continuity:	Definition of continuity, Continuity of algebraic functions, Continuity of trigonometric and exponential functions.	
6 -15	Differentiation:	Definition, Differentiation by the first principle, Derivative of Some standard functions (Formulae only), Rules of Differentiation (Sum, Difference, Product and quotient without proof), Differentiation using the chain rule, Differentiation of functions in parametric and implicit form, Logarithmic Differentiation, Successive differentiation, Maxima and minima	30
16 -25	Indefinite and Definite Integration:	Definition of indefinite Integral, Integrals elementary functions (Formulae only) Theorems of integration (without proof) Methods of Integration: Integration by Substitution, Integration by parts, Integration by partial fractions Some special integrals formulae only. Definition of definite Integral with examples Properties of definite integral (Without proof)	30
26 -32	Determinants and Matrices:	Definition of determinants, Expansion up to third order determinant, Properties of determinant (statements only) Definition of matrix, Order of Matrix, Types of matrices, Algebra of Matrices, Inverse of matrix by elementary transformations, Solution of linear equations by Crammer's rule	25

Pg **18** of **48** 

Semester	:	I	
Course No.	:	FT-111	Credits Hrs. : 3(2+1)
Course Title	:	Fundamentals of Food Processing	

**Objectives:** (i) To gain an understanding of the perishability of food and causes for food spoilage,

(ii) To have an idea of the basic methods of preservation of food and

(iii) To impart knowledge about non-thermal processing of food.

#### **THEORY**

Food: Definition and Functions, Classification of foods, sources, types and perishability of foods; Causes and types of food spoilage; Scope and benefit of food preservation. Food processing: Introduction, levels and techniques; Methods of food preservation; Preservation by salt and sugar: Principle, method and effect on food quality. Preservation by heat treatment: Principle, process and equipment for blanching, canning, pasteurization, sterilization. Preservation by use of low temperature: Principle, methods, equipments. Preservation by drying, dehydration and concentration: Principle, methods, equipments. Preservation by irradiation: Principle, methods, equipments. Preservation by chemicals-antioxidants, mould inhibitors, antibodies, acidulants, Hurdle technology etc. Preservation by fermentation: Principles, methods, equipments. Non-thermal preservation processes: Principles, equipment- Pulsed electric field and pulsed intense light, ultrasound, dielectric heating, ohmic and infrared heating, high pressure processing, microwave processing, Cold Plasma technology, etc. Quality tests and shelf-life of preserved foods.

#### **PRACTICAL**

Demonstration of various perishable food items and degree of spoilage; Blanching of selected food items; Preservation of food by heat treatment- Pasteurization; Preservation of food by high concentration of sugar: Jam; Preservation of food by using salt: Pickle; Preservation of food by using acidulants i.e. pickling by acid, vinegar or acetic acid; Preservation of food by using chemical preservatives; Preservation of bread, cake using mold inhibitors; Drying of fruit slices pineapple slices, apple slices in cabinet drier; Drying of green leafy vegetables; Drying of mango/ other pulp by foam-mat drying; Drying of semisolid foods using roller dryers; Drying of foods using freeze drying process; Demonstration of preserving foods under cold vs. freezing process; Processing of foods using fermentation technique, i.e. preparation of sauerkraut; Study on effect of high pressure on microbe; Study on effect of pulse electric field on food.

# THEORY [FT-111]

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)
1-2	Food	<ul> <li>i) Definition and Functions,</li> <li>ii) Classification of foods, sources,</li> <li>iii) Types and perishability of foods</li> <li>iv) Causes and types of food spoilage</li> <li>v) Scope and benefit of food preservation.</li> </ul>	10
3-5	Food processing	<ul><li>i) Introduction, levels and techniques</li><li>ii) Methods of food preservation</li><li>iii) Preservation by salt and sugar:</li><li>Principle, method and effect on food quality.</li></ul>	10
6-8	Preservation by heat treatment	Principle, process and equipment for blanching, canning, pasteurization, sterilization.	10
9-12	Preservation by use of low temperature	Principle, methods, equipment.	14
13-14	Preservation by drying, dehydration and concentration	Principle, methods, equipment.	8
15-16	Preservation by irradiation	Principle, methods, equipment.	8
17-19	Preservation by chemicals.	Antioxidants, mould inhibitors, antibodies, acidulants, Hurdle technology etc.	5
20-21	Preservation by fermentation	Principles, methods, equipment.	5
22-25	Quality tests and shelf- life of preserved foods.	Physico-chemical, Sensory attributes shelf-life determination by using two methods i.e. Real time shelf life and Accelerated shelf life.	10
26-32	Non-thermal preservation processes	Principles, equipment – Pulsed electric field and pulsed intense light, ultrasound, dielectric heating, ohmic and infrared heating, high pressure processing, microwave processing, Cold Plasma technology, etc.	20
Total =			100

# PRACTICAL [FT-111]

Exercise No.	Exercise Title	
1	Demonstration of various perishable food items and degree of spoilage	
2	Blanching of selected food items	
3	Preservation of food by heat treatment- Pasteurization	
4	Preservation of food by high concentration of sugar: Jam	
5	Preservation of food by using salt: Pickle	
6	Preservation of food by using acidulants i.e. Pickling by acid, vinegar or acetic acid	
7	Preservation of food by using chemical preservatives	
8	Preservation of bread and cake using mold inhibitors	
9	Drying of fruit slices- pineapple slices and apple slices in cabinet drier	
10	Drying of green leafy vegetables	
11	Drying of mango/ other pulp by foam-mat drying	
12	Drying of semisolid foods using roller dryers	
13	Drying of foods using freeze drying process	
14	Demonstration of preserving foods under cold vs. freezing process	
15	Processing of foods using fermentation technique, i.e. preparation of sauerkraut	
16	Study on effect of high pressure on microbe;	
10	Study on effect of pulse electric field on food.

\_\_\_\_

Semester	:	I	
Course No.	:	FQA-111	Credit Hrs. : 3(2+1)
<b>Course Title</b>	:	Food Chemistry-I	

# **Objectives:**

- (i) To learn the chemical aspects of food and bio-materials and its importance in food processing,
- (ii) To gain an understanding of various water and macro-molecules and
- (iii) To have an idea of about the effect of processing on these biomolecules.

#### **THEORY**

Water; Moisture in foods, Role and type of water in foods, Functional properties of water, Water activity and Sorption isotherm, Molecular mobility and Foods stability; Dispersed systems of foods: Physicochemical aspects of food dispersion system (Sol, gel, foam, emulations); Rheology of diphase systems. Carbohydrates; Monosaccharaides, Disaccharides and Polysaccharides, Modification of carbohydrates, Dietary fibers and Carbohydrates digestibility; Enzymatic and Chemical reactions of carbohydrates. Proteins in foods: Proteins-Classification, Structure and Properties; Proteins and Nutrition, Functional properties of proteins; Processing induced, Physical, Chemical and Nutritional changes in protein; Chemical and Enzymatic modification of protein. Lipids in foods: Classification, structure and properties of lipids; Role and use of lipids/fat, Crystallization and Consistency, Chemical aspects of lipids, Lipolysis, Auto-oxidation, Thermal decomposition, Chemistry of frying technology of fat and oil; Oil processing: Refining, Hydrogenations, Inter esterification, Use of oils and Fats in food formulation. Enzymatic and Chemical reactions of fats; Rancidity and its types, Detection techniques, Chemical aspects of lipids, Antioxidants.

#### **PRACTICAL**

Determination of moisture content of foods using different methods; Studies of sorption isotherms of different foods; Swelling and Solubility characteristics of starches; Rheological properties of food systems; Determination of crude proteins by Micro-Kjeldhal method; Determination of essential amino acids i.e. lysine, tryptophan, methionine, etc.; Isolation of egg and milk protein; Preparation of protein isolate and Concentrate of proteins; Determination of Acid value, Saponification value and Iodine number of fat/oil; Assay of amylases, Papain and Lipases.

# PRACTICAL [FQA-111]

Exercise No.	Exercise Title
1	Study of laboratory equipments/ apparatus
2	Determination of moisture content of foods using different methods
3	Qualitative test for carbohydrates
4	Qualitative test for amino acids
5	Qualitative test for proteins: (Salting out test, acid precipitation of protein
	test)
6	Qualitative test for lipids/fats
7	Studies of sorption isotherm of different foods
8	Swelling and solubility characteristics of starches
9	Determination of total sugar and reducing sugar in food
10	Determination of crude proteins by Micro-Kjeldhal method
11	Preparation of protein isolate and concentrate of proteins
12	Test for detection of different oils (Baudouin test, Halphens test)
13	Test for detection of different oils (Hexabromide test)
14	Determination of Acid value of fat/oil
15	Determination of Saponification value and Iodine number of fat/oil
16	Experiments with food enzymes

\_\_\_\_

Semester	:	I	
Course No.	:	FQA-112	Credit Hrs. : 3(2+1)
<b>Course Title</b>	:	General Microbiology	

# **Objectives:**

- (i) To identify the micro-organisms, their structure and growth characteristics and
- (ii) To acquaint with techniques for cultivation and preservation and control.

#### THEORY

Scope and History of Microbiology: (Notable contributions of Leeuwenhoek, Pasteur, Koch, etc.). Place of Microorganisms in Living World; Groups of Microorganisms; Applied area of Microbiology. Classification and Identification of microorganisms; Major Characteristics of Microorganisms, Methods of classification of bacteria. Microscopy: Introduction to microscope; Component of microscope; Types of microscope and Microscopic techniques. Microbial Ultrastructure and Functions: Morphological features; Structures external to cell wall, Cell wall; Structures internal to cell wall. Cultivation and Preservation of microorganisms: Nutritional requirements; Types of media. Physical condition required for the growth; Enumeration methods for microorganisms. Bacterial Metabolism and Growth: Reproduction of bacteria; Growth of bacteria: Growth curve, Continuous culture, Synchronous culture; Methods of isolation of pure cultures; Maintenance and Preservation of pure cultures; Culture collections. Control of microorganisms: Physical and Chemical agents. Bacterial Genetics. Structure and Functions of DNA and RNA; Overview of replication and regulation.

#### **PRACTICAL**

Practical Microscopy; Micrometry; Cleaning and sterilization of glassware and acquainting with equipment used in microbiology; Preparation of nutrient agar media and techniques of inoculation; Staining methods (Monochrome staining, Gram staining, Negative staining, Capsule-staining, Flagella staining and Endospore staining); Pure culture techniques (Streak plate/Pour plate/Spread plate); Identification procedures (Morphology and Cultural characteristics); Growth characteristics of fungi: Determination of microbial numbers, Direct plate count, generation time; Factors influencing growth: pH, Temperature, Growth curves for bacteria.

# THEORY [FQA-112]

Lecture No.	Торіс	Sub-topics/Key Points	Weightage (%)
1-2	Scope and History of Microbiology	Notable Contributions of Leeuwenhoek, Pasteur, Koch, Edward Jenner, Ignaz Semmelweis, Louis Pasteur Joseph Lister, Paul Ehrlich, Alexander Fleming, etc. in Microbiology. Scope and economic importance of microorganisms, Applied area of Microbiology: Industrial Microbiology, Aquatic and Marine Microbiology, Public health Microbiology, Immunology, Food and Dairy Microbiology.	5
3-4	Place of Microorganisms in Living World;	Overview of the major groups of microorganisms, Role of Microorganisms in Ecosystem and Human Health, Ecosystem: Nutrient cycling, Organic matter decay, Pollution remediation, Climate change Human Health: Digestion, Immune system, Detoxification, Protection, Reproductive health.	5
5-10	Classification and Identification of Microorganisms	Microbial classification, Nomenclature and Identification; Taxonomic groups; General-, Methods of classifying bacteria; Major Characteristics of microorganisms: Cell types (Prokaryotic and Eukaryotic) and Presence of nuclear membrane; Methods of classification of bacteria: Gram stain, Shape, Cell wall composition, Respiration and Nutrition; Other methods for classifying microbes include: Differential staining, Biochemical testing, DNA fingerprinting or DNA base composition, Polymerase Chain Reaction and DNA Chips.	10
11-14	Microscopy	Microscopy and Microscopes: Principles, Simple and Compound microscopes, Phase.  i) Introduction to microscope;  ii) Types of microscopes: Optical microscopes, Electron microscopes, Scanning probe microscopes, Atomic force microscopes (AFMs),  iii) Components of microscope:  iv)Microscopic Techniques: Fluorescent microscopy, Electron microscopy (SEM and TEM), Applications, Smears and Staining	10

Semester	:	I	
Course No.	:	FE-111	Credit Hrs. : 3(2+1)
<b>Course Title</b>	:	Post Harvest Engineering	

#### **SYLLABUS**

**Objectives:** (i) To understand the basic post-harvest operations,

- (ii) To gain an understanding of various engineering properties and
- (iii) To differentiate between different types of material handling systems.

#### **THEORY**

Overview of Post-Harvest Technology. Concept and Science, Introduction to different Agricultural crops, their Cropping pattern, Production, Harvesting and Post-harvest losses, Reasons for losses, Importance of loss reduction, Post-Harvest Handling operations. Water Activity; Water binding and its effect on Enzymatic and Non-enzymatic reactions and Food texture, Control of water activity and Moisture. Engineering Properties of Food Materials; Physical, Thermal, Aerodynamic, Optical, Mechanical, Rheological and Electromagnetic properties and their measurement. Cleaning; Cleaning of grains, Washing of fruits and Vegetables, Types of cleaners, Screens, Types of screens, Rotary screens, Vibrating screens, Machinery for cleaning of fruits and vegetables (air cleaners, washers), Cleaning efficiency, Care and Maintenance; Peeling. Sorting, Grading, Methods of grading; Grading- Size grading, Colour grading, Specific gravity grading; Screening, Equipment for grading of fruits and vegetables, Grading efficiency, Care and Maintenance. Magnetic separator, Destoners, Electrostatic separators, Pneumatic separator. Decorticating and Shelling; Principles of working, Design and Constructional details, Operating parameters, Maintenance, etc. of various decorticators/dehullers/shellers, Description of groundnut decorticators, maize shellers, etc. Milling, Polishing, Grinding, Milling equipment, De-huskers, Polishers (abrasion, friction, water jet), Flour milling machines, Pulse milling machines, Grinders, Cutting machines, Oil expellers, Machine efficiency and Power requirement. Materials handling; Introduction to different conveying equipment used for handling of grains; Scope and Importance of material handling devices. Study of different Material Handling systems; Classification, Principles of operation, Conveyor system selection/design; Belt conveyor: Principle, Characteristics, Design, Relationship between belt speed and width, Capacity, Inclined belt conveyors, Idler spacing, Belt tension, Drive tension, Belt tripper; Chain conveyor: Principle of operation, Advantages, Disadvantages, Capacity and Speed, Conveying chain; Screw conveyor: Principle of operation, Capacity, power, Troughs, Loading and Discharge, Inclined and Vertical screw conveyors; Bucket elevator: Principle, Classification, Operation, Advantages, Disadvantages, Capacity, Speed, Bucket pickup, Bucket discharge, Relationship between belt speed, Pickup and Bucket discharge, Buckets types, Power requirement; Pneumatic conveying system: Types, Air/Product separators; Gravity conveyor design considerations, Capacity and Power requirement.

#### **PRACTICAL**

Study of cleaners for grains; Study of washers for fruits and vegetables; Study of graders for grains; Study of graders for fruits and vegetables; Study of decorticators; Study of a maize/sunflower sheller; Study of crop dryers; Study of a RF/MW/tray dryer; Study of hot air dryer and modelling drying kinetics; Study of vacuum dryer and modelling drying kinetics; Study of working principle of spray dryer and spray drying process; Study of drum dryer and liquid food dehydration using drum drying; Study of fluidized bed dryer and drying process; Study of freeze dryer and freeze drying process; Study of different materials handling equipment.

#### **TEACHING SCHEDULE**

#### **THEORY [FE-111]**

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)
1-2	Overview of Post-Harvest Technology	Definition and Overview of Post-Harvest Technology/ Engineering	5
3-5	Concept and Science	Introduction to different agricultural crops, Cropping Pattern, Production, Post harvesting and Post-harvest losses, Reasons for losses, Importance of loss reduction, Post-harvest handling operations.	10
6-8	Water Activity	Water binding, Effects on enzymatic and Non- enzymatic reactions and Food texture, Control of water activity and moisture.	10
9-14	Engineering Properties of Food Materials	Physical, Thermal, Aerodynamic, Optical, Mechanical, Rheological and Electromagnetic properties and their measurement.	10
15-16	Cleaning	Cleaning of grains, Washing of fruits and vegetables, Types of cleaners; Screens, Types of screens- rotary screens, vibrating screens; Machinery for cleaning of fruits and vegetables (air cleaners, washers); Cleaning efficiency; Care and Maintenance; Peeling.	10
17-20	Sorting, Grading and Methods of grading	Size grading, Colour grading, Specific gravity grading; Screening, equipment for grading of fruits and vegetables, Grading efficiency, Care and maintenance, Magnetic Seperator, Destoners, Electrostatic separators, Pneumatic separator	15

## # List/ Bouquet of Skill Enhancement Courses (SECs)

Discipline/ Department	Sr. No.	Course No.	Course Title	Credits (Hrs.)
	1	FT/SEC	Introduction to Drying Technology and Dryers	2(0+2)
Food Technology	2	FT/SEC	Introduction to Processing of Extruded Foods	2(0+2)
	3	FT/SEC	Introduction to Milling (Rice, Dal, Spices, etc.)	2(0+2)
Food	1	FQA/SEC	Introduction to Food Safety and Sanitation	2(0+2)
Quality	2	FQA/SEC	Introduction to Good Laboratory Practices	2(0+2)
Assurance	3	FQA/SEC	Basic Food Analysis Laboratory Techniques	2(0+2)
	1	FE/SEC	Introduction to Electrical and Control Systems in Food Industry	2(0+2)
Food Engineering	2	FE/SEC	Introduction to Mechanical Systems in Food Industry	2(0+2)
	3	FE/SEC	Introduction to AutoCAD	2(0+2)
	1	FPO/SEC	Maintenance of Food Processing Equipment	2(0+2)
Food Plant	2	FPO/SEC	Introduction to Bottling and Canning Line	2(0+2)
Operations	3	FPO/SEC	Introduction to Manufacturing of Bakery Products	2(0+2)

Note: Skill Enhancement Courses can be added/offered as per the facilities and resources available at the respective universities/colleges based on the relevance to the region and the UG degree subject.

In case of unavailability of said detailed course-wise syllabus of above SEC courses, the same can be primarily developed and followed at College/ University level in the academic year, 2024-25; However, the same will be obtained from the respective UG Degree Coordinator/ Discipline Coordinators and can be followed w.e.f. AY, 2025-26.

[Above list is an indicative list/bouquet of SEC courses and subject to modification as applicable therein]

## Skill Enhancement Courses (SECs): Detailed Syllabi

## **Food Technology**

## **TEACHING SCHEDULE**

Exercise No.	Exercise Topic/ Title	
1	Introduction to drying process and its mechanism	
2	Understanding of different methods for moisture estimation	
3	Determination of moisture content with oven method	
4	Determination of drying characteristics and study of kinetics	
5	Prediction of moisture sorption isotherms	
6	Determination of equilibrium moisture content of grain	
7	Introduction to different dryings theories and its importance	
8	Introduction to different methods of drying (Contact, Convective and Radiation).	
9	Principle and Operational mechanism involved in Cabinet and Tunnel Drying	
10	Principle and Operational mechanism involved in Spray Drying	
11	Principle and Operational mechanism involved in Roller/ Drum Drying	
12	Principle and Operational mechanism involved in fluidized bed drying	
13	Principle and Operational mechanism involved in foam-mat drying	
14	Principle and Operational mechanism involved in microwave drying	
15	Principle and Operational mechanism involved in vacuum oven drying	
16	Principle and Operational mechanism involved in solar drying	
17	Principle and Operational mechanism involved in refractance window drying of foods	

18	Study of pretreatment methods for drying and dehydration
19	Study of operational principle and working of freeze dryer
20	Study of Rehydration/ Reconstitution properties of dehydrated foods
21	Drying of fruit slices in cabinet drier
22	Drying of green leafy vegetables
23	Drying of mango/ other pulp by foam-mat drying
24	Drying of foods using roller dryer and Spray dryer
25	Drying of foods using freeze drying process
26	Preparation of Mango Leather
27	Preparation of Osmo-Dehydrated Food Products (Candied Fruits, Glazed Fruits)
28	Preparation of dehydrated raisins
29	Study of packaging, labelling and FSSAI Regulations of Dehydrated products
30	Industrial Visit(s) to different dehydration Units
31	Case study on fruits and vegetable drying

 Course Title
 :
 Introduction to Processing of Extruded Foods

## **TEACHING SCHEDULE**

Exercise No.	Exercise Topic/ Title	
1	Introduction and market survey of extruded products	
2	Introduction of food extruders components and their functions	
3	Principle and operational mechanism involved in cold and hot extruder (Single and Twin-Screw Extruder)	
4	Preparation of spaghetti pasta	
5	Preparation of penne pasta	
6	Preparation of noodles	
7	Preparation of vermicelli	
8	Preparation of instant noodles	
9	Quality evaluation of pasta products	
10	Demonstration of extrusion products (extruded snacks/ breakfast cereal/ texturized vegetable protein)	
11	Preparation of traditional extruded products (sev/ chakli)	
12	Evaluation of physical properties of expanded snacks	
13	Evaluation of water and milk hydration properties of breakfast cereal	
14	Evaluation of functional properties of expanded snacks	
15	Evaluation of functional properties of texturized vegetable protein	
16	Preparation of plant-based meat analogue by using extruder	
17	Preparation of cereal, pulses based ready-to-eat snack food by extrusion cooking	
18	Preparation of extruded confectionary product	
19	Effect of feed moisture content on extrudate food product characteristic	
20	Studies on development of weaning food by extrusion technology	
21	Texture profile analysis of extruded product	

22	Preparation of dietary fiber rich extruded product	
23	Quality evaluation of commercially available extruded food products	
24	Packaging of Extruded products	
25	Quality evaluation of different extruded products	
26	Determination of techno-economic feasibility of prepared extruded product	
27	Sensory evaluation of prepared extruded products	
28	Labelling and FSSAI Regulations of different extruded products	
29-30	Visit to Commercial Extrusion Unit	

Semester	:	I	
Course No.	:	SEC-xxx	Credit Hrs. : 2(0+2)
<b>Course Title</b>	:	Introduction to Milling (Rice, Dal, Spices, etc.)	

Exercise No.	Exercise Topic/ Title
1	Introduction and market survey of milled rice, dal and spices
2	Determination of Physical Properties of rice grain, dal and spices
3	To study the defects in grains and milled rice, dal and spices by physical observation
4	Determination of moisture content in different milled product
5	Studies on traditional methods of milling of dal and rice grains
6	Cleaning of rice, dal and spices for milling
7	Studies on different dehusking and deshelling equipments involved in the milling of paddy grains
8	Principles and Operational mechanism of rice mills
9	Determination of Head Rice Yield (HRY), Milled Rice Yield (MRY) and % Brokens
10	Determination of polishing quality of paddy
11	Studies on different by-products of paddy milling
12	Studies on different methods and pretreatments involved in pulse milling
13	Studies on Dry milling and Wet milling of pulses for production of dal
14	Principles and Operational mechanism of Dal Mills
15	Cleaning and inspection for effective grading and sieving of grains based on size and grade
16	Demonstration of the procedure of cleaning of unprocessed whole spices
17	Principles and Operational mechanism of Spice Mills
18	Manufacture of Dalia from cereals and legumes

19	Production process of rice from paddy
20	Study on Mini Dal Mill
21	Studies on utilization of by-products from dal milling industry
22	Preparation of turmeric powder
23	Preparation of curry powder
24	Recipe formulation and preparation of different spice mix powders (Turmeric, Chilli, Onion, Ginger etc.)
25	Sieve analysis of milled products for particle size distribution
26	Milling yield calculation for different grains
27	Packaging and storage techniques for milled products
28	Techno-economic feasibility of prepared spice powder and milled dal
29	Case study on spice powder processing industries
30	To study milling quality of rice, dal and spices
31	Study of packaging, labelling and FSSAI Regulations of Dehydrated products
32	Visit to Commercial Rice mill, Dal mill and Spice industry.

## **Food Quality Assurance**

Semester	:	I	
Course No.	:	SEC-xxx	Credit Hrs. : 2(0+2)
<b>Course Title</b>	:	Introduction to Food Safety and Sanitation	

## **TEACHING SCHEDULE**

Exercise No.	Exercise Topic/ Title
1-2	Understanding Food Safety and Sanitation: Concept, Terms and Importance
3-4	Developing the process flow for the food establishment including all the inputs, outputs and interim loops
5-6	Data collection for identification of biological, chemical and physical hazards
7-8	Hazard Analysis using FMEA Technique for Risk Assessment
8	Demonstration of Correct method of washing hands
9	Assessment of personal hygiene
10-11	Identifying the Key Focus Areas for GHP and GMP
12-13	Identifying Gaps in its Implementation; Closure Plans for Identified Gaps
14-15	Importance of temperature control and Demonstrating proper cooking, cooling and reheating temperatures using thermometers
16-17	Introduction to HACCP
18-19	Development of OPRP (Operational Pre-requisite Programme) and Development of HACCP Plan (Critical Limits including Rationale for Limits)
20-21	Monitoring Procedure, Correction and Corrective Measures
22-23	Introduction to Cleaning agents and Techniques for Sanitizing surfaces
24-25	Hands-on Demonstration of using Chemical Sanitizers correctly
26-27	To recognize signs of pest infestations and methods of control
28-29	Demonstration of segregation of waste
30-31	To study proper disposal methods for different types of waste
31-32	Practice identifying common food allergens and labelling

Semester	:	I	
Course No.	:	SEC-xxx	Credit Hrs. : 2(0+2)
<b>Course Title</b>	:	Introduction to Good Laboratory Practice	

Exercise No.	Exercise Topic/ Title	
1-2	Introduction and Importance of Good Laboratory Practices	
3-4	Practical session on identifying hazards and using appropriate Personal Protective Equipment	
5-6	Hands-on practice with common lab equipment (e.g., microscopes, pipettes, balances, centrifuges etc.)	
7-8	Equipment calibration techniques and How to properly maintain instruments	
9-10	Techniques for cleaning, drying and sterilizing lab glassware to prevent contamination	
11-12	Autoclave operation for Sterilization, Calibration of balances, pH meters and Spectrophotometers	
13-14	Sample collection techniques for biological, chemical, or environmental samples	
15-16	Correct labelling and storage procedures to maintain integrity	
17-18	Proper segregation and disposal of hazardous and non-hazardous lab waste	
19-20	Understanding chemical compatibility and safe disposal practices	
21-22	Performing basic quality control tests like titration, pH measurement and UV-Vis Spectrophotometry to assess the purity and quality of samples	
23-25	Aseptic techniques for handling microbial cultures, preparing agar plates and transferring cultures	
26-28	Detecting, recording and reporting errors or deviations in experimental work	
29-30	Writing and following SOPs for basic lab techniques like, solution preparation or instrument usage	

## **TEACHING SCHEDULE**

Exercise No.	Exercise Topic/ Title
1-2	Sampling plan; Sample collection and preparation for analysis
3-4	Sensory evaluation techniques of food products
5-6	Quality evaluation of food products for color and taste of marketed products
7-8	Determination of moisture content in food samples
9-10	Water analysis
11-12	Determination of ash content in food samples
12-13	Determination of crude fat in food samples
14-15	Determination of crude protein in food samples by Kjeldahl method
15-16	Determination of crude fibre in food samples
17	Qualitative tests for sugars
18-19	Qualitative tests for proteins, Colorimetric estimation of protein concentration
20-21	Estimation of total and reducing sugars
22-23	Measuring the pH of various food samples like fruits, dairy, and beverages
24-25	Determining the acidity in food samples by titrating with a base
26-27	Determination of Total Soluble Solids and Vitamin C in food samples
28	Determination of Salt Content in food samples
29-30	Estimation of chlorophyll and carotenoids in food samples
31	Estimation of Macro and Micro Minerals
32	Visit to NABL-Accredited Food Laboratory

## **Food Engineering**

Semester : I

Course No. : SEC-xxx Credit Hrs. : 2(0+2)

Course Title : Introduction to Electrical and Control Systems in Food Industry

## TEACHING SCHEDULE

Exercise No.	Exercise Topic/ Title
1-2	Build simple electrical circuits using resistors, capacitors and inductors
3	Measurement of voltage, current and resistance using a multimeter
4-5	Explore different types of sensors used in food processing
6-7	Performing calibration exercises with EC/ pH meter. Study of different types of motors (AC, DC, Stepper) and their applications
8-9	Developing a motor control circuit for a conveyor system
10-11	Programming simple control sequences using PLC software
12	Creating a basic ladder logic diagram for a conveyor belt system
13	Simulating PID control for a temperature control system
14-15	Designing a simple HMI using software tools (like Factory Talk or Win CC)
16-17	Integrating the HMI with PLC for monitoring and control
18-19	Setting-up a small SCADA system for monitoring a food processing operation
20-21	Understanding data logging and visualization techniques
22	Learning about industrial communication protocols (Modbus, Ethernet/IP)
23	Creating a simple network setup to connect PLCs and HMIs
25	Building and analyze a control loop for a food processing scenario (e.g. Pasteurization)
26	Understanding feedback mechanisms and their importance in control systems
27	To diagnose and troubleshoot faulty electrical circuits
28	To develop systematic approaches to identify common issues
29	To measure and analyze energy consumption in a small-scale food processing set-up
30	To explore energy-saving practices and technologies in the industry
31	Safety Protocols in Electrical Systems
32	Visit of food industry for practical exposure of electrical and control system

## **TEACHING SCHEDULE**

Exercise No.	Exercise Topic/ Title	
1-2	Introduction to mechanical system and its application in food industry	
3-4	To identify and understand the function of basic mechanical components (gears, belts, pulleys, bearings) used in food machinery	
5-6	To study different materials used in food machinery and their properties	
7-8	To practice the assembly and disassembly of simple food processing machines (e.g., mixers, blenders)	
9-10	To measure and analyze vibration in food processing equipment	
11-12	To learn how to identify issues such as misalignment or imbalance	
13-14	To perform routine maintenance tasks on mechanical systems (lubrication, belt tensioning)	
15-16	To conduct troubleshooting exercises to identify and fix common mechanical failures	
17	Study of principles, construction and working of Cleaning equipments	
18	Study of principles, construction and working of Sorting/grading equipments	
19	Study of principles, construction and working of Washing equipments	
20	Study of principles, construction and working of Handling equipments	
21	Study of principles, construction and working of Food packaging machines	
22-23	To conduct tests to evaluate corrosion resistance and suitability for food contact	
24-25	To explore the use of robotic systems for tasks such as packing or palletizing	
26-27	To implement quality control measures in a mechanical process (e.g., measuring dimensions of food products)	
28-29	To create basic mechanical drawings using CAD software	
30-31	Project work to enlist various mechanical parts and its functionality in different food processing industries	
32	Visit of Food Industry to identify mechanical systems in food processing	

Semester : I

Course No. : SEC-xxx Credit Hrs. : 2(0+2)

Course Title : Introduction to AutoCAD

## **TEACHING SCHEDULE**

Exercise No.	Exercise Topic/ Title
1-2	Introduction to AutoCAD and its application in the food processing industry
3-4	Familiarization with the AutoCAD interface: toolbars, menus, and command line
4-5	Practice using drawing tools to create geometric shapes
6-7	Experiment with drawing precision using grid and snap features
8	Learning to modify objects using commands such as move, copy, rotate, scale and mirror
9	To perform exercises on editing shapes and lines in an existing drawing
10	To create and manage layers in a drawing
11	To assign different colours and line types to layers for better organization
12	To add linear, radial and angular dimensions to drawings
13-14	To practice dimensioning techniques and understand best practices for clarity
15	To insert text and annotations into a drawing
16	To explore styles and formatting options for clarity and presentation
17-18	To draw a complete 2D engineering drawing of an equipment
19	Introduction to 3D modelling: create basic 3D shapes (cubes, cylinders)
20-21	To practice using 3D viewing tools and rendering techniques
22-23	Setting-up a layout for printing: scaling, title blocks and viewports
24-25	Understanding the file types and compatibility issues (DWG, DXF) to save the AutoCAD files
26	To attach and manage external references in a drawing
27-28	To develop a detailed plan (floor plan, mechanical part) incorporating multiple elements
29-30	To create isometric drawings to represent three-dimensional objects in two dimensions
31-32	To practice isometric dimensioning and labeling

## **Food Plant Operations**

**Course Title : Maintenance of Food Processing Equipment** 

## TEACHING SCHEDULE

Exercise No.	Exercise Topic/ Title
1-2	Hands-on identification of various types of food processing equipment
3-4	Creation of customized preventive maintenance checklists for different equipment
5-6	Simulated execution of a preventive maintenance routine
7	Understanding the types of lubricants used in food processing
8	Practicing proper lubrication techniques on machinery
9-10	Learning about different cleaning agents and their appropriate use
11-12	Conducting cleaning protocols on equipment in compliance with food safety standards
13-14	Practical exercises in electrical troubleshooting, including circuit testing and voltage measurement
15-16	Dismantling and reassembling parts of common food processing equipment
17-18	Simulated troubleshooting of common equipment malfunctions
19-20	Simulating the documentation of maintenance activities and creating maintenance logs
21	Study of maintenance of cleaning equipment
22-23	Study of care and maintenance of Sorting/Grading equipment
24-25	Study of care and maintenance of Milling equipment
26-27	Study of and care and maintenance of Drying equipment
28-29	Study of care and maintenance of Material Handling equipment
30-31	Study of care and maintenance of Packaging equipment
32	Study of care and maintenance of Storage units

Semester : I

Course No. : SEC-xxx Credit Hrs. : 2(0+2)

**Course Title**: Introduction to Bottling and Canning Line

## TEACHING SCHEDULE

Exercise No.	Exercise Topic/ Title
1-2	Introduction to bottling and canning process
3	Study of sorting and grading equipments
4	Study of washing equipments
5	Study of peeling methods and equipments
6	Study of cutting equipments
7	To perform the blanching of fruits and vegetables
8	To check the adequacy of blanching process
9-10	Study of different types of bottles and cans, including materials and sizes
11	Study of different filling techniques (gravity, pressure, vacuum)
12	Practical session on filling bottles/cans accurately
13	Cutout analysis of cans
14	Hands-on practice on in-bottle sterilization
15	Hands-on practice with various sealing methods (screw caps, corks, can lids)
16	Testing seal integrity using various methods
17	Practical session on labeling machinery operation
18	Coding and printing best practices for product information
19	Conduct quality checks on filled and sealed products
20	Discuss common quality issues and troubleshooting techniques
21	Study of domestic carbonator and carbonation process
22	Learn proper cleaning and sanitation protocols for equipment
23-24	Hands-on cleaning sessions for different parts of the line
25	Basic maintenance tasks for key equipments
26	Troubleshooting common problems in bottling and canning lines
27	Workshop on regulations affecting bottling and canning
28	Product Handling and Storage
29	Practical session on proper storage techniques
30-31	Study of packaging, labelling and FSSAI Regulations of beverages and canned products
32	Visit to Beverage and Canning Industry

## **TEACHING SCHEDULE**

Exercise No.	Exercise Topic		
1-2	Introduction and market survey of bakery products		
3-4	Study of different methods of preparation of bakery product (Bread, Biscuit, Cake and Cookies etc.)		
5-6	Determination of Gluten Content in wheat flour		
7-8	Determination of Sedimentation value of wheat flour		
9-10	Determination of Pelshenke value of wheat flour		
11-12	Determination of water and oil absorption of flour		
13-14	Determination of emulsion capacity and stability of flour		
15-16	Determination of foaming capacity and stability of flour		
17-18	Determination of alkaline water retention capacity of flour		
19-20	Preparation and quality evaluation of composite formulation of wheat-based cookie		
21-22	Preparation and quality evaluation of millet-based cookie formulations		
23-24	Preparation and quality evaluation of crackers		
25-26	Preparation and quality evaluation of unleavened flat breads		
27-28	Preparation and quality evaluation of leavened breads (White bread, Brown Bread)		
29	Preparation and quality evaluation of cake/muffin		
30	Preparation and quality evaluation of baked cereal bar		
31	Study of packaging, labelling and FSSAI Regulations of bakery products		
32	Visit a Commercial Bakery Unit		

## **ANNEXURE-VI**

(~ of DICC-Circular No. MAUEB/DICC-Circular/New UG Syllabi/420/24; Dtd. 29.11.2024)

New Undergraduate Degree Syllabus of <u>I-Semester</u> of

## **B.Sc.** (Hons.) Agri-Business Management

Finalized & Approved by the DICC as per the

ICAR - SIXTH DEANS' COMMITTEE REPORT

- ❖ UG-Diploma in Agri-Business Management

UG-Certificate in Agri-Business Management

❖ UG-Degree: B.Sc. (Hons.) Agri-Business Management

Dr. Panjabrao Deshmukh Krishi Vidyapeeth, Akola

Vasantrao Naik Marathwada Krishi Vidyapeeth, Parbhani

Dr. Balasaheb Sawant Konkan Krishi Vidyapeeth, Dapoli

Maharashtra Agricultural Universities Examination Board, Pune

Compiled & Submitted by

Dr. V.A. Shinde

Professor & Ex-Head (Ag. Econ.), MPKV, Rahuri.

**UG Degree Syllabus State Coordinator** 

with

UG Degree Syllabus Discipline Coordinators & DICC - UG Degree Syllabus Core Committee

Submitted to the

**Directors of Instruction Coordination Committee** 

~ w.e.f. AY, 2024-25 ~

# Course Curriculum of <u>First Semester</u> as per the ICAR-Sixth Deans' Committee Report for Academic Programmes in AGRI-BUSINESS MANAGEMENT

## **B.Sc.** (Hons.) Agri-Business Management

Semester: I (New) w.e.f. Academic Year: 2024-25

Sr. No.	Course No.	Course Title	Credit Hrs.	Remark
1.	CAC-111	Deeksharambh (Induction-cum-Foundation Course)	2(0+2)	NG (2 Weeks)
2.	AEC-111	National Service Scheme (NSS-I) / National Cadet Corps (NCC-I)	1(0+1)	
3.	AEC-112	Communication Skills	2(1+1)	
4.	MDC-111	Farming-based Livelihood Systems	3(2+1)	
5.	MATH-111*/ BOT-111**	Basic Mathematics*/ Basic Botany**	2(2+0)	Need- based
6.	ABM-111	Introduction to Agribusiness Management	2(2+0)	
7.	ECON-111	Fundamentals of Agricultural Economics	2(2+0)	
8.	AGRO-111	Introduction to Agronomy and Crop Production Technology	2(1+1)	
9.	GPB-111	Introduction to Genetics and Plant Breeding	2(1+1)	
10.	PATH-111	Management of Plant Diseases	2(1+1)	
11.	SEC-111	Skill Enhancement Course-I (To be offered from the bouquet of SEC Courses)	2(0+2)	
12.	SEC-112	Skill Enhancement Course-II (To be offered from the bouquet of SEC Courses)	2(0+2)	
	Total Credits Hrs.			

CAC: Common Academic Course, AEC: Ability Enhancement Course,

MDC: Multidisciplinary Course, SEC: Skill Enhancement Course,

G: Gradial, NG: Non-Gradial

**Note**: \*MATH-111 for **PCB** student/ \*\*BOT-111 for **PCM** student / **PCMB** students should opt any one choice-based course viz., MATH-111 or BOT-111 for completion of the mandatory gradial credits.

#### B.Sc. (Hons.) A.B.M. : First Semester

#### **Course-wise Syllabus with Teaching Schedules**

Semester : I

Course No. : CAC-111 Credit Hrs. : 2 (0+2) NG/ 2 Weeks

Course Title : Deeksharambh (Induction-cum-Foundation Course)

Non-Gradial Common Academic Course for the said UG degree with the activities to be conducted during initial two weeks.

#### **Objectives**:

- (i) To create a platform for students to help for cultural Integration of students from different backgrounds,
- (ii) To know about the operational framework of academic process in university, instilling life and social skills,
- (iii) To create Social awareness, Ethics and Values, Team work, Leadership, Creativity,
- (iv) To identify the traditional values and indigenous cultures along with diverse potentialities both in indigenous and developed scenario.

#### **ACTIVITIES**

- ➤ Introduction/ Orientation and Discussions on operational framework of academic process in University/ College, as well as interactions with Academic and Research Managers of the University.
- ➤ Interaction with Alumni, Business Leaders, Perspective Employers, Outstanding Achievers in related fields and people with inspiring life experiences.
- ➤ Group activities to identify the strength and weakness of students and to learn from each other's life experiences.
- Activities to enhance Cultural Integration of students from different backgrounds.
- Field visits to the relevant fields/ establishments.
- Sessions on Personality Development (Instilling Life and Social skills, Social awareness, Ethics and Values, Team work, Leadership etc.) and imbibing the Communication skills.

**Note:** The details of the relevant activities will be decided by the parent University in line with the above-mentioned broad activities.

Syllabus of **B.Sc. (Hons.) Agri-Business Management** as per the ICAR - Sixth Deans' Committee Report 2024 Pg **2** of **36** 

 Semester
 : I

 Course No.
 : AEC-111
 Credit Hrs.
 : 1 (0+1)

 Course Title
 : National Service Scheme (NSS-I) / National Cadet Corps (NCC-I)

 Gradial Common Course across all UG Degrees

Course No.: AEC-111 | Course Title: National Service Scheme-I (NSS-I) | Credit Hrs: 1(0+1)

#### **SYLLABUS**

#### **PRACTICAL**

#### **Introduction and Basic Components of NSS**

- Orientation: History, Objectives, Principles, Symbol, Badge; Regular Programs under NSS.
- Organizational structure of NSS, Code of conduct for NSS volunteers, Points to be considered by NSS Volunteers' awareness about Health.
- NSS program activities. Concept of regular activities, Special camping, Day camps,
  Basis of adoption of village/slums, Conducting survey, Analysing Guiding financial
  patterns of scheme, Youth program/schemes of GOI, Coordination with different
  agencies and maintenance of diary. Understanding youth. Definition, Profile,
  Categories, Issues and Challenges of youth; and Opportunities for youth who is agent
  of the social change.
- Community mobilization. Mapping of community stakeholders, Designing the message as per problems and their culture; Identifying methods of mobilization involving youth-adult partnership. Social harmony and National integration.
- Indian history and culture, role of youth in nation building, Conflict resolution and peace building. Volunteerism and Shramdaan. Indian tradition of volunteerism, its need, importance, motivation and constraints; Shaman as part of volunteerism.
- Citizenship, Constitution, and Human rights. Basic features of constitution of India,
  Fundamental rights and duties, Human rights, Consumer awareness and rights and
  Right to information. Family and Society. Concept of family, Community (PRIs and
  other community-based organizations) and Society.

Exercise	Exercise Topic/ Title	Weightage	
No.		(%)	
1	Orientation, History, Objectives, Principles, Symbols, Badge	10	
2	Regular Programmes under NSS	10	
3	Organizational Structure of NSS	10	
4	Code of Conduct of NSS Volunteer	10	
5	Points to be considered about NSS Volunteers awareness about Health	5	
6	NSS Programme Activities- Concept of Regular activities	5	
7	NSS Programme Activities- Special Campaign	5	
8	NSS Programme Activities- Day Camps	5	
9	NSS Programme Activities- Adoption of village, Conducting survey, Analyzing Guiding financial patterns of scheme		
10	NSS Programme Activities- Youth programs/schemes of GOI, Coordination with different agencies and maintenance of diary. Understanding youth. Definition, Profile, Categories, Issues and Challenges of youth and Opportunities for youth who is agent of the social change.	5	
11	Community Mobilization- Mapping of community stakeholders, Designing the message as per problems and their culture; Identifying methods of mobilization involving youth-adult partnership.		
12	Community Mobilization-Culture, Social harmony and National integration.	5	
13	Indian History and Culture- Role of youth in Nation Building	5	
14	Volunteerism and Shramdaan: Indian tradition of volunteerism, its need, importance, motivation and constraints; Shaman as part of volunteerism.	5	
15	Citizenship, Constitution and Human Rights: Basic features of constitution of India, Fundamental rights and duties, Human rights, Consumer awareness and rights and Right to information.	5	
16	Family and Society: Concept of family, Community (PRIs and other community-based organizations) and Society.		
	Total =	100	

Course No.: AEC-111 | Course Title: National Cadet Corps-I (NCC-I) | Credit Hrs.: 1(0+1)

#### **SYLLABUS**

**Objective:** To integrate and develop qualities of leadership, discipline, character and patriotism and foster the NCC Motto: "Unity and Discipline" among the youth.

- Aims, Objectives, Organization of NCC and NCC Song. DG's Cardinals of Discipline.
- Drill- aim, General words of command, Attention, Stands-at-ease, Stand-easy and Turning.
- Sizing, Numbering, Forming in three ranks, Open and Close order march and Dressing.
- Saluting at the halt, Getting on parade, Dismissing and Falling-out.
- Marching, Length of pace and time of marching in quick/slow time and halt. Side pace, Pace forward and to the rear. Turning on the march and wheeling. Saluting on the march.
- Marking time, Forward march and halt. Changing step, Formation of squad and squad drill.
- Command and control, Organization, Badges of rank, Honours and Awards.
- Nation Building- Cultural heritage, Religions, Traditions and Customs of India.
  National integration. Values and ethics, Perception, Communication, Motivation,
  Decision making, Discipline and duties of good citizens. Leadership traits, Types of
  leadership. Character/ Personality development. Civil defence organization, Types of
  emergencies, Fire-fighting, Protection. Maintenance of essential services, Disaster
  management, Aid during development projects.
- Basics of Social Service, Weaker sections of society and their needs, NGO's and their contribution, Contribution of youth towards Social welfare and Family planning.
- Structure and Function of human body, Diet and Exercise, Hygiene and Sanitation.
   Preventable diseases including AIDS, Safe blood donation, First aid, Physical and mental health. Adventure activities. Basic principles of Ecology, Environmental conservation, Pollution and its control.

## PRACTICAL [AEC-111]

Exercise No.	Exercise Topic	Exercise Sub-topics/ Titles	Weightage (%)
110.	T414 4	Aires Objections NGC Operational attraction	(%)
1-2	Introduction to NCC	Aims, Objectives, NCC Organizational structure, NCC Song, DG's Cardinals of Discipline.	4
		Aim of drill, General words of command,

30-32	Ecology	Pollution and its control, Adventure activities.	

Syllabus of **B.Sc. (Hons.) Agri-Business Management** as per the ICAR - Sixth Deans' Committee Report 2024 Pg **6** of **36** 

#### **SYLLABUS**

**Objectives:**(i) To acquire competence in oral, written and non-verbal communication,

- (ii) To develop strong personal and professional communication and
- (iii) To demonstrate positive group communication.

#### **THEORY**

Communication Process: The magic of effective communication; Building self-esteem and overcoming fears; Concept, nature and significance of communication process; Meaning, types and models of communication; Verbal and Non-verbal communication; Linguistic and non-linguistic barriers to communication and reasons behind communication gap/miscommunication. Basic Communication Skills: Listening, Speaking, Reading and Writing Skills; Precis writing/Abstracting/Summarizing; Style of technical communication, Curriculum vitae/resume writing; Innovative methods to enhance vocabulary, analogy questions; Structural and Functional Grammar: Sentence structure, modifiers, connecting words and verbals; Phrases and clauses; Case: subjective case, possessive case, objective case; Correct usage of nouns, pronouns and antecedents, adjectives, adverbs and articles; Agreement of verb with the subject: tense, mood, voice; Writing effective sentences; Basic sentence faults.

#### **PRACTICAL**

Listening and note taking; Writing skills: précis writing, summarizing and abstracting; Reading and comprehension (written and oral) of general and technical articles; Micropresentations and Impromptu Presentations: Feedback on presentations; Stage manners: grooming, body language, voice modulation, speed; Group discussions; Public speaking exercises; Vocabulary building exercises; Interview techniques; Organization of events.

## THEORY [AEC-112]

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)
1	Communication Process: The Magic of Effective Communication	Elements of Communication process such as Communicator, Message, Channel treatment of message, Audience and Audience response.	5
2	Building Self-esteem and Overcoming Fears	Points to build Self-esteem, Build social connections, Encourage yourself, Focus on solutions and Set realistic goals, Strategies to overcome fears, Practice, Visualise Success, Preparation, Know your audience, Seek feedback and Active listening.	5
3		Concept, Nature and Significance of Communication process	10
4		Meaning, Types and Models of communication	10
5	Communication	Verbal and Non-verbal communication, Linguistic and Non-linguistic communication	10
6		Barriers to communication and Reasons behind communication gap/ miscommunication	5
7		Listening, Speaking, Reading, Writing skills	5
8	Basic Communication Skills	Précis writing/ Abstracting/ summarizing- Styles of technical communication, Curriculum Vitae/resume writing	10
9		Innovative methods to enhance vocabulary, analogy questions	5
10		Sentence structure, modifiers, connecting words and verbal; Phrases and Clauses	5
11		Case: Subjective case, Possessive case, Objective case	5
12	Structural and Functional Grammar	Correct usage of nouns, Pronouns and Antecedents	5
13	i uncuviiai Gi allilliai	Adjectives, Adverbs and Articles	5
14		Agreement of verbs with the subject: Tense, Mood, Voice	5
15		Writing effective sentences	5
16		Basic sentence faults	5
		Total =	100

#### PRACTICAL [AEC-112]

Exercise No.	Exercise Topic/ Title	
1	Listening and Note taking	
2	Writing skills- Précis writing	
3	Writing skills- Abstracting	
4	Writing skills- Summarizing	
5	Reading and Comprehension (written and oral) of general and technical articles	
6	Micro-presentations	
7	Impromptu presentations	
8	Feedback on presentations	
9	Stage manners- Grooming	
10	Stage manners- Body language	
11	Stage manners- Voice modulations, Speed	
12	Group discussions	
13	Public speaking exercise	
14	Vocabulary building exercises	
15	Interview techniques	
16	Organisation of events	

#### **Suggested Readings:**

#### **SYLLABUS**

**Objectives:** (i) To make the students aware about farming-based livelihood systems in Agriculture,

(ii) To disseminate the knowledge and skills that how farming-based systems can be a source of livelihood.

#### **THEORY**

Status of Agriculture in India and different States, Income of farmers and rural people in India, Livelihood- Definition, Concept and Livelihood patterns in urban and rural areas, Different indicators to study livelihood systems. Agricultural Livelihood Systems (ALS): Meaning, approach, approaches and framework, Definition of farming systems and farmingbased livelihood systems, Prevalent Farming systems in India contributing to livelihood. Types of traditional and modern farming systems. Components of farming system/ farmingbased livelihood systems: Crops and cropping systems, Livestock, (Dairy, Piggery, Goatry, Poultry, Duckry etc.), Horticultural crops, Agroforestry systems, Aquaculture, Duck/Poultrycum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.; Small, medium and large enterprises including value chains and secondary enterprises as livelihood components for farmers, Factors affecting integration of various enterprises of farming for livelihood. Feasibility of different farming systems for different agro-climatic zones, Commercial farming-based livelihood models by NABARD, ICAR and other organizations across the country; Case studies on different livelihood enterprises associated with the farming. Risk and success factors in farming-based livelihood systems, Schemes and programs by Central and State Governments; Public and Private organizations involved in promotion of farming-based livelihood opportunities. Role of farming-based livelihood enterprises in 21st Century in view of circular economy, green economy, climate change, digitalization and changing lifestyle.

#### **PRACTICAL**

Survey of farming systems and agriculture-based livelihood enterprises, Study of components of important farming-based livelihood models/systems in different agro-climatic zones, Study of production and profitability of crop based, livestock based, processing-based and integrated farming-based livelihood models, Field Visit of innovative farming system models. Visit of Agri-based enterprises and their functional aspects for integration of production, processing and distribution sectors and Study of agri-enterprises involved in industry and service sectors (Value Chain Models), Learning about concept of project formulation on farming-based livelihood systems along with cost and profit analysis, Case study of Start-Ups in agri-sectors.

## THEORY [MDC-111]

Lecture No.	Торіс	Sub-topics/Key Points	Weightage (%)
1	Status of Agriculture in India	Historical background, Current status, Role of Agriculture in Indian Economy	4
2	Status of Agriculture in Different States	State-wise scenario, Major crops, Regional diversity	4
3	Income of Farmers and Rural People in India	Factors affecting income, Rural-urban income gap, Government initiatives	4
4	Livelihood: Definition, Concept, and livelihood Patterns in urban and rural areas	Livelihood-Definition and its Concept, Urban vs Rural livelihood patterns, Sources of income	4
5	Different Indicators to Study Livelihood Systems	Economic, Social and Environmental indicators, Measuring livelihood resilience	4
6	Agricultural Livelihood Systems (ALS): Meaning and Approaches	Definition, Significance of ALS, Integrated farming systems, Approaches	4
7	ALS Framework and Case studies	Framework for ALS, Case studies in India	4
8	Definition of Farming Systems and farming based Livelihood Systems	Definition and Role of farming systems in rural livelihoods, Examples of systems	4
9	Prevalent Farming Systems in India contributing to livelihood	Traditional vs. Modern farming systems, Regional differences	4
10	Types of Traditional and Modern Farming Systems	Types; Differences; Strengths, Limitations, Case studies	4
11	Components of farming system/farming-based livelihood systems - Crops and Cropping Systems	Components, Crop diversification, Cropping pattern, Mixed cropping, Importance for rural livelihoods	4
12	Livestock-based Farming Systems	Importance and Management of dairy, piggery, poultry, goatry, duckry, etc.	4
13	Horticultural Crops and Livelihoods	Role of fruits, vegetables and spices in rural income generation	4
14	Agroforestry Systems	Agroforestry- Definition, Combining trees and crops, Agroforestry models in India	2
15	Aquaculture as a Livelihood System	Importance of Aquaculture, Integrated systems (e.g. Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.)	4
16	Challenges in Aquaculture- based Systems	Feasibility, Government support and Market access	2

Continued...

## *MDC-111*...

17	Small Enterprises in Farming	Role of small enterprises, Value addition, Local processing	2
18	Medium and Large Enterprises in Farming	Value chains, Secondary enterprises as livelihood components for farmers, Agri-processing.	2
19	Factors affecting Integration of various enterprises of farming for livelihood	Technology, Market access, Credit and infrastructure challenges etc.	4
20	Strategies for Enterprise Integration	Successful integration, Government policies, Examples.	2
21	Overview of Agro-Climatic Zones in India	Characteristics of different zones and their agricultural potential.	2
22	Feasibility of different Farming Systems for different Agro-Climatic Zones	Suitable farming systems for different zones, Climate adaptation.	2
23	Commercial Farming Based Livelihood Models by NABARD, ICAR and other organizations across the country	Role of NABARD, ICAR and other Organizations in promoting commercial models, Successful cases.	4
24	Case studies on different Livelihood Enterprises associated with farming	Analysis of successful enterprises, Dairy Cooperatives etc.	4
25	Risk Factors in Farming- based Livelihood Systems	Climate, Market fluctuations, Input costs; Mitigation strategies etc.	4
26	Success Factors in Farming-based Livelihood Systems	Innovation, Market access, Government support, Social capital etc.	2
27	Schemes and Programmes by the Central Government	Overview of schemes like, PM-KISAN, National Rural Livelihood Mission.	2
28	Schemes and programmes by State Governments	State-specific programs promoting rural livelihoods, Case examples.	2
29	Role of Private Sector in Livelihood Promotion	Public-Private Partnerships, Role of private agribusiness.	2
30	Public-Private Partnerships in Agriculture	Successful collaborations in rural development and farming systems	2
31	Farming-based Livelihoods in the 21st Century	Circular economy, Green economy, Climate change, Sustainability.	2
32	Impact of Digitalization and Changing Lifestyles	Technology in Agriculture, Future prospects for rural livelihoods.	2
		Total =	100

# PRACTICAL [MDC-111]

Exercise No.	Exercise Topic	Exercise Sub-topics/ Titles
1	Survey of Farming Systems and Agriculture-based Livelihood Enterprises	Methods of data collection; Field survey techniques; Preparing reports on surveyed farms.
2	Study of Components of Farming-based Livelihood Models in Different Agro- Climatic Zones	Components: Crop, Livestock, Fishery, Agroforestry; Identifying models suited to specific zones.
3	Study of Production and Profitability of Crop-based Models	Analysis of input-output relations; Identifying profitable crops
4	Study of Livestock-based Models	Livestock systems: Dairy, poultry, goat farming; Profitability and market access
5	Study of Processing-based Models	Value addition in agriculture; Studying small-scale food processing units
6	Study of Integrated Farming- based Models	Study of crop-livestock-aquaculture integration; Synergies and challenges
7	Field Visit to Innovative Farming System Models	Visit to farms using modern technologies; Documenting practices
8	Visit to Agri-based Enterprises	Enterprises involved in input supply or value addition
9	Study of Functional Aspects: Integration of Production, Processing and Distribution	Backward and forward linkages; Assessing supply chain models
10	Agri-Enterprises in Industry and Service Sectors (Value Chain Models)	Studying value chain enterprises; Evaluating sustainability models
11	Concept of Project Formulation on Farming-based Livelihood Systems	Identifying project objectives; Structuring budgets and timelines
12	Cost and Profit Analysis of Farming-based Livelihood Projects	Developing Cost-Benefit analysis; Identifying Break-Even points
13	Case Study of Start-ups in Agrisectors	Analysing real-world Start-ups; Identifying success factors
14	Group Project: Develop a Farming-based Livelihood Model	Formulating a working model; Feasibility and sustainability analysis
15	Preparation of Report on Farming Systems Survey and Livelihood Models	Compiling field data; Preparing reports with recommendations
16	Presentation and Evaluation of Practical Project Reports	Group presentations; Internal assessment of reports and participation

#### **Suggested Readings [MDC-111]:**

- 1. Ashley, C., & Carney, D. (1999). Sustainable Livelihoods: Lessons from Early Experience. Department for International Development, London, UK.
  - o **Relevance**: This book explores sustainable livelihood frameworks, which are key to understanding livelihood patterns and rural income systems.
- **2. Agarwal, A., & Narain, S.** (1989). Towards Green Villages: A Strategy for Environmentally Sound and Participatory Rural Development. Centre for Science and Environment, New Delhi, India.
  - o **Relevance**: Provides strategies for participatory rural development, focusing on environmental sustainability—a core concept in farming systems.
- **3.** Carloni, A. (2001). Global Farming Systems Study: Challenges and Priorities to 2030 Regional Analysis: Sub-Saharan Africa. FAO, Rome, Italy.
  - o **Relevance**: Offers insights into global farming system challenges, with lessons that can be adapted for Indian contexts in agricultural development.
- **4. Dixon, J., Gulliver, A., & Gibbon, D.** (2001). Farming Systems and Poverty: Improving Farmers' Livelihoods in a Changing World. FAO & World Bank, Rome & Washington, DC.
  - o **Relevance**: Focuses on farming systems' role in poverty alleviation and rural livelihood improvement.
- **5. Evenson, R.E.** (2000). Agricultural Productivity and Production in Developing Countries. In FAO, The State of Food and Agriculture. FAO, Rome, Italy.
  - o **Relevance**: Discusses agricultural productivity, a critical factor in sustainable farming and improved livelihoods.
- **6. Bhatt, B.P.,** *et al.* (**ICAR Research Complex for Eastern Region**). *Livelihood Improvement of Underprivileged Farming Community: Experiences from Bihar.* Patna, Bihar.
  - **Relevance**: Case studies on improving livelihoods in rural India, relevant to learning about region-specific agricultural interventions.
- 7. Panwar et al. (2020). Integrated Farming System Models for Agricultural Diversification, Enhanced Income, and Employment. Indian Council of Agricultural Research, New Delhi.
  - **Relevance**: Provides models for agricultural diversification and income enhancement, which align with farming system topics.
- **8. Reddy, S.R.** (2016). Farming System and Sustainable Agriculture. Kalyani Publishers, New Delhi.
  - o **Relevance**: Covers sustainable agriculture principles and farming system models, essential for sustainable livelihood systems.
- **9. Singh, J.P.** *et al.* (2016). Region Specific Synthesized Integrated Farming System Models for Improved Production, Profitability and Nutrition (Series-1). Bulletin, ICAR-Indian Institute of Farming Systems Research, Modipuram, Meerut (U.P.).
  - **Relevance**: Discusses integrated farming models tailored to different agro-climatic regions of India, essential for practical learning.
- **10.** Walia, S.S., & Walia, U.S. (2020). Farming System and Sustainable Agriculture. Scientific Publishers, Jodhpur, Rajasthan.
  - **Relevance:** Provides insights into sustainable agricultural practices and integrated farming systems with regional focus.

Syllabus of B.Sc. (Hons.) Agri-Business Management as per the ICAR - Sixth Deans' Committee Report 2024 Pg 14 of 36

Semester	: I (New)				
Course No.	: MATH-111*	Credit Hrs.	:	2(2+0)	Need-based; G
<b>Course Title</b>	: Basic Mathematics				
*Gradial Need-based Course only for B.Sc. (Hons.) Agri-Business Management					

#### **SYLLABUS**

#### **Objectives:**

- (i) To introduce the basic principles and functions in Mathematics,
- (ii) To study differentiation and integration,
- (iii) To study matrices and determinants.

#### **THEORY**

**Algebra: Progressions**: Arithmetic Progression: Definition, Sum of n terms, Examples. Geometric Progression: Definition, sum of n terms, Examples. Harmonic Progression: Definitions, Examples.

**Determinants:** Definition of Determinant, Expansion of determinant up to  $3^{rd}$  order, Examples; Properties of determinants up to  $3^{rd}$  order (without proof).

**Matrices:** Definition of Matrices, Order of Matrix, Types of Matrices, Algebra of Matrices: Addition, Subtraction, Multiplication, Examples, Transpose of Matrix and it's properties (without proof).

**Differential Calculus**: Definition, Differentiation of function using first principle, Examples. Rules of Differentiation: Derivatives of sum, difference, product and quotient of two functions (Formulae only), Derivative of Standard Functions: Algebraic Function, Trigonometric, Logarithmic and Exponential Functions (Formulae only), Examples. Increasing and Decreasing Functions, Growth rate, Average cost, Marginal cost, and Marginal revenue. Examples.

**Partial Differentiation:** Definition, Homogeneous function, Euler's theorem, Examples. Maxima and Minima of the functions of the form y = f(x) and y = f(x1, x2), Examples.

**Integral Calculus:** Definition of Indefinite and Definite Integrals, Integrals of elementary functions (Formulae only), Theorems of integration (without proof), Integration by substitution, Examples. Integration by parts, Examples, Application of Integration: To find Area under simple well-known curves (Simple problems based on it).

**Mathematical Models:** Agricultural systems - Mathematical models - Classification of mathematical models- Fitting of Linear, Quadratic and Exponential models to experimental data.

#### **Suggested Readings:**

- 1. NCERT, 2012, Mathematics of Class XII, NCERT, India.
- 2. A Textbook of Mathematics XI and XII (Part I and II) Maharashtra State Board of Secondary and Higher Secondary Education, Pune.
- 3. Sharma RD, 2014, Mathematics of Class XII, Dhanpat Rai Publisher.

# THEORY [MATH-111]

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)
1 - 3	Algebra: Progressions	Arithmetic Progression: Definition, Sum of n terms, Examples.  Geometric Progression: Definition, Sum of n terms, Examples. Harmonic Progression: Definitions, Examples.	10

Semester : I

Course No. : BOT-111\*\* Credit Hrs. : 2(2+0) Need-based; G/NG

Course Title : Basic Botany

\*\*Need-based Common Course among 3 UG Degrees:

B.Tech. (Biotech.) - Gradial / B.Sc. (Hons.) A.B.M. - Gradial / B.Tech. (Food Tech.) - Non-Gradial

#### **SYLLABUS**

**Objectives:** i. To study the basic taxonomy and classification of plants,

ii. To study the features of plant kingdom and morphology,

iii. To study the internal structures of plants.

#### **THEORY**

Plant Kingdom and Features of each group. Plant taxonomy, Systems of classification. Morphology, Modifications and Functions of Root, Stem, Leaf, Flower and Inflorescence. Pollination and Fertilization. Fruit types. Structure of dicot and monocot seed, and seed germination. Cell structure. Chromosome, DNA and Genes. Cell and tissue types. Internal structure of root, stem and leaf. Characteristics and economic importance of Poaceae, Brassicaceae, Fabaceae, Malvaceae, Rutaceae, Rosaceae, Asteraceae and Solanaceae families.

#### **TEACHING SCHEDULE**

#### THEORY [BOT-111]

Lecture No.	Topics	Sub-topics/ Key Points	Weightage (%)
1-3	Plant Kingdom and Features:	Classification of Plant Kingdom (Major plant groups: Bryophytes, Pteridophytes, Gymnosperms, and Angiosperms.) Key distinguishing features/ Characteristics of each group with examples. Plantae Kingdom.	8
4-5	Plant Taxonomy and Systems of Classification:	Binomial nomenclature and other systems of classification (in brief)	5
6-7	Plant Cell and Tissue Types:	Basic Structure of a Plant Cell and Tissue, Types of Plant Cells and Tissues; Plant Cell Functions.	8
8-9	Chromosome:	Definition and Overview, Chemical Composition; Chromosome Morphology, Types of Chromosomes.	8

Continued...

#### **BOT-111...**

	DNA:	Brief historical overview of DNA discovery, Watson-Crick model of DNA,			
10-11		Chemical composition, Components of a nucleotide, Structures of Purines and Pyrimidines.	8		
		Definitions (Gene, Allele, Genotype, Phenotype, Exon, Intron, Codon) and			
12	Comos	Historical Overview;	0		
12	Genes:	Structure: Basic layout of a gene- (Exon, Intron, etc.);	8		
		Types of genes, Codons (Start/Stop).			
		Definitions/Terminology, Types,			
	D-11:	Agents of pollination,			
13-14	Pollination and Fertilization:	Processes/Events, Significances,	10		
		Barriers to Fertilization,			
		Differences between their types.			
15-16	Root and Stem:	Morphology, Modifications with examples and Functions	8		
17-19	Leaf, Flower and Inflorescence:	Morphology, Modifications with examples and Functions	8		
20	Fruits:	Types of fruits with examples	3		
21-22	Structures of Monocot and Dicot Seeds:	Structure, Diagrams, Differences	5		
23-24	Seed Germination:	Definitions, Types, Differences and Stages of seed germination	5		
Plant tax	onomy-Classification; Ch	aracteristics and Economic Importance;			
Members/ Examples of following Families viz.,					
25-26					
27-28	Fabaceae and Malvaceae	4			
29-30	Rutaceae and Rosaceae	4			
31-32	-32 Asteraceae and Solanaceae				
Total=

Semester	:	I	
Course No.	:	ABM-111	Credit Hrs. : 2(2+0)
<b>Course Title</b>	:	Introduction to Agri-Business Ma	anagement

#### **SYLLABUS**

#### **Objectives:**

- To gain a comprehensive understanding of agribusiness structures, functions, a and dynamics;
- (ii) To develop essential management skills applicable to agricultural enterprises;
- (iii) To explore strategies for optimizing production efficiency and maximizing profitability in agribusiness; and
- (iv) To prepare for diverse careers in farm management, agricultural marketing, finance, and consulting.

#### **THEORY**

Indian Agriculture: Place of Agriculture in Indian Economy, Trends in the structure of Indian Economy Role of Agriculture in Economic Development in India. Trends in agricultural production and productivity, cropping pattern size of farms and farm efficiency. Functions of Management: Planning, organizing, staffing, motivation and control and Principles of Management. Indian Agriculture; Impact of Liberalization, Privatization and Globalization on Agribusiness sector. Agribusiness Management: Definition, Importance, Scope of Agribusiness Management, Nature and Functions. Agribusiness input and output services, Agricultural credit and foreign trade, Planning and Organizing agribusiness. New trends in Agribusiness: Contract farming, Types and Scope of contract farming, Working of Contracts, Contract Models, Organic Farming, Genetically Modified Food, Farmer Producers' Organizations (FPO) Case Studies.

# THEORY [ABM-111]

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)
1-3	Indian Agriculture	Place of Agriculture in Indian Economy, Trends in the structure of Indian Economy, Role of Agriculture in Economic Development in India	10
4		Trends in Agricultural Production and Productivity	6
5		Cropping pattern, Size of farms and Farm efficiency	0
6	Functions of Management- Planning	Meaning, Importance and Characteristics	4
7	Directing	Meaning, Importance and Principles	4
8	Organizing	Meaning, Nature/ Characteristics, Purpose	4
9	Staffing	Meaning, Objectives, Importance, Process of Selection	4
10	Controlling	Meaning, Nature, Characteristics and Importance	4
11-13	Principles of Management	Principles of Management- Meaning, Evolution, Features, Levels of Management, Roles of Manager, Managerial Skills	12
14-15	Indian Agriculture	Impact of Liberalization, Privatization, Globalization on Agribusiness sector	6
16-18	Agri-business Management	Definition, Importance, Scope, Nature, Functions of Agri-business Management	6
19-20	Agri-business	Input services, Output services	6
21	Agricultural Credit	Trends of Agricultural Credit in India, Agricultural Credit Policy	6
22	Agricultural Foreign Trade	Importance, Policy, Trade Organizations	O

Continued...

23-24	Planning and Organizing Agri-business	Business Planning; Market Analysis, Financial Planning, Legal considerations, Organizational Structure, Financial & Risk Management	4
25-28	New Trends in Agri-business	Contract farming, Definitions, Types and Scope of contract farming, Working of contracts, Contract models	12
29	Organic Farming	Characteristics of Organic Farming, Principles of Organic Farming	2
30	Genetically Modified Food	Definition, Examples, Indian Scenario	4
31 -32	Farmer Producers' Organizations (FPO)	Definition, Introduction, Importance, Organisation, Functions; Case Studies (Two only)	6
Total=			100

- 1. A Handbook of Agribusiness- S.C. Gaur and D. Singh
- 2. A Textbook of Agri-business Management- Sanket S. Kadam, Universal Prakashan, Pune.
- 3. Indian Agriculture and Agri-business Management, Dr. Smita Diwase, Krishi Resource Management Network.
- 4. Farm Business Management: The Fundamentals of Good Practice by Peter L Nuthall.
- 5. Fundamentals of Agribusiness Finance by Ralph W. Battles and Robert C. Thompson.
- 6. Objective Agri-business Management by S.R. Panigrahy.
- 7. Agri-business: Management, Marketing, Human Resource Development, Communication, and Technology by Robert H. Usry and Lanny W. Hass
- 8. Agri-business and Market Management by Amod Sharma.

\_\_\_\_\_

Semester	:	I		
Course No.	:	ECON-111	Credits Hrs. :	2(2+0)
Course Title	:	Fundamentals of Agricult	ural Economics	

#### **SYLLABUS**

#### **Objectives:**

- (i) To understand the fundamental principles of economics as they apply to Agriculture,
- (ii) To analyze the economic factors influencing agricultural production, distribution and consumption,
- (iii) To explore the role of government policies and international trade in shaping the agricultural economy,
- (iv) To develop critical thinking skills to evaluate and address economic challenges and opportunities in Agriculture.

#### **THEORY**

Agricultural Economics: Meaning, Definition, Characteristics of Agriculture, Nature and Scope of Agricultural Economics, Distinction between Agriculture and Industry, Role of Agriculture in economic development, Role of Government Interventions in Agricultural development. Planning and Agricultural Development: Meaning and Objectives, Economic planning, Benefits of planning, Agricultural development during different Five-year Plans in India, Measures of reorganization of agriculture and NITI Aayog. Factors of production: Meaning of land and its Characteristics, Labour concept, Characteristics of labour and Efficiency of labour, Capital concept and its Characteristics, Forms of capital in Agriculture and Process of capital formation, Organization of business firms, Forms of business organizations and their characteristics. Land reforms: Land reforms and Land tenure systems, Concepts of agricultural land holdings in India. Theory of production: Meaning, Definition, Types of production functions, Laws of Diminishing Marginal Returns and Elasticity of production. Scale of production: Meaning, Classification and Economies of scale. Theory of costs: Meaning, Definitions and Different types of costs and their Measurement. Revenue concept: Total revenue, Average revenue, Marginal revenue and Profit maximization.

# THEORY [ECON-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1-2	Agricultural Economics	Meaning, Definition, Characteristics of Agriculture, Nature and Scope of Agricultural Economics	10
3	Distinction between Agriculture and Industry	Distinction between Agriculture and Industry	2
4-5	Role of Agriculture	Role of Agriculture in economic development, Role of Government interventions in agricultural development	8
6-7	Planning and Agricultural Development	Meaning and Objectives, Economic planning, Benefits/ Importance of planning,	4
8-11	Agricultural Development during different Five-Year Plans in India  Plan period, Outlay Share, Growth rates and Achievements in the field of Agriculture in brief		8
12-13	Measures of Reorganization of Agriculture	Measures of reorganization of Agriculture	2
14-16	NITI Aayog	History of Planning Commission, NITI Aayog, Organization, Working, Role for Agricultural development	8
17-20	Factors of Production	Meaning of land and its characteristics, Labour concept, Characteristics of labour and Efficiency of labour, Capital concept and its characteristics, Forms of capital in Agriculture and Process of capital formation, Organization of business firms, Forms of business organizations and their characteristics.	10
21-22	Land Reforms	Land reforms, Land tenure systems, Concepts of agricultural land holdings in India	8
23-24	Theory of Production	Meaning, Definition, Types of Production functions	8

Continued...

#### **ECON-111**...

25-26	Laws of Diminishing Marginal Returns and Elasticity of Production	Laws of Diminishing Marginal Returns and Elasticity of production	8
27-28	Scale of Production	Meaning, Classification and Economies of scale	10
29-30	Theory of Costs	Meaning, Definitions and Different types of costs and their measurement	10
31-32	Revenue Concept	Total revenue, Average revenue and Marginal revenue and Profit maximization	4
		Total=	100

## **Suggested Readings [ECON-111]:**

- 1. Agriculture Economics by Shubha Reddy.
- 2. Finance by Shubha Reddy.
- 3. Economic of farm production and management by V.T. Raju and V.S. Rao.
- 4. Agricultural marketing in India by S.S. Acharya and N.L. Aggarwal.
- 5. Modern Microeconomics by Koutsoyiannis.

Semester:ICourse No.:AGRO-111Credits Hrs.:2(1+1)Course Title:Introduction to Agronomy and Crop Production Technology

#### **SYLLABUS**

#### **Objectives:**

- (i) To understand the principles of Agronomy and Crop Production Technology,
- (ii) To learn about crop growth and development, including factors influencing yield and quality,
- (iii) To explore sustainable and efficient farming practices to enhance crop productivity while minimizing environmental impact,
- (iv) To gain practical knowledge of crop management techniques, including soil fertility, pest control and irrigation.

#### **THEORY**

Agriculture, Agronomy and their Scope, Tillage and Tilth, Crop density and Geometry, Factors affecting growth and development, Crops and Cropping systems, Crop rotation and its principles, Manures and Fertilizers, Irrigation, Water resources, Crop water requirement, Water Use Efficiency, Irrigation-scheduling criteria and methods, Quality of irrigation water, drainage. Weeds - Importance, Classification, Crop weed competition, Concepts of weed management- Principles and methods, Herbicides. Origin, Geographical distribution, Economic importance, Soil and Climatic requirements, Varieties, Cultural practices and Yield of *Kharif* crops viz., Rice, Maize, Sorghum, Minor millets, Pigeon pea, Mungbean, Groundnut and Soybean. *Rabi* crops viz., Sorghum, Wheat, Chickpea, Rapeseed and Mustard, Sunflower; and Sugarcane, Cotton, Tobacco, Chilli.

#### **PRACTICAL**

Identification of crops, seeds, fertilizers, herbicides and tillage implements, Identification of weeds in crops, Methods of herbicide and fertilizer application, Numerical exercises on fertilizer requirement, plant population, herbicides and water requirement, Methods of irrigation. Methods of sowing of different crop. Nutrient function and deficiency. Top dressing and foliar feeding of nutrients. Study of yield contributing characters and yield calculation of important crops. Visit to research centres of related crops.

# THEORY [AGRO-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1	Agriculture, Agronomy	Definitions: Agriculture, Agronomy, Scope. Tillage: Definition, Objects of tillage, Types of tillage, Tilth: Definition and Characteristics of ideal tilth.	8
2	Crop Density and Geometry	Crop density and Geometry concept, Factors affecting growth and crop development, Cropping systems-types, Crop rotation- Concept and its Principles.	6
3	Manures and Fertilizers, Role of plant nutrients	Manures and Fertilizers - Meaning, Classification of manures and fertilizers, Role of plant nutrients.	8
4	Irrigation, Water resources	Irrigation meaning, Water resources of India, Crop water requirements, Water use efficiency: Concept, Irrigation efficiencies: Def'ns/Concept.	6
5	Criteria and Methods of irrigation	Criteria for scheduling of irrigation, Methods of irrigation, Advantages and Disadvantages.	8
6	Water quality parameters and Drainage	Quality of irrigation water. Drainage: Concept and importance, Types of drainage, Factors affecting drainage.	4
7	Weeds	Weed- Definition, Importance, Merits and Demerits, Classification of weeds, Meaning of crop-weed competition.	6
8	Concept of Weed Management	Principles and Methods of weed management viz., Cultural, Mechanical, Chemical, Biological Weed control methods and IWM concept, Classification of herbicides.	8
9-12	Production Technology of <i>Kharif</i> crops	Origin, Geographical distribution, Economic importance, Soil and Climatic requirements, Varieties, Cultural practices and Yield of: Rice, Maize, Sorghum, Minor millets, Pigeon pea, Mung bean, Groundnut and Soybean.	6

Continued...

13-16	Production technology of <i>Rabi</i> crops	Origin, Geographical distribution, Economic importance, Soil and Climatic requirements, Varieties, Cultural practices and Yield of: Sorghum, Wheat, Chickpea, Rapeseed, Mustard and Sunflower.	4
17	Sugarcane Production Technology	Origin, Geographical distribution, Economic importance, Soil and Climatic requirements, Varieties, Cultural practices and Yield	8
18	Production Technology of Chilli	Origin, Geographical distribution, Economic importance, Soil and Climatic requirements, Varieties, Cultural practices and Yield	6
19	Production Technology of Tobacco and Cotton	Origin, Geographical distribution, Economic importance, Soil and Climatic requirements, Varieties, Cultural practices and Yield	4
Total=			100

# PRACTICAL [AGRO-111]

Exercise No.	Exercise Title
1	Identification of crops and seeds.
2	Identification of fertilizers.
3	Identification of herbicides.
4	Identification of tillage implements.
5	Identification of weeds in crops.
6	Study methods of herbicide and fertilizer application.
7	Numerical exercises on fertilizer requirement.
8	Numerical exercises on calculation of plant population.
9	Numerical exercises on calculation of herbicide requirement.
10	Numerical exercises on calculation of water requirement.
11	Study of different methods of irrigation.
12	Study of methods of sowing of different crops.
13	Study of nutrient functions and deficiencies.
14	Study of top dressing and foliar feeding of nutrients.
15	Study of yield contributing characters and yield calculation of important crops.
16	Visit to Research Centers of related crops.

#### **Suggested Readings [AGRO-111]:**

1. Principles of Agronomy by T.Y. Reddy and G.H. Sankara Reddi:

Relevance: This book provides a comprehensive overview of agronomic principles, including crop production techniques, soil management, and crop physiology.

2. Fundamentals of Crop Production by Stephen R. Kaffka and Larry L. Strand:

Relevance: This textbook covers the basics of crop production, including plant growth and development, crop management practices, and environmental factors affecting crop yield.

3. Introduction to Agricultural Engineering Technology: A Problem-Solving Approach by Harry L. Field and John B. Solie:

Relevance: This book offers insights into the technological aspects of agronomy, including machinery, irrigation systems and precision agriculture techniques.

4. Crop Production: Evolution, History, and Technology by C. Wayne Smith and Julian R. Betters:

Relevance: This book explores the history and evolution of crop production technologies, providing a broader context for understanding modern agronomic practices.

#### **SYLLABUS**

#### **Objectives:**

- (i) To understand the principles of Genetics and their application in Plant Breeding,
- (ii) To learn about breeding techniques used to improve crop traits such as yield, its quality and disease resistance,
- (iii) To explore the importance of genetic diversity and its role in crop improvement and adaptation to changing environments,
- (iv) To develop skills to evaluate and select superior plant genotypes for breeding programs aimed at enhancing agricultural productivity and sustainability.

#### **THEORY**

History of Genetics and Plant Breeding, Study of Chromosome- Structure and Functions, Cell Division, Mendel's Laws of inheritance, Modes of inheritance- Monogenic, Polygenic, Cytoplasmic. Modes of reproduction and their significance in Plant Breeding, Modes of Pollination, Self incompatibility, Male sterility and their significance in Plant Breeding, Breeding for Self-pollinated crops- Mass, Pure line, Pedigree method and Bulk method; Breeding for Cross-pollinated crops- Ear to row method, Backcross method, Development of Synthetics, Development of Composites and Hybrids; Vegetative Propagated Crops viz., Clonal selection.

#### **PRACTICAL**

Study of Microscopy, Simple and compound microscopes, Mendelian ratios- Monohybrid, Dihybrid and Problems related to segregation and independent assortment, Study of floral biology and structure of a model flower, Study of floral structure and biology of important cereals, Study of floral structure and biology of important pulses and oil seeds, Study of floral structure and biology of important commercial crops, Study of Plant Breeder's kit, Selfing and crossing techniques, Male sterility: A, B and R lines and their utility, Pollen, fertility study and its importance, Study of germplasm of various crops, Problems in hybrid seed production, Layout of field experiments, Principles, data recording and elementary statistics and analysis of data, Visit to different crop breeding schemes.

# THEORY [GPB-111]

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)
1	History of Genetics and Plant Breeding	Definitions: Genetics, Plant Breeding, Domestication, Plant introduction; History/ Milestones/ Major Contributions in/of Genetics and Plant Breeding.	5
2	Study of Chromosome	Structure of chromosomes: Nucleosome-solenoid model. Types of chromosomes: Based on position of centromere, Autosomes and Sex chromosomes, Special chromosomes (in brief). Structural aberrations: (deletions, duplications, inversions and translocations); Polyploidy in plants: (Numerical aberrations: Autopolyploidy and Allopolyploidy). Definitions: Chromosome, Karyotype. Functions of chromosomes in inheritance.	10
3	Cell Division	Mitosis: Stages and Significance in growth and asexual reproduction; Meiosis: Stages and Significance in genetic diversity.	10
4	Mendel's Laws of Inheritance	Law of Segregation: Statement, Explanation and Example with pea plants.  Law of Independent Assortment: Statement, Explanation and examples.  Reasons for Mendel's Success, Exceptions to Mendelism;  [Definitions: Gene, Allele, Dominant and Recessive alleles, Epistasis, Genotype, Phenotype, Monohybrid cross, Dihybrid cross, Back cross, Test cross].	5
5	Modes of Reproduction  Sexual and Asexual modes of reproduction; Definitions, Their significance in Plant Breeding		5
6	Modes of Pollination	Self-pollination: Definitions, Characteristics, Promoting Mechanisms and Examples. Cross-pollination: Definitions, Characteristics, Promoting Mechanisms and Examples. Often-cross pollination: Definitions and Examples. Pollinators in brief:(insects, animals, wind, water)	5

Continued...

7	Self Incompatibility	Definition, Mechanisms of self-incompatibility; Types of self-incompatibility/ SI Systems: (sporophytic, gametophytic) with Examples. Role / Use of SI in Plant Breeding.	10
8-9	Male Sterility	Definitions of male sterility systems in plants.  Types of male sterility: (Cytoplasmic, genetic, CGMS and Environmental)  Significance in Plant Breeding:  Utilization/ Role of male sterility in developing hybrid crops and hybrid seed production.	10
10-11	Breeding for Self-pollinated Crops	Breeding Objectives for self-pollinated crops with examples.  Definitions, Principles/Concept, Purpose, Method/Steps involved, Advantages, Applications of following breeding methods: Mass Selection:  Pure Line Selection:  Pedigree Method:  Bulk Method:	10
12-13	Breeding for Cross-pollinated Crops	Breeding Objectives for cross-pollinated crops with examples.  Definitions, Principles/Concept, Purpose, Method/Steps involved, Advantages, Applications of following breeding methods: Ear-to-Row Method: Backcross Method: Development of Synthetics: Development of Composites: Development of Hybrids:	10
14	Breeding for Vegetatively Propagated Crops	Breeding Objectives for vegetatively propagated crops. Clonal Selection: Definitions, Principles, Steps, and importance, Merits & Demerits. Examples of vegetative propagating crops; Role of clonal selection in crop improvement.	10
15-16	Mutation	Mutation (Definition); Introduction; Characteristics; Classification/Kinds/Types of Mutation. Mutagenic agents/Mutagen (Definition), Types of mutagens (Physical, Chemical- with e.g.), and Induction (method of mutagenesis). Role of Mutation in Plant Breeding.	10
		Total=	100

#### PRACTICAL [GPB-111]

Exercise No.	Exercise Title	
1	Study of Microscopy, Simple and Compound microscope	
2	Monohybrid - Mendelian ratios and Problems solving.	
3	Dihybrid - Mendelian ratios and Problems related to Segregation and Independent Assortment	
4	Study of floral biology and structure of a model flower	
5	Study of floral structure and biology of important cereals	
6	Study of floral structure and biology of important pulses and oilseeds	
7	Study of floral structure and biology of important commercial crops	
8	Study of Plant Breeder's Kit	
9	Selfing and Crossing techniques	
10	Male sterility: A, B and R lines and their utility	
11	Pollen fertility study and its importance	
12	Study of germplasm of various major crops	
13	Problems in hybrid seed production	
14	Layout of field experiments	
15	Principles, Data recording and Elementary statistics and Analysis of data	
16	Visit to different crop breeding schemes/stations.	

#### **Suggested Readings [GPB-111]:**

- 1. An Introduction to Genetic Analysis, Suzuki et. al.
- 2. Principles of Genetics, E.J. Gardner, M.J. Simmons, D.P. Snustad, Wiley India (P) Ltd.
- 3. Genetics, P.K. Gupta, Rastogi Publication, Meerut.
- 4. Fundamentals of Genetics, B.D. Singh, Kalyani Publication, New Delhi.
- 5. Genetics, M.W. Strickberger, Peerson Education, New Delhi.
- 6. Elements of Genetics, Phundan Singh, Kalyani Publication, New Delhi.
- 7. Genetics, Sushant Elrod and William Stansfield, McGraw Hill Publishing Company Limited, New Delhi.
- 8. Plant Breeding Principles and Methods, B.D. Singh, Kalyani Publication, New Delhi.
- 9. Essentials of Plant Breeding, Phundan Singh, Kalyani Publication New Delhi.
- 10. Principles and Practices Plant Breeding, J.R. Sharma, McGraw Hill Publishing Company Limited, New Delhi.
- 11. Plant Breeding Theory and Practices, V.L. Chopra, Oxford and IBH, Publishing Company, New Delhi.

\_\_\_\_\_

#### **SYLLABUS**

#### **Objectives:**

- (i) To understand the Biology, Epidemiology and Ecology of plant diseases,
- (ii) To learn effective strategies for disease prevention, diagnosis and management in agricultural systems,
- (iii) To explore Integrated Disease Management approaches, including cultural, chemical and biological control methods,
- (iv) To develop skills to mitigate the impact of plant diseases on crop yield, quality and sustainability.

#### **THEORY**

Economic significance of post-harvest diseases and seed-borne diseases. Historical development in Seed Pathology and Post-harvest diseases. Objectives of Seed Pathology and Post-harvest diseases. Study of important Post-harvest Diseases (transport, storage and market) of perishables and grains etc. Important post-harvest diseases. Storage/Field fungi responsible for production of toxins and their effects on consumption. Mycotoxins and Aflatoxin. Identification and detection of plant pathogens carried through seeds, vegetatively propagating material. Seed processing, treatment and storage. Seed transmission, Seed contamination, accompanying pathogens, false seed transmission. Processing, seed treatment, seed packaging, packaging materials. Functional requirement to packing materials. Epidemiology, Factors affecting disease development, Assessment of disease severity and crop losses. Principles of plant disease management viz., Avoidance, Exclusion, Eradication, Protection, Immunization-HPR and Biological control. Pesticides, Classification of fungicides. Modes of application. Management of post-harvest diseases. Biotechnological approaches of diseases management. IPR and related issues. IDM concepts and importance. IDM module for important post-harvest diseases.

#### **PRACTICAL**

Study of post-harvest disease symptoms caused by fungi, bacteria, virus, nematodes etc. Methods of diagnosis of various post-harvest diseases. Methods of estimation of disease severity and losses; Seed health testing techniques. Methods of detection and identification of seed-borne pathogens; Isolation of biocontrol agents; Testing the efficacy of biocontrol agents by dual culture technique. Mass multiplication and methods of application of bioagents. Study of fungicides, bactericides, nematicides and their formulations. Study of pesticide compatibility and their safe-use. Study of plant protection equipments. Bioassay of fungicides; Seed treatment techniques for the control of seed-borne diseases; Biocontrol of post-harvest diseases. Study of seed packaging and storage techniques. Visit to vegetable and fruit markets, biopesticide/pesticide firms. Visit to processing warehouse and testing laboratories.

# THEORY [PATH-111]

Lecture No.	Topic with Sub-topics/ Key Points	Weightage (%)

MDC: Multidisciplinary Course, SEC: Skill Enhancement Course,

G: Gradial, NG: Non-Gradial

Note: \*MATH-111 for PCB student/ \*\*BIO-111 for PCM student/

**PCMB** student is NOT required to take any of these Need-based Courses.

## **B.Sc.** (Hons.) Forestry: <u>First Semester</u>

## **Course-wise Syllabus with Teaching Schedules**

Semester : I

Course No. : CAC-111 Credit Hrs. : 2 (0+2) NG/ 2 Weeks

Course Title : Deeksharambh (Induction-cum-Foundation Course)

Non-Gradial Common Academic Course for the said UG degree with the activities to be conducted during initial two weeks.

#### **Objectives:**

- (i) To create a platform for students to help for Cultural Integration of students from different backgrounds,
- (ii) To know about the operational framework of academic process in university, instilling life and social skills,
- (iii) To create Social awareness, Ethics and Values, Team work, Leadership, Creativity,
- (iv) To identify the traditional values and indigenous cultures along with diverse potentialities both in indigenous and developed scenario.

#### **ACTIVITIES**

- ➤ Introduction/Orientation and Discussions on operational framework of academic process in University/College, as well as interactions with Academic and Research Managers of the University.
- Interaction with Alumni, Business Leaders, Perspective Employers, Outstanding Achievers in related fields and people with inspiring life experiences.
- > Group activities to identify the strength and weakness of students and to learn from each other's life experiences.
- > Activities to enhance Cultural Integration of students from different backgrounds.
- Field visits to the relevant fields/ establishments.
- ➤ Sessions on Personality Development (Instilling Life and Social skills, Social awareness, Ethics and Values, Team work, Leadership etc.) and imbibing the Communication skills.

**Note:** The details of the relevant activities will be decided by the parent University in line with the above-mentioned broad activities.

Semester : I

Course No. : AEC-111 | Credit Hrs. : 1 (0+1)

Course Title : National Service Scheme (NSS-I) / National Cadet Corps (NCC-I)

Course No.: AEC-111 | Course Title: National Service Scheme-I (NSS-I) | Credit Hrs: 1(0+1)

#### **SYLLABUS**

#### **PRACTICAL**

#### **Introduction and Basic Components of NSS**

- Orientation: History, Objectives, Principles, Symbol, Badge; Regular Programs under NSS.
- Organizational structure of NSS, Code of conduct for NSS volunteers, Points to be considered by NSS Volunteers' awareness about Health.
- NSS program activities. Concept of regular activities, Special camping, Day camps, Basis
  of adoption of village/slums, Conducting survey, Analysing Guiding financial patterns of
  scheme, Youth program/schemes of GOI, Coordination with different agencies and
  maintenance of diary. Understanding youth. Definition, Profile, Categories, Issues and
  Challenges of youth; and Opportunities for youth who is agent of the social change.
- Community mobilization. Mapping of community stakeholders, Designing the message as per problems and their culture; Identifying methods of mobilization involving youth-adult partnership. Social harmony and National integration.
- Indian history and culture, role of youth in nation building, Conflict resolution and peace building. Volunteerism and Shramdaan. Indian tradition of volunteerism, its need, importance, motivation and constraints; Shaman as part of volunteerism.
- Citizenship, Constitution, and Human rights. Basic features of constitution of India, Fundamental rights and duties, Human rights, Consumer awareness and rights and Right to information. Family and Society. Concept of family, Community (PRIs and other community-based organizations) and Society.

Course No.: AEC-111	Course Title: National Cadet Corps-I (NCC-I)	<b>Credit Hrs.: 1(0+1)</b>
---------------------	----------------------------------------------	----------------------------

#### **SYLLABUS**

**Objective:** To integrate and develop qualities of leadership, discipline, character and patriotism and foster the NCC Motto: "Unity and Discipline" among the youth.

#### **PRACTICAL**

- Aims, Objectives, Organization of NCC and NCC Song. DG's Cardinals of Discipline.
- Drill- aim, General words of command, Attention, Stands-at-ease, Stand-easy and Turning.
- Sizing, Numbering, Forming in three ranks, Open and Close order march and Dressing.
- Saluting at the halt, Getting on parade, Dismissing and Falling-out.
- Marching, Length of pace and time of marching in quick/slow time and halt. Side pace, Pace forward and to the rear. Turning on the march and wheeling. Saluting on the march.
- Marking time, Forward march and halt. Changing step, Formation of squad and squad drill.
- Command and control, Organization, Badges of rank, Honours and Awards.
- Nation Building- Cultural heritage, Religions, Traditions and Customs of India. National integration. Values and ethics, Perception, Communication, Motivation, Decision making, Discipline and duties of good citizens. Leadership traits, Types of leadership. Character/ Personality development. Civil defence organization, Types of emergencies, Fire fighting, Protection. Maintenance of essential services, Disaster management, Aid during development projects.
- Basics of Social Service, Weaker sections of society and their needs, NGO's and their contribution, Contribution of youth towards Social welfare and Family planning.
- Structure and Function of human body, Diet and Exercise, Hygiene and Sanitation.
   Preventable diseases including AIDS, Safe blood donation, First aid, Physical and mental health. Adventure activities. Basic principles of Ecology, Environmental conservation,
   Pollution and its control.

Semester	:	I	
Course No.	:	AEC-112	Credit Hrs. : 2(1+1)
<b>Course Title</b>	:	Communication Skills	

#### **SYLLABUS**

Objectives:(i) To acquire competence in oral, written and non-verbal communication,

- (ii) To develop strong personal and professional communication and
- (iii) To demonstrate positive group communication.

#### **THEORY**

Communication Process: The magic of effective communication; Building self-esteem and overcoming fears; Concept, nature and significance of communication process; Meaning, types and models of communication; Verbal and Non-verbal communication; Linguistic and nonlinguistic communication and behind communication barriers reasons gap/ miscommunication. Basic Communication Skills: Listening, Speaking, Reading and Writing Skills; Precis writing/Abstracting/Summarizing; Style of technical communication, Curriculum vitae/resume writing; Innovative methods to enhance vocabulary, analogy questions; Structural and Functional Grammar: Sentence structure, modifiers, connecting words and verbals; Phrases and clauses; Case: subjective case, possessive case, objective case; Correct usage of nouns, pronouns and antecedents, adjectives, adverbs and articles; Agreement of verb with the subject: tense, mood, voice; Writing effective sentences; Basic sentence faults.

#### **PRACTICAL**

Listening and note taking; Writing skills: précis writing, summarizing and abstracting; Reading and comprehension (written and oral) of general and technical articles; Micro-presentations and Impromptu Presentations: Feedback on presentations; Stage manners: grooming, body language, voice modulation, speed; Group discussions; Public speaking exercises; Vocabulary building exercises; Interview techniques; Organization of events.

# THEORY [AEC-112]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1	Communication Process: The Magic of Effective Communication	Elements of Communication process such as Communicator, Message, Channel treatment of message, Audience and Audience response.	5
2	Building Self-esteem and Overcoming Fears	Points to build Self-esteem, Build social connections, Encourage yourself, Focus on solutions and Set realistic goals, Strategies to overcome fears, Practice, Visualise Success, Preparation, Know your audience, Seek feedback and Active listening.	5
3		Concept, Nature and Significance of Communication process	10
4		Meaning, Types and Models of communication	10
5	Communication	Verbal and Non-verbal communication, Linguistic and Non-linguistic communication	10
6		Barriers to communication and Reasons behind communication gap/ miscommunication	5
7		Listening, Speaking, Reading, Writing skills	5
8	Basic Communication Skills	Precis writing/ Abstracting/ summarizing- Styles of technical communication, Curriculum Vitae/resume writing	10
9		Innovative methods to enhance vocabulary, analogy questions	5
10		Sentence structure, modifiers, connecting words and verbal; Phrases and Clauses	5
11		Case: Subjective case, Possessive case, Objective case	5
12	Structural and	Correct usage of nouns, Pronouns and Antecedents	5
13	Functional Grammar	Adjectives, Adverbs and Articles	5
14		Agreement of verbs with the subject: Tense, Mood, Voice	5
15		Writing effective sentences	5
16		Basic sentence faults	5
		Total =	100

#### **PRACTICAL**

Exercise No.	Exercise Topic	
1	Listening and Note taking	
2	Writing skills- Precís writing	
3	Writing skills- Abstracting	
4	Writing skills- Summarizing	
5	Reading and Comprehension (written and oral) of general and technical articles	
6	Micro-presentations	
7	Impromptu presentations	
8	Feedback on presentations	
9	Stage manners- Grooming	
10	Stage manners- Body language	
11	Stage manners- Voice modulations, speed	
12	Group discussions	
13	Public speaking exercise	
14	Vocabulary building exercises	
15	Interview techniques	
16	Organisation of events

\_\_\_\_

#### **SYLLABUS**

**Objectives:** (i) To make the students aware about farming-based livelihood systems in Agriculture,

(ii) To disseminate the knowledge and skills that how farming-based systems can be a source of livelihood.

#### **THEORY**

Status of Agriculture in India and different States, Income of farmers and rural people in India, Livelihood-Definition, Concept and livelihood pattern in urban and rural areas, Different indicators to study livelihood systems. Agricultural Livelihood Systems (ALS): Meaning, approach, approaches and framework, Definition of farming systems and farming-based livelihood systems, Prevalent Farming systems in India contributing to livelihood. Types of traditional and modern farming systems. Components of farming system/ farming-based livelihood systems: Crops and cropping systems, Livestock, (Dairy, Piggery, Goatry, Poultry, Duckry etc.), Horticultural crops, Agroforestry systems, Aquaculture, Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.; Small, medium and large enterprises including value chains and secondary enterprises as livelihood components for farmers, Factors affecting integration of various enterprises of farming for livelihood. Feasibility of different farming systems for different agro-climatic zones, Commercial farming-based livelihood models by NABARD, ICAR and other organizations across the country; Case studies on different livelihood enterprises associated with the farming. Risk and success factors in farming-based livelihood systems, Schemes and programs by Central and State Governments; Public and Private organizations involved in promotion of farming-based livelihood opportunities. Role of farming-based livelihood enterprises in 21st Century in view of circular economy, green economy, climate change, digitalization and changing life style.

#### **PRACTICAL**

Survey of farming systems and agriculture-based livelihood enterprises, Study of components of important farming-based livelihood models/systems in different agro-climatic zones, Study of production and profitability of crop based, livestock based, processing-based and integrated farming-based livelihood models, Field Visit of innovative farming system models. Visit of Agri-based enterprises and their functional aspects for integration of production, processing and distribution sectors and Study of agri-enterprises involved in industry and service sectors (Value Chain Models), Learning about concept of project formulation on farming-based livelihood systems along with cost and profit analysis, Case study of Start-Ups in agri-sectors.

# THEORY [MDC-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1	Status of Agriculture in India	Historical background, Current status, Role of Agriculture in Indian Economy	4
2	Status of Agriculture in Different States	State-wise scenario, Major crops, Regional diversity	4
3	Income of Farmers and Rural People in India	Factors affecting income, Rural-urban income gap, Government initiatives	4
4	Livelihood: Definition, Concept, and livelihood Patterns in urban and rural areas	Livelihood- Definition and its Concept, Urban vs Rural livelihood patterns, Sources of income	4
5	Different Indicators to Study Livelihood Systems	Economic, Social and Environmental indicators, Measuring livelihood resilience	4
6	Agricultural Livelihood Systems (ALS): Meaning and Approaches	Definition, Significance of ALS, Integrated farming systems, Approaches	4
7	ALS Framework and Case studies	Framework for ALS, Case studies in India	4
8	Definition of Farming Systems and farming based Livelihood Systems	Definition and Role of farming systems in rural livelihoods, Examples of systems	4
9	Prevalent Farming Systems in India contributing to livelihood	Traditional vs. Modern farming systems, Regional differences	4
10	Types of Traditional and Modern Farming Systems	Types; Differences; Strengths, Limitations, Case studies	4
11	Components of farming system/farming-based livelihood systems - Crops and Cropping Systems	Components, Crop diversification, Cropping pattern, Mixed cropping, Importance for rural livelihoods	4
12	Livestock-based Farming Systems	Importance and Management of dairy, piggery, poultry, goatry, duckry, etc.	4
13	Horticultural Crops and Livelihoods	Role of fruits, vegetables and spices in rural income generation	4
14	Agroforestry Systems	Agroforestry- Definition, Combining trees and crops, Agroforestry models in India	2
15	Aquaculture as a Livelihood System	Importance of Aquaculture, Integrated systems (e.g. Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.)	4
16	Challenges in Aquaculture- based Systems	Feasibility, Government support and Market access	2

Continued....

#### MDC-111....

		Total =	100
32	Impact of Digitalization and Changing Lifestyles	Technology in Agriculture, Future prospects for rural livelihoods.	2
31	Farming-based Livelihoods in the 21st Century	Circular economy, Green economy, Climate change, Sustainability.	2
30	Public-Private Partnerships in Agriculture	Successful collaborations in rural development and farming systems	2
29	Role of Private Sector in Livelihood Promotion	Public-Private Partnerships, Role of private agribusiness.	2
28	Schemes and programmes by State Governments	State-specific programs promoting rural livelihoods, Case examples.	2
27	Schemes and Programmes by the Central Government	Overview of schemes like, PM-KISAN, National Rural Livelihood Mission.	2
26	Success Factors in Farming- based Livelihood Systems	Innovation, Market access, Government support, Social capital etc.	2
25	Risk Factors in Farming- based Livelihood Systems	Climate, Market fluctuations, Input costs; Mitigation strategies etc.	4
24	Case studies on different Livelihood Enterprises associated with farming	Analysis of successful enterprises, Dairy Cooperatives etc.	4
23	Commercial Farming Based Livelihood Models by NABARD, ICAR and other organizations across the country	Role of NABARD, ICAR and other Organizations in promoting commercial models, Successful cases.	4
22	Feasibility of different Farming Systems for different Agro-Climatic Zones	Suitable farming systems for different zones, Climate adaptation.	2
21	Overview of Agro-Climatic Zones in India	Characteristics of different zones and their agricultural potential.	2
20	Strategies for Enterprise Integration	Successful integration, Government policies, Examples.	2
19	Factors affecting Integration of various enterprises of farming for livelihood	Technology, Market access, Credit and infrastructure challenges etc.	4
18	Medium and Large Enterprises in Farming	Value chains, Secondary enterprises as livelihood components for farmers, Agri-processing.	2
17	Small Enterprises in Farming	Role of small enterprises, Value addition, Local processing	2

# PRACTICAL [MDC-111]

Exercise No.	Exercise Topic	Exercise Sub-topics/ Title
1	Survey of Farming Systems and Agriculture-based Livelihood Enterprises	Methods of data collection; Field survey techniques; Preparing reports on surveyed farms.
2	Study of Components of Farming- based Livelihood Models in Different Agro-Climatic Zones	Components: Crop, livestock, fishery, agroforestry; Identifying models suited to specific zones.
3	Study of Production and Profitability of Crop-based Models	Analysis of input-output relations; Identifying profitable crops
4	Study of Livestock-based Models	Livestock systems: Dairy, poultry, goat farming; Profitability and market access
5	Study of Processing-based Models	Value addition in agriculture; Studying small-scale food processing units
6	Study of Integrated Farming-based Models	Study of crop-livestock-aquaculture integration; Synergies and challenges
7	Field Visit to Innovative Farming System Models	Visit to farms using modern technologies; Documenting practices
8	Visit to Agri-based Enterprises	Enterprises involved in input supply or value addition
9	Study of Functional Aspects: Integration of Production, Processing and Distribution	Backward and forward linkages; Assessing supply chain models
10	Agri-Enterprises in Industry and Service Sectors (Value Chain Models)	Studying value chain enterprises; Evaluating sustainability models
11	Concept of Project Formulation on Farming-based Livelihood Systems	Identifying project objectives; Structuring budgets and timelines
12	Cost and Profit Analysis of Farming- based Livelihood Projects	Developing Cost-Benefit analysis; Identifying Break-Even points
13	Case Study of Start-ups in Agrisectors	Analysing real-world Start-ups; Identifying success factors
14	Group Project: Develop a Farming- based Livelihood Model	Formulating a working model; Feasibility and sustainability analysis
15	Preparation of Report on Farming Systems Survey and Livelihood Models	Compiling field data; Preparing reports with recommendations
16	Presentation and Evaluation of Practical Project Reports	Group presentations; Internal assessment of reports and participation

#### **Suggested Readings [MDC-111]:**

- 1. **Ashley, C. and Carney, D. 1999**. Sustainable Livelihoods: Lessons from Early Experience. Department for International Development, London, UK.
  - o **Relevance**: This book explores sustainable livelihood frameworks, which are key to understanding livelihood patterns and rural income systems.
- 2. **Agarwal, A. and Narain, S. 1989**. *Towards Green Villages: A Strategy for Environmentally Sound and Participatory Rural Development*. Centre for Science and Environment, New Delhi, India.
  - o **Relevance**: Provides strategies for participatory rural development, focusing on environmental sustainability—a core concept in farming systems.
- 3. Carloni, A. 2001. Global Farming Systems Study: Challenges and Priorities to 2030 Regional Analysis: Sub-Saharan Africa. FAO, Rome, Italy.
  - o **Relevance**: Offers insights into global farming system challenges, with lessons that can be adapted for Indian contexts in agricultural development.
- 4. **Dixon, J., Gulliver, A. and Gibbon, D. 2001**. Farming Systems and Poverty: Improving Farmers' Livelihoods in a Changing World. FAO & World Bank, Rome & Washington, DC.
  - **Relevance**: Focuses on farming systems' role in poverty alleviation and rural livelihood improvement.
- 5. **Evenson, R.E. 2000**. Agricultural Productivity and Production in Developing Countries. In FAO, The State of Food and Agriculture. FAO, Rome, Italy.
  - o **Relevance**: Discusses agricultural productivity, a critical factor in sustainable farming and improved livelihoods.
- 6. **Bhatt et al.** (**ICAR Research Complex for Eastern Region**). Livelihood Improvement of Underprivileged Farming Community: Experiences from Bihar. Patna, Bihar.
  - **Relevance**: Case studies on improving livelihoods in rural India, relevant to learning about region-specific agricultural interventions.
- 7. **Panwar** et al., 2020. Integrated Farming System Models for Agricultural Diversification, Enhanced Income, and Employment. Indian Council of Agricultural Research, New Delhi.
  - o **Relevance**: Provides models for agricultural diversification and income enhancement, which align with farming system topics.
- 8. **Reddy, S.R., 2016**. Farming System and Sustainable Agriculture. Kalyani Publishers, New Delhi.
  - o **Relevance**: Covers sustainable agriculture principles and farming system models, essential for sustainable livelihood systems.
- 9. **Singh** *et al.*, **2015**. *Region Specific Integrated Farming System Models*. ICAR-Indian Institute of Farming Systems Research, Modipuram.
  - o **Relevance**: Discusses integrated farming models tailored to different agro-climatic regions of India, essential for practical learning.
- 10. Walia, S.S., and Walia, U.S., 2020. Farming System and Sustainable Agriculture. Scientific Publishers, Jodhpur, Rajasthan.
  - o **Relevance:** Provides insights into sustainable agricultural practices and integrated farming systems with regional focus.

Semester	:	I		
Course No.	:	MATH-111*	<b>Credit Hrs.</b> : 1(1+0)	Need-based; NG
<b>Course Title</b>	:	<b>Introductory Mathematics</b>		
*Need-based, Non-Gradial Common Course among 5 UG Degrees viz.,				
B.Sc. (Hons.) Agri. / B.Sc. (Hons.) Horti. / B.Sc. (Hons.) Forestry / B.F.Sc. (Hons.) / B.Sc. (Hons.) C.S.				

**Objective:** To impart knowledge on Introductory Mathematics as a need-based/ deficiency course.

#### **THEORY**

**Algebra: Progressions:** Arithmetic Progression: Definition, Sum of n terms, Examples. Geometric Progression: Definition, Sum of n terms, Examples. Harmonic Progression: Definitions, Examples.

**Determinants:** Definition of Determinant, Expansion of determinant up to 3<sup>rd</sup>order, Examples Properties of determinants up to 3<sup>rd</sup>order (without proof).

**Matrices:** Definition of Matrices, Order of Matrix, Types of Matrices, Algebra of Matrices: Addition, Subtraction, Multiplication, Examples, Transpose of Matrix and it's properties (without proof).

**Differential Calculus:** Definition, Differentiation of function using first principle, Examples. Rules of Differentiation: Derivatives of sum, Difference, Product and quotient of two functions (Formulae only) and Derivative of Standard functions: Algebraic Function, Trigonometric, Logarithmic and exponential functions (Formulae only), Examples. Increasing and Decreasing Functions, Growth rate, Average Cost and Marginal cost, Marginal Revenue. Examples.

**Partial Differentiation**: Definition, Homogeneous function, Euler's Theorem, Examples.

Maxima and Minima of the functions of the form y = f(x) Examples.

**Integral Calculus**: Definition of Indefinite and Definite Integrals, Integrals of elementary functions (Formulae only), Theorems of integration (without proof), Integration by substitution, Examples.

Integration by parts, Examples, Application of Integration: to find Area under simple well-known curves (Simple problems based on it).

**Mensuration:** Statement of Simpson's 1/3<sup>rd</sup>Rule (Without Proof). Examples on Simpson's Rule.

#### **Suggested Readings:**

- 1. NCERT, 2012, Mathematics of Class XII, NCERT, India.
- 2. A Textbook of Mathematics XI and XII (Part I and II), Maharashtra State Board of Secondary and Higher Secondary Education, Pune.
- 3. Sharma RD, 2014, Mathematics of Class XII, Dhanpat Rai Publisher.
- 4. Mensuration-I by Pierpoint.

Semester	:	I				
Course No.	:	BIO-111**	Credit Hrs.	:	1(1+0)	Need-based; NG
<b>Course Title</b>	:	Basic Biology				
	**Ne	eed-based, Non-Gradial	Common Cours	se ac	ross 5 UG I	Degrees:
B.Sc. (Hons.) Agri. / B.Sc. (Hons.) Horti. / B.Sc. (Hons.) Forestry / B.F.Sc. (Hons.) / B.Sc. (Hons.) C.S.						

#### **Objectives:**

- (i) To impart foundational knowledge of biological principles including diversity, genetics, evolution of living organisms,
- (ii) To impart basic knowledge about flowering plants and animals with a focus on their application in Agriculture.

#### **THEORY**

Introduction to the living world, Diversity and characteristics of life. Origin of life, Evolution and Eugenics. Genetics and Basics concepts. Binomial nomenclature and Classification. Cell and cell division. Morphology of flowing plants. Seed and Seed germination. Plant systematics-viz., Brassicaceae, Fabaceae and Poaceae. Role of animals in agriculture.

#### **TEACHING SCHEDULE**

#### THEORY [BIO-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1	Introduction to Living World	Definition of Biology; Composition and Biological Classification of living world.	5
2	Diversity and Characteristics of Life	Definitions: Diversity, Biodiversity; Characteristics of life; Building blocks of life and relationship between different organisms.	5
3	Origin of Life	Theories of Origin of Life; Oparin - Haldane Theory of Chemical origin.	5
4	Evolution and Eugenics	Evidences of Organic Evolution, Theories of Evolution; Eugenics: Definition.	5

Continued...

#### BOT-111...

5	Genetics and Basics Concepts	Genetics and Mendel's Experiments (Basic Concepts)	5
6	Binomial Nomenclature	Binomial nomenclature and classification; Overview of taxonomic hierarchy/ ranks.	10
7	Cell: Structure and Function	Cell structure, Composition and Cell organelles and their functions.	5
8-9	Cell Division	Definition, Types: Mitosis and Meiosis, their Significance, Stages.	10
10-12	Morphology of Flowering Plants	Morphology, Structure and Functions: Roots, Stems, Leaves, Flowers and Fruits.	25
13	Seed and Seed Germination	Definitions, Types of seed (Monocot and Dicot seed), Types of seed germination and Factors affecting it.	5
14-15	Plant Systematics – Study of Families	Key features, Economic importance and Examples of - A) Brassicaceae B) Fabaceae C) Poaceae	15
16	Role of Animals in Agriculture	Livestock in farming systems: Nutritional and economic contributions; Role of pollinators in crop production; Biological pest control (Predatory use); Sustainable integration of animals in agroecosystems.	5
	•	Total =	100

#### **Suggested Readings [BIO-111]:**

- 1. Cell Biology, Genetics, Molecular Biology and Evolution by P.S. Verma, V.K. Agrwal. Publisher- S. Chand and Company Ltd., Ram Nagar, New Delhi. India.
- 2. Evolution of Vertebrates by Edwin H. Colbert, Publisher- A Wiley, Inter Science Publication, John Wiley and Sons, New York. US.
- 3. A Class-book of Botany by A.C. Dutta, Publisher- Oxford University Press, YMCA Library Building, Jai Singh Road, New Delhi 110001, India.
- 4. Fundamentals of Genetics by B.D. Singh, Publisher- Kalyani Publ. B-I/1292, Rajinder Nagar, Ludhiana.
- 5. A Textbook of Practical Botany-2 by Ashok M. Bendre, Ashok Kumar, Publisher- Rastogi Publications, Shivaji Road, Meerut, India.
- 6. Botany An Introduction to Plant Biology by Jamesh D. Mauseth, Publisher- Continental Prakashan, 1962, Pune.
- 7. Anatomy of Seed Plants by A.C. Datta, Sigh V., Pande P.G., Publisher- Sai Print Opack, New Delhi, Rastogi Publication, Meerut, India.
- 8. Handbook of Animal Husbandry by ICAR, New Delhi Publication, Publisher- Directorate of Knowledge Management in Agriculture, Krishi Anusandhan Bhavan, Pusa, New Delhi 110012, India.

Semester	:	I	
Course No.	:	FRM 111	Credit Hrs. : 3(2 +1)
<b>Course Title</b>	:	<b>Introduction to Forest Resources</b>	

**Objectives:** (i) To impart knowledge about the basic concepts of Forestry,

(ii) To familiarize the students about developments in the field of Forestry.

#### **THEORY**

Forests: definitions, role, benefits; direct and indirect. History of Forestry- Forestry: definitions, divisions and interrelationships. Classification of forests- Forest types. Agricultural lands and forests- Agroforestry systems; Differences in nutrient cycling, diversity etc. Social Forestry, Joint forest management; programmes and objectives. Important acts and policies related to Indian forests. Global warming; Forestry options for mitigation and adaptation- Carbon sequestration. Introduction to World forests- Geographical distribution of forests and their classification-Factors influencing world distribution of forests- Productivity potential and increment of world forests. Forest resources and forestry practices in different regions of the world; Western Europe, North America, Central Africa, Australia, Central America, Russia, Japan and China. General problems of forest development and economy. Forest-based industries in the developed and developing countries. Trade patterns of forest based raw materials. Recent trends in Forestry development in the world. National and International Organizations in Forestry. Important events/dates related to forests and environment - Themes and Philosophy.

#### **PRACTICAL**

Identification of important farm grown trees. Identification of tree seeds and seedlings. Visit to various forest types viz., thorn forest, dry deciduous forests, moist deciduous forests, Shola grassland ecosystem, semi-evergreen forests and wet evergreen forests to study the factors of locality and species composition. Visit to different Forest plantations, Agroforestry plantations and other Woodlots. Identification of wood and non-wood forest products. Visit to forest-based institutes and industries.

# THEORY [FRM-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)	
1	Introduction to Forests	Definition, Scope, Importance of forests	10	
2	Forest Benefits	Direct and indirect benefits of forests	10	
3-4	Introduction to Forestry	Definition of Forestry, Divisions, Interrelationships	10	
5	History of Forestry in India	Ancient Forestry, Medieval Forestry, Modern Forestry, Pre-Independence, Post-Independence	10	
6-7	Classification of Forests	Forest types and Classification based on Climatic zones and Vegetation (High forest, Coppice forest, Virgin forest, Pure forest, Mixed forest, Even and Uneven aged stands)		
8-9	Introduction to World Forest	Geographical distribution, Vegetation forms, Forest Classification, Major forest types.	10	
10-11	Factors influencing World Forest Distribution	Climate, Soil topography, Human activities, Productivity potential and increment of World forest	10	
12-14	Forest Resources and Forest Practices in different regions of World and India  Forest Resources and Forest resources of World, Analysis of practices in Western Europe, North America, Central Africa, Australia, Central America, Russia, South Asia, Japan, China and India		10	
15-16	Agricultural Lands and Forests	Land use, Agroforestry System- Definition, Scope/ Importance, Classification	10	
17-18	Benefits of Agroforestry systems	Benefits, Nutrient cycling, Biodiversity, Soil health etc.	10	
19-21	Social Forestry and Joint Forest Management  Definition/ Concept, Objectives, Benefits, Programs of Social Forestry and JFM in India and Community Participation in Social Forestry and JFM in India.		5	
22-23	Forest Acts and Policies in India	Key Acts and Policies related to Indian forests; Forest Policies (1984; 1952; 1988; JFM 1990): Overview, Objectives, Salient features	5	
24-25	Global Warming and Forests	Role of Forestry in Climate change mitigation, Carbon sequestration, Forestry options for mitigation and adaptation strategy	5	
26-27	Forest-based Industries	Overview of major forest-based industries, Forest-based industries in developed and developing countries.	5	

 $Continued \dots$ 

#### FRM-111...

28	Trade Patterns of Forest Products	Analysis of raw material trade, Trade pattern (Domestic/ International), Market dynamic, Trade regulation	5	
29	Problems in Forest Development	Economic challenges; Social and Environmental issues affecting forest growth and development.	5	
30	Trends in Forestry Development	Recent global trends and innovations in Forestry and Sustainable Forestry practices	5	
31	National and International Organizations	Roles and functions of ICFRE Institutions, MOEF and CC, BNHS, FAO, CGIAR, UNEP, IUCN, WWF, ITTO etc.	5	
32	Important Events and Dates in Forestry and Environment	Key dates, Themes and Environmental philosophies in Forestry and Environment		
	·	Total =	100	

#### **TEACHING SCHEDULE**

#### PRACTICAL [FRM-111]

Exercise No.	Exercise Title	
1	Tree identification tools and methods	
2-3	Identification of important farm grown trees	
4-5	Collection and Identification of tree seeds	
6	Identification of tree seedlings in Forest Nursery	
7-8	Visit to local Saw Mill for Collection and Identification of wood samples of different trees	
9-10	Identification of wood and non-wood forest products	
11-12	Visit to various forest types viz., thorn forest, dry deciduous forests, moist deciduous forests, Shola grassland ecosystem, semi-evergreen forests and wet evergreen forests	
13-14	Study of the factors of locality and species composition in local forest area	
15	Visit to different Forest plantations, Agroforestry plantations and other Woodlots.	
16	Visit to forest-based institutes and industries for practical exposure: (Production units: Plywood, Furniture, Silk, Paper and pulp, Charcoal making, Kattha, Honey)	

#### **Suggested Readings:**

- 2. Champion and Seth. 1968. Forest Types of India.
- 3. Grebner, D.L., Bettinger, P. and Siry, J.P. 2012. Introduction to Forestry and Natural Resources. Academic Press. 508p (Google eBook).
- 4. Khanna, L.S. 1989. Principles and Practice of Silviculture. Khanna Bandhu, New Delhi.
- 5. Dwivedi, A.P. 1995. Principles and Practices of Silviculture.

Semester	:	I	
Course No.	:	FBT-111	Credit Hrs : 3(2+1)
<b>Course Title</b>	:	Forest Plant Biology	

**Objective:** To inculcate the fundamentals of botany and taxonomy of gymnosperms and angiosperms.

#### **THEORY**

Plant classification and systematics. Botanical Nomenclature- ICBN (International Code of Botanical Nomenclature) - Rules and Codes of ICBN, Binomial and Polynomials. Systems of classification - Natural, Artificial and Phylogenetic classification. Principles of systematics. Demerits and merits of plant classification as given by Engler and Prantl, Hutchinson, Bentham and Hooker, Angiosperm Phylogenic Group (APG) and Other modern classifications. Morphology as a tool for tree identification: Field characters- Branching pattern, Leaf, Fruit and Bark. Role of reproductive characters- Flower types, Floral formulas and floral diagrams. Reproductive morphology of plants with reference to description and identification of reproductive parts- General form of woody trunk and deviations like, buttresses, flutes, crooks, etc. Morphology and description of bark of common Indian trees- Types of exfoliation patterns in bark. Methods of Floristic survey and need for botanical explorations. Herbarium techniques-Collection, processing and preservation of plant material. General study of Herbarium, Arboretum, Palmetum, Fruticetum, Bambusetum and Xylarium. Origin, geographical distribution, phylogenetic position, taxonomic description and economic importance of the flora of families of Gymnosperms viz., Pinaceae, Taxaceae, Conifereae. Origin, geographical distribution, phylogenetic position, taxonomic description and economic importance of the flora for the families of Angiosperms viz., Annonaceae, Magnoliaceae, Rhizophoraceae, Ebenaceae, Sapotaceae, Caesalpiniaceae, Santalaceae, Mimosaceae, Elaeagnaceae, Fabaceae, Meliaceae, Salicaceae, Lauraceae, Apocynaceae and Betulaceae. Origin, geographical distribution, phylogenetic position, taxonomic description and economic importance of the flora for the families of Angiosperms viz., Fagaceae, Moraceae, Tiliaceae, Euphorbiaceae, Dipterocarpaceae, Bixaceae, Cupressaceae, Guttiferae (Clusiaceae), Myrtaceae, Rubiaceae, Sterculiaceae, Bignoniaceae and Combretaceae, Verbenaceae, Malvaceae, Poeceae, Leguminoseae and Malvaceae.

#### **PRACTICAL**

Morphological description of plant parts with special reference to identification. Study on types of leaves, phyllotaxy and venation; Inflorescence; Bark with suitable examples. Methods of plant collections and herbarium preparation. Laboratory and field identification of important forestry species using vegetative and reproductive characteristics of Magnoliaceae, Ebenaceae, Fabaceae, Meliaceae, Salicaceae, Tiliaceae, Taxaceae, Pinaceae, Myrtaceae, Rubiaceae, Sterculiaceae, Bignoniaceae and Combretaceae, Verbenaceae, Malvaceae, Poeceae, Leguminoseae and Malvaceae. Visit to Botanical Garden and Arboretum for identification of trees.

# THEORY [FBT-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1-2	Plant Classification and Systematics Botanical Nomenclature- ICBN:	Definitions of Plant Classification- Scope of forest Plant Biology- Principles of Forest Plant Biology- Rules and Code of ICBN- Rules of plant nomenclature- Main groups of plants- Characteristics of Phanerogams- Gymnosperms, Angiosperms, Monocotyledons- Dicotyledons, Identification- Classification- Binomial system of Nomenclature and its Basis, Polynomials.	7
3-5	Systems of Classification: Natural, Artificial and Phylogenetic classification. Principles of systematic. Angiosperm Phylogenic Group (APG) and Other modern classifications.	Concept of characters in plant classification- Principles and Systems of classification of plants- Types with suitable examples- Flow chart of classification systems- Merits and Demerits of various plant classification systems- as given by Engler Prantl, Hutchinson, Bentham and Hooker, Angiosperm Phylogeny Group (APG) & other Modern system; Their Principles, Merit and Demerits- Cladogram of Angiosperms.	8
6-8	Morphology as a Tool for Tree Identification: Field Characters- Role of Reproductive Characters-	Tools for tree identification: Morphological characteristics of trees- Branching pattern, Fruit and Bark; Habit, leaf arrangement, stipules, inflorescence, number of petals, position of ovary, placentation, shape of pollen and its character states, morphology of leaf, description of different types of leaves, colour of young and old leaves in some species as regular features of identification, Phyllotaxy, venation, Significance of morphology and field characters, Role of reproductive characters: Flower types, floral formulas and floral diagrams of economically important tree species.	10

Semester	:	I	
Course No.	:	SAF-111	Credit Hrs. : 3(2+1)
<b>Course Title</b>	:	Silviculture - Principles and Practices	

**Objectives:** i) To develop basic understanding on forest and factors influencing forest growth and development

- ii) To develop skill for the artificial and natural regeneration of forest
- iii) Exposing students to develop skill on raising and maintaining plantation
- iv) To impart knowledge on tending operations followed in forest with preliminary information on succession in forest.

#### **THEORY**

Definition and classification of Forest and Forestry- Branches of forestry and their relationships-Trees and their distinguishing features. Forest Reproduction- Flowering, fruiting and seeding behaviour. Site factors- Climatic, edaphic, physiographic, biotic and their interactions. Classification of Climatic Factors- Role of light, temperature, rainfall, snow, wind, humidity and evapo-transpiration in relation to forest vegetation. Bioclimatic and Micro climate effects. Edaphic factors- Influence of biological agencies, parent rock, topography on the soil formation-Soil profile- Physical and chemical properties, mineral nutrient. Physiographic factors- influence of altitude, latitude, aspect and slope on vegetation. Biotic factors- Influence of plants, insects, wild animals, man and domestic animals on vegetation. Forest types of India- Basis and systems of classification- Major groups- Revised classification of forest types of India- Tropical, Montane sub-tropical, Montane temperate, Sub-alpine and Alpine- Sub groups- Types- Species composition and distribution. Forest types of Maharashtra. Regeneration of forests- Objectives, Ecology of regeneration- Natural and Artificial regeneration. Natural regeneration- Seed production, seed dispersal, germination and establishment. Requirement for natural regeneration. Dieback in seedling with examples. Advance growth, coppice- Root sucker. Regeneration survey- Natural regeneration supplemented by artificial regeneration. Artificial regeneration-Object of artificial regeneration- Advantages. Factors governing the choice of regeneration techniques. Choice of species and factors that govern. Sowing v/s Planting- Preparation of planting material- Field planting and techniques- Plant protection and sanitation measures-Forest nutrition and irrigation in trees.

#### **PRACTICAL**

Study about habits of plants and developmental stages of tree growth and its structure. Study about tree morphology- Stem, crown and root characters. Assessment of forest composition. Study about stand structure. Assessment of natural regeneration. Planting pattern and planting technique for afforestation and reforestation. Exercise on Seed and nursery practices. Planting pattern and planting technique for afforestation and reforestation. Field preparation, marking, alignment and stacking, pit making and planting. Plant protection and sanitation measures. Study of afforestation and reforestation success.

# THEORY [SAF-111]

Lecture No.	Торіс	Sub-topics/Key Points	Weightage (%)
1-2	Forest and Forestry- Classification, Branches, Distinguishing features of tree.	Definitions, Classification of forest- Basis of origin of forest, Classification of Forestry- Based on objectives- Protection forestry, Commercial forestry, Social forestry, Farm forestry, Extension forestry, Mixed forestry. Branches of Forestry and their relationships with Silviculture: Forest Protection, Forest Mensuration, Forest Management, Forest Products and Utilization, Distinguishing features- General appearance of tree Crown, Flowers, Stem, Roots.	5
3-4	Forest Reproduction - Flowering, Pollination, Fruiting and Seeding behaviour.	Sexual reproduction. Flowering-Time of flowering, Unisexual and bisexual flowers- Monoecious, Dioecious and Polygamous. Pollination- Anemophilly, Zoophilly and Entomophilly. Flowering of Bamboo-Gregarious and sporadic. Fruiting and seeding behaviour-Angiosperm and gymnosperm	5
5-6	Factors of Locality/ Site Factors: Climatic factors	Classification of Climatic Factors- Role of light, temperature, rainfall, snow, wind, humidity and evapotranspiration in relation to forest vegetation. Bioclimatic and Microclimate effects.	10
7-8	Edaphic factors	Influence of biological agencies, parent rock, topography on soil formation- Soil profile- Physical and chemical properties, mineral nutrient.	5
9-10	Physiographic factors	Definition- Altitude, Latitude, Aspect and Slope of site and Description of factors affecting vegetation formation.	5
11-12	Biotic factors	Effect of plants, insects, wild animals, man on forest vegetation.	5

Semester	:	I	
Course No.	:	SAF-112	Credit Hrs. : 3(2+1)
<b>Course Title</b>	:	Agroforestry Systems and Management	

**Objectives:** i) To develop basic understanding on Agroforestry in different agro-climatic zones.

- ii) To develop skill on various Agroforestry systems and carbon sequestration in Agroforestry systems.
- iii) Exposing students to develop skill on Industrial Agroforestry

#### **THEORY**

Agroforestry systems in different agro climatic zones- Tropical agroforestry, Temperate agroforestry, arid and semi-arid agroforestry and humid agroforestry- components, production and management techniques. Alley cropping-functional and structural attributes of alley cropping, soil management, choice of species- productivity of various Agroforestry systems. High-density short rotation plantation systems- choice of species, design, development and management. Silvicultural woodlots/energy plantations- choice of species, design, development and management. Different types of agroforestry systems- Silvi-agriculture, shelterbelts and windbreaks- design, aerodynamics and management, Silvopastoral systems- live fences; fodder trees and protein banks and Agri-silvopastoral systems- home gardens, hedge rows, Multistorey system and their mangement; Special systems- Apisilviculture, Silvisericulture, Aquaforestry etc. Agroforestry for wasteland development. Canopy management- Lopping, pruning, pollarding, and hedging. Diagnosis and design methods and approaches. Biophysical and ecological functions of agroforestry: Nutrient cycling and role of agroforestry in soil and water conservation- micro-site enrichment by trees, N fixation, improvement in soil physico-chemical properties and soil organic matter status, litter and fine root dynamics, nutrient pumping; beneficial effects of species mixture- rhizosphere and phillosphere effects. Carbon sequestration-Climate change mitigation and phytoremediation. Adverse effects of trees on soils - competition, allelopathy- Causes and mechanisms. Industrial Agroforestry- scope and potential in Indiamajor wood based industries- People's participation, rural entrepreneurship through Agroforestry and industrial linkages- contract farming- types and systems- successful contract farming models- timber transit rules for farm grown trees- Financial and socio-economic analysis of Agroforestry systems. Evaluation of tangible and intangible benefits- Agroforestry research and development in India- National Agroforestry Policy 2014- objectives and strategies.

#### **PRACTICAL**

Study characteristics of trees/shrubs/grasses for agroforestry- Designing and development of multifunctional agroforestry model- Survey agroforestry practices in local/ adjoining areas- Visit to prominent Agroforestry systems, other plantation crop combinations, Homegardens, other integrated multitier agroforestry systems and study their structural and functional attributes-Establishment and management of fodder bank- Studies on Integrated Farming System-Establishment and assessment of Industrial agroforestry plantations- Volume and biomass estimation- Carbon sequestration assessment- Crown measurement, light interception, leaf area index measurements in agroforestry systems. Annual crops/grass growth measurements and yield estimation- Determination of cost and returns of various agroforestry systems.

# THEORY [SAF-112]

Lecture No.	Торіс	Sub-topics/Key Points	Weightage (%)
1	Agroforestry systems in different Agro-climatic zones of India	Definitions of Agroforestry, Sustainable Agriculture, Concept, Benefits, scope and limitation of Agroforestry system, Agroforestry systems exist in different agro-climatic zones, Definition of Tropical-Temperate, Arid and Semi-Arid. Components of Agroforestry.	2.5
2	Components, production and management techniques	Production and management techniques of Silviculral crop, agricultural crop and Livestock and others	2.5
3-4	Alley cropping- functional and structural attributes of alley cropping	Definition of alley cropping (Hedge-row intercropping), Concept, purpose and function in soil conservation, its structure (Design, position and spacing and choice of species for hedge-row) of alley cropping,	5
5-6	High-density short rotation plantation (HDRS) systems	Definition- high density, short rotation, plantation, Suitable/choice of tree species for HDSR, Design, development and management of HDRS.	5
7-8	Silvicultural woodlots/energy plantations - choice of species, design, development and management	Definition of Woodlots and Energy Plantation, Selection of choice of tree species for woodlots and energy plantation (Properties/Characteristics of fuel wood species). Its design and management. Role of Agroforestry (woody component) in energy production.	5
9-10	Different types of Agroforestry systems – Definition silvi- agriculture – shelterbelts and windbreaks - design, aerodynamics and management	Types or classification of Agroforestry system, Agrisilviculture-Silvi/vo pasture- Agrisilvi/agrovo pastoral and other systems.	5
11-12	Silvopastoral systems - live fences; fodder trees and protein banks Agri-silvopastoral systems - home gardens, hedge rows, Multistorey system and their mangement; Special systems - Apisilviculture, silvisericulture, aquaforestry etc.	Definition of silvopastoral, Pasture, live fence, fodder trees and protein banks.  Definition of Agri-silvopastoral systems  – home gardens, hedge-rows,  Multistorey system. Structure and  Management of home garden and hedge-rows. Other Systems Entomoforestry and  Aquaforestry (Special System):  Definition: Apiculture/Apisilviculture,  Silvisericulture, Apiculture	10
13-14	Agroforestry for wasteland development. Canopy management	Concept, Problematic Soil/Difficult Soil. Canopy management in Agroforestry system through Lopping, pruning, pollarding, and hedging. Its definition and concepts.	10

Note: Skill Enhancement Courses can be added/offered as per the facilities and resources available at the respective universities/colleges based on the relevance to the region and the UG degree subject.

In case of unavailability of said detailed course-wise syllabus of above SEC courses, the same can be primarily developed and followed at College/ University level in the academic year, 2024-25; However, the same will be obtained from the respective UG Degree Coordinator/ Discipline Coordinators and can be followed w.e.f. AY, 2025-26.

[Above list is an indicative list/bouquet of SEC courses and subject to modification as applicable therein]

# **ANNEXURE-VIII**

(~ of DICC-Circular No. MAUEB/DICC-Circular/New UG Syllabi/420/24; Dtd. 29.11.2024)

New Undergraduate Degree Syllabus of <u>I-Semester</u> of

**B.F.Sc.** (Hons.)

Finalized & Approved by the DICC as per the

ICAR - SIXTH DEANS' COMMITTEE REPORT

# Course Curriculum of <u>First Semester</u> as per the ICAR-Sixth Deans' Committee Report for the Academic Programmes in <u>FISHERIES SCIENCE</u>

- UG-Certificate in Fisheries Science
- UG-Diploma in Fisheries Science
- UG-Degree: B.F.Sc. (Hons.)

Dr. Panjabrao Deshmukh Krishi Vidyapeeth, Akola

Vasantrao Naik Marathwada Krishi Vidyapeeth, Parbhani

Dr. Balasaheb Sawant Konkan Krishi Vidyapeeth, Dapoli

Maharashtra Agricultural Universities Examination Board, Pune

11.	SEC-112	Skill Enhancement Course-II (To be offered from the bouquet of SEC Courses)	2(0+2)	
		23(10+13) G 2(0+2) NG		

CAC: Common Academic Course, AEC: Ability Enhancement Course,

MDC: Multidisciplinary Course, SEC: Skill Enhancement Course,

G: Gradial, NG: Non-Gradial

Note: \*MATH-111/231 for PCB student/ \*\*BIO-111/231 for PCM student/ PCMB student is NOT required to take any of these Need-based Courses.

Currently, during **AY 2024-25**, the Need-based NG courses \*MATH-111 &\*\*BIO-111 are being offered in **III-semester** as \*MATH-231&\*\*BIO-231, respectively. However, this will be regularized **w.e.f. AY 2025-26**, wherein said courses will be offered in **I-semester**.

#### **B.F.Sc.** (Hons.) : First Semester

### **Course-wise Syllabus with Teaching Schedules**

Semester : I

Course No. : CAC-111 Credit Hrs. : 2 (0+2) NG/2 Weeks

Course Title : Deeksharambh (Induction-cum-Foundation Course)

Non-Gradial Common Academic Course for the said UG degree with the activities to be conducted during initial two weeks.

#### **Objectives:**

- (i) To create a platform for students to help for Cultural Integration of students from different backgrounds,
- (ii) To know about the operational framework of academic process in university, instilling life and social skills,
- (iii) To create Social awareness, Ethics and Values, Team work, Leadership, Creativity etc.,
- (iv) To identify the traditional values and indigenous cultures along with diverse potentialities both in indigenous and developed scenario.

#### **ACTIVITIES**

- ➤ Introduction/Orientation and Discussions on operational framework of academic process in University/ College, as well as interactions with Academic and Research Managers of the University.
- ➤ Interaction with Alumni, Business Leaders, Perspective Employers, Outstanding Achievers in related fields and people with inspiring life experiences.
- ➤ Group activities to identify the strength and weakness of students and to learn from each other's life experiences.
- Activities to enhance Cultural Integration of students from different backgrounds.
- Field visits to the relevant fields/ establishments.
- > Sessions on Personality Development (Instilling Life and Social skills, Social awareness, Ethics and Values, Team work, Leadership etc.) and imbibing the Communication skills.

**Note:** The details of the relevant activities will be decided by the parent University in line with the above mentioned broad activities.

Semester	:	I	
Course No.	:	AEC-111	Credit Hrs. : 1 (0+1)
Course Title	:	National Service Scheme (NSS-I) / National Cadet Corps (NCC-I)	
Gradial Common Course across all UG degrees			

Course No.: AEC-111 Course Title: National Service Scheme-I (NSS-I) Credit Hrs: 1(0+1)

#### **SYLLABUS**

#### **PRACTICAL**

#### **Introduction and Basic Components of NSS**

- Orientation: History, Objectives, Principles, Symbol, Badge; Regular Programs under NSS.
- Organizational structure of NSS, Code of conduct for NSS volunteers, Points to be considered by NSS Volunteers' awareness about Health.
- NSS program activities. Concept of regular activities, Special camping, Day camps, Basis
  of adoption of village/slums, Conducting survey, Analysing Guiding financial patterns of
  scheme, Youth program/schemes of GOI, Coordination with different agencies and
  maintenance of diary. Understanding youth. Definition, Profile, Categories, Issues and
  Challenges of youth; and Opportunities for youth who is agent of the social change.
- Community mobilization. Mapping of community stakeholders, Designing the message as per problems and their culture; Identifying methods of mobilization involving youth-adult partnership. Social harmony and National integration.
- Indian history and culture, role of youth in nation building, Conflict resolution and peace building. Volunteerism and Shramdaan. Indian tradition of volunteerism, its need, importance, motivation and constraints; Shaman as part of volunteerism.
- Citizenship, Constitution, and Human rights. Basic features of constitution of India, Fundamental rights and duties, Human rights, Consumer awareness and rights and Right to information. Family and Society. Concept of family, Community (PRIs and other community-based organizations) and Society.

# PRACTICAL [AEC-111 : NSS-I]

	Total =	100

Course No.: AEC-111 | Course Title: National Cadet Corps-I (NCC-I) | Credit Hrs.: 1(0+1)

#### **SYLLABUS**

**Objective:** To integrate and develop qualities of leadership, discipline, character and patriotism and foster the NCC Motto: "Unity and Discipline" among the youth.

#### **PRACTICAL**

- Aims, Objectives, Organization of NCC and NCC Song. DG's Cardinals of Discipline.
- Drill- aim, General words of command, Attention, Stands-at-ease, Stand-easy and Turning.
- Sizing, Numbering, Forming in three ranks, Open and Close order march and Dressing.
- Saluting at the halt, Getting on parade, Dismissing and Falling-out.
- Marching, Length of pace and time of marching in quick/slow time and halt. Side pace,
   Pace forward and to the rear. Turning on the march and wheeling. Saluting on the march.
- Marking time, Forward march and halt. Changing step, Formation of squad and squad drill.
- Command and control, Organization, Badges of rank, Honours and Awards.
- Nation Building- Cultural heritage, Religions, Traditions and Customs of India. National integration. Values and ethics, Perception, Communication, Motivation, Decision making, Discipline and duties of good citizens. Leadership traits, Types of leadership. Character/ Personality development. Civil defense organization, Types of emergencies, Fire fighting, Protection. Maintenance of essential services, Disaster management, Aid during development projects.
- Basics of Social Service, Weaker sections of society and their needs, NGO's and their contribution, Contribution of youth towards Social welfare and Family planning.
- Structure and Function of human body, Diet and Exercise, Hygiene and Sanitation.
   Preventable diseases including AIDS, Safe blood donation, First aid, Physical and mental health. Adventure activities. Basic principles of Ecology, Environmental conservation, Pollution and its control.

Semester	:	I	
Course No.	:	AEC-112	Credit Hrs. : 2(1+1)
<b>Course Title</b>	:	Communication Skills	
Gradial Common Course across all UG degrees			

Objectives: (i) To acquire competence in oral, written and non-verbal communication,

- (ii) To develop strong personal and professional communication and
- (iii) To demonstrate positive group communication.

#### **THEORY**

Communication Process: The magic of effective communication; Building self-esteem and overcoming fears; Concept, nature and significance of communication process; Meaning, types and models of communication; Verbal and Non-verbal communication; Linguistic and noncommunication and reasons behind linguistic barriers to communication miscommunication. Basic Communication Skills: Listening, Speaking, Reading and Writing Skills; Precis writing/ Abstracting/ Summarizing; Style of technical communication, Curriculum vitae/resume writing; Innovative methods to enhance vocabulary, analogy questions; Structural and Functional Grammar: Sentence structure, modifiers, connecting words and verbals; Phrases and clauses; Case: subjective case, possessive case, objective case; Correct usage of nouns, pronouns and antecedents, adjectives, adverbs and articles; Agreement of verb with the subject: tense, mood, voice; Writing effective sentences; Basic sentence faults.

#### **PRACTICAL**

Listening and note taking; Writing skills: precis writing, summarizing and abstracting; Reading and comprehension (written and oral) of general and technical articles; Micro-presentations and Impromptu Presentations: Feedback on presentations; Stage manners: Grooming, Body language, Voice modulation, Speed; Group discussions; Public speaking exercises; Vocabulary building exercises; Interview techniques; Organization of events.

## **SYLLABUS**

**Objectives:** (i) To make the students aware about farming-based livelihood systems in Agriculture,

(ii) To disseminate the knowledge and skills that how farming-based systems can be a source of livelihood.

#### **THEORY**

Status of Agriculture in India and different States, Income of farmers and rural people in India, Livelihood-Definition, Concept and livelihood pattern in urban and rural areas, Different indicators to study livelihood systems. Agricultural Livelihood Systems (ALS): Meaning, approach, approaches and framework, Definition of farming systems and farming-based livelihood systems, Prevalent Farming systems in India contributing to livelihood. Types of traditional and modern farming systems. Components of farming system/ farming-based livelihood systems: Crops and cropping systems, Livestock, (Dairy, Piggery, Goatry, Poultry, Duckry etc.), Horticultural crops, Agroforestry systems, Aquaculture, Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.; Small, medium and large enterprises including value chains and secondary enterprises as livelihood components for farmers, Factors affecting integration of various enterprises of farming for livelihood. Feasibility of different farming systems for different agro-climatic zones, Commercial farming-based livelihood models by NABARD, ICAR and other organizations across the country; Case studies on different livelihood enterprises associated with the farming. Risk and success factors in farming-based livelihood systems, Schemes and programs by Central and State Governments; Public and Private organizations involved in promotion of farming-based livelihood opportunities. Role of farming-based livelihood enterprises in 21st Century in view of circular economy, green economy, climate change, digitalization and changing life style.

#### **PRACTICAL**

Survey of farming systems and agriculture-based livelihood enterprises, Study of components of important farming-based livelihood models/systems in different agro-climatic zones, Study of production and profitability of crop based, livestock based, processing-based and integrated farming-based livelihood models, Field Visit of innovative farming system models. Visit of Agri-based enterprises and their functional aspects for integration of production, processing and distribution sectors and Study of agri-enterprises involved in industry and service sectors (Value Chain Models), Learning about concept of project formulation on farming-based livelihood systems along with cost and profit analysis, Case study of Start-Ups in agri-sectors.

## THEORY [MDC-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1	Status of Agriculture in India	Historical background, Current status, Role of Agriculture in Indian Economy	4
2	Status of Agriculture in Different States	State-wise scenario, Major crops, Regional diversity	4
3	Income of Farmers and Rural People in India	Factors affecting income, Rural-urban income gap, Government initiatives	4
4	Livelihood: Definition, Concept, and livelihood Patterns in urban and rural areas	Livelihood- Definition and its Concept, Urban vs Rural livelihood patterns, Sources of income	4
5	Different Indicators to Study Livelihood Systems	Economic, Social and Environmental indicators, Measuring livelihood resilience	4
6	Agricultural Livelihood Systems (ALS): Meaning and Approaches	Definition, Significance of ALS, Integrated farming systems, Approaches	4
7	ALS Framework and Case studies	Framework for ALS, Case studies in India	4
8	Definition of Farming Systems and farming based Livelihood Systems	Definition and Role of farming systems in rural livelihoods, Examples of systems	4
9	Prevalent Farming Systems in India contributing to livelihood	Traditional vs. Modern farming systems, Regional differences	4
10	Types of Traditional and Modern Farming Systems	Types; Differences; Strengths, Limitations, Case studies	4
11	Components of farming system/farming-based livelihood systems - Crops and Cropping Systems	Components, Crop diversification, Cropping pattern, Mixed cropping, Importance for rural livelihoods	4
12	Livestock-based Farming Systems	Importance and Management of dairy, piggery, poultry, goatry, duckry, etc.	4
13	Horticultural Crops and Livelihoods	Role of fruits, vegetables and spices in rural income generation	4
14	Agroforestry Systems	Agroforestry- Definition, Combining trees and crops, Agroforestry models in India	2
15	Aquaculture as a Livelihood System	Importance of Aquaculture, Integrated systems (e.g. Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.)	4
16	Challenges in Aquaculture- based Systems	Feasibility, Government support and Market access	2

## MDC-111....

17	Small Enterprises in Farming	Role of small enterprises, Value addition, Local processing	2
18	Medium and Large Enterprises in Farming	Value chains, Secondary enterprises as livelihood components for farmers, Agri-processing.	2
19	Factors affecting Integration of various enterprises of farming for livelihood	Technology, Market access, Credit and infrastructure challenges etc.	4
20	Strategies for Enterprise Integration	Successful integration, Government policies, Examples.	2
21	Overview of Agro-Climatic Zones in India	Characteristics of different zones and their agricultural potential.	2
22	Feasibility of different Farming Systems for different Agro-Climatic Zones	Suitable farming systems for different zones, Climate adaptation.	2
23	Commercial Farming Based Livelihood Models by NABARD, ICAR and other organizations across the country	Role of NABARD, ICAR and other Organizations in promoting commercial models, Successful cases.	4
24	Case studies on different Livelihood Enterprises associated with farming	Analysis of successful enterprises, Dairy Cooperatives etc.	4
25	Risk Factors in Farming- based Livelihood Systems	Climate, Market fluctuations, Input costs; Mitigation strategies etc.	4
26	Success Factors in Farming- based Livelihood Systems	Innovation, Market access, Government support, Social capital etc.	2
27	Schemes and Programmes by the Central Government	Overview of schemes like, PM-KISAN, National Rural Livelihood Mission.	2
28	Schemes and programmes by State Governments	State-specific programs promoting rural livelihoods, Case examples.	2
29	Role of Private Sector in Livelihood Promotion	Public-Private Partnerships, Role of private agribusiness.	2
30	Public-Private Partnerships in Agriculture	Successful collaborations in rural development and farming systems	2
31	Farming-based Livelihoods in the 21 <sup>st</sup> Century	Circular economy, Green economy, Climate change, Sustainability.	2
32	Impact of Digitalization and Changing Lifestyles	Technology in Agriculture, Future prospects for rural livelihoods.	2
		Total =	100

## PRACTICAL [MDC-111]

Exercise No.	Exercise Topic	Exercise Sub-topics/ Title
1	Survey of Farming Systems and Agriculture-based Livelihood Enterprises	Methods of data collection; Field survey techniques; Preparing reports on surveyed farms.
2	Study of Components of Farming- based Livelihood Models in Different Agro-Climatic Zones	Components: Crop, livestock, fishery, agroforestry; Identifying models suited to specific zones.
3	Study of Production and Profitability of Crop-based Models	Analysis of input-output relations; Identifying profitable crops
4	Study of Livestock-based Models	Livestock systems: Dairy, poultry, goat farming; Profitability and market access
5	Study of Processing-based Models	Value addition in agriculture; Studying small-scale food processing units
6	Study of Integrated Farming-based Models	Study of crop-livestock-aquaculture integration; Synergies and challenges
7	Field Visit to Innovative Farming System Models	Visit to farms using modern technologies; Documenting practices
8	Visit to Agri-based Enterprises	Enterprises involved in input supply or value addition
9	Study of Functional Aspects: Integration of Production, Processing and Distribution	Backward and forward linkages; Assessing supply chain models
10	Agri-Enterprises in Industry and Service Sectors (Value Chain Models)	Studying value chain enterprises; Evaluating sustainability models
11	Concept of Project Formulation on Farming-based Livelihood Systems	Identifying project objectives; Structuring budgets and timelines
12	Cost and Profit Analysis of Farming- based Livelihood Projects	Developing Cost-Benefit analysis; Identifying Break-Even points
13	Case Study of Start-ups in Agrisectors	Analysing real-world Start-ups; Identifying success factors
14	Group Project: Develop a Farming- based Livelihood Model	Formulating a working model; Feasibility and sustainability analysis
15	Preparation of Report on Farming Systems Survey and Livelihood Models	Compiling field data; Preparing reports with recommendations
16	Presentation and Evaluation of Practical Project Reports	Group presentations; Internal assessment of reports and participation

## **Suggested Readings [MDC-111]:**

- **1. Ashley, C. and Carney, D. 1999**. *Sustainable Livelihoods: Lessons from Early Experience*. Department for International Development, London, UK.
  - o **Relevance**: This book explores sustainable livelihood frameworks, which are key to understanding livelihood patterns and rural income systems.
- 2. Agarwal, A. and Narain, S. 1989. Towards Green Villages: A Strategy for Environmentally Sound and Participatory Rural Development. Centre for Science and Environment, New Delhi, India.
  - o **Relevance**: Provides strategies for participatory rural development, focusing on environmental sustainability—a core concept in farming systems.
- **3.** Carloni, A. 2001. Global Farming Systems Study: Challenges and Priorities to 2030 Regional Analysis: Sub-Saharan Africa. FAO, Rome, Italy.
  - o **Relevance**: Offers insights into global farming system challenges, with lessons that can be adapted for Indian contexts in agricultural development.
- **4. Dixon, J., Gulliver, A. and Gibbon, D. 2001**. Farming Systems and Poverty: Improving Farmers' Livelihoods in a Changing World. FAO & World Bank, Rome & Washington, DC.
  - **Relevance**: Focuses on farming systems' role in poverty alleviation and rural livelihood improvement.
- **5. Evenson, R.E. 2000**. *Agricultural Productivity and Production in Developing Countries.* In FAO, The State of Food and Agriculture. FAO, Rome, Italy.
  - **Relevance**: Discusses agricultural productivity, a critical factor in sustainable farming and improved livelihoods.
- **6. Bhatt** *et al.* (**ICAR Research Complex for Eastern Region**). *Livelihood Improvement of Underprivileged Farming Community: Experiences from Bihar*. Patna, Bihar.
  - **Relevance**: Case studies on improving livelihoods in rural India, relevant to learning about region-specific agricultural interventions.
- 7. Panwar et al., 2020. Integrated Farming System Models for Agricultural Diversification, Enhanced Income, and Employment. Indian Council of Agricultural Research, New Delhi.
  - o **Relevance**: Provides models for agricultural diversification and income enhancement, which align with farming system topics.
- **8.** Reddy, S.R., 2016. Farming System and Sustainable Agriculture. Kalyani Publishers, New Delhi.
  - o **Relevance**: Covers sustainable agriculture principles and farming system models, essential for sustainable livelihood systems.
- **9. Singh** *et al.*, **2015**. *Region Specific Integrated Farming System Models*. ICAR-Indian Institute of Farming Systems Research, Modipuram.
  - Relevance: Discusses integrated farming models tailored to different agro-climatic regions of India, essential for practical learning.
- **10.** Walia, S.S., and Walia, U.S., 2020. Farming System and Sustainable Agriculture. Scientific Publishers, Jodhpur, Rajasthan.
  - o **Relevance:** Provides insights into sustainable agricultural practices and integrated farming systems with regional focus.

Syllabus of **B.F.Sc. (Hons.)** as per the ICAR - Sixth Deans' Committee Report-2024

Semester	:	I		
Course No.	:	MATH-111*	Credit Hrs. : 1(1	+0) Need-based; NG
<b>Course Title</b>	:	<b>Introductory Mathematics</b>		
*Need-based, Non-Gradial Common Course among 5 UG Degrees viz.,				
B.Sc. (Hons.) Ag	gri. / ]	B.Sc. (Hons.) Horti. / B.Sc. (Hons.)	Forestry / B.F.Sc. (Hons.	) / B.Sc. (Hons.) C.S.

**Objective:** To impart knowledge on Introductory Mathematics as a need-based/ deficiency course.

#### **THEORY**

**Algebra: Progressions:** Arithmetic Progression: Definition, Sum of n terms, Examples. Geometric Progression: Definition, Sum of n terms, Examples. Harmonic Progression: Definitions, Examples.

**Determinants:** Definition of Determinant, Expansion of determinant up to 3<sup>rd</sup>order, Examples Properties of determinants up to 3<sup>rd</sup>order (without proof).

**Matrices:** Definition of Matrices, Order of Matrix, Types of Matrices, Algebra of Matrices: Addition, Subtraction, Multiplication, Examples, Transpose of Matrix and it's properties (without proof).

**Differential Calculus:** Definition, Differentiation of function using first principle, Examples. Rules of Differentiation: Derivatives of sum, Difference, Product and quotient of two functions (Formulae only) and Derivative of Standard functions: Algebraic Function, Trigonometric, Logarithmic and exponential functions (Formulae only), Examples. Increasing and Decreasing Functions, Growth rate, Average Cost and Marginal cost, Marginal Revenue. Examples.

**Partial Differentiation**: Definition, Homogeneous function, Euler's Theorem, Examples.

Maxima and Minima of the functions of the form y = f(x) Examples.

**Integral Calculus**: Definition of Indefinite and Definite Integrals, Integrals of elementary functions (Formulae only), Theorems of integration (without proof), Integration by substitution, Examples.

Integration by parts, Examples, Application of Integration: to find Area under simple well-known curves (Simple problems based on it).

**Mensuration:** Statement of Simpson's 1/3<sup>rd</sup>Rule (Without Proof). Examples on Simpson's Rule.

## **Suggested Readings:**

- 1. NCERT, 2012, Mathematics of Class XII, NCERT, India.
- 2. A Textbook of Mathematics XI and XII (Part I and II), Maharashtra State Board of Secondary and Higher Secondary Education, Pune.
- 3. Sharma RD, 2014, Mathematics of Class XII, Dhanpat Rai Publisher.
- 4. Mensuration-I by Pierpoint.

## THEORY [MATH-111]

Lecture No.	Торіс	Subtopics/ Key Points	Weightage (%)
1-2	Algebra: Progressions	Arithmetic Progression: Definition, Sum of n terms, Examples.  GeometricProgression: Definition, Sum of n terms, Examples. Harmonic Progression: Definitions, Examples.	10
3-4	Determinants	Definition of Determinant, Expansion of determinant up to 3 <sup>rd</sup> order, Examples  Properties of determinants up to 3 <sup>rd</sup> order (without proof)	10
5-7	Definition of Matrices, Order of Matrix, Types of Matrices  Matrices  Algebra of Matrices: Addition, Subtraction, Multiplication, Examples  Transpose of Matrix and it's Properties (without proof)		20
8-10	Differential Calculus	Definition, Differentiation of function using First principle, Examples.  Rules of Differentiation: Derivatives of sum, Difference, Product and quotient of two functions (Formulae only) and Derivative of Standard functions: Algebraic Function, Trigonometric, Logarithmic and Exponential functions (Formulae only), Examples.  Increasing and Decreasing Functions,  Growth rate, Average Cost and Marginal cost, Marginal Revenue. Examples.	20
11-12	Partial Differentiation	Definition, Homogeneous function, Euler's theorem, Examples.  Maxima and Minima of the functions of the form $y = f(x)$ Examples.	10
13-15	Integral Calculus	Definition of Indefinite and Definite Integrals Integrals of elementary functions (Formulae only) Theorems of integration (without proof) Integration by substitution, Examples Integration by parts, Examples Application of Integration: to find Area under simple well-known curves, (Simple problems based on it).	20
16	Mensuration	Statement of Simpson's 1/3 <sup>rd</sup> Rule (without Proof). Examples on Simpson's Rule.	10
		Total =	100

Semester	:	I				
Course No.	:	BIO-111**	Credit Hrs.	:	1(1+0)	Need-based; NG
<b>Course Title</b>	:	Basic Biology				
**Need-based, Non-Gradial Common Course across 5 UG Degrees:						
B.Sc. (Hons.) Agri. / B.Sc. (Hons.) Horti. / B.Sc. (Hons.) Forestry / B.F.Sc. (Hons.) / B.Sc. (Hons.) C.S.						

## **Objectives:**

- (i) To impart foundational knowledge of biological principles including diversity, genetics, evolution of living organisms,
- (ii) To impart basic knowledge about flowering plants and animals with a focus on their application in Agriculture.

## **THEORY**

Introduction to the living world, Diversity and characteristics of life. Origin of life, Evolution and Eugenics. Genetics and Basics concepts. Binomial nomenclature and Classification. Cell and cell division. Morphology of flowing plants. Seed and Seed germination. Plant systematics-viz., Brassicaceae, Fabaceae and Poaceae. Role of animals in agriculture.

## **TEACHING SCHEDULE**

## THEORY [BIO-111]

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)
1	Introduction to Living World	Definition of Biology; Composition and Biological Classification of living world.	5
2	Diversity and Characteristics of Life	Definitions: Diversity, Biodiversity; Characteristics of life; Building blocks of life and relationship between different organisms.	5
3	Origin of Life	Theories of Origin of Life; Oparin - Haldane Theory of Chemical origin.	5
4	Evolution and Eugenics	Evidences of Organic Evolution, Theories of Evolution; Eugenics: Definition.	5

#### BIO-111...

5	Genetics and Basics Concepts	Genetics and Mendel's Experiments (Basic Concepts)	5
6	Binomial Nomenclature	Binomial nomenclature and classification; Overview of taxonomic hierarchy/ ranks.	10
7	Cell: Structure and Function	Cell structure, Composition and Cell organelles and their functions.	5
8-9	Cell Division	Definition, Types: Mitosis and Meiosis, their Significance, Stages.	10
10-12	Morphology of Flowering Plants	Morphology, Structure and Functions: Roots, Stems, Leaves, Flowers and Fruits.	25
13	Seed and Seed Germination	Definitions, Types of seed (Monocot and Dicot seed), Types of seed germination and Factors affecting it.	5
14-15	Plant Systematics – Study of Families	Key features, Economic importance and Examples of - A) Brassicaceae B) Fabaceae C) Poaceae	15
16	Role of Animals in Agriculture	Livestock in farming systems: Nutritional and economic contributions; Role of pollinators in crop production; Biological pest control (Predatory use); Sustainable integration of animals in agroecosystems.	
		Total =	100

## **Suggested Readings [BIO-111]:**

- 1. Cell Biology, Genetics, Molecular Biology and Evolution by P.S. Verma, V.K. Agrwal. Publisher- S. Chand and Company Ltd., Ram Nagar, New Delhi. India.
- 2. Evolution of Vertebrates by Edwin H. Colbert, Publisher- A Wiley, Inter Science Publication, John Wiley and Sons, New York. US.
- 3. A Class-book of Botany by A.C. Dutta, Publisher- Oxford University Press, YMCA Library Building. Jai Singh Road, New Delhi 110001, India.
- 4. Fundamentals of Genetics by B.D. Singh, Publisher- Kalyani Publ. B-I/1292, Rajinder Nagar, Ludhiana.
- 5. A Textbook of Practical Botany-2 by Ashok M. Bendre, Ashok Kumar, Publisher- Rastogi Publications, Shivaji Road, Meerut, India.
- 6. Botany An Introduction to Plant Biology by Jamesh D. Mauseth, Publisher- Continental Prakashan, 1962, Pune.
- 7. Anatomy of Seed Plants by A.C. Datta, Sigh V., Pande P.G., Publisher- Sai Print Opack, New Delhi, Rastogi Publication, Meerut, India.
- 8. Handbook of Animal Husbandry by ICAR, New Delhi Publication, Publisher- Directorate of Knowledge Management in Agriculture, Krishi Anusandhan Bhavan, Pusa, New Delhi 110012, India.

Semester	:	I		
Course No.	:	FRM-111	Credit Hrs. : 3(1+2)	
Course Title	:	Taxonomy of Commercially Important Fish and Shellfish		

## **Objectives:**

- (i) To identify the commercially important fish and shell-fish species inhabited in the aquatic environment,
- (ii) To acquire knowledge on the fish and shell-fish species in the aquatic environment.

#### **THEORY**

Principles of Taxonomy, Nomenclature, Types, Classification and Interrelationships. Criteria for generic and specific identification; Morphological, Morphometric and Meristic characteristics of taxonomic significance. Major taxa of inland and marine fishes upto Family level. Commercially important freshwater and marine fishes of India and their morphological characteristics. Introduction to modern taxonomic tools: Karyo-taxonomy, DNA barcoding, Protein analysis and DNA polymorphism. Study of external morphology and meristic characteristics of Crustacea and Mollusca. Classification of Crustacean and Mollusca upto the level of Species with examples of commercially important species.

#### **PRACTICAL**

Collection and Identification of commercially important inland and marine fishes. Study of their external morphology and diagnostic features. Modern taxonomic tools - Protein analysis and Electrophoretic studies; Karyo-taxonomy - Chromosome preparation and identification. DNA barcoding, DNA polymorphism; Visit to fish landing Centres to study commercially important fishes and catch composition. Study of external morphology. Collection, Preservation and Identification of commercially important prawns, shrimps, crabs, lobsters, bivalves, gastropods and cephalopods from natural habitats. Field visits for collection and study of commercially important shellfish.

## THEORY [FRM 111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1	Principles of Taxonomy, Nomenclature, Types.	Definition- Taxonomy, History of Taxonomy, Earlier methods of identification	2
2	Classification and Interrelationships, Classical and Modern taxonomic methods	Evolution of fishes, Interrelationships between Animal Phyla, Methods of Classical and Modern Taxonomy	8
3	Criteria for Generic and Specific identification	Criteria, Genetic relationships, Identification techniques	5
4	Morphological, Morphometric and Meristic characteristics of taxonomic significance	Taxonomic tools, Identification based on Morphological, Morphometric and Meristic characteristics	8
5	Classification hierarchy and Use of keys for identification	Use of keys and understanding the hierarchy ie. Order, Family, Genus, Species levels	8
6	Study of external morphology, Meristic characteristics and Classes of Crustacea	Study of external features, Morphological differences in classes of Crustacea	8
7	Study of External Morphology, Meristic Characteristics and Classes of Mollusca	Study of external features, Morphological differences in Classes of Mollusca	8
8	Major Taxa of Inland fishes up to Family level	Inland sources and the Biodiversity of fishes, Major commercially important inland fishes	8
9	Major Taxa of Marine fishes up to Family level	Marine sources and the Biodiversity of fishes, Major commercially important inland fishes	8
10	Classification of Crustacean up to the level of Species	Classification of Crustacea with examples of commercially important species of Crustacea	8
11	Classification of Mollusc up to the level of Species	Classification of Mollusca with examples of commercially important species of Mollusca	8
13	Modern Taxonomic Tools in Classification	Introduction to Modern Taxonomic TOOLS, Use of available Databases, Bioinformatic tools	6
14	Methods in Karyo-taxonomy, DNA barcoding	Karyotyping tools, DNA analysis	6
15	Methods in Protein analysis and DNA polymorphism	Electrophoresis techniques, DNA structure, Polymorphism	5
16	Preservation Techniques for fish and shellfishes	Wet and Dry Preservation Techniques for fish and shellfish	4
		Total=	100

## Practical [FRM 111]

Exercise No.	Exercise Title
1-2	Collection and Identification of commercially important marine fishes from Mirkarwada harbour.
3-4	Collection and Identification of commercially important marine fishes from other local jetties.
5-6	Collection and Identification of commercially important inland fishes from local ponds.
7-8	Collection and Identification of commercially important inland fishes from local riverine sources.
9-10	Study of external morphology and diagnostic features of various fishes.
11-12	Study of anatomy and other identifying characteristics of fishes.
13-14	Study of mouths and teeth, food and feeding in fishes.
15-16	Modern taxonomic tools - Protein analysis of collected samples.
17	Modern taxonomic tools - Electrophoretic studies.
18-19	Karyotaxonomy - Chromosome preparation and Identification.
20-21	Collection and Study of external morphology, Preservation and Identification of commercially important prawns, shrimps.
22-23	DNA barcoding; DNA polymorphism.
24-25	Visit to Mirkarwada fish landing centre to study commercially important fishes and catch composition.
26-28	Visit to Sakhartar, Shirgaon jetties and other local jetties for collection of fish and shellfish specimens.
29-31	Collection and Study of external morphology, Preservation and Identification of commercially important crabs, lobsters, bivalves, gastropods and cephalopods from natural habitats.
32	Field visits for collection and study of commercially important shellfish.

Semester	:	I	
Course No.	:	AEM-111	Credit Hrs. : 3(2+1)
<b>Course Title</b>	:	Soil and Water Chemistry	

## **Objectives:**

- (i) To analyse the water and soil quality parameters in relation to aquaculture for assessing the health of the water bodies and
- (ii) To study the impact of water and soil quality parameters on fish and shellfish production.

#### **THEORY**

Analytical Chemistry: Principles, Applications and Types. Classical methods of Analytical Chemistry, Volumetry and Gravimetry. Solutions: Standard solutions, titration, indicators, dilute solutions, Units of concentration: Standard curve, Nomograph. Chemistry of water: The water molecule, Properties of pure water, fresh water and seawater. Composition of waters: surface water, groundwater and seawater. Dissolved gasses: Factors affecting natural waters. Acid, base, salts, Hydrogen ions, Modern concept of pH and Buffer. Water analysis: Collection and Preservation of water samples. Measurement of temperature. Transparency, Turbidity, Determination of pH, Electrical conductivity, Salinity, Chlorinity, Total Solids (TDS, TSS, TVS, TVDS), Dissolved Oxygen, Free Carbon dioxide, Total alkalinity, Total hardness, Calcium, Magnesium, Inorganic Nitrogen (Ammonium and Nitrate) and Phosphorus. Water quality criteria/ requirements for Aquaculture. Soil Chemistry: Origin and Nature of soils. Physical properties of soil: Soil colour, texture, structure, pore size, bulk density, water holding capacity. Soil types and their distribution. Soil Chemistry: Soil colloids, cation exchange, organic carbon, Carbon - Nitrogen ratio, Soil fertility. Soil reaction: Acidity, alkalinity, conductivity, redox potential. Submersed soils: Wet lands, peat soils, fluxes between mud and water, methane and hydrogen sulphide formation. Saline soils, Alkali soils, Acid sulphate soils, Iron pyrites and Soil reclamation. Soil analysis: collection and preparation of soil samples, determination of soil texture, water holding capacity, pH, Conductivity, Organic Carbon, Nitrogen, Phosphorus, Lime requirement. Soil and Water amendments: Lime manures, fertilizers, micronutrients, zeolites, alum, gypsum. Environmental ameliorative: Chlorination, deodorizers, bacterial formulation. Soil quality criteria/ requirements for Aquaculture.

## **PRACTICAL**

Principles of Titrimetry, Gravimetry, Potentiometry, Conductometry, Refractometry, Colourimetry, Turbidimetry, Spectrophotometry (UV, Visible, Flame, AAS), Computerized instrument system. Demonstration: Demonstration of laboratory glass wares and equipment used in water and soil analysis. Water analysis: Measurement of temperature, turbidity, determination of pH and EC. Determination of salinity, Chlorinity, Total solids, Redox potential, DO, Free CO2. Determination of total alkalinity, hardness. Determination of inorganic nitrogen, and phosphorus. Soil analysis: Determination of soil texture, soil pH, conductivity, soil available nitrogen, available phosphorus and organic carbon.

## **TEACHING SCHEDULE**

## THEORY [AEM-111]

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)
		Principles, Applications and Types.	2
1-2	Analytical Chemistry	Classical methods of Analytical Chemistry, Volumetry and Gravimetry.	3
3	Solutions	Standard solutions, Titration, Indicators, Dilute solutions	5
4	Units of Concentration	Standard curve, Nomograph	3
5	Chemistry of Water	The water molecule, Properties of pure water, fresh water and seawater.	3
6	Composition of Waters	Surface water, Groundwater and Seawater.	3
7	Dissolved Gasses	Factors affecting Natural waters. Acid, Base, Salts, Hydrogen ions, Modern concept of pH and Buffer	5

Semester	:	I	
Course No.	:	AQC-111	Credit Hrs. : 3(2+1)
<b>Course Title</b>	:	Freshwater Aquaculture	

## **Objectives:**

- (i) To gain knowledge and understand the recent advances in freshwater Aquaculture under different culture systems,
- (ii) To impart the knowledge of the different types of aquaculture methods and commercially importable freshwater fish and shell-fish species.

#### **THEORY**

Major species cultured, Production trends and Prospects in different parts of the world. Freshwater Aquaculture resources- ponds, tanks, lakes, reservoirs, etc. Nursery, rearing and grow-out ponds preparation and management-control of aquatic weeds and algal blooms, predatory and weed fishes, liming, fertilization/ manuring. Use of bio-fertilizers, Supplementary feeding. Water quality management. Selection, Transportation and Acclimatization of seed. Traits of important cultivable fish and shellfish and their culture methods - Indian major carps, Exotic carps, Air-breathing fishes, Cold water fishes, Freshwater prawns, Freshwater mussels. Wintering ponds, Quarantine ponds and Isolation ponds. Sewage-fed fish culture. Principles of organic cycling and detritus food chain. Use of agro-industrial waste and bio-fertilizer in Aquaculture. Composite fish culture system of Indian and Exotic carps-competition and Compatibility. Exotic fish species introduced to India. Culture of other freshwater species. Medium and minor carps, catfishes and murrels. Species of fish suitable for integrated aquaculture. Integration of Aquaculture with Agriculture/ Horticulture. Integration of Aquaculture with Livestock. Cultivation of Aquacic macrophytes with Aquaculture (Makahana). Paddy-cum-Fish/Shrimp culture.

## **PRACTICAL**

Preparation and Management of nursery, Rearing and Grow-out ponds. Study on the effect of liming, manuring and fertilization on hydrobiology of ponds and growth of fish and shellfishes. Collection, Identification and Control of aquatic weeds, insects, predatory fishes, weed fishes and eggs and larval forms of fishes. Algal blooms and their control. Estimation of plankton and benthic biomass. Study of contribution of natural and supplementary feed to growth. Workout of the economics of different culture practices. Estimation of livestock requirement / Unit in integrated Aquaculture. Design of paddy plot for paddy-cum-fish culture. Design of Fish and Shrimp Culture, Livestock shed on pond embankment. Economics of different integrated farming systems.

## THEORY [AQC-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1	Major Species cultured in different parts of the World	Carps, Catfishes and Trouts	3
2	Production Trends and Prospects in different parts of the World	China India and South-East Asia	3
3	Freshwater Aquaculture Resources-	Ponds, tanks, lakes, reservoirs etc. Cage Culture Potential	4
4	Nursery, Rearing and Grow-out ponds preparation and Management	Larval rearing	4
5	Control of aquatic weeds and Algal blooms	Use of organic control measures	2
6	Eradication of predatory and Weed fishes	Introducing grass carp	2
7	Liming	Types of lime	2
8	Fertilization/ Manuring	Dosages of fertilizers and manures	2
9	Use of Biofertilizers	Agriculture and Horticulture based biofertilizers	2
10	Supplementary feeding	Pelleted feeds	2
11	Water quality management	Dissolver oxygen, pH, Alkalinity and Hardness, etc. Analysis	4
12	Selection and Transportation of Seed	Selection criterion of seed	4
13	Acclimatization of Seed	Protocol of acclimatization	3
14	Traits of important cultivable fish and shellfish and their culture methods- Indian major carps	IMC and M. rosenbergii	5
15	Culture of Exotic carps	Chinese carps	3
16	Culture of Air breathing fishes	Cat fishes	2
17	Culture of Coldwater fishes	Mahseer and Trouts	2
18	Culture of Freshwater Prawns	M. rosenbergii and M. malcomsonii	3
19	Culture of Mussels	Freshwater pearl farming	2
20	Wintering ponds, Quarantine ponds and Isolation ponds	Preventive measures to protect the crop	2
21	Sewage-fed fish culture	Kolkata based models	3
22	Principles of Organic cycling and Detritus food chain	Detritus cycling	4

23	Use of agro-industrial waste and bio fertilizer in aquaculture.	Feed formulation using agro-based waste, e.g. molasses	3
24	Composite fish culture system of Indian and exotic carps	Different types of composite fish culture	3
25	Competition and compatibility of IMC and Exotic carps	Composite carp farming	2
26	Exotic fish species introduced to India.	Sport fishes and food fishes	4
27	Culture of other freshwater species	Ompakpabda, Pangasianodon spp. etc.	3
28	Medium and minor carps, catfish and murrels	Culture technologies, pen, cages and RAS	3
29	Integration of aquaculture with agriculture/horticulture	Integrated fish farming	5
30	Integration of aquaculture with livestock.	Ducks, Pigs and poultry	5
31	Cultivation of aquatic macrophytes with aquaculture (Makahana)	Cultivation of weeds and ornamental plants	4
32	Paddy cum Fish/Shrimp Culture.	Traditional fish farming methods	5
_		Total=	100

## PRACTICAL [AQC-111]

Exercise No.	Exercise Title	
1	Preparation and management of nursery ponds.	
2	Preparation and management of rearing and ponds	
3	Preparation and management of grow-out ponds	
4	Study on effect of liming on hydrobiology of ponds and growth of fish and shellfishes	
5	Effect of manuring and fertilization on hydrobiology of ponds and growth of fish and shellfishes.	
6	Collection and identification of aquatic weeds	
7	Control of aquatic weeds	
8	Collection, identification and eradication of aquatic insects	
9	Collection, identification and eradication of predatory and weed fishes, eggs and larval forms of fishes	

## **AQC-111...**

10	Algal blooms and their control
11	Estimation of plankton and benthic biomass
12	Study of contribution of natural and supplementary feed to growth
13	Estimation of livestock requirement / Unit in integrated aquaculture - Design of paddy plot for paddy-cum-fish culture.
14	Design of Fish and Shrimp Culture, Livestock shed on pond Embankment
15	Working-out of economics of different culture practices
16	Economics of different integrated farming systems

## **Suggested Readings [AQC 111]:**

Semester	:	I	
Course No.	:	AHM-111	Credit Hrs. : 2(1+1)
<b>Course Title</b>	:	Fundamental Microbiology	

## **Objectives:**

- i) To create a basic understanding on Microbiology and its importance in the aquatic environment,
- ii) To develop skills in the identification of microbes, culture of microbes and diagnosis of microbial pathogens in aquatic organisms.

#### **THEORY**

Milestones in Microbiology. Contributions of Leeuwenhoek, Louis Pasteur, Robert Koch, Alexander Flemming, Joseph Lister, Winogrdasky. Microscopy- Principle and construction of brightfield, darkfield, phase contrast, stereo, SEM and TEM. Microbial Taxonomy- Bergy's and Molecular taxonomy. Types of Microorganisms: Prokaryotes - Morphology and Ultrastructure of bacterial cell. General features, Types and Importance of viruses, cyanobacteria, actinomycetes, archae, mycoplasma, rickettsiae. Eukaryotes-Diagnostic features and importance of fungi and protozoa. Microbial Techniques- Types of media, types of sterilization- physical and chemical agents, cultivation of microorganisms, staining techniques- simple, differential, structural staining; enumeration of microorganisms, culture preservation methods. Bacterial metabolism: Nutrient requirements, nutritional types, bacterial photosynthesis and their ecological significance. Microbial growth: Growth phases, measurement of cell growth, factors affecting growth- influence of physico-chemical factors- pH, temperature, moisture, light, osmotic pressure, fermentation - types and significance. Microbial genetics- general principles, genetic recombination, transformation, transduction and conjugation. Plasmids-types and their importance. Mutation- types and significance. Microbial ecology: Introduction and types of interaction, extremophiles and their significance. Aquatic Microbiology: Introduction and scope of aquatic microbiology, aquatic environment as habitat for microorganisms- bacteria, cyano bacteria, fungi, algae, parasites and viruses. Distribution of microorganisms and their biomass in rivers, lakes, sea and sediment. Influence of physical, chemical and biological factors on aquatic microbes. Microbial biofilms. Role of microbes in the production and breakdown of organic matter. Role of microbes in sedimentation and mineralization process. Nutrient cycles- carbon, nitrogen, sulphur, phosphorus, iron, and manganese cycles. Sewage microbiology, selfpurification in naturalwaters, sewage treatment, drinking water microbiology, sanitary quality of water for aquaculture, bio remediators. Economic significance of aquatic microbes.

#### **PRACTICAL**

Handling of microscopes, Wet mount, smear and hanging drop preparations Micrometry. Determination of size of microorganisms (ocular, stage micrometers). Tools and techniques in sterilization methods: Filtration, dry heat, moist heat, chemical agents. Cultivation technique: Media preparation, Isolation -pure culture, subculture. Observation of fungi, blue-green algae and protozoans. Staining techniques for bacteria—simple, Differential, Structural and Biochemical tests: Indole, methyl red, Voges Proskauer, citrate test, oxidase test, catalase tests. Collection of water and sediment samples for microbiological analysis, Winogradsky cylinder, Isolation, identification and enumeration of various groups of microorganisms from different water bodies including aquaculture systems. Study of bacteria involved in nutrient cycles. Biofilms, water testing for potability, enumeration of coliform. Antibiotic sensitivity of bacteria - Antibiotic sensitivity test - disc diffusion method.

#### **TEACHING SCHEDULE**

1	Milestones in Microbiology	Contributions of Leeuwenhoek, Louis Pasteur, Robert Koch, Alexander Flemming, Joseph Lister, Winogrdasky.	5
2	Microscopy	Principle and Construction of bright field, Dark field, Phase contrast, Stereo, SEM and TEM.  Microbial Taxonomy – Bergy's and Molecular taxonomy.	5
3	Types of Microorganisms	Prokaryotes-Morphology and Ultra structure of bacterial cell. General features, Types and Importance of viruses, Cyanobacteria, Actinomycetes, Archae, Mycoplasma, Rickettsiae.	5
4	Eukaryotes	Diagnostic features and Importance of Fungi and Protozoa.	5
5	Microbial Techniques	Types of media, Types of sterilization- Physical and Chemical agents, Cultivation of microorganisms, Staining techniques- Simple, Differential, Structural staining; Enumeration of microorganisms, Culture preservation methods.	10

## **AHM-111...**

10	Significance		
16	Economic	Economic significance of aquatic microbes.	5
15	Sewage Microbiology	Self-purification in natural waters, Sewage treatment, Drinking water microbiology, Sanitary quality of water for Aquaculture, Bioremediators.	10
14	<b>Nutrient Cycles</b>	Carbon, Nitrogen, Sulphur, Phosphorus, Iron and Manganese cycles.	5
13	Microbial Biofilms	Role of microbes in the production and breakdown of organic matter.  Role of microbes in sedimentation and mineralization process.	5
12	Distribution of Microorganisms	Distribution of microorganisms and their biomass in rivers, lakes, sea and sediment.  Influence of physical, chemical and biological factors on aquatic microbes.	5
11	Aquatic Microbiology	Introduction and Scope of Aquatic Microbiology, Aquatic environment as habitat for microorganisms - bacteria, cyanobacteria, fungi, algae, parasites and viruses.	5
10	Mutation	Types and Significance Microbial Ecology: Introduction and types of interaction, extremophiles and their significance	5
9	Plasmids	Types and their importance.	5
8	Microbial Genetics	General principles, Genetic recombination, Transformation, Transduction and Conjugation.	10
7	Microbial Growth	Growth phases, measurement of cell growth, Factors affecting growth- Influence of physico- chemical factors - pH, temperature, moisture, light, osmotic pressure, fermentation - types and significance.	10
6	Bacterial Metabolism	Nutrient requirements, Nutritional types, Bacterial photosynthesis and their ecological significance.	5

## PRACTICAL [AHM-111]

Exercise No.	Exercise Title
1	Handling of microscopes, Wet mount, Smear and hanging drop preparations.
2	Micrometry. Determination of size of microorganisms (ocular, stage micrometers).
3	Tools and techniques in sterilization methods: Filtration, dry heat, moist heat, chemical agents.
4	Cultivation technique: Media preparation, Isolation - pure culture, subculture.
5	Observation of fungi, blue-green algae and protozoans.
6-7	Staining techniques for bacteria-simple, differential and structural.
8-10	Biochemical tests: Indole, Methyl red, Voges Proskauer, Citrate test, Oxidase test, Catalase tests.
11	Collection of water and sediment samples for microbiological analysis, Winogradsky cylinder.
12-13	Isolation, identification and enumeration of various groups of microorganisms from different water bodies including aquaculture systems.
14	Study of bacteria involved in nutrient cycles.
15	Biofilms, water testing for potability, enumeration of coliform.
16	Antibiotic sensitivity of bacteria - Antibiotic sensitivity test – Disc diffusion method.

## **Suggested Readings [AHM 111]:**

\_\_\_\_\_

Semester	:	I	
Course No.	:	AEM-112	Credit Hrs. : 2(1+1)
<b>Course Title</b>	:	Meteorology and Geography	

**Objectives:** To teach the meteorological phenomena and geographical distribution.

#### **THEORY**

Nature of Atmosphere: Weather and climate; composition of atmosphere; structure of atmosphere. Heat energy of atmosphere: the process of heat transmission; heating of atmosphere; disposal of insulation; irregular heating of the atmosphere. Temperature: Temperature instruments; periodic, horizontal and vertical temperature variations; effects of vertical air motion on temperature. Humidity and water vapour: the relationship between temperature and humidity; distribution of water vapour in atmosphere; evaporation, humidity instruments and measurements. Condensation and precipitation: process of conditions of condensation, forms of condensation; precipitation; forms of precipitation, measurement of precipitation; rainfall in India. Clouds and thunderstorms: amount of cloudiness; ceiling; classification of clouds; conditions of cloud formation; reporting and identification of clouds; thunderstorms. Atmospheric pressure: meaning of atmospheric pressure; the laws of Gases; pressure units; pressure instruments; vertical, horizontal and periodic variations; isobars and pressure gradients. Wind: characteristics of wind motion; wind observation and measurement; wind representation factors affecting wind motion. Terrestrial or planetary winds: ideal planetary wind system; planetary pressure belts. Planetary wind system; secondary winds; monsoon winds; land and sea breeze. Tropical cyclones: storm divisions; pressure and winds; vertical structure of storm centre; hurricane, sea, swell and surge; hurricane warning. Weather forecasting: forecasting process; forecasting from local indications; role of satellite in weather forecasting; synoptic weather charts. Effects of climate change on fisheries sector. Introduction to Geography: shape, size and structure of the earth; concepts of latitude, longitude and great circles; model globe, maps and different types of projections; cartography; landscape.

## **PRACTICAL**

Graphic representation of the structure of atmosphere; physical layering and compositional layering. Temperature instruments: simple thermometers; Six's Max-Min Thermometer; thermograph. Isotherms: world mean temperatures-January to July. India means temperatures - January to July. Humidity measurement: hygrometer; psychrometer; relative humidity; dew point. Condensation: observation and identification of various types of clouds. Depicting sky picture. Precipitation: measurement of rainfall using rain gauge. Mapping Indian monsoons: south-west monsoon and rainfall in June, North-east monsoon and rainfall in December; isohyets. Atmospheric pressure measurement: Fortin's mercurial barometer; Aneroid barometer. Isobars: India mean pressure - Jan to July. Wind observation and measurement: wind vane; cup anemometer. Ideal terrestrial/planetary pressure and wind systems: diagrammatic representation. Geography: The Earth: diagrammatic representation of shape, size, structure, zones, latitudes, longitudes and great circles. Typical landscape mapping; map reading. Geographical terms used in landscape.

## THEORY [AEM-112]

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)
1	Nature of Atmosphere	Weather and climate; composition of atmosphere; structure of atmosphere	6
2	Heat energy of atmosphere	Process of heat transmission; heating of atmosphere; disposal of insulation; irregular heating of the atmosphere	6
3	Temperature	Temperature instruments; periodic, horizontal and vertical temperature variations; effects of vertical air motion on temperature.	8
4	Humidity and water vapour	The relationship between temperature and humidity; distribution of water vapour in atmosphere; evaporation, humidity instruments and measurements.	8
5	Condensation and precipitation	Process of conditions of condensation, forms of condensation; precipitation; forms of precipitation, measurement of precipitation; rainfall in India	6
6	Clouds and thunderstorms	Amount of cloudiness; ceiling; classification of clouds; conditions of cloud formation; reporting and identification of clouds; thunderstorms.	6
7	Atmospheric pressure	Meaning of atmospheric pressure; the laws of Gases; pressure units; pressure instruments; vertical, horizontal and periodic variations; isobars and pressure gradients.	7
8	Wind	Characteristics of wind motion; wind observation and measurement; wind representation factors affecting wind motion	7
9	Terrestrial or planetary winds	Ideal planetary wind system; planetary pressure belts. Planetary wind system; secondary winds; monsoon winds; land and sea breeze.	7
10	Tropical cyclones	Storm divisions; pressure and winds; vertical structure of storm centre; hurricane, sea, swell and surge; hurricane warning.	7
11	Weather forecasting	Forecasting process; forecasting from local indications; role of satellite in weather forecasting; synoptic weather charts.	6

## **AEM-112...**

12	Effects of climate change on fisheries sector	Impact of climate change on sea coasts, harbours, ports, rivers, estuaries.	5
13	Introduction to Geography	Shape, size and structure of the earth	5
14	Introduction to Geography	Concepts of latitude, longitude and great circles	5
15	Introduction to Geography	Model globe, maps and different types of projections	5
16	Introduction to Geography	Cartography and landscape	6
		Total=	100

## **TEACHING SCHEDULE**

## PRACTICAL [AEM-112]

Exercise No.	Exercise Title		
1	Graphic representation of the structure of atmosphere, physical layering and compositional layering.		
2	Temperature instruments: simple thermometers; Six's Max-Min Thermometer; thermograph.		
3	Isotherms: world mean temperatures- January to July. India means temperatures - January to July		
4	Humidity measurement: hygrometer; psychrometer; relative humidity; dew point.		
5-6	Condensation: Observation and identification of various types of clouds.  Depicting sky picture		
7	Precipitation: measurement of rainfall using rain gauge		
8	Mapping Indian monsoons: south-west monsoon and rainfall in June, North-east monsoon and rainfall in December; isohyets		
9	Atmospheric pressure measurement: Fortin's mercurial barometer; Aneroid barometer		
10	Study of Isobars: India mean pressure - Jan to July		
11	Wind observation and measurement: wind vane; cup anemometer.		
12	Ideal terrestrial/planetary pressure and wind systems: diagrammatic representation		
13	The Earth: Study of diagrammatic representation of shape, size, structure, zones		
14	Study of latitudes, longitudes and great circles		
15	Typical landscape mapping; Map reading		
16	Study of Geographical terms used in landscape.		

## **Suggested Readings [AEM-112]:**

- 4. M. Ganapathi Naik, 2013. Meteorology and Geography, Narendra Publishing House.
- 5. Matthew Fontaine Maury, 2018. The Physical Geography of the Sea, and Its Meteorology, Palala Publ.
- 6. The Indian Meteorological Department (IMD), Weather Instruments, Maps and Charts, in Practical Geography. 2022-23.

## #List/ Bouquet of Skill Enhancement Courses (SECs)

Sr. No.	Course No.	Course Title	Credit Hrs.
1.	SEC-xxx	Breeding and Culture of Ornamental Fish	2(0+2)
2.	SEC-xxx	Net Making and Mending	2(0+2)

Note: Skill Enhancement Courses can be added/ offered as per the facilities and resources available at the respective universities/colleges based on the relevance to the region and the UG degree subject.

In case of unavailability of said detailed course-wise syllabus of above SEC courses, the same can be primarily developed and followed at College/University level in the academic year, 2024-25; However, the same will be obtained from the respective UG Degree Coordinator/ Discipline Coordinators and can be followed w.e.f. AY, 2025-26.

[Above list is an indicative list/bouquet of SEC courses and subject to modification as applicable therein]

Semester	:	I	
Course No.	:	SEC-XXX	Credits Hrs. : 2(0+2)
Course Title	:	Breeding and Culture of Ornamental Fish	

## **Objectives:**

- (i) To gain knowledge on breeding and culture of ornamental fish.
- (ii) To produce ornamental fish for marketing.

## **PRACTICAL**

Broodstock management of live bearers, Broodstock management of cichlids, Broodstock management of Goldfish/ Koi carp, Broodstock management of barbs/danios, Broodstock management of tetras, Broodstock management of fighters/gourami, Broodstock management of catfishes, Setting up of breeding tank and breeding substrate/devices used for live bearers, Setting up of breeding tank and breeding substrate/devices used for cichlids, Setting up of breeding tank and breeding substrate/devices used for goldfish / koi carp, Setting up of breeding tank and breeding substrate/devices used for barbs/danios, Setting up of breeding tank and breeding substrate/devices used for tetras, Setting up of breeding tank and breeding substrate/devices used for fighters/gourami, Setting up of breeding tank and breeding substrate/devices used for catfishes, Preparation of moist feed, Preparation of dry feed, Measurement of pH and temperature of water, Estimation of dissolved oxygen, Estimation of total alkalinity, Estimation of total hardness, Breeding and rearing of live bearers, Breeding and rearing of cichlids, Breeding and rearing of Goldfish / Koi carp, Breeding and rearing of barbs/danios, Breeding and rearing of tetras, Breeding and rearing of fighters/gourami, Breeding and rearing of catfishes, Culture of cladocerans, Culture of tubifex/chironomids, Culture of infusoria, Hatching of Artemia cysts and harvesting of Artemia nauplii, Aeration system for ornamental fish

## PRACTICAL [SEC-xxx]

Exercise No.	Exercise Title
1	Brood stock management of live bearers
2	Brood stock management of cichlids
3	Brood stock management of Goldfish / Koi carp
4	Brood stock management of barbs / danios
5	Brood stock management of tetras
6	Brood stock management of fighters / gourami
7	Brood stock management of catfishes
8	Setting up of breeding tank and breeding substrate/devices used for live bearers
9	Setting up of breeding tank and breeding substrate/devices used for cichlids
10	Setting up of breeding tank and breeding substrate/devices used for goldfish / koi carp
11	Setting up of breeding tank and breeding substrate/devices used for barbs / danios
12	Setting up of breeding tank and breeding substrate/devices used for tetras
13	Setting up of breeding tank and breeding substrate/devices used for fighters/gourami
14	Setting up of breeding tank and breeding substrate/devices used for catfishes
15	Preparation of moist feed
16	Preparation of dry feed
17	Measurement of pH and temperature of water
18	Estimation of dissolved oxygen
19	Estimation of total alkalinity
20	Estimation of total hardness
21	Breeding and rearing of young ones of live bearers
22	Breeding and rearing of cichlids
23	Breeding and rearing Goldfish / Koi carp
24	Breeding and rearing barbs/danios
25	Breeding and rearing of tetras
26	Breeding and rearing of fighters/gourami
27	Breeding and rearing of catfishes

28	Culture of cladocerans	
29	Culture of tubifex/chironomids	
30	Culture of infusoria	
31	Hatching of Artemia cysts and harvesting of Artemia nauplii	
32	Aeration system for ornamental fish	

## **Suggested readings [SEC-xxx]:**

- 1. Ahilan B., Felix N., Santhanam, R. 2008. Textbook of Aquariculture, Daya Publishing House, Delhi.
- 2. Axelrod H.R. and Sweenen M.E. 1992. The Fascination of Breeding Aquarium Fishes, TFH Publ.
- 3. Axelrod H.R. and Vorderwinkler W. 1978. Encyclopaedia of Tropical Fishes. TFH Publ.
- 4. Axelrod H.R. 1967. Breeding Aquarium Fishes. TFH Publ.
- 5. Mills D. 1981. Aquarium Fishes. Kingfisher Books.
- 6. Sanford G. and Crow R. 1991. The Manual of Tank Busters. Salamander Books.
- 7. Saxena A. (Ed.). 2003. Aquarium Management. Daya Publ.
- 8. Spotte S. 1979. Fish and Invertebrate Culture. John Wiley and Sons.
- 9. Boyd C.E. 1979. Water Quality in Warm Water Fish Ponds. Auburn
- 10. Crow R. and Keeley D. 1992. A Practical Guide to Tropical Aquarium Fish. Tiger Book Int., London.
- 11. Swain S.K., Sarangi N. and Ayyappan, S. 2010. Ornamental Fish Farming. ICAR.
- 12. Thomas P.C., Rath S.C. and Mohapatra K.D. 2003. Breeding and Seed Production of Finfish and Shellfish. Daya Publ. House.

Semester	:	I			
Course No.	:	SEC-xxx	Credits Hrs.	:	2(0+2)
Course Title	:	Net Making and Mending			

## **Objectives:**

- (i) To gain knowledge about net making and net mending for fishing.
- (ii) To train in selection of different net accessories for construction of fishing net.

#### **PRACTICAL**

Terminologies for Net mending and ropes, Abbreviations used for net preparation, Symbols used for net construction, Identification of synthetic and natural materials, Different fishing, Accessories used for mounting on net, Study of net accessories & net making tools, Prepare different mesh size nets. Identification of different hooks, Traditional fish catching device, Crab trap, Net repairing, Parts of the net replacement techniques, Fishing methods - Cast netting, Innovative fishing methods- Trawling, Squid jigging, Collapsible fishing trap used for fin fish, Crab trap used for brackish water crabs, Study of G-links, C-links. Handling, operation and usage of different shackles, Thimbles. Handling, operation of anchors used for fishing nets, Net tailoring methods. Measurement of bar length, stretched length of a mesh etc. Mounting as well as joining of floats, sinkers. Mounting of Head rope, foot rope. Construction and usage of steel wire rope, HDPE coated ropes. Different fishing gear operation, Ideal lay out of net mending yard. Study of different types of otter board. Visit to otter board manufacturing units, Net manufacturing unit, Net manufacturing unit, Net repairing/drying yard, Net seller, accessories sellers.

## TEACHING SCHEDULE

## PRACTICAL [SEC-xxx]

Exercise No.	Exercise Title	
1	Study of Terminologies for net mending and ropes.	
2	Study of Abbreviations used for net preparation.	
3	Study of Symbols used for net construction.	
4	Identification of synthetic and natural materials.	
5	Identification of different fishing ropes.	
6	Using Accessories for mounting on net.	
7	Study of net accessories & net making tools.	
8	To prepare different mesh size nets.	
9	Identification of different hooks.	
10	Study of traditional fish catching devices.	
11	Study of traditional methods for crab harvesting.	

12	Study of net repairing and net replacement techniques.		
13	Fishing methods - Cast netting.		
14	Innovative fishing methods- Trawling.		
15	Detail study of squid jigging.		
16	Study of collapsible fishing trap used for fin fish.		
17	Study of collapsible crab trap.		
18	Study of G-links, C-links.		
19	Study of different shackles, Thimbles.		
20	Handling, operation of anchors used for fishing nets.		
21	Net tailoring methods.		
22	Measurement of bar length, stretched length of a mesh etc.		
23	Mounting of floats, sinkers.		
24	Mounting of Head rope, foot rope.		
25	Construction and usage of steel wire rope, HDPE coated ropes.		
26	Different types of fishing gear operation.		
27	Ideal layout of net mending yard.		
28	Study of different types of otter board.		
29	Visit to otter board manufacturing units.		
30	Visit to net manufacturing unit		
31	Visit to net repairing/drying yard.		
32	Visit to net seller, accessories sellers.		

## **Suggested Readings [SEC-xxx]:**

- 1. Anrose A. 1986. Craft and Gear Practical -Course Manual, CIFE, Versova, Mumbai.
- 2. Baranov F.I. 1977. Selected works of Fishing Gear Vol. II, Jerusalem, I.P.S.T.
- 3. Klust G., 1983. Fishing Gear Technology FAO, United Nation by Fishing News Book ltd., Engl and Porry W.H., 1980. Fisherman's Handbook, England Fishing News Book.
- 4. Sreekrishna Y. and Shenoy L., 2001. Fishing Gear and Craft Technology, ICAR, New Delhi.
- 5. Sainsbury J. C. 1975. Commercial Fishing Methods: an introduction to vessels and gears., Fishing News Books Ltd., London.
- 6. Novikov V.M.1983. Hand Book of Fishery Technology Vol. 4., Amerind Book Co., New Delhi.
- 7. Y. Shreekrishna and Latha Shenoy,1986. Glossary of Fishing Gear Technology, CIFE, Versova Mumbai.
- 8. FAO. 1972. Catalogue of Fishing Gear Design. FAO Roam
- 9. Lal K.B. 1969. An Introduction to Fish Gear Technology. M and B Co. Delhi.

Note: \*MATH-111 for PCB student/ \*\*BIO-111 for PCM student/

**PCMB** student is NOT required to take any of these Need-based/Deficiency Courses.

## **B.Sc.** (Hons.) Community Science: First Semester

## **Course-wise Syllabus with Teaching Schedules**

Semester : I

Course No. : CAC-111 | Credit Hrs. : 2 (0+2) NG/ 2 Weeks

Course Title : Deeksharambh (Induction-cum-Foundation Course)

Non-Gradial Common Academic Course for the respective UG degree with the activities to be conducted during initial two weeks.

## **Objectives**:

- (i) To create a platform for students to help for Cultural Integration of students from different backgrounds,
- (ii) To know about the operational framework of academic process in university, instilling life and social skills,
- (iii) To create Social awareness, Ethics and Values, Team work, Leadership, Creativity,
- (iv) To identify the traditional values and indigenous cultures along with diverse potentialities both in indigenous and developed scenario.

## **ACTIVITIES**

- ➤ Introduction/Orientation and Discussions on operational framework of academic process in University/ College, as well as interactions with Academic and Research Managers of the University.
- ➤ Interaction with Alumni, Business Leaders, Perspective Employers, Outstanding Achievers in related fields and people with inspiring life experiences.
- > Group activities to identify the strength and weakness of students and to learn from each other's life experiences.
- Activities to enhance Cultural Integration of students from different backgrounds.
- Field visits to the relevant fields/ establishments.
- > Sessions on Personality Development (Instilling Life and Social skills, Social awareness, Ethics and Values, Team work, Leadership etc.) and imbibing the Communication skills.

**Note:** The details of the relevant activities will be decided by the parent University in line with the above-mentioned broad activities.

Semester	:	I					
Course No.	:	AEC-111	Credit Hrs. : 1(0+1)				
Course Title	:	National Service Scheme (NSS-I) / National Cadet Corps (NCC-I)					
Gradial Common Course across all UG degrees							

Course No.: AEC-111 Course Title: National Service Scheme-I (NSS-I) Credit Hrs: 1(0+1)

#### **SYLLABUS**

#### **PRACTICAL**

## **Introduction and Basic Components of NSS**

- Orientation: History, Objectives, Principles, Symbol, Badge; Regular Programs under NSS.
- Organizational structure of NSS, Code of conduct for NSS volunteers, Points to be considered by NSS Volunteers' awareness about Health.
- NSS program activities. Concept of regular activities, Special camping, Day camps, Basis of
  adoption of village/slums, Conducting survey, Analysing Guiding financial patterns of
  scheme, Youth program/schemes of GOI, Coordination with different agencies and
  maintenance of diary. Understanding youth. Definition, Profile, Categories, Issues and
  Challenges of youth; and Opportunities for youth who is agent of the social change.
- Community mobilization. Mapping of community stakeholders, Designing the message as per problems and their culture; Identifying methods of mobilization involving youth-adult partnership. Social harmony and National integration.
- Indian history and culture, role of youth in nation building, Conflict resolution and peace building. Volunteerism and Shramdaan. Indian tradition of volunteerism, its need, importance, motivation and constraints; Shaman as part of volunteerism.
- Citizenship, Constitution, and Human rights. Basic features of constitution of India, Fundamental rights and duties, Human rights, Consumer awareness and rights and Rightto information. Family and Society. Concept of family, Community (PRIs and other communitybased organizations) and Society.

# PRACTICAL [AEC-111: NSS-I]

Exercise No.	Exercise Topics/ Titles	Weightage (%)
1	Orientation, History, Objectives, Principles, Symbols, Badge	10
2	Regular Programmes under NSS	10
3	Organisational Structure of NSS	10
4	Code of Conduct of NSS Volunteer	10
5	Points to be considered about NSS Volunteers awareness about Health	5
6	NSS Programme Activities- Concept of Regular Activities	5
7	NSS Programme Activities- Special Campaign	5
8	NSS Programme Activities- Day Camps	5
9	NSS Programme Activities- Adoption of village, Conducting survey, Analysing Guiding financial patterns of scheme	5
10	NSS Programme Activities- Youth programs/schemes of GOI, Coordination with different agencies and maintenance of diary. Understanding youth. Definition, Profile, Categories, Issues and Challenges of youth and Opportunities for youth who is agent of the social change.	5
11	Community Mobilization- Mapping of community stakeholders, Designing the message as per problems and their culture; Identifying methods of mobilization involving youth-adult partnership.	
12	Community Mobilization-Culture, Social harmony and National integration.	5
13	Indian History and Culture- Role of youth in Nation Building	5
14	Volunteerism and Shramdaan: Indian tradition of volunteerism, its need, importance, motivation and constraints; Shaman as part of volunteerism.	5
15	Citizenship, Constitution and Human Rights: Basic features of constitution of India, Fundamental rights and duties, Human rights, Consumer awareness and rights and Right to information.	5
16	Family and Society: Concept of family, Community (PRIs and other community-based organizations) and Society.	5
	Total =	100

Course No.: AEC-111 | Course Title: National Cadet Corps-I (NCC-I) | Credit Hrs.: 1(0+1)

#### **SYLLABUS**

**Objective:** To integrate and develop qualities of leadership, discipline, character and patriotism and foster the NCC Motto: "Unity and Discipline" among the youth.

#### **PRACTICAL**

- Aims, Objectives, Organization of NCC and NCC Song. DG's Cardinals of Discipline.
- Drill- Aim, General words of command, Attention, Stands-at-ease, Stand-easy and Turning.
- Sizing, Numbering, Forming in three ranks, Open and Close order march and Dressing.
- Saluting at the halt, Getting on parade, Dismissing and Falling-out.
- Marching, Length of pace and time of marching in quick/slow time and halt. Side pace, Pace forward and to the rear. Turning on the march and wheeling. Saluting on the march.
- Marking time, Forward march and halt. Changing step, Formation of squad and squad drill.
- Command and control, Organization, Badges of rank, Honours and Awards.
- Nation Building- Cultural heritage, Religions, Traditions and Customs of India. National integration. Values and ethics, Perception, Communication, Motivation, Decision making, Discipline and duties of good citizens. Leadership traits, Types of leadership. Character/Personality development. Civil defence organization, Types of emergencies, Fire fighting, Protection. Maintenance of essential services, Disaster management, Aid during development projects.
- Basics of Social Service, Weaker sections of society and their needs, NGO's and their contribution, Contribution of youth towards Social welfare and Family planning.
- Structure and Function of human body, Diet and Exercise, Hygiene and Sanitation.
   Preventable diseases including AIDS, Safe blood donation, First aid, Physical and mental health. Adventure activities. Basic principles of Ecology, Environmental conservation, Pollution and its control.

# PRACTICAL [AEC-111 : NCC-I]

Exercise No.	Exercise Topic	Exercise Sub-topics/ Titles	Weightage (%)
1-2	Introduction to NCC	Aims, Objectives, NCC Organizational structure, NCC Song, DG's Cardinals of Discipline.	4
3-5	Drill Basics	Aim of drill, General words of command, Positions of attention, Stand-at-ease and Stand- easy, Turning.	8
6-8	Formation Drills	Sizing, Numbering, Forming in three ranks, Open and Close order march and Dressing.	8
9-11	Saluting Drills and Parade Movements	Saluting at halt, Getting on parade, Dismissing and Falling-out.	8
12-14	Length of pace and time of marching in  Marching Techniques  Length of pace and time of marching in  Quick/slow march, Side pace, Forward/rear pace,  Turning on the march, Wheeling and Saluting on the march		10
15-17	Squad Formation and Control	Marking time, Forward march, Halt, Changing step, Formation of squad and Squad drill.	10
18-19	Command and Control in NCC	Organization, Badges of rank, Honours and Awards.	4
20-22	Nation Building and Citizenship; Leadership	Cultural heritage, Religions, Traditions, Customs of India, National integration, Values and Ethics, Communication, Leadership traits, Discipline and Motivation, Character/ Personality Development.	12
23-24	Civil Defence and Emergency Management	Types of emergencies, Fire fighting techniques, Maintenance of essential services, Disaster management and Aid during development projects, Civil Defence Organizations.	10
25-26	Social Service and Youth Welfare	Weaker sections of society, Role of NGOs, Youth participation in Social welfare and Family planning	8
27-29	Health, Hygiene and First Aid  Human body structure, Diet, Hygiene, Preventa diseases (including AIDS), Safe blood donation First aid practices, Mental and Physical health.		10
30-32	Environment and Ecology	Basic Principles of Ecology, Environmental conservation, Pollution and its control, Adventure activities.	8
		Total=	100

Semester	:	I				
Course No.	:	AEC-112	Credit Hrs.	:	2(1+1)	
<b>Course Title</b>	Course Title : Communication Skills					
Gradial Common Course across all UG degrees						

## **SYLLABUS**

**Objectives:** (i) To acquire competence in oral, written and non-verbal communication,

- (ii) To develop strong personal and professional communication and
- (iii) To demonstrate positive group communication.

#### **THEORY**

Communication Process: The magic of effective communication; Building self-esteem and overcoming fears; Concept, nature and significance of communication process; Meaning, types and models of communication; Verbal and Non-verbal communication; Linguistic and non-linguistic barriers to communication and reasons behind communication gap/ miscommunication. Basic Communication Skills: Listening, Speaking, Reading Writing Skills: Precís and writing/Abstracting/Summarizing; Style of technical communication, Curriculum vitae/resume writing; Innovative methods to enhance vocabulary, analogy questions; Structural and Functional Grammar: Sentence structure, modifiers, connecting words and verbals; Phrases and clauses; Case: subjective case, possessive case, objective case; Correct usage of nouns, pronouns and antecedents, adjectives, adverbs and articles; Agreement of verb with the subject: tense, mood, voice; Writing effective sentences; Basic sentence faults.

#### **PRACTICAL**

Listening and note taking; Writing skills: précis writing, summarizing and abstracting; Reading and comprehension (written and oral) of general and technical articles; Micro-presentations and Impromptu Presentations: Feedback on presentations; Stage manners: grooming, body language, voice modulation, speed; Group discussions; Public speaking exercises; Vocabulary building exercises; Interview techniques; Organization of events.

# THEORY [AEC-112]

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)	
	Communication Process:	Elements of Communication process such as		
1	The Magic of Effective	Communicator, Message, Channel treatment	5	
	Communication	of message, Audience and Audience		
		response.		
		Points to build Self-esteem, Build social		
	Building Self-esteem and	connections, Encourage yourself, Focus on		
2	Overcoming Fears	solutions and Set realistic goals, Strategies to overcome fears, Practice, Visualize Success,	5	
		Preparation, Know your audience, Seek		
		feedback and Active listening.		
		Concept, Nature and Significance of		
3		Communication process	10	
		Meaning, Types and		
4		Models of communication	10	
_	Communication	Verbal and Non-verbal communication,		
5		Linguistic and Non-linguistic communication	10	
		Barriers to communication and		
6		Reasons behind communication	5	
		gap/miscommunication		
7		Listening, Speaking, Reading, Writing Skills	5	
		Precís writing/ Abstracting/ Summarizing-		
8	<b>Basic Communication</b>	Styles of technical communication,	10	
	Skills	Curriculum Vitae/Resume writing.		
9		Innovative methods to enhance vocabulary,	5	
		analogy questions	<u> </u>	
10		Sentence structure, modifiers, connecting	5	
		words and verbal; Phrases and Clauses		
11		Case: Subjective case, Possessive case,	5	
		Objective case	_	
12	Structural and Functional Grammar	Correct usage of nouns, Pronouns and	5	
		Antecedents		
13		Adjectives, Adverbs and Articles	5	
14		Agreement of verbs with the subject: Tense,	5	
1.5		Mood, Voice		
15		Writing effective sentences	5	
16		Basic sentence faults	5	
		Total=	100	

## PRACTICAL [AEC-112]

Exercise No.	Exercise Topic	
1	Listening and Note taking	
2	Writing skills- Precís writing	
3	Writing skills- Abstracting	
4	Writing skills- Summarizing	
5	Reading and Comprehension (written and oral) of general and technical articles	
6	Micro-presentations	
7	Impromptu presentations	
8	Feedback on presentations	
9	Stage manners- Grooming	
10	Stage manners- Body language	
11	Stage manners- Voice modulations, speed	
12	Group discussions	
13	Public speaking exercise	
14	Vocabulary building exercises	
15	Interview techniques	
16	Organization of events

\_\_\_\_\_

Semester	:	I			
Course No.	:	MDC-111	Credit Hrs.	:	3(2+1)
<b>Course Title</b>	Course Title : Farming-based Livelihood Systems				
Gradial Common Course across all UG degrees					

## **SYLLABUS**

**Objectives:** (i) To make the students aware about farming-based livelihood systems in Agriculture,

(ii) To disseminate the knowledge and skills that how farming-based systems can be a source of livelihood.

#### **THEORY**

Status of Agriculture in India and different States, Income of farmers and rural people in India, Livelihood-Definition, Concept and livelihood pattern in urban and rural areas, Different indicators to study livelihood systems. Agricultural Livelihood Systems (ALS): Meaning, approach, approaches and framework, Definition of farming systems and farming-based livelihood systems, Prevalent Farming systems in India contributing to livelihood. Types of traditional and modern farming systems. Components of farming system/ farming-based livelihood systems: Crops and cropping systems, Livestock, (Dairy, Piggery, Goatry, Poultry, Duckry etc.), Horticultural crops, Agroforestry systems, Aquaculture, Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.; Small, medium and large enterprises including value chains and secondary enterprises as livelihood components for farmers, Factors affecting integration of various enterprises of farming for livelihood. Feasibility of different farming systems for different agro-climatic zones, Commercial farming-based livelihood models by NABARD, ICAR and other organizations across the country; Case studies on different livelihood enterprises associated with the farming. Risk and success factors in farming-based livelihood systems, Schemes and programs by Central and State Governments; Public and Private organizations involved in promotion of farming-based livelihood opportunities. Role of farming-based livelihood enterprises in 21st Century in view of circular economy, green economy, climate change, digitalization and changing life style.

#### **PRACTICAL**

Survey of farming systems and agriculture-based livelihood enterprises, Study of components of important farming-based livelihood models/systems in different agro-climatic zones, Study of production and profitability of crop based, livestock based, processing-based and integrated farming-based livelihood models, Field Visit of innovative farming system models. Visit of Agribased enterprises and their functional aspects for integration of production, processing and distribution sectors and Study of agri-enterprises involved in industry and service sectors (Value Chain Models), Learning about concept of project formulation on farming-based livelihood systems along with cost and profit analysis, Case study of Start-Ups in agri-sectors.

# THEORY [MDC-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1	Status of Agriculture in India	Historical background, Current status, Role of Agriculture in Indian Economy	4
2	Status of Agriculture in Different States	State-wise scenario, Major crops, Regional diversity	4
3	Income of Farmers and Rural People in India	Factors affecting income, Rural-urban income gap, Government initiatives	4
4	Livelihood: Definition, Concept, and livelihood Patterns in urban and rural areas	Livelihood- Definition and its Concept, Urban vs Rural livelihood patterns, Sources of income	4
5	Different Indicators to Study Livelihood Systems	Economic, Social and Environmental indicators, Measuring livelihood resilience	4
6	Agricultural Livelihood Systems (ALS): Meaning and Approaches	Definition, Significance of ALS, Integrated farming systems, Approaches	4
7	ALS Framework and Case studies	Framework for ALS, Case studies in India	4
8	Definition of Farming Systems and farming based Livelihood Systems	Definition and Role of farming systems in rural livelihoods, Examples of systems	4
9	Prevalent Farming Systems in India contributing to livelihood	Traditional vs. Modern farming systems, Regional differences	4
10	Types of Traditional and Modern Farming Systems	Types; Differences; Strengths, Limitations, Case studies	4
11	Components of farming system/farming-based livelihood systems - Crops and Cropping Systems	Components, Crop diversification, Cropping pattern, Mixed cropping, Importance for rural livelihoods	4
12	Livestock-based Farming Systems	Importance and Management of dairy, piggery, poultry, goatry, duckry, etc.	4
13	Horticultural Crops and Livelihoods	Role of fruits, vegetables and spices in rural income generation	4
14	Agroforestry Systems	Agroforestry- Definition, Combining trees and crops, Agroforestry models in India	2
15	Aquaculture as a Livelihood System	Importance of Aquaculture, Integrated systems (e.g. Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.)	4
16	Challenges in Aquaculture- based Systems	Feasibility, Government support and Market access	2

Continued....

## MDC-111....

	Changing Enestytes	Total =	100
32	Impact of Digitalization and Changing Lifestyles	Technology in Agriculture, Future prospects for rural livelihoods.	2
31	Farming-based Livelihoods in the 21st Century	Circular economy, Green economy, Climate change, Sustainability.	2
30	Public-Private Partnerships in Agriculture	Successful collaborations in rural development and farming systems	2
29	Role of Private Sector in Livelihood Promotion	Public-Private Partnerships, Role of private agribusiness.	2
28	Schemes and programmes by State Governments	State-specific programs promoting rural livelihoods, Case examples.	2
27	Schemes and Programmes by the Central Government	Overview of schemes like, PM-KISAN, National Rural Livelihood Mission.	2
26	Success Factors in Farming- based Livelihood Systems	Innovation, Market access, Government support, Social capital etc.	2
25	Risk Factors in Farming- based Livelihood Systems	Climate, Market fluctuations, Input costs; Mitigation strategies etc.	4
24	Case studies on different Livelihood Enterprises associated with farming	Analysis of successful enterprises, Dairy Cooperatives etc.	4
23	Commercial Farming Based Livelihood Models by NABARD, ICAR and other organizations across the country	Role of NABARD, ICAR and other Organizations in promoting commercial models, Successful cases.	4
22	Feasibility of different Farming Systems for different Agro-Climatic Zones	Suitable farming systems for different zones, Climate adaptation.	2
21	Overview of Agro-Climatic Zones in India	Characteristics of different zones and their agricultural potential.	2
20	Strategies for Enterprise Integration	Successful integration, Government policies, Examples.	2
19	Factors affecting Integration of various enterprises of farming for livelihood	Technology, Market access, Credit and infrastructure challenges etc.	4
18	Medium and Large Enterprises in Farming	Value chains, Secondary enterprises as livelihood components for farmers, Agri-processing.	2
17	Small Enterprises in Farming	Role of small enterprises, Value addition, Local processing	2

# PRACTICAL [MDC-111]

Exercise No.	Exercise Topic/ Title	Exercise Sub-topics
1	Survey of Farming Systems and Agriculture-based Livelihood Enterprises	Methods of data collection; Field survey techniques; Preparing reports on surveyed farms.
2	Study of Components of Farming- based Livelihood Models in Different Agro-Climatic Zones	Components: Crop, livestock, fishery, agroforestry; Identifying models suited to specific zones.
3	Study of Production and Profitability of Crop-based Models	Analysis of input-output relations; Identifying profitable crops
4	Study of Livestock-based Models	Livestock systems: Dairy, poultry, goat farming; Profitability and market access
5	Study of Processing-based Models	Value addition in agriculture; Studying small-scale food processing units
6	Study of Integrated Farming-based Models	Study of crop-livestock-aquaculture integration; Synergies and challenges
7	Field Visit to Innovative Farming System Models	Visit to farms using modern technologies; Documenting practices
8	Visit to Agri-based Enterprises	Enterprises involved in input supply or value addition
9	Study of Functional Aspects: Integration of Production, Processing and Distribution	Backward and forward linkages; Assessing supply chain models
10	Agri-Enterprises in Industry and Service Sectors (Value Chain Models)	Studying value chain enterprises; Evaluating sustainability models
11	Concept of Project Formulation on Farming-based Livelihood Systems	Identifying project objectives; Structuring budgets and timelines
12	Cost and Profit Analysis of Farming- based Livelihood Projects	Developing Cost-Benefit analysis; Identifying Break-Even points
13	Case Study of Start-ups in Agrisectors	Analysing real-world Start-ups; Identifying success factors
14	Group Project: Develop a Farming- based Livelihood Model	Formulating a working model; Feasibility and sustainability analysis
15	Preparation of Report on Farming Systems Survey and Livelihood Models	Compiling field data; Preparing reports with recommendations
16	Presentation and Evaluation of Practical Project Reports	Group presentations; Internal assessment of reports and participation

## **Suggested Readings (MDC-111):**

- **1. Ashley, C. and Carney, D. 1999**. *Sustainable Livelihoods: Lessons from Early Experience*. Department for International Development, London, UK.
  - o **Relevance**: This book explores sustainable livelihood frameworks, which are key to understanding livelihood patterns and rural income systems.
- 2. Agarwal, A. and Narain, S. 1989. Towards Green Villages: A Strategy for Environmentally Sound and Participatory Rural Development. Centre for Science and Environment, New Delhi, India.
  - o **Relevance**: Provides strategies for participatory rural development, focusing on environmental sustainability—a core concept in farming systems.
- **3. Carloni, A. 2001**. Global Farming Systems Study: Challenges and Priorities to 2030 Regional Analysis: Sub-Saharan Africa. FAO, Rome, Italy.
  - **Relevance**: Offers insights into global farming system challenges, with lessons that can be adapted for Indian contexts in agricultural development.
- **4. Dixon, J., Gulliver, A. and Gibbon, D. 2001**. Farming Systems and Poverty: Improving Farmers' Livelihoods in a Changing World. FAO & World Bank, Rome & Washington, DC.
  - o **Relevance**: Focuses on farming systems' role in poverty alleviation and rural livelihood improvement.
- **5.** Evenson, R.E. 2000. Agricultural Productivity and Production in Developing Countries. In FAO, The State of Food and Agriculture. FAO, Rome, Italy.
  - **Relevance**: Discusses agricultural productivity, a critical factor in sustainable farming and improved livelihoods.
- **6. Bhatt et al.** (**ICAR Research Complex for Eastern Region**). Livelihood Improvement of Underprivileged Farming Community: Experiences from Bihar. Patna, Bihar.
  - **Relevance**: Case studies on improving livelihoods in rural India, relevant to learning about region-specific agricultural interventions.
- 7. Panwar et al., 2020. Integrated Farming System Models for Agricultural Diversification, Enhanced Income, and Employment. Indian Council of Agricultural Research, New Delhi.
  - Relevance: Provides models for agricultural diversification and income enhancement, which align with farming system topics.
- **8. Reddy, S.R., 2016**. *Farming System and Sustainable Agriculture*. Kalyani Publishers, New Delhi.
  - **Relevance**: Covers sustainable agriculture principles and farming system models, essential for sustainable livelihood systems.
- **9. Singh** *et al.*, **2015**. *Region Specific Integrated Farming System Models*. ICAR-Indian Institute of Farming Systems Research, Modipuram.
  - **Relevance**: Discusses integrated farming models tailored to different agro-climatic regions of India, essential for practical learning.
- **10.** Walia, S.S., and Walia, U.S., 2020. Farming System and Sustainable Agriculture. Scientific Publishers, Jodhpur, Rajasthan.
  - **Relevance:** Provides insights into sustainable agricultural practices and integrated farming systems with regional focus.

Semester	:	I			
Course No.	:	MATH-111*	Credit Hrs. : 1(1+0) NG; Need-based		
Course Title	:	<b>Introductory Mathematics</b>			
*Need-based, Non-Gradial Common Course across 5 UG Degrees:					
B.Sc. (Hons.) Agri. / B.Sc. (Hons.) Horti. / B.Sc. (Hons.) Forestry / B.F.Sc. (Hons.) / B.Sc. (Hons.) C.S.					

## **SYLLABUS**

**Objective:** To impart knowledge on Introductory Mathematics as a need-based/ deficiency course.

## **THEORY**

**Algebra: Progressions:** Arithmetic Progression: Definition, Sum of n terms, Examples. Geometric Progression: Definition, Sum of n terms, Examples. Harmonic Progression: Definitions, Examples.

**Determinants:** Definition of Determinant, Expansion of determinant up to 3<sup>rd</sup> order, Examples Properties of determinants up to 3<sup>rd</sup>order (without proof).

Matrices: Definition of Matrices, Order of Matrix, Types of Matrices, Algebra of Matrices: Addition, Subtraction, Multiplication, Examples, Transpose of Matrix and it's properties (without proof).

**Differential Calculus:** Definition, Differentiation of function using first principle, Examples. Rules of Differentiation: Derivatives of sum, Difference, Product and quotient of two functions (Formulae only) and Derivative of Standard functions: Algebraic Function, Trigonometric, Logarithmic and exponential functions (Formulae only), Examples. Increasing and Decreasing Functions, Growth rate, Average Cost and Marginal cost, Marginal Revenue. Examples.

**Partial Differentiation**: Definition, Homogeneous function, Euler's Theorem, Examples.

Maxima and Minima of the functions of the form y = f(x) Examples.

**Integral Calculus**: Definition of Indefinite and Definite Integrals, Integrals of elementary functions (Formulae only), Theorems of integration (without proof), Integration by substitution, Examples.

Integration by parts, Examples, Application of Integration: to find Area under simple well-known curves (Simple problems based on it).

**Mensuration:** Statement of Simpson's 1/3<sup>rd</sup>Rule (Without Proof). Examples on Simpson's Rule.

## **Suggested Readings:**

- 1. NCERT, 2012, Mathematics of Class XII, NCERT, India.
- 2. A Textbook of Mathematics XI and XII (Part I and II), Maharashtra State Board of Secondary and Higher Secondary Education, Pune.
- 3. Sharma RD, 2014, Mathematics of Class XII, Dhanpat Rai Publisher.
- 4. Mensuration-I by Pierpoint.

Semester	:	I				
Course No.	:	BIO-111**	Credit Hrs.	:	1(1+0)	Need-based; NG
Course Title	:	Basic Biology				
**Need-based, Non-Gradial Common Course across 5 UG Degrees:						
B.Sc. (Hons.) Agri. / B.Sc. (Hons.) Horti. / B.Sc. (Hons.) Forestry / B.F.Sc. (Hons.) / B.Sc. (Hons.) C.S.						

## **SYLLABUS**

## **Objectives:**

- (i) To impart foundational knowledge of biological principles including diversity, genetics, evolution of living organisms,
- (ii) To impart basic knowledge about flowering plants and animals with a focus on their application in Agriculture.

#### **THEORY**

Introduction to the living world, Diversity and characteristics of life. Origin of life, Evolution and Eugenics. Genetics and Basics concepts. Binomial nomenclature and Classification. Cell and cell division. Morphology of flowing plants. Seed and Seed germination. Plant systematics- viz., Brassicaceae, Fabaceae and Poaceae. Role of animals in agriculture.

## **TEACHING SCHEDULE**

## THEORY [BIO-111]

Lecture No.	Topic	Sub-topics/ Key Points	Weightage (%)
1	Introduction to Living World	Definition of Biology; Composition and Biological Classification of living world.	5
2	Diversity and Characteristics of Life	Definitions: Diversity, Biodiversity; Characteristics of life; Building blocks of life and relationship between different organisms.	5
3	Origin of Life	Theories of Origin of Life; Oparin - Haldane Theory of Chemical origin.	5
4	Evolution and Eugenics	Evidences of Organic Evolution, Theories of Evolution; Eugenics: Definition.	5

Continued...

5	Genetics and Genetics and Mendel's Experiments (Basic Concepts)		5
6	Binomial Nomenclature	Binomial nomenclature and classification; Overview of taxonomic hierarchy/ ranks.	10
7	Cell: Structure and Function	r	
8-9	Cell Division	Definition, Types: Mitosis and Meiosis, their Significance, Stages.	10
10-12	Morphology of Flowering plants	Morphology, Structure and Functions: Roots, Stems, Leaves, Flowers and Fruits.	25
13	Seed and Seed Germination	Definitions, Types of seed (Monocot and Dicot seed), Types of seed germination and factors affecting it.	5
14-15	Plant Systematics – Study of Families	Key features, Economic importance and Examples of - A) Brassicaceae B) Fabaceae C) Poaceae	15
16	Role of Animals in Agriculture	Livestock in farming systems: Nutritional and economic contributions; Role of pollinators in crop production; Biological pest control (Predatory use); Sustainable integration of animals in agroeco systems.	5
		Total =	100

## **Suggested Readings [BIO-111]:**

- 1. Cell Biology, Genetics, Molecular Biology and Evolution by P.S. Verma, V.K. Agrwal. Publisher-S. Chand and Company Ltd., Ram Nagar, New Delhi. India.
- 2. Evolution of Vertebrates by Edwin H. Colbert, Publisher- A Wiley, Inter Science Publication, John Wiley and Sons, New York. US.
- 3. A Class-book of Botany by A.C. Dutta, Publisher- Oxford University Press, YMCA Library Building. Jai Singh Road, New Delhi 110001, India.
- 4. Fundamentals of Genetics by B.D. Singh, Publisher- Kalyani Publ. B-I/1292, Rajinder Nagar, Ludhiana.
- 5. A Textbook of Practical Botany-2 by Ashok M. Bendre, Ashok Kumar, Publisher- Rastogi Publications, Shivaji Road, Meerut, India.
- 6. Botany- An Introduction to Plant Biology by Jamesh D. Mauseth, Publisher- Continental Prakashan, 1962, Pune.
- 7. Anatomy of Seed Plants by A.C. Datta, Sigh V., Pande P.G., Publisher- Sai Print Opack, New Delhi, Rastogi Publication, Meerut, India.
- 8. Handbook of Animal Husbandry by ICAR, New Delhi Publication, Publisher- Directorate of Knowledge Management in Agriculture, Krishi Anusandhan Bhavan, Pusa, New Delhi 110012, India.

Semester Ι Course No. FN-111 Credit Hrs. : 2(1+1)**Course Title Food Standards and Quality Control** 

## **SYLLABUS**

## **Objectives:**

- (i) To understand the adverse effects of chemical substances in food, on human beings and about food laws and regulations to prevent adulteration in food.
- (ii) To acquire knowledge about the quality and safety aspects of food.
- (iii) To induce sufficient knowledge regarding national and international food safety standards and regulations.

#### **THEORY**

Food Quality - Meaning and Definition of Food Quality; Quality factors in raw and cooked foods, Indicators of food quality. Meaning, Importance and Ways of Food Quality Assessment; Total Quality Management; HACCP; Good Hygienic Practices; Good Manufacturing Practices - Risk Analysis, Risk Management, Risk Assessment, Risk Communication - Traceability and authentication, Water quality- Methods of assessment, purification. Sensory evaluation Physiological bases, sensory characteristics of foods, types, selection and training of sensory panel, requirements for sensory evaluation tests, types of tests, analysis and interpretation of sensory evaluation tests; Methods of Sensory Evaluation and Evaluation cards- Ranking and Rating procedures. Different methods of Quantitative descriptive analysis. Determination of Sensory thresholds and taste Interactions. Objective methods for quality evaluation- Introduction and application. Consumer Studies – Types of Consumer studies. Preference Studies Objectives of Consumer Preference Studies-factors affecting consumer acceptance. Food laws and regulations at National level and International level- Food Safety & Standards Rules, 2011, FSSAI, AGMARK, BIS, Food export and import regulations in India, Codex Alimentarius, Eco friendly products, ISO and others. Food Adulteration Meaning, detection of common adulterants. Food packaging material-Potential contaminants from food packaging material; Food toxins and contaminants- Occurrence, types, their Harmful effects, Detection in foods, Toxicological effects, Limits and Methods of removal. Food hygiene and sanitation.

#### **PRACTICAL**

Detection of common adulterants in foods, Sensory evaluation of some finished products, Quality evaluation of some products using objective methods, Visit to quality control laboratory/ food processing industries, FCI, AGMARK, Food Toxicology Lab and notes the procedures and parameters used for quality assessment, Market Survey, Collection of food labels and preparation of Scrap Book.

# THEORY [FN-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weighta ge (%)
1	Scope and Importance of Food Standards and Quality Control	Meaning and Definition of Food Quality; Factors of quality in raw and cooked foods, Indicators of food quality.	5
2	Food quality assessment	Meaning, Importance and Ways	5
3	Total Quality Management HACCP; Good Hygienic Practices	Meaning and definition Methods and Importance/ application	5
4	Good Manufacturing Practices	Risk analysis, Risk management, Risk assessment, Risk communication Traceability and Authentication,	5
5	Water Quality	Methods of assessment, Purification	5
6	Sensory Evaluation of Food and Food products	Physiological basis, Sensory characteristics of foods, Types, Selection and training of sensory panel	5
7	Needs and Importance of Sensory Evaluation	Requirements for sensory evaluation tests, analysis and interpretation of sensory evaluation tests	5
8	Methods of Sensory Evaluation; Different methods of Quantitative descriptive analysis.	Types of tests, Evaluation cards- ranking and rating procedures. Sensory thresholds, Taste Interactions; Determination of Sensory thresholds and taste Interactions.	5
9	Objective Methods for Quality Evaluation	Introduction and Application. Consumer studies	5
10	Types of Consumer Studies	Preference studies, Objectives of Consumer preference, Studies-factors affecting consumer acceptance	5
11	Food Laws and Regulations at National level	Food Safety & Standards Rules, 2011 AGMARK, BIS, Food export and import regulations in India, FSSAI	10
12	Food Laws and Regulations at International level	Codex Alimentarius, Eco friendly products, ISO and others	5
13	Food Adulteration	Meaning, detection of common adulterants and various methods	10
14	Food Packaging and Food Packaging Material	Meaning, Types of food packaging material and food packaging functions, Potential contaminants from food packaging	10
15	Food Toxins and Contaminants	Food toxins and contaminants- Occurrence, Types, their Harmful effects, Detection in foods, Toxicological effects, Limits and Methods of removal of contaminants	10
16	Food Hygiene and Sanitation	Definition, Methods, Application and Importance	5
		Total =	100

## PRACTICAL [FN-111]

Exercise No.	Exercise Title
1	Detection of common adulterants in Cereals and millets
2	Detection of common adulterants in Legumes and pulses
3	Detection of common adulterants in Milk and milk products
4	Sensory evaluation of food products
5	Quality evaluation of products using objective methods of evaluation
6	Detection of colour by hunter codex laboratory
7	Visit to Quality control laboratory
8	Visit to Food processing industries
9	Study of AGMARK and its significance in food quality control
10	Study of Food Corporation of India (FCI) and its importance
11-12	Study of Food Toxicology Lab and notes the procedures and parameters used for quality assessment
13	Market survey for study of various packaging materials used for food products
14-15	Market survey for collection of food labels and their study
16	Preparation of Scrap Book

## **Suggested Readings [FN-111]:**

- 1. Impact WTO and Codex.
- 2. McWilliams, M. (2000) Foods Experimental Perspectives, 4th edition, Prentice-Hall, Inc New Jersey.

#### **SYLLABUS**

## **Objectives:**

- (i) To impart knowledge about the basics of textiles and their care,
- (ii) To develop a basic understanding of different textile fibres, yarn and fabrics,
- (iii) To gain knowledge of the processing of natural fibres and manufacturing of man-made fibers,
- (iv) To inculcate an understanding of fibre morphology and physical and chemical properties of fibers,
- (v) To learn about the laundry practices of clothes made of natural and man-made fibres and their care and storage.

#### **THEORY**

Textile: terminology, forms of textile, importance of textile industry in national economy. Classification of textile fibres, Properties of textile fibres; primary and secondary properties. Molecular structure of textile fibres: Monomers, polymers and their types, polymerization and its type, degree of polymerization and orientation. Cotton: Fibre processing, fibre varieties and their grading, fibre morphology, physical, chemical, biological properties and end-uses. Bast fibres: Flax, jute, hemp; Fibre processing, fibre morphology, physical, chemical and biological properties and end-use., Wool and specialty hair fibres: classification, processing, wool labelling, fibre morphology, physical, chemical, biological properties and end-uses. Silk: Fibre processing, classification, fibre morphology, physical, chemical, biological properties and end-uses. Chemical spinning: Wet, melt and dry. Common properties of man-made fibres. Regenerated cellulosic fibres: Viscose, Cuprammonium and High Wet Modulus rayons; fibre manufacturing, microscopic structure, physical, chemical, biological properties and end-uses. Modified cellulosic fibres: Diacetate and triacetate; fibre manufacturing, fibre microscopic structure, physical, chemical and biological properties and end-uses. Synthetic fibres: Nylon, polyester, acrylic and elastomeric; fibre manufacturing, fibre microscopic structure, physical, chemical, biological properties and end-uses. Mechanical spinning: Ring spinning method, classification of yarn on the basis of structure (simple yarns and different type of novelty yarns), twist direction, twist amount, fiber length and end-uses. Methods of fabric construction: Weaving, knitting, braiding, tufting, net, lace making, crocheting, macramé, stitch through fabrics, quilted fabrics, laminated fabrics, bonded fabrics, felt, nonwoven and films. Laundry: Definition, principles, equipment, laundry methods and dry cleaning. Stain removal: Classification of stains and methods of removing different stains. Laundry agents: Water, soap and other laundry auxiliaries - stiffening agents, bleaches and blue. Care of textiles: Labelling Act, importance of labelling, labels and tags used in textiles. Storage of clothes: Requirements of short term and long-term storage, folding and packaging of clothes

## **PRACTICAL**

Fibre identification: Visual test, Burning test, Solubility and Microscopic view. Collection and identification of different types of yarns. Collection and identification of fabric samples of different construction. Washing of garments made up of cotton, wool, silk and manmade fibers. Dry cleaning. Removal of different stains from fabric surface. Visit to textile industry.

# THEORY [ATS-111]

Lecture No.	Торіс	Sub-topics/ Key points	Weightage (%)
1	Textile	Terminology, forms of textile, Importance of textile industry in national economy. Classification of textile fibres	5

Semester I Credit Hrs. : 2(1+1)Course No. **RMCS-111 Course Title Fundamentals of Art and Design** 

#### **SYLLABUS**

#### **Objectives:**

- (i) To make the students aware of the fundamentals of Art and design and develop skills in designing functional and decorative interiors.
- (ii) To help students gain knowledge of-
  - Element of Art and principles of Design
  - Colour- its importance, characteristics and applications in interior furniture and furniture arrangement
  - Types of floor and floor finishes
  - Types of windows, Functional and decorative window treatments
  - Types and placement of Accessories
  - Importance and Types of Home lighting.

#### **THEORY**

Introduction and objectives of interior decoration. Design- Definition, Types, features and requirements. Elements of art and their importance in interior decoration: Line, Form, Colour, Texture, Pattern. Principles of design and their application to enrich the interiors: Harmony, Proportion, Rhythm, Emphasis, Balance. Colour: sources of colour, Colour theories, properties of colour, emotional effect of colour, colour schemes, colour plans for interiors. Furniture: types of furniture, materials and finishes of furniture, factors affecting the selection of furniture, care and maintenance of furniture, furniture arrangement. Walls- Classification, Types of building wall, Exterior and interior wall finishes. Floor: importance, types of floor and floor covering, Selection, care and maintenance of floor covering. Ceilings: types, materials and functions, Doors, Windows and Ventilators: Importance and types, Functional and decorative window treatments, Curtain and draperies, top treatments of windows- pelmets, valances, swags and tails. Hardware for curtains, blinds. Factors considered in selection of curtain and draperies. Lighting: importance, types of lighting and its application.

#### **PRACTICAL**

Learning elements of art and principles of design. Development of motif and design through art principles. Colour- colour schemes, values and intensity scale, colour wheel. Furniture - care and arrangement of furniture. Accessories - preparation and placements of accessories. Window treatment: Preparation of soft window treatment. Study of lighting fixtures. Market survey different types of wall and floor coverings. Types of flower arrangement, learning different types of table setting, napkin folding.

# THEORY [RMCS-111]

Lecture No.	Торіс	Sub-topics/ Key Points	Weightage (%)
1	Introduction and Objectives of Interior Decoration Design	Definitions, Objectives, Types, Features and Requirements	5
2	Elements of Art in Interior Decoration	Elements of Art and their importance in interior decoration	10
3	Line, Form, Colour, Texture, Pattern	Detail- types elements	10
4	Principles of Design and their Application to enrich the interiors	Introduction to Principles, Harmony and Proportion Rhythm, Emphasis and Balance	8
5	Colour	Sources of colour, colour theories, Important characteristics and application	6
6	Properties of Colour, Emotional effects of colour	Prang colour chart, Properties and Dimension of colour	6
7	Different Colour schemes for Room	Monochromatic colour scheme, Analogous colour scheme	6
8	Contrasting Colour Schemes	<ol> <li>Complementary</li> <li>Double Complementary</li> <li>Split Complementary</li> <li>Triad</li> </ol>	7
9	Colour Plans for Interiors	Colour plans for bed room, Kitchen, drawing room	8
10	Furniture	Types of furniture, materials and finishes of furniture, factors affecting the selection of furniture, care and maintenance of furniture, furniture arrangement	6
11	Walls	Classification, types of building wall, Exterior and interior wall finishes	5

Semester	:	I	
Course No.	:	HDFS-111	Credit Hrs. : 3(2+1)
Course Title	:	<b>Childhood Development</b>	

## **SYLLABUS**

## **Objectives:**

- To make students aware about the fundamental as well as overall development of the (i) child from conception to late childhood.
- (ii) To understand human development and its significance
- (iii) To create awareness about the process of human growth and development
- (iv) To identify the genetic and environmental influences on human life
- (v) To study the inter-relatedness of physical, cognitive, social, emotional and motor development
- (vi) To understand the theories of human development

#### THEORY

Concept of human development, Stages of human development, Domains of human development and its characteristics, Definition of growth and development, Determinants of human growth and development, Principles of human growth and development-Concept of heredity and environment, the role of heredity and environment on development- perspectives on development: Naturalism, environmentalism, maturational, need, ecological, ethological, cognitive, psycho-analytical, social (socio-cultural and social learning), language, behaviour, psycho-social, intelligence and moral reasoning - Prenatal, peri-natal and postnatal stages- conception, care during pregnancy, labour/ birth, Early Childhood{birth to eight yrs}- Physical, motor, social, emotional, cognitive and language development of infancy, babyhood, preschool and early school yrs.- Late childhood (8 to 14 yrs): Physical, motor, social, emotional, cognitive and language development. Guidance to parents for promoting holistic development of children.

#### **PRACTICAL**

Observational visits to well-baby clinics to observe full term and preterm babies and observe/ record its characteristics. Visit to Early Childhood Centres, study physical, motor, social, emotional, intellectual, language, moral and personality development at different stages and prepare interpretive reports. Collect and evaluate reports/ article / news / other secondary data related to recent issues, trends and challenges of Human development and write analytical report. Case study of individuals in different stages of development - Infancy, early childhood and late childhood, Critical analysis of case study reports. Preparation of Resource file.

# THEORY [HDFS-111]

Lecture No.	Торіс	Sub-topics/ Key points	Weightage (%)
1	Concept of Studying Human Development	Scope, Importance of Human Development	2.5
2	Stages of Human Development	Prenatal, Peri-natal, Postnatal - various substages	5.0
3	Domains of Human Development and its characteristics	Facets of Human Development, 8 domains of Human Development	5.0
4	Growth and Development	Definition of Growth and Development, Difference between Growth and Development	2.5
5	Determinants of Human Growth and Development	Genetics influences, Parenting styles, Socioeconomic factors etc.	5.0
6	Principles of Human Growth and Development	Cephalocaudal principle, Proximodistal principle, Orthogenetic principle, Predictable development	2.5
7	Concept of Heredity and Environment	Principles of Heredity Principles of Environment	2.5
8	Role of Heredity and Environment on Development	Role of Heredity Role of Environment	2.5
9	Prenatal, Perinatal and Postnatal stages of Human life span-conception	Prenatal- Zygote Peri-natal - Delivery Process Postnatal- 8 stages	2.5
10	Birth Process and Birth Complications	Three stages- Dilation, Expulsion, Placental; Birth Complication — Maternal, Neonatal Umbilical cord, Abnormal heart rate, Premature rupture of membranes, Labour complication.	2.5
11	Care during Pregnancy	Health, Nutrition, Medical Consultations Supervision- Weight gain, weight of foetus etc.	2.5

Semester	:	I	
Course No.	:	EECM-111	Credit Hrs. : 2(1+1)
Course Title : Communication for Development			

## **SYLLABUS**

## **Objectives:**

- (i) To develop competence in effective communication,
- (ii) To develop understanding of various concepts of communication process,
- (iii) To develop competence in oral and written communication.

#### **THEORY**

Communication process – concept, elements and their characteristics. Principles of Communication. Basic functions of communication. Models of Communication. Barriers of communication. Concepts related to communication; fidelity of communication, empathy credibility, feedback in communication, communication gap and distortion. Forms and types of communication- Oral and written communication, Non-verbal communication, interpersonal communication, organizational communication, Digital communication.

## **PRACTICAL**

Practice sessions on written communication - Writing official letters, Notices/Circulars, Preparing minutes of meetings; Practice sessions on Oral communication- Planning and delivering an effective talk; Planning for digital communication- Arranging educational programs using digital media.

# THEORY [EECM-111]

Lecture No.	Торіс	Sub-topics/ Key points	Weightage (%)
1-2	Communication Process	Definition, Concept, Elements and their Characteristics	10
3-4	Principles of Communication	Principles of Communication.	10
5	Basic Functions of Communication	The information function Command or instructive function Influence or persuasive function Integrative function	10
6	Models of Communication	Introduction of different models of communication	5
7	Barriers of Communication	Barrier pertaining to communicator, Barrier pertaining to message, Barrier pertaining to audience	10
8		Fidelity of communication	5
9-10	Concepts related to Communication	Empathy, Credibility, Feedback in communication	10
11		Communication gap and distortion	10
12-13		Oral and Written communication	10
14-15	Forms and Types of Communication	Non-verbal communication, Interpersonal communication	10
16		Organizational communication, Digital communication	10
Total =			100

#### **TEACHING SCHEDULE**

## PRACTICAL [EECM-111]

Exercise No.	Exercise Title			
1-2	Written communication – Types of written communication			
3-4	Techniques of writing official letters			
5	Study of various types of official letters			
6-7	Study of Notices - Notice Format – Public notice, Implied notice, Actual notice and Constructive notice			
8-9	Study of Circulars - Meaning, Points to be considered while preparing circular			
10-11	Method of preparing Minutes of Meetings			
12	Oral communication- Planning and delivering an effective talk			
13-14	Planning for digital communication- Organization of educational programs through organization of digital media.			
15-16	Organization of educational programs - Educational webinar

# #List/ Bouquet of Skill Enhancement Courses (SECs)

Sr. No.	Course No.	Course Title	Credit Hrs.	Offering Department
1.	SEC-xxx	Breads and Buns	2(0+2)	FN
2.	SEC-xxx	Biscuits and Cookies	2(0+2)	FN
3.	SEC-xxx	Housekeeping and Service Management-I	2(0+2)	RMCS
4.	SEC-xxx	Floral Art and Design-I	2(0+2)	RMCS
5.	5. SEC-xxx Developmental Assessment I (Infancy and Toddlerhood)		2(0+2)	HDFS
6.	SEC-xxx Developmental Assessment II (Childhood)		2(0+2)	HDFS

Note: Skill Enhancement Courses can be added/offered as per the facilities and resources available at the respective universities/colleges based on the relevance to the region and the UG degree subject.

In case of unavailability of said detailed course-wise syllabus of above SEC courses, the same can be primarily developed and followed at College/ University level in the academic year, 2024-25; However, the same will be obtained from the respective UG Degree Coordinator/ Discipline Coordinators and can be followed w.e.f. AY, 2025-26.

[Above list is an indicative list/bouquet of SEC courses and subject to modification as applicable therein]

# \*Skill Enhancement Courses (SECs): Detailed Syllabi

## **Foods and Nutrition**

Course No. : SEC-xxx Credit Hrs. : 2(0+2)

Course Title : Breads and Buns

### **SYLLABUS**

## **Objectives:**

- (i) To enable students to learn the basics of producing breads and buns
- (ii) To acquaint the students with newer technologies and machineries used in product development.
- (iii) To develop skills of students in making of breads and buns at professional level
- (iv) To impart knowledge about commercialization of breads and buns
- (v) To build confidence among students to start a new career in bakery.

# **TEACHING SCHEDULE**

#### **PRACTICAL**

Exercise No.	Exercise Title			
1	Orientation to the course contents			
2	Studying role of ingredients in breads and buns			
3	Studying characteristic features of ingredients of bread			
4	Studying characteristic features of ingredients of buns			
5	Quality assessment of raw ingredients used in bread			
6	Quality assessment of raw ingredients used in buns			
7	Introduction about various types of breads and buns			
8	Demonstration of types of breads			
9	Demonstration of types of buns			
10	Studying basic procedure in production			
11	Demonstration of procedure in production			
12	Preparation of multigrain bread			
13	Preparation of pita bread			
14	Preparation of rye bread			
15	Preparation of sour dough			
16	Preparation of whole wheat bread			

17	Preparation bread stick				
18	Preparation banana bread				
19	Studying bread and bun packaging				
20	Studying costing and financial management of bread				
21	Studying costing and financial management of buns				
22-23	Studying licensing, marketing (open and digital) of bread and buns				
24	Studying commercialization of bread and buns				
25-26	Studying storage of breads and buns- slightly cool, dry, dark place				
27-29	Observational visit to breads and buns industries				
30-31	Project planning for financial assistance for a small-scale industry on breads and buns making				
32	Writing report				

- 1. Chakrabarty M M. 2003. Chemistry and Technology of Oils and Fats. Prentice Hall.
- 2. Dendy D A V & Dobraszczyk B J. 2001. Cereal and Cereal Products. Aspen.
- 3. Arora A K. 2007. Food Service and Catering Management. APH Publishing Corporation, New Delhi.
- 4. Parvinder S. Bali, 2018. Theory of Bakery. Oxford Publishing.

## **Foods and Nutrition**

Course No. : SEC-xxx Credit Hrs. : 2(0+2)

Course Title : Biscuits and Cookies

## **SYLLABUS**

## **Objectives:**

- (i) To enable students to learn the basics of producing biscuit and cookies
- (ii) To acquaint the students with newer technologies and machineries used in product development
- (iii) To impart knowledge about commercialization of biscuit and cookies
- (iv) To build confidence among students to start a new career in bakery.

# TEACHING SCHEDULE

## **PRACTICAL**

Exercise No.	Exercise Title			
1	Orientation to the course contents			
2	Studying various types of biscuits			
3	Studying basic procedure in production			
4	Demonstration of basic procedure in production			
5	Studying role of ingredients in biscuits			
6	Studying role of ingredients in cookies			
7	Studying characteristic features of ingredients of biscuits			
8	Studying characteristic features of ingredients of cookies			
9	Quality assessment of raw ingredients used in biscuits			
10	Quality assessment of raw ingredients used in cookies			
11	Preparation of sheeted cookies			
12	Preparation of bar cookies			
13	Preparation of piped type cookies			
14	Preparation of dropped type cookies			
15	Preparation of rolled type cookies			
16	Preparation of digestive biscuits			
17	Preparation of custard cream			

18	Preparation of short bread			
19	Preparation of chocolate biscuits			
20	Preparation of rolled biscuits and drop biscuits			
21	Studying biscuits and cookies packaging			
22-23	Studying costing and financial management of biscuits and cookies			
24-25	Studying licensing, marketing (open and digital) of biscuits and cookies			
26-27	Studying commercialization of biscuits and cookies			
28-29	Studying storage of biscuits and cookies—slightly cool, dry, dark place.			
30-31	Project planning for financial assistance for a small-scale industry on biscuits and cookies making			
32	Writing report
